**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 54 FR 12345.

# Rules and Regulations

Federal Register
Vol. 54, No. 39
Wednesday, March 1, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

**[FV-89-010]**

## Onions Grown in South Texas and Onions Imported Into the United States; Change in Effective Period of Handling Regulation and Import Regulation

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** This final rule changes the effective period of the handling regulation for onions grown in South Texas to March 1 through May 20. The current period is from March 10 through June 15 of each season with all but container requirements terminating on May 31. Earlier maturing varieties have enabled producers and handlers to harvest and ship earlier to take advantage of generally higher prices in early spring. The committee believes changing the effective period of quality requirements will help to maintain the quality of such early shipments. Terminating the handling regulation on May 20 will relieve restrictions on handlers during the latter part of the season. The onion import regulation also will be amended to make appropriate conforming changes.

**EFFECTIVE DATE:** March 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Robert F. Matthews, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456, telephone: (202) 447-2431.

**SUPPLEMENTARY INFORMATION:** This rule is effective under Marketing Agreement No. 143 and Marketing Order No. 959 (7 CFR Part 959), both as amended, regulating the handling of onions grown in designated counties of South Texas. The marketing agreement and order are authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 35 handlers of South Texas onions subject to regulation under the marketing order, and approximately 75 onion producers in the South Texas production area. Also, there are about 25 onion importers subject to the requirements of the onion import regulation. The Small Business Administration (13 CFR 121.2) has defined small agricultural producers as those having annual gross revenue for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of South Texas onions and importers of onions may be classified as small entities.

The South Texas Onion Committee met on October 19, 1988, and unanimously recommended a change in the effective period of the handling regulation. The regulation currently begins March 10 and ends June 15 of each season, with all but container requirements terminating on May 31.

The committee proposed beginning the effective period 10 days earlier, on March 1 of each season. In recent years, several new varieties of onions have been developed that mature slightly earlier than older varieties in general use. The Texas spring crop provides the first new-crop onions for each season, previous shipments being drawn from storage stocks. Because of this, prices at the beginning of the spring season tend to be higher than later in the season. Thus, earlier maturing varieties can give shippers a competitive advantage by providing them with a product to ship when prices are the highest.

Moreover, because of a university-conducted selective onion breeding program that has been carried on for over a decade, even earlier varieties may soon be developed. Although early March shipments are not usually heavy relative to mid-season volume, they are, nevertheless, significant. The committee believes that the marketing order standards of quality should apply especially to early onions to forestall shipments of poorer quality produce.

The committee also recommended changing the termination date of all provisions of the regulation from June 15 to May 20. This will be of particular benefit to the late shippers, principally those from the Laredo and Winter Garden districts. The early and mid-season crop is produced in the Lower Rio Grande Valley, which generally accounts for about 85 percent of the total. Shipments in the 1987-88 season totaled 5,731,267 fifty-pound equivalent bags. The remaining crop, generally 15 percent, is produced in the Laredo and the Winter Garden districts. Shipments in the 1987-88 season from those districts totaled 915,278 fifty-pound equivalent bags. These are the last regulated shipments to leave the production area each season. Shipments made towards the end of the season tend to bring lower, and sometimes much lower, prices, hence lower returns to growers. Moreover, inspection costs tend to be higher due to the distance of the Laredo and Winter Garden district handlers from Federal-State inspection facilities. Relieving handling restrictions during the latter part of the season when prices are generally low will be of benefit to late producers and handlers and is not expected to adversely affect the overall objectives of the program.

Section 8e of the Agricultural Marketing Agreement Act of 1937 requires that when certain domestically produced commodities, including onions, are regulated under a Federal marketing order, imports of that

VOL 54 ISS 39 MR 1 1989 UMI

commodity must meet the same or comparable grade, size, quality, or maturity requirements. Section 8e also provides that whenever two or more marketing orders regulating a commodity produced in different areas of the United States are concurrently in effect, the Secretary shall determine which of the areas produces the commodity in most direct competition with the imported commodity. Imports then must meet the quality standards set for that particular area.

In the case of onions, the current onion import regulation (7 CFR 980.117) specifies that import requirements be based on those in effect for onions produced in designated counties in Idaho and Malheur County, Oregon (7 CFR Part 958) during the period June 1 through March 9 and on those produced in South Texas (7 CFR Part 959) during the period March 10 through May 31 of each year.

Changing the beginning date of the South Texas onion handling regulation will have no effect on the import regulation. Although the South Texas handling regulation will begin March 1, it is found that onions from Idaho and Eastern Oregon will continue to be predominant in the marketplace and in direct competition with imported onions, primarily from Mexico, from March 1 through March 9 each season. Accordingly, no change to the import regulation is necessary based upon the earlier beginning of the South Texas handling regulation.

However, the termination of the South Texas handling regulation on May 20 rather than June 1 does affect the import regulation. Since there will be no Texas onion handling regulation in effect during the period May 21 through May 31, the requirements of the Idaho-Oregon program will prevail. Therefore, it is found that imports are in most direct competition with Idaho and Eastern Oregon onions for the period May 21 through March 9 and South Texas onions for the period March 10 through May 20. Accordingly, onion import requirements will change to those grade and size requirements established under the marketing order regulating certain designated counties in Idaho and Malheur County, Oregon, for the period May 21 through March 9 each year, and to those grade and size requirements established under the marketing order regulating onions grown in South Texas for the period March 10 through May 20 each year.

A change is therefore made in the language of § 980.117 and paragraph (h) *Applicability to imports* of § 959.322.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

Notice of these actions was given in the January 31, 1989, **Federal Register** [54 FR 4828] providing interested persons until February 15, 1989, to file written comments.

Two comments were filed pertaining to the proposed change in the onion import regulation. The comment received from the Idaho-Oregon Fruit and Vegetable Association was in favor of the proposed change.

The other comment, filed on behalf of the South Texas Onion Committee, opposed the proposal that onion import requirements continue to be based on those in effect for onions grown in Idaho and Oregon through March 9. The committee expressed the view that the import requirements should be based on those established for South Texas onions beginning March 1 because onion imports from Mexico are in most direct competition with onions produced in Texas and are intermingled with Texas onions in distribution channels.

An analysis of USDA Market News data reveals that few, if any, South Texas onions are shipped during the first nine days of March. On the other hand, movement of Idaho-Eastern Oregon onions during this period is significant, and onions from this source are prevalent in most major markets including Dallas, Los Angeles, St. Louis, Denver, and Atlanta. These are important markets for Mexican onions as well. Shipments of South Texas onions typically do not begin in volume until mid-March. It is therefore concluded that imported onions are currently in most direct competition with Idaho-Eastern Oregon onions through March 9. However, it is recognized that shipments from South Texas may begin earlier in future seasons, and a change in the import requirements could become necessary.

After consideration of all relevant information, including the proposal set forth in the notice and comments filed with respect thereto, it is hereby found that the rule as hereinafter set forth will tend to effectuate the declared policy of the Act.

It is hereby further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that (1) shipments of onions grown in the production area are expected to begin about March 1, (2) to maximize benefits to the industry this regulation should apply to as many shipments as possible during the marketing season, (3) the action was proposed at an open meeting of onion producers and handlers in the production area, and (4) compliance with this regulation requires no special preparation on the part of handlers.

**List of Subjects**

*7 CFR Part 959*

Marketing agreements and orders, Onions, South Texas.

*7 CFR Part 980*

Vegetables, Import regulations, Onions.

For the reasons set forth in the preamble, 7 CFR Parts 959 and 980 are hereby amended as follows:

1. The authority citation for 7 CFR Parts 959 and 980 continues to read as follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

**PART 959—ONIONS GROWN IN SOUTH TEXAS**

2. Section 959.322 is amended by revising the introductory paragraph and the first sentence of paragraph (i) up through the second comma to read as follows:

**§ 959.322 Handling regulation.**

During the period beginning March 1 and ending May 20, no handler shall package or load onions on Sunday, or handle any onions, except red varieties, unless they comply with paragraphs (a) through (d) or (e) or (f) of this section.

* * * * *

(i) *Applicability to imports.* During the period beginning March 10 and ending May 20, of each year, * * *

**PART 980—VEGETABLES; IMPORT REGULATIONS**

3. Section 980.117 is amended by revising paragraphs (a)(2) and (b)(1) and (2) to read as follows:

**§ 980.117 Import regulations; onions.**

(a) * * *

(2) Therefore, it is hereby determined that: Imports of onions during the May 21 through March 9 period are in most direct competition with the marketing of onions produced in designated counties of Idaho and Malheur County, Oregon, covered by Marketing Order No. 958, as amended (7 CFR Part 958), and during the March 10 through May 20 period the marketing of imported onions is in most direct competition with onions produced in designated counties in South Texas covered by Marketing Order No. 959, as amended (7 CFR Part 959).

(b) * * *

(1) During the period May 21 through March 9 of each marketing year, whenever onions grown in designated counties in Idaho and Malheur County, Oregon, are regulated under Marketing Order No. 958, imported onions shall comply with the grade, size, quality, and maturity requirements imposed under that order.

(2) During the period March 10 through May 20 of each marketing year, whenever onions grown in designated counties in South Texas are regulated under Marketing Order No. 959, imported onions shall comply with the grade, size, quality, and maturity requirements imposed under that order.

BILLING CODE 3410-02-M

**Farmers Home Administration**

**7 CFR Parts 1809, 1922, 1944, 1945 and 1965**

**Appraisal of Single Family Residential Property**

**AGENCY:** Farmers Home Administration, USDA.

**ACTION:** Final rule.

**SUMMARY:** The Farmers Home Administration (FmHA) amends its appraisal regulations to reflect minor changes in appraisal regulation content. The changes enhance and strengthen the Agency's internal appraisal process and improve the overall quality of single family housing appraisals. The intended effect of this action is to improve FmHA appraisal regulations regarding the use of comparable sales data and to adopt a new appraisal format common to the real estate lending industry, including other federal government agencies.

**EFFECTIVE DATE:** March 31, 1989.

**FOR FURTHER INFORMATION CONTACT:** Neal A. Hayes, Jr., Senior Loan Specialist, Home Ownership Branch, Single Family Housing Processing Division, Farmers Home Administration, USDA, Room 5344, South Agriculture Building, 14th Street and Independence Avenue SW., Washington, DC 20250, telephone (202) 382-1474.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed under USDA procedures established in Department Regulation 1512-1 which implements Executive Order 12291, and has been classified as "nonmajor." This action will result in an annual effect on the economy of less than $100 million and will neither result in a major increase in cost or prices, nor adversely affect competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. There is no impact on proposed budget levels, and funding allocations will not be affected because of this action.

In accordance with the Regulatory Flexibility Act (Pub. L. 96-354), Neal Sox Johnson, Acting Administrator, FmHA, has determined that this action will not have a significant economic impact on a substantial number of small entities because the proposed regulation changes primarily affect residential appraisal processing by FmHA staff appraisers.

Subpart C of Part 1922 is amended to incorporate internal management changes which affect the use of comparable sales data, Marshall and Swift "Square Foot Appraisal Form" form number changed from AP 1007 to 1007, changes incorporated in Form FmHA 1922-8, currently titled "Residential Appraisal Report" and renamed to "Uniform Residential Appraisal Report", and including minor changes in appraisal regulation content.

**Background**

A proposed rule published in the **Federal Register** (53 FR 23406) on June 22, 1988, invited the public to submit written comments for the Agency to consider with regard to the development of the final rule. Eight (8) sets of comments were received from interested persons representing Professional Real Estate Appraiser Organizations, Professional Surveyors and FmHA employees.

**Discussion of Comments**

1. One respondent suggested changes to the provisions of § 1922.101 concerning employee appraisal authorizations versus employee demonstration of skills and training, prior to a State Director review and delegation of appraisal authority to the employee.

The Agency believes that § 1922.101 provides State Directors with the necessary administrative controls and flexibility to institute and establish an on-going appraisal review and training program which meets the overall objectives of the regulation. Therefore, the suggested changes were not adopted by the Agency at this time.

2. One respondent recommended modification to § 1922.101(c) relative to providing photographs of the subject property. Section 1922.101(c) was modified and deletes reference to photographs.

Section 1922.105(c)(6) sets forth the photographic requirements for the completion of all residential appraisals.

3. One respondent expressed concern over dwelling repair policy contained in Subpart C of Part 1965 of this chapter versus § 1922.101(c) requirements on the completion of residential appraisals on an "as developed" basis.

The respondent's concern is a loan processing issue under Subpart A of Part 1944 of this chapter. The comment is appreciated but is beyond the scope of the changes proposed at this time. It is suggested that the respondent provide comment in accordance with the pending major revisions to Subpart A of Part 1944, which will be published in the **Federal Register** as a proposed rule at later date.

4. One respondent suggested changes to the definitions of appraisal terms contained in § 1922.102.

The Agency adopted the suggested change for the definition of depreciated replacement cost and modified § 1922.102(f) by inserting the words "less deductions for depreciation" between the words "cost" and "of" in the text. Suggested definition changes on final reconciliation/estimated value, program definition of dwelling size, highest and best use of the site, including additional definitions presently not contained in § 1922.102, were not adopted by the Agency. The provisions of § 1922.102 will adequately serve the Agency's residential appraisal process and additional modification is not necessary at this time.

5. Two respondents suggested changes to § 1922.105 concerning photographs, inspection and property information gathered in evaluating the subject property.

Photographs of the subject property are adequately addressed in § 1922.105(c)(6) of the regulation. The necessity to require photographs which provide front, rear and side views of the property will enhance the overall quality of the residential appraisal process, including off-site appraisal reviews conducted by the Agency.

Realignment and/or consolidation of § 1922.105(c)(4) with § 1922.105(c)(2) and § 1922.105(c)(3) versus § 1922.105(b)(3), was not adopted by the Agency. These suggestions will be evaluated and considered in the next major rewrite of the regulation.

6. One respondent suggested that § 1922.105(a) be revised to stipulate that information gathered by an appraiser, as defined in § 1922.101(a) for the completion of an appraisal assignment in accordance with the provisions of § 1922.104(a)(10), § 1922.105(1)(ii) and

VOL 54 ISS 39 MR 1 1989 UMI

§ 1922.105(3)(i–vii), be provided by a licensed or registered professional surveyor in accordance with applicable State law.

Our Agency believes that § 1922.105(a) does not require additional revision at this time. Information required to perform an appropriate evaluation of a residential appraisal assignment is usually provided by the realtor, contractor, seller and/or purchaser involved in the real estate transaction. Expense and procurement of such information is the burden of the parties associated with the real estate transaction who are seeking financial assistance from our Agency.

Legal descriptions (deeds), professional property surveys and additional site information is obtained from official Court House records and or other State and Federal Agencies, to validate the authenticity of the information which is incorporated into the residential appraisal.

FmHA appraisers are not authorized to perform professional property surveys in conjunction with their assigned duties while employed by the Agency. In addition, a potential conflict of interest situation would exist in the event FmHA appraisers were licensed in accordance with applicable State law and permitted to conduct a professional property survey in conjunction with a residential appraisal assignment. Therefore, our Agency believes that the intent of § 1922.105(a) is clear and adequate training has been provided to all FmHA appraisers regarding the compilation of documentation needed to complete residential appraisal assignments.

7. Six respondents recommended changes to § 1922.107(a)(1) concerning short-lived and long-lived depreciation on residential properties.

The Agency has modified its regulation in response to these recommendations to require physical depreciation estimates in structures with an effective age of 5 years in lieu of the proposed effective age of 1 year. In addition, the Agency modified the last sentence in § 1922.107(a)(1) to read as follows:

"Short-lived and long-lived depreciation schedules will be completed on comparable properties, provided the effective age is over 5 years and the appraiser gains access into the property to validate the condition and actual age of the short-lived components. If access to the property cannot be obtained, document accessibility on Form FmHA 1922–12. (Refer to Form FmHA 1922–12, reverse side.)".

8. One respondent recommended changes to § 1922.107(b), relative to depreciation entries in the sales comparison section of Form FmHA 1922–8 and Form 1007.

The Agency adopts the recommendation and modifies all references in § 1922.107(b) which currently read as "will be" to read as "is also".

9. Four respondents recommended that § 1922.109(a) retain the District Director exception authority to grant the use of FmHA comparable sales data. In addition, one respondent expressed concern that the Agency utilize FmHA financed comparable sales provided appropriate adjustments were made to reflect financing terms.

The Agency decision to grant exception authority at the National Office level, as proposed in the regulation, will strengthen the overall internal management of residential appraisals and promote improvement in the management of the comparable sale data base. FmHA financed comparable sales may be authorized in accordance with the provisions of the regulations set forth in the proposed rule.

10. One respondent recommended changes in § 1922.109(a) concerning the sequence of adjustments to comparable sales data.

The Agency adopts the recommendation to reflect initial adjustments for financing concessions, time of sale, location and physical characteristics, in accordance with the chronological order of adjustment categories identified on Form FmHA 1922–8.

11. One respondent expressed concern regarding § 1922.109(c), which introduces the Income Approach used in conjunction with FmHA inventory properties classified as "non-program."

FmHA inventory properties classified as "non-program" are typically sold to investors for rental purposes. Therefore, the Income Approach which is incorporated into the FmHA residential appraisal process, will enable the appraiser to make necessary adjustments for real estate market trends attributed to income producing properties.

12. Two respondents suggested that § 1922.110 accommodate flexibility in the utilizaiton of the income approach to value, including the final reconciliation/estimated market value section, when completing non-program residential appraisals.

The Agency believes that Exhibit B, of this subpart, provides adequate guidance and flexibility on the income approach to value on non-program residential property. § 1922.110(d) was changed to accommodate the reconciliation of the three approaches to value for non-program residential appraisals. Additional language was added to this section which reads as follows:

"Non-program property appraisals, utilizing the income approach to value in accordance with Exhibit B, of this subpart, will have the estimated market value documented in the reconciliation section of Form FmHA 1922–8. Non-program property appraisals which do not utilize the income approach to value due to a lack of comparable sales data will have the final reconciliation/estimated market value derived from the sales comparison and cost approaches to value".

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.410, "Low Income Housing Loans (Section 502 Rural Housing Loans)." For the reasons set forth in the Final Rule related Notice to 7 CFR Part 3015, Subpart V, 48 FR29115, June 24, 1983, this program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the qualifty of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

**List of Subjects in 7 CFR Parts 1809, 1922, 1944, 1945, and 1965**

Loan programs—Agriculture, Real property—Appraisals, Rural areas, Loan programs—Housing and community development, Low and moderate income housing, Rural housing, Home improvement, Low and moderate income housing—Rental, Mobile homes, Mortgages, Subsidies, Agriculture, Disaster assistance, Administrative practice and procedure and Foreclosure.

Therefore, Chapter XVIII, Title 7 of the Code of Federal Regulations is amended as follows:

1. The authority citations for the Parts 1809, 1944, 1945, and 1965 continue to read as follows:

**PART 1809—[AMENDED]**

**Authority:** 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

**PART 1944—[AMENDED]**

**Authority:** 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

**PART 1945—[AMENDED]**

**Authority:** 7 U.S.C. 1989; 42 U.S.C. 1980; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

**PART 1965—[AMENDED]**

**Authority:** 7 U.S.C. 1989; 42 U.S.C. 1980; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

**CHAPTER XVIII—[AMENDED]**

2. 7 CFR Chapter XVIII is amended by changing the title of Form FmHA 1922–8 from "Residential Appraisal Report" to read "Uniform Residential Appraisal Report" in the following places:

**§ 1809.1 [Amended]**

(a) Part 1809, Subpart A, § 1809.1(b).

**§ 1944.30 [Amended]**

(b) Part 1944, Subpart A, § 1944.30(a).

**§ 1945.175 [Amended]**

(c) Part 1945, Subpart D, § 1945.175(c)(1).

**§ 1965.12 [Amended]**

(d) Part 1965, Subpart A, § 1965.12(f).

**§ 1965.65 [Amended]**

(e) Part 1965, Subpart B, § 1965.65(f)(12).

**§ 1965.110 [Amended]**

(f) Part 1965, Subpart C, § 1965.110(c).

**PART 1922—GENERAL**

3. The authority citation for Part 1922 is revised to read as follows:

**Authority:** 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

4. Subpart C of Part 1922 is revised to read as follows:

**Subpart C—Appraisal of Single Family Residential Property**

Sec.

1922.101 General.
1922.102 Definition of appraisal terms.
1922.103 [Reserved]
1922.104 Influences on value.
1922.105 Steps preliminary to writing the appraisal.
1922.106 [Reserved]
1922.107 Depreciation.
1922.108 Appraisal of leasehold estate.
1922.109 Writing the appraisal.
1922.110 Final Reconciliation/estimated value.
1922.111 Abbreviated appraisal and revising existing appraisals.
1922.112–1922.150 [Reserved]
Exhibit A—Single Family Residential Appraisal Manual [Note]
Exhibit A–1—Single Family Residential Appraisal Sequential Analysis [Note]
Exhibit B—Single Family Housing Income Approach [Note]

**Supart C—Appraisal of Single Family Residential Property**

**§ 1922.101 General.**

This subpart prescribes the policies and procedure for appraisals in connection with making and servicing Single Family Rural Housing (RH) loans on fee simple owned nonfarm and small farm real properties, and on leaseholds on nonfarm and small farm real properties. Property will be appraised for market value. In no case will an appraisal be made without inspecting the property and, when applicable, reviewing all plans and specifications for proposed improvements to the site.

(a) *Appraiser.* Only an employee designated by the State Director or contract appraiser selected by the State Director as authorized by the National Office may appraise a single family housing property.

(b) *Employees authorized to appraise under this subpart.* Employees whose job descriptions contain appraisal responsibilities, after receiving the required training and written delegation from the State Director, are authorized to make appraisals. The employee's immediate supervisor will recommend the employee designated to make appraisals after determining he or she has:

(1) Inspected at least two properties not previously used by Farmers Home Administration (FmHA) for sales comparison and completed corresponding Forms FmHA 1922–12, "Nonfarm Tract Comparable Sales Data," for those comparables; and

(2) Satisfactorily prepared at least two appraisals on Form FmHA 1922–8, "Uniform Residential Appraisal Report," and Form 1007, "Square Food Appraisal Form."

(c) *Appraisal report.* An appraisal report is a supportable, defensible, written report as of a specific date by an appraiser setting forth an estimate of the value of a property, along with documentation supporting the value estimate. The basic principles and methods of appraising real estate outlined in this subpart, Exhibits A, A–1 and B to this subpart (all available in any FmHA office) will be followed in making appraisals. Use Form FmHA 1922–8 for all appraisals made under this subpart. Attach a cost calculation sheet, Form 1007, to Form FmHA 1922–8. The appraisal report will include market data on comparable sales of similar properties in the sales comparison analysis section. Use three comparable sales if available. A cost calculation based on a residential cost handbook or building valuation manual approved by the National Office is required for all appraisals. Appraisals for loan making purposes will be made on an "as developed" basis. Appraisals for foreclosures, voluntary conveyance, partial release, recapture, etc., will be made on an "as is" basis. Appraisals made in connection with voluntary conveyance and foreclosure may also contain an additional "as developed" value documented in the reconciliation section of Form FmHA 1922–8 if repairs are planned prior to or in connection with sale of the property. When an "as developed" value is documented in the reconciliation section of Form FmHA 1922–8, a list of the repairs and estimated cost of the repairs must be included.

**§ 1922.102 Definition of appraisal terms.**

(a) *Depreciation*—A decline in market value of dwelling and related facilities from the time improvements were constructed to the time an appraisal is made. Depreciation may result from:

(1) Physical deterioration, such as wear and tear, etc., to a structure and other site improvements that are subject to deterioration.

(2) Functional obsolescence, such as inadequacies or overadequacy due to size, design, style, age; changes in taste of the general public; the high cost of heating and cooling dwellings that cannot economically be made energy efficient, etc.

(3) Location/Economic obsolescence is caused by forces external to the property; such as changes in use, or poorly maintained properties in the neighborhood, decline in area employment, noise or other pollution, a decline in the purchasing power of potential buyers, etc.

(b) *Economic life*—When applied to single family dwellings, the normal time a dwelling is expected to remain suitable as a residence, taking into consideration a normal depreciation rate. This may vary significantly from the remaining physical life of the structure. Economic life minus effective age equals remaining economic life.

(c) *Effective age*—The age of the dwelling taking into account any remodeling or refurbishment that has been accomplished or is planned to take place immediately and deterioration or abuse of the property that will not be included in any planned improvements.

VOL 54 ISS 39 MR 1 1989 UMI

Effective age usually will be less than actual age when significant refurbishment has taken place, or greater than actual age if the property has deteriorated more than typical properties of the same age.

(d) *Final reconciliation/estimated value*—The final estimate of market value after weighing the relative significance, supportability, and reliability of the market data and cost approaches; the most probable price a property should bring, as of a specific date, in a competitive and open market, assuming the buyer and seller are prudent, knowledgeable and the price is not affected by undue stimulus such as forced sale or loan interest subsidy.

(e) *Reproduction cost*—The estimated cost of reproducing an exact duplicate or replica of a structure using the same materials, construction standards, quality of workmanship, layout, design, and incorporating all the deficiencies and superadequacies (functional obsolescence) of the subject structure. Reproduction cost less the sum of physical depreciation, functional and economic/locational absolescence equals depreciated replacement cost.

(f) *Depreciated replacement cost*—The calculated cost less deductions for depreciation of replacing a structure of equal utility that conforms to present day standards. Replacement cost may be significantly less than the cost of reproducing an older outdated structure or a new structure that is overbuilt or does not conform to current market standards.

(g) *Living area.* (1) For appraisal purposes, living area will include only finished area as determined by the exterior dimensions of the dwelling.

(2) For dwelling size eligibility determinations, living area is defined differently and is calculated as prescribed in § 1944.16, Subpart A of Part 1944, of this chapter.

(h) *Leased fee value*—This is the value of the landlord's rights to the property being leased.

(i) *Leasehold value*—This is the value of the tenant's rights under the lease that can be tranferred or sold to another party.

(j) *Residential property*—The site and all improvements to the site, including the dwelling.

(k) *Cost calculation manual*—A manual or handbook published on a national basis, approved by the National Office, that is used to estimate the depreciated replacement cost of single family residential structures and other site improvements.

**§ 1922.103 [Reserved]**

**§ 1922.104 Influences on value.**

(a) *Factors to be considered.* (1) *Location.* Location is one of the greatest influences on real property value. A location near railroads, commercial or industrial plants, landfills, cemeteries, airports, etc., or too distant from employment opportunities may adversely affect a residential property value, whereas a location in a quiet, residential area near good employment, schools, shopping, public services, etc., may enhance property value.

(2) *Supply and demand.* If the market area has an oversupply of residential properties and/or building sites for sale or depressed economic conditions exist, a negative effect on property value will normally be observed. When the supply of residential properties or suitable building sites is short and/or the general economy is good, a positive effect on residential property values may be observed.

(3) *Replacement cost.* Cost does not directly create or maintain value; however, cost does have an influence on value and will be considered when estimating value of improvements to a site.

(4) *Highest and best use of the site.* The site and the improvements to the site will be valued separately. However, for loan making purposes, the value estimate of the site will not exceed its value as a residential site, based on market data on actual sales of similar residential sites in the area. For other than loan making purposes, when an alternate use of the site indicates a site value greater than the value of the improved site, the higher value will be used.

(5) *Accrued depreciation.* This is a combination of physical deterioration, functional and economic/locational obsolescence.

(6) *Use restrictions.* Easements, rights-of-ways, subdivision covenants, zoning, and deed restrictions, etc., affect value.

(7) *Utilities.* Availability, reliability, quality of utility service and cost to obtain suitable water supply, sewer, gas, electrical and other utility services affect value.

(8) *Taxes and assessments.* Tax rates and other public assessments as compared to rates in other similar neighborhoods in the market area affect value.

(9) *Homogeneity.* Similarities to other properties in the neighborhood; for example, a property overbuilt for the neighborhood in an older or deteriorating neighborhood may have a value less than its replacement cost.

(10) *Site.* Topography, size, shape, drainage, general suitability of the site and site view for residential purposes and site development in addition to the dwelling must be considered in estimating the value of the site.

(11) *Financing.* Terms, availability of funds, interest rates and cost of obtaining long-term loans, including but not limited to FmHA RH loans, have an influence on the value of property.

(12) *Construction.* Living area, room arrangement, garages, porches, built-in equipment, storage, parking facilities, basement, quality of construction, and "value in use" of certain energy efficient and/or solar items affect value. Exhibit A of FmHA Instruction 1922–B (available in any FmHA office) will be used when estimating value in use of any component described in § 1944.16(g)(2) of Subpart A, Part 1944 of this chapter.

(13) *Street improvements.* Street improvements adjacent to the property and the type of roads leading to the neighborhood affect value.

(b) *Factors not to be considered.* (1) Amount of existing liens or debts secured by the property;

(2) Proposed sale price or bid amount to build the structure;

(3) Amount of FmHA loan requested;

(4) Sex, age, race, national origin, color, religion or handicap(s) of residents of the neighborhood or community; and

(5) Appraisals for voluntary conveyances and foreclosure will not reflect any consideration of a forced sale, unpaid balance of FmHA loan(s), other liens against the property, or cost of acquisition.

**§ 1922.105 Steps preliminary to writing the appraisal.**

The appraisal will be made only when sufficient information has been developed to enable the appraiser to properly evaluate the property.

(a) *Basic information on property.* As a minimum, the property legal description, address, plat, subdivision and/or neighborhood map, tax information, recording information, and complete plans and specifications of any planned improvements should be obtained by the appraiser prior to beginning the appraisal.

(b) *Analysis information.* The appraiser will consider general economic conditions of the market area and obtain additional information which he or she considers pertinent to the appraisal. The appraiser should examine the community and the neighborhood before inspecting the site.

(1) *Community analysis.* The appraiser needs pertinent information about the history and growth of the community. The collection, analysis and interpretation of community data helps the appraiser to determine the relative competitive positon of a property in the total market. A knowledge of how and why the community grew and an understanding of its economic trends enables the appraiser to better understand the factors influencing the value of real property. The community factors to consider include:

(i) Population—increase or decrease;
(ii) Geography—i.e., topography, etc.;
(iii) Roads and public transportation service;
(iv) Employment wages and other income sources;
(v) Medical facilities;
(vi) Schools;
(vii) Volume of new construction;
(viii) Number of homes (new and old) being offered for sale in the market area;
(ix) Fire and police protection;
(x) Availability of suitable building sites;
(xi) Shopping facilities; and
(xii) Other financing available in the area.

(2) *Neighborhood analysis.* Neighborhoods are divisions or sections of a community or city which are usually homogeneous in some respect. Neighborhoods customarily pass four stages of life: building, static, declining, and rebuilding. In measuring the desirability of neighborhoods, features such as the number of unoccupied homes, age and condition of nearby properties, etc., should be studied and compared.

(3) *Site analysis.* The importance of location cannot be overemphasized. The location of a community, city, or neighborhood to available job opportunities, places of worship, school, medical care, shopping, etc., is as important as the location of the property within its own neighborhood. Other factors to consider about the site are:

(i) Frontage;
(ii) Width;
(iii) Depth;
(iv) Shape;
(v) Total usable area;
(vi) Topography;
(vii) Hazards, such as being located in a flood plain, subject to localized flooding, etc.;
(viii) View from the site; and
(ix) Utilities available.

(c) *Inspection of the property.* An inspection of the site and all improvements to the site will be made at such time and under such conditions that the appraiser can adequately evaluate the entire property. In the case of planned improvements, a thorough evaluation of the plans and specifications of the improvements to be made should be completed to determine if the improvements are suitable for the site and any existing improvements.

(1) The appraiser, after locating and identifying the property, must check boundary lines against the plat and legal description. This is essential in order to be certain the improvements to the site are totally on the site and do not encroach on adjoining property.

(2) When inspecting an existing structure, the appraiser will determine the condition of the structure, and estimate depreciation and cost to repair individual items he or she determines need repair or replacement in order for the structure to meet minimum property requirements and FmHA thermal standards. The appraiser will determine the total living area, storage, basement, and parking area by actual measurements made during the inspection of an existing structure; for proposed construction, measurements will be made from the building plans.

(3) If the house is under construction or less than one year old and an individual water or sewage system is involved, include a certification by the builder that the house and any water and waste disposal systems have been or will be built or installed in accordance with the local building codes, plans and specifications. Evidence of approval by health authorities having jurisdiction in the area also will be included. If the house is one year or more old, the appraiser will require approval of individual water and/or sewage systems by health authorities or, in a case where no State or local health authority exists, by a person or firm qualified to determine the adequacy and safety of such systems.

(4) If the inspection reveals the property cannot be made suitable for the FmHA program, an appraisal will not be made.

(5) The date the real property is inspected will be the date placed in the reconciliation section of Form FmHA 1922–8.

(6) Photographs of the property will be attached to Form FmHA 1922–8. Photographs will provide front, rear and side views of the property, including the "street appeal" aspects of the property.

**§ 1922.106 [Reserved]**

**§ 1922.107 Depreciation.**

Adjustments to reproduction cost and the sales comparison analysis that reflect a decrease in value of a structure or other improvements to the site due to physical deterioration and/or functional and economic obsolescence will be determined. Land and improvements to the site such as wells, etc., do not depreciate but may change in value.

(a) *Adjustments for depreciation.* (1) *Physical deterioration.* Any deterioration to a structure or other improvement to a site which adversely affects the value of the property is physical depreciation. Since all parts of a structure are not expected to have the same life expectancy, it is necessary to determine the age, suitability and condition of certain major components of the existing structure. Physical depreciation estimates in structures with an effective age over 5 years, will be made by estimating depreciation of the short-lived components of the property seperately from the long-lived components of the property. The appraiser, as a minimum, will consider the heating and/or cooling system(s), roof covering, floor covering, and built-in or easily removable appliances as short-lived components and estimate depreciation based on the percent of total economic life which has passed since the component was installed. The appraiser will subtract the replacement cost new of these component items from the replacement cost new of the entire structure; then estimate the physical depreciation of the long lived items in accordance with the depreciation section of the residential cost calculation manual and Exhibit A to this subpart (available in any FmHA office). The total short-lived and long-lived depreciation equals total physical depreciation. Short-lived and long-lived depreciation schedules will be completed on all comparable properties, provided the effective age is over 5 years and the appraiser gains access into the property to validate the condition and actual age of the short-lived components. If access to the property cannot be obtained, document accessibility on Form FmHA 1922–12. (Refer to Form FmHA 1922–12, reverse side.)

(2) *Functional obsolescence.* Any design or feature of a dwelling that is not acceptable to the typical buyer in the market area will be identified by the appraiser on the inspection visit to an existing dwelling or in the review of plans and specifications of a dwelling to be built. All items affecting the livability and marketability of the property will be recorded in the appraisal report. The appraiser will measure the value difference in the subject property caused by functional obsolescence by comparing properties that have sold that do meet the livability and marketability demands of the typical purchaser. The

VOL
54
ISS
39
MR
1
1989
UMI

appraiser must be familiar with the taste and desires of the typical purchaser in the market area in order to support the estimate of value loss due to functional obsolescence of a property. Exhibit A to this subpart (available in any FmHA Office) outlines the parts of a property and design items to consider when estimating functional obsolescence.

(3) *Economic obsolescence.* Any factor outside the property boundary that causes real property to be worth less because of its location is an economic obsolescence factor. The community, neighborhood and site analysis will form the basis for making this estimate. The actual dollar adjustment estimate for economic obsolescence will be based on a comparison of sales prices of similar properties in similar and nonsimilar locations. Exhibit A to this subpart (available in any FmHA Office) explains market data extraction of economic obsolescence and sources of economic trend data.

(b) *Accrued depreciation.* The sum of physical depreciation, and functional and economic obsolescence equals accrued depreciation. Accrued depreciation is also entered on Line 29 of Form 1007 and is also documented on the reverse of Form 1007. Accrued depreciation is also reflected in the sales comparison section of Form FmHA 1922–8.

**§ 1922.108 Appraisal of leasehold estate.**

Prior to making an appraisal for loan making purposes involving a leasehold, the appraiser must determine if the lease complies with the requirements of § 1944.15(a)(5) of Subpart A of Part 1944 of this chapter. The value of the leased fee will not be estimated under this subpart.

(a) *Property as improved.* Estimate the market value of the property "as improved" as though the property was owned under a good and marketable fee title. Estimate the market value of the site on an "as is" basis as if no improvements exist or are to be made or placed on the site and subtract from "as improved" property value.

(b) *Rent.* Estimate the amount of rent that customarily is paid in the area for similar sites leased under similar terms.

(c) *Lease acquisition cost.* Where a lease acquisition cost is involved, determine the total annual leasehold cost of the site as if vacant. In making this determination the appraiser will consider the amount of annual rent to be paid under the lease plus the annual loan payment required on the portion of the RH loan used to acquire the leasehold site. The sum of these should not exceed the amount an applicant would need to pay on a loan to buy a similar site with fee simple title.

*Example:* Present market value of the site as if owned with fee simple title is $5000. Amortization factor for 33-year loan at 12% interest with monthly payments is .0102 per $1.00 of loan.
$5000 × .0102 = $51/month
$51 × 12 mos. = $612 (annual payment on the site if owned with fee simple title)
Lease acquisition cost is $2000. Amount of annual rent is $300
$2000 × .0102 = $21/mo. (rounded up to nearest dollar)
$21 × 12 = $252 annual payment on leasehold acquisition fee.
$252 plus $300 (annual rent) equals an annual leasehold cost of $552.
Since the total annual cost of the leasehold interest in the site in this example is less than what the annual payment would be on the site as if owned with fee simple title, the $2,000 lease acquisition fee would be reasonable. The lease acquisition "value" will be documented on Form 1007 and would be adjusted downward if the total annual cost of the leasehold exceeded the annual cost of an identical fee simple owned site.

(d) *Security value of leasehold.* The maximum security value of a leasehold interest (recommended market value of the leasehold) which will be documented on Form 1007, including improvements to be made to the leasehold site, will not exceed the market value of the improved property less the "as is" value of the site as if owned with fee simple title, plus the market value of the leasehold site.

*Example:*

| | |
|---|---|
| Market value of the property "as improved" as if owned with fee title | $40,000 |
| Less market value fee title owned site "as is" | 5,000 |
| Market value of improvements | 35,000 |
| Acquisition Cost of leasehold site (unimproved) | 2,000 |
| Maximum security value of leasehold property "as improved" | 37,000 |

Complete Form FmHA 1922–8 with a full explanation as to how the value estimates were arrived at and what factors were considered in estimating the maximum security value for a loan being made on the leasehold.

**§ 1922.109 Writing the appraisal.**

In order to analyze and evaluate the influence on the value of a property by the factors outlined in this subpart and Exhibit A of this subpart (available in any FmHA office), the following steps, as a minimum, will be followed by the appraiser.

(a) *Sales comparison approach.* Collecting, verifying and analyzing sales of comparable properties in the market area will provide a basis for completing the sales comparison section on the residential appraisal resort of Form FmHA 1922–8. Information on each comparable sale will be recorded on Form FmHA 1922–12, after inspecting the property. A photograph of the comparable sale will be attached to Form FmHA 1922–12. Comparable sales less than one year old with nonsubsidized financing from lenders other than FmHA should be used in the market data analysis. A National Office exception may be granted on a quarterly basis, to permit the use of comparable sales financed by FmHA, provided, the State Director certifies in writing that nonsubsidized financed comparable sales are not available within a specific geographic location within the State. Documentation to support a National Office exception request will include a detailed analysis of the real estate market situation from the County Supervisor, District Director and the State Office Single Family Housing Appraisal Trainer. Only "arms length" sales will be used. Market value of the site should be obtained by using comparable sales data for other building sites sold in the area. Dollar adjustments for differences in financing concessions, time of sale, location and physical characteristics will be made in accordance with the chronological order of adjustment categories identified on Form FmHA 1922–8. All adjustments to comparables will be based on paired sales extraction, cost estimates and market surveys of value differences. Written documentation used to support adjustments will be attached to Form FmHA 1922–8. The cost estimates and market survey methods of making adjustments to comparables will be used only when data extracted from paired sales cannot be obtained. Comparable sales closest to the subject are the most desireable and the best indicator of value, but if comparable sales in the immediate area are nonexistent, the distance may be increased to the nearest similar communities where comparable sales have occurred.

(b) *Cost approach.* A residential cost calculation manual approved by the National Office will be used in estimating the replacement cost of the dwelling and improvements to the site. The cost calculation will be made in accordance with instructions furnished in the handbook or manual and recorded on a form furnished by the cost manual supplier or Form 1007. The cost manual contains basic cost adjustment tables for different qualities of houses. The quality description which best describes the house being appraised will be used. Accrued depreciation will be established in accordance with Exhibit A (available in any FmHA office) and 1922.107 of this subpart. Lot or land value will be estimated and added to depreciated replacement cost of improvements.

(c) *Income approach.* To be used in conjunction with inventory property non-program appraisals only. See Exhibit B (available in any FmHA office).

**§ 1922.110 Final reconciliation/estimated value.**

(a) *Indicated value by the sales comparison approach.* The appraiser will make an estimate of value by the sales comparison approach after reviewing the similarity of each comparable sale to the subject. The final indicated value by sales comparison approach on Form FmHA 1922–8, will be tempered by the degree of similarity and reliance placed on each of the different comparable sales and will not be an average of the three indicated values.

(b) *Indicated value by cost approach.* The appraiser will enter the value indicated by the cost approach in the cost approach section of Form 1922–8.

(c) *Indicated value by the income approach.* The appraiser will enter the value indicated by the income approach in the income approach section of Form 1922–8. This approach is to be used in conjunction with inventory property non-program appraisals only. See Exhibit B (available in any FmHA office).

(d) *Final reconciliation/estimated market value.* The estimated market value in the reconciliation section of Form FmHA 1922–8 will never exceed the higher of the values indicated by the sales comparison approach or the cost approach and may exceed the lower of the two indicated values only when the appraiser includes justifying and supporting documentation in the appraisal report. Non-program property appraisals, utilizing the income approach to value in accordance with Exhibit B, of this subpart, will have the estimated market value documented in the reconciliation section of Form FmHA 1922–8. Non-program property appraisals which do not utilize the income approach to value due to the lack of comparable sales data, will have the final reconciliation/estimated market value derived from the sales comparison and cost approaches to value.

(e) *Valuation of buildings for insurance purposes.* The value of buildings for insurance purposes will be the amount indicated on Line 30, Form 1007.

**§ 1922.111 Abbreviated appraisal and revising existing appraisals.**

A complete new appraisal will be made for each property requiring an appraisal except:

(a) *Abbreviated appraisal.* An abbreviated appraisal may be made for property to be built when:

(1) The property being appraised is identical, except for minor differences, with a property appraised not more than 90 days prior to the date of the abbreviated appraisal and is located on an equally desirable site within the same subdivision. A copy of all appraisal documents from the first appraisal, "the master appraisal," will be attached to, and will become a part of Form FmHA 1922–8, for the abbreviated appraisal.

(2) All items on the abbreviated appraisal that differ from the property being appraised, such as property address, legal description, applicant's name and reconciliation/estimated value will be completed along with a narrative explanation of any adjustments made and any differences in final value estimate.

(b) *Revised appraisal.* An existing appraisal may be revised when an accurate estimate of present market value can be determined without making a complete new appraisal and the following conditions exist:

(1) The appraisal being revised is not more than 2 years old;

(2) Adequate narrative documentation is attached to support the revised estimate; and

(3) The appraisal being revised was made using Form FmHA 1922–8 and Form 1007.

**§§ 1922.112–1922.150 [Reserved]**

BILLING CODE 3410–07–M

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

### 14 CFR Part 39

**[Docket No. 88–NM–136–AD; Amdt. 39–6149]**

### Airworthiness Directives; McDonnell Douglas Model DC–10 and KC–10A (Military) Series Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment revises an existing airworthiness directive, applicable to DC–10 and KC–10A (Military) series airplanes, which currently requires inspection and repair, if necessary, of the horizontal stabilizer rear upper spar cap and/or upper rear skin panel for fatigue cracking. This action would add a requirement to repeat the inspections at intervals not to exceed 2,000 landings. This amendment is necessary to detect cracks that may progress until the spar cap or skin panel is severed, which could result in structural failure.

**DATES:** Effective March 27, 1989.

**ADDRESSES:** The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1–L00 (54–60). This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 3229 East Spring Street, Long Beach, California.

**FOR FURTHER INFORMATION CONTACT:** Mr. Kyle L. Olsen, DC–10/MD–11 Program Manager, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806–2425; telephone (213) 988–5227.

**SUPPLEMENTARY INFORMATION:** A proposal to amend Part 39 of the Federal Aviation Regulations to amend Airworthiness Directive (AD) 87–06–53–R1, Amendment 39–5694 (52 FR 28133: July 28, 1987), applicable to McDonnell Douglas Model DC–10 and KC–10A (Military) series airplanes, to require repetitive inspections of the horizontal stabilizer rear spar cap and/or upper rear skin panel for fatigue cracking at intervals not to exceed 2,000 landings, was published in the **Federal Register** on November 21, 1988 (53 FR 46877).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due

VOL 54 ISS 39 MR 1 1989 UMI

consideration has been given to the single comment received.

The Air Transport Association (ATA) of America requested that the proposed repetitive inspection interval be increased from 2,000 landings to 3,000 landings so that all inspections could be accomplished during a main base visit ("C-check"). The FAA does not concur. With the information available at this time, the FAA has determined that repetitive inspection at 2,000 landings represents the maximum interval of time allowable in order to adequately detect fatigue cracking in the horizontal stabilizer, without compromising safety. McDonnell Douglas is currently conducting a fatigue test to verify the appropriateness of the 2,000 landing inspection interval. Once that test is completed and the results analyzed along with the flight test data and actual fleet inspections, the FAA may have sufficient information to adjust the repetitive inspection interval, if necessary.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 423 Model DC-10 series airplanes in the worldwide fleet. It is estimated that 153 airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 manhour per airplane to accomplish the required actions, and that average labor cost will be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $6,120 per year.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12812, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities, because few, if any, Model DC-10 series airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

**List of Subjects in 14 CFR Part 39**

Aviation safety, Aircraft.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

**PART 39—[AMENDED]**

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

**§ 39.13 [Amended]**

2. By amending Airworthiness Directive (AD) 87-06-53 R1, Amendment 39-5894 (52 FR 28133; July 28, 1987), as follows:

**McDonnell Douglas:** Applies to Model DC-10-10, -10F, -15, -30, -30F, -40 and KC-10A (Military) series airplanes, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent failure of the horizontal stabilizer rear upper spar cap and/or upper rear skin panel due to fatigue cracking, accomplish the following:

A. Prior to the accumulation of 30,000 flight hours or 7,500 landings, whichever occurs earlier, or within 15 days after August 14, 1987 (the effective date of Amendment 39-5894), whichever occurs later, unless already accomplished within the last 120 days since August 14, 1987, (the effective date of Amendment 39-5894), conduct a dye penetrant or eddy current inspection of horizontal stabilizer upper outer section rear spar cap and a visual inspection of the horizontal stabilizer upper outer rear skin panel, in accordance with McDonnell Douglas Alert Service Bulletin A55-18, dated March 23, 1987, or Revision 1, dated May 21, 1987, or Revision 2, dated February 8, 1988.

B. Prior to the accumulation of 2,000 landings after the inspection required by paragraph A., above, or within 100 landings after the effective date of this amendment, whichever occurs later, and thereafter at intervals not to exceed 2,000 landings, repeat the inspection required by paragraph A., above.

C. If a crack is found as a result of the inspections required by paragraphs A. or B., above, repair before further flight, in a manner approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal maintenance Inspector (PMI), who may add comments and then send it to the Manager, Los Angeles Aircraft Certification Office.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-60). These documents may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 3229 East Spring, Long Beach, California.

This amendment becomes effective March 27, 1989.

Issued in Seattle, Washington, on February 17, 1989.

**Leroy A. Keith,**

*Manager, Transport Airplane Directorate, Aircraft Certification Service.*

BILLING CODE 4910-13-M

---

**14 CFR Part 71**

**[Airspace Docket No. 88-ASO-22]**

**Revision of Control Zone, Anderson, S.C.**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment revises the Anderson, South Carolina, Control Zone by changing the hours of operation from part-time to full-time. This action is a result of around-the-clock weather observations now being taken at the Anderson County Airport. Also, this revision corrects the geographic position coordinates of the airport and corrects the arrival area extensions based on the Electric City Very High Frequency Omnidirectional Range/Tactical Air Navigation (VORTAC) and the Anderson County Radio Beacon (RBN).

**EFFECTIVE DATE:** 0901 u.t.c., April 6, 1989.

**FOR FURTHER INFORMATION CONTACT:** Melvin Brock, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

**SUPPLEMENTARY INFORMATION:**

**History**

On December 22, 1988, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the Anderson, South Carolina, Control Zone (53 FR 51567). The proposed revision would change the control zone hours of operation from part-time to full-time due to availability of 24-hour weather observations at the Anderson County Airport. Also, the proposed action would correct the geographic position coordinates of the airport and correct the arrival area extensions based on the Electric City VORTAC and the Anderson County RBN. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6D dated January 4, 1988.

**The Rule**

This amendment to Part 71 of the Federal Aviation Regulations revises the Anderson, South Carolina, Control Zone by changing the hours of operation from part-time to full-time due to the availability of 24-hour weather observations at the Anderson County Airport. This action also corrects the geographic position coordinates of the Anderson County Airport and corrects the arrival area extensions based on the Electric City VORTAC and the Anderson County RBN.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition area.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Public Law 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.171 [Amended]**

2. Section 71.171 is amended as follows:

**Anderson, SC [Amended]**

By deleting the existing description and adding the following: "Within a 5-mile radius of Anderson County Airport (Lat. 34°29'42" N., Long. 82°42'33" W.); within 1.5 miles each side of Electric City VORTAC 035° radial, extending from the 5-mile radius zone to 1.5 miles NE. of the VORTAC and within 3 miles each side of the 172° bearing from the Anderson County RBN (Lat. 34°29'53" N., Long. 82°42'31" W.), extending from the 5-mile radius zone to 8.5 miles south of the RBN."

Issued in East Point, Georgia, on February 14, 1989.

**William D. Wood,**

*Acting Manager, Air Traffic Division, Southern Region.*

**DEPARTMENT OF ENERGY**

**Federal Energy Regulatory Commission**

**18 CFR Parts 141, 260 and 357**

**[Docket No. RM88-18-000]**

**Statement of Cash Flows To Replace Statement of Changes in Financial Position in FERC Annual Report Forms**

February 23, 1989.

**AGENCY:** Federal Energy Regulatory Commission, DOE.

**ACTION:** Final rule; notice of OMB control numbers.

**SUMMARY:** The Federal Energy Regulatory Commission, on October 13, 1988, issued a final rule (Order No. 505 in Docket No. RM88-18-000, FR 40,875 (Oct. 19, 1988)). The rule amended the Commission's annual report forms for electric utilities, natural gas companies and oil pipeline companies. This notice states that the Office of Management and Budget has approved the information collection requirements in Order No. 505.

**EFFECTIVE DATE:** February 23, 1989.

**FOR FURTHER INFORMATION CONTACT:** Sandras S. Vincent, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 357-8530.

**SUPPLEMENTARY INFORMATION:** The Paperwork Reduction Act, 44 U.S.C. 3501-3520 (1982) and the Office of Management and Budget's (OMB) regulations, 5 CFR Part 1320 (1988), require that OMB approve certain information collection requirements imposed by agency rules. On November 18, 1988, OMB approved the revisions to the information collection requirements in 18 CFR Parts 141, 260 and 357. The OMB Control Numbers are: 1902-0021—FERC Form No. 1 (Annual Report for Major Public Utilities and Licensees); 1902-0029—FERC Form No. 1-F (Annual Report of Nonmajor Electric Utilities and Licensees); 1902-0028—FERC Form No. 2 (Annual Report of Major Natural Gas Companies); 1902-0030—FERC Form No. 2-A (Annual Report of Nonmajor Natural Gas Companies); and 1902-0022 FERC Form No. 6 (Annual Report of Oil Pipeline Companies). It is not necessary to amend Part 389 of the Commission's regulations, since these OMB control numbers appear on the forms. The final rule in Docket No. RM88-18-000 is effective as of November 18, 1988.

To access CIPS, set your communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this final rule will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 1000, 825 North Capitol Street NE., Washington, DC 20426.

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

## I. Introduction

The Federal Energy Regulatory Commission (Commission) is deleting Part 277 of its regulations in its entirety.[1] Part 277 implemented certain provisions of section 315 of the Natural Gas Policy Act of 1978 (NGPA) that have been repealed by Congress in Pub. L. No. 100–439.[2]

## II. Background and Discussion

On September 22, 1988, Congress enacted Pub. L. No. 100–439, repealing two nonprice marketing restrictions on sales of certain OCS gas in NGPA section 315. Specifically, Congress repealed NGPA section 315(a)(3), which required certain OCS gas to be sold under long-term contracts of up to 15 years, and section 315(b), which provided a right of first refusal for interstate buyers of certain categories of natural gas after the existing contracts run out.

Part 277 of the Commission's regulations implemented the provisions of NGPA section 315 that have been repealed by Pub. L. No. 100–439. Specifically, Subpart A implemented section 315(a)(3) and provides that any new contract for the first sale of OCS gas that is new natural gas or high cost natural gas as defined in NGPA section 107(c) (1)–(4) must be for a duration of not less than 15 years or, if less, the commercially producible life of the reservoir.[3] Subpart B implemented section 315(b) and requires a first seller of gas sold under NGPA sections 102(c), 103(c), and 107(c) (1)–(4) to make a bona fide offer to the original purchaser for the continued sale of the gas before the expiration or termination of the contract covering the gas.[4]

Part 277 is being deleted in its entirety because that part of the regulations applies to the provisions of section 315 of the NGPA repealed by Pub. L. No. 100–439 and is no longer needed.

## III. Environmental Statement

Commission regulations require that an environmental assessment or an environmental impact statement must be prepared for any Commission action that may have a significant adverse effect on the human environment.[5] The Commission has categorically excluded certain actions from this requirement as not having a significant effect on the human environment.[6] No environmental consideration is necessary for the promulgation of a rule that is clarifying, corrective, or procedural or that does not substantially change the effect of legislation or regulation being amended.[7] This final rule is corrective in nature. The rule simply deletes provisions from the Commission's regulations in response to a Congressional mandate.

## IV. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) [8] requires rulemakings to either contain a description and analysis of the impact the rule will have on small entities or certify that the rule will not have a significant economic impact on a substantial number of small entities. This final rule may have a significant impact on a substantial number of small entities. In effect, the Commission's rule will make interstate natural gas prices more market responsive by increasing competition and permit producers greater flexibility in selling natural gas supplies. The Commission believes this rule will have a beneficial impact on small entities, rather than a negative impact. The Commission concludes, therefore, that this impact will not be "significant" within the meaning of the RFA. Accordingly, the Commission certifies that this rule will not have a "significant economic impact on a substantial number of small entities."

## V. Paperwork Reduction Act

The Paperwork Reduction Act [9] and the Office of Management and Budget's (OMB) regulations [10] require that OMB approve certain information collection requirements imposed by agency rule. This final rule deletes certain information collection requirements no longer required in light of the Congressional mandate. The Commission is notifying the Office of Management and Budget that this information collection provision is no longer required.

## VI. Administrative Findings and Effective Date

The Administrative Procedure Act (APA) [11] requires rulemakings to be published in the **Federal Register**. The APA also mandates that an opportunity for comment be provided when an agency promulgates regulations. Notice and comment are not required under the APA when the "agency for good cause finds that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interests."[12] The Commission finds that notice and comment are unnecessary for this rulemaking. The Commission is merely deleting regulations that apply to provisions of the NGPA that have been repealed.

This final rule is procedural in nature. It deletes regulations no longer valid in light of recent Congressional action. The Commission, therefore, finds good cause to make this rule effective immediately upon issuance. This final rule is effective February 23, 1989.

## DEPARTMENT OF STATE

**Bureau of Consular Affairs**

**22 CFR Part 51**

**[108.681]**

## Denial of Passports to Certain Convicted Drug Traffickers

**AGENCY:** Department of State.

**ACTION:** Interim rule with request for comments.

**SUMMARY:** The Department of State is issuing interim regulations to implement provisions of the Anti-Drug Abuse Act of 1988, Pub. L. 100–690. The interim regulations prescribe the conditions governing the issuance, denial or revocation of United States passports to individuals convicted of offenses violating Federal and state drug abuse laws where the individual used a U.S. passport or crossed an international border in committing the offense. The interim rule also makes technical, non-substantive conforming amendments to existing regulations governing the revocation and denial of passports in other cases.

**EFFECTIVE DATE:** March 1, 1989.

**DATE:** Comments must be submitted on or before May 1, 1989.

**ADDRESS:** Written comments may be sent to William B. Wharton, Director, Office of Citizenship Appeals and Legal Assistance, Passport Services, Department of State, Room 300, 1425 K Street, NW., Washington, DC 20524.

**FOR FURTHER INFORMATION CONTACT:** Bonnie Lea-Brown, Office of Citizenship Appeals and Legal Assistance, Telephone (202) 326–6213.

**SUPPLEMENTARY INFORMATION:** The Anti-Drug Abuse Act of 1988, Pub. L. 100–690, provides that a passport shall not be issued to or shall be revoked for an individual convicted of a Federal or state drug offense where the individual used a U.S. passport or crossed an international border in commiting the offense.

As reflected in the interim rule, it is contemplated that passport denial or revocation action shall be taken in all cases, except where the Secretary decides otherwise on emergency or humanitarian grounds, where the offense involved constitutes a felony as defined by section 4603(2)(e)(3) of the Act, and may be taken in all cases where the offense involved constitutes a misdemeanor as defined by state or Federal law. The Department recognizes that the use of a U.S. passport or crossing of an international border may not necessarily constitute an element of a Federal or state drug offense. Nonetheless, the Secretary must receive reliable information about one or both of these circumstances in order to take action under the interim rule. It should be noted, however, that the Department of State has regulations of general applicability that govern limitations on issuance or extension of passports. These existing regulations, which come into play wher. the Department receives a copy of a warrant or is otherwise informed of a warrant by a competent authority, apply to a broader range of criminal activity and do not require a showing that the criminal activity at issue involved the use of a U.S. passport or the crossing of an international border. As a result, denial or revocation of a passport of an individual contemplated by the interim rule may alternatively be taken under existing regulations.

The Department is also making non-substantive conforming amendments to 22 CFR Part 51 to reflect that, in keeping with established policy and procedure, passport denial or revocation action depends upon receipt by the Department from a competent authority of supporting information and documentation establishing to the satisfaction of the Department that an individual is subject to the regulations. This policy reflects the view of the Department that responsible judicial and law enforcement authorities are in the best position to identify individuals who should be subject to passport denial or revocation action. Finally, the interim rule provides that no administrative review shall be taken of a refusal on the part of the Secretary to grant a humanitarian or emergency exception. This approach is consistent with existing passport denial and revocation provisions, which provide for no emergency or humanitarian exceptions. As required by the Regulatory Flexibility Act (5 U.S.C. 301 et seq.), it is hereby certified that the iterim rule will not have a significant impact on small business entities. The provisions of the Paperwork Reduction Act (44 U.S.C. Ch. 35) apply.

**List of Subjects in 22 CFR Part 51**

Passports.

For the reasons set forth in the preamble, 22 CFR Part 51 is amended as follows:

**PART 51—PASSPORTS**

1. The authority citation for Part 51 is revised to read as follows:

**AUTHORITY:** 22 U.S.C. 2658 and 3926; sec. 1, 44 Stat. 887; sec. 1, 41 Stat. 750; sec. 4, 63 Stat. 111, as amended; 22 U.S.C. 211a, as amended, 2658; sec. 122 (d)(3), Pub. L. 98–164, 97 Stat. 1017; E.O. 11295, 36 FR 10603; 3 CFR 1966–70 Comp. p. 507; Pub. L. 100–690.

2. Section 51.70 is revised to read as follows:

**§ 51.70 Denial of passports.**

(a) A passport, except for direct return to the United States, shall not be issued in any case in which the Secretary of State determines or is informed by competent authority that:

(1) The applicant is the subject of an outstanding Federal warrant of arrest for a felony, including a warrant issued under the Federal Fugitive Felon Act (18 U.S.C. 1073); or

(2) The applicant is subject to a criminal court order, condition of probation, or condition of parole, any of which forbids departure from the United States and the violation of which could result in the issuance of a Federal warrant of arrest, including a warrant issued under the Federal Fugitive Felon Act; or

(3) The applicant is subject to a court order committing him or her to a mental institution; or

(4) The applicant is the subject of a request for extradition or provisional arrest for extradition which has been presented to the government of a foreign country; or

(5) The applicant is the subject of a subpoena issued pursuant to section 1783 of Title 28, United States Code, in a matter involving Federal prosecution for, or grand jury investigation of, a felony; or

(6) The applicant has not repaid a loan received from the United States as prescribed under §§ 71.10 and 71.11 of this chapter; or

(7) The applicant is in default on a loan received from the United States to

BEST COPY AVAILABLE

VOL 54 ISS 39 MR 1 1989 UMI

effectuate his or her return from a foreign country in the course of travel abroad.

(b) A passport may be refused in any case in which the Secretary of State determines or is informed by competent authority that:

(1) The applicant has not repaid a loan received from the United States to effectuate his or her return from a foreign country in the course of travel abroad; or

(2) The applicant has been legally declared incompetent, unless accompanied on his or her travel abroad by the guardian or other person responsible for the national's custody and well being; or

(3) The applicant is under the age of 18 years, unmarried and not in the military service of the United States unless a person having legal custody of such national authorizes issuance of the passport and agrees to reimburse the United States for any monies advanced by the United States for the minor to return to the United States; or

(4) The Secretary determines that the national's activities abroad are causing or are likely to cause serious damage to the national security or the foreign policy of the United States; or

(5) The applicant has been the subject of a prior adverse action under this section or § 51.71 and has not shown that a change in circumstances since the adverse action warrants issuance of a passport; or

(6) The applicant is subject to an order of restraint or apprehension issued by an appropriate officer of the United States Armed Forces pursuant to Chapter 47 of Title 10 of the United States Code.

(Approved by the Office of Management and Budget under control number 1405-0077)

3. A new § 51.71 is inserted after section 51.70 and reads as follows:

**§ 51.71 Denial of passports to certain convicted drug traffickers.**

(a) A passport shall not be issued in any case in which the Secretary of State determines or is informed by competent authority that the applicant is subject to imprisonment or supervised release as the result of a felony conviction for a Federal or state drug offense if the individual used a U.S. passport or otherwise crossed an international border in committing the offense, including a felony conviction arising under:

(1) The Controlled Substances Act (21 U.S.C. 801 et seq.) or the Controlled Substances Import and Export Act (21 U.S.C. 951 et seq.); or

(2) Any Federal law involving controlled substances as defined in section 802 of the Controlled Substances Act (21 U.S.C. 801 et seq.); or

(3) The Bank Secrecy Act (31 U.S.C. 5311 et seq.) or the Money Laundering Act (18 U.S.C. 1956 et seq.) if the Secretary of State is in receipt of information that supports the determination that the violation involved is related to illicit production of or trafficking in a controlled substance; or

(4) Any state law involving the manufacture, distribution, or possession of a controlled substance.

(b) A passport may be refused in any case in which the Secretary of State determines or is informed by competent authority that the applicant is subject to imprisonment or supervised release as the result of a misdemeanor conviction of a Federal or state drug offense if the individual used a U.S. passport or otherwise crossed an international border in committing the offense, other than a first conviction for possession of a controlled substance, including a misdemeanor conviction arising under:

(1) The federal statutes described in section 51.71 (a); or

(2) Any state law involving the manufacture, distribution, or possession of a controlled substance.

(c) Notwithstanding subsections (a) and (b), the Secretary of State may issue a passport when the competent authority confirms, or the Secretary of State otherwise finds, that emergency circumstances or humanitarian reasons exist.

(Approved by the Office of Management and Budget under control number 1405-0077)

**§ 51.71 [Redesignated as § 51.72]**

4. Current § 51.71 is redesignated as § 51.72 and is revised to read as follows:

**§ 51.72 Revocation or restriction of passports.**

A passport may be revoked or restricted or limited where:

(a) The national would not be entitled to issuance of a new passport under § 51.70 or § 51.71; or

(b) The passport has been obtained by fraud, or has been fraudulently altered, or has been fraudulently misused.

**§ 51.72 [Redesignated as § 51.73]**

5. Current section 51.72 is redesignated as section 51.73.

**§ 51.73 [Redesignated as § 51.74]**

6. Current section 51.73 is renumbered as section 51.74.

7. Current section 51.80 is revised to read as follows:

**§ 51.80 Applicability of §§ 51.81 through 51.89.**

The provisions of §§ 51.81 through 51.89 apply to any action of the Secretary taken on an individual basis in denying, restricting, revoking or invalidating a passport or in any other way adversely affecting the ability of a person to receive or use a passport except action taken by reason of noncitizenship, refusal to grant a discretionary exception under the emergency or humanitarian relief provisions of § 51.71(c) or refusal to grant a discretionary exception from geographical limitations of general applicability. The provisions of this subpart shall constitute the administrative remedies provided by the Department to persons who are the subject of adverse action under §§ 51.70, 51.71 or 51.72.

(The information collection implications contained in this rule have been approved by OMB (1405-0077, 6/90))

Joan M. Clark,

*Assistant Secretary for Consular Affairs.*

December 19, 1988.

BILLING CODE 4710-06-M

---

## DEPARTMENT OF THE TREASURY

### Fiscal Service

### 31 CFR Parts 203 and 214

### Treasury Tax and Loan Depositaries, Depositaries for Federal Taxes

**AGENCY:** Financial Management Service, Fiscal Service, Treasury.

**ACTION:** Final rule.

**SUMMARY:** This rule (1) amends the Treasury regulations on paying fees to financial institutions for maintaining Treasury Tax and Loan (TT&L) accounts and processing Federal tax deposit (FTD) payments by removing specific references to the FTD fee structure from 31 CFR Parts 203 and 214 and transferring the fee schedule to the "Treasury Financial Manual" and (2) revises Treasury procedures to reduce the fees paid to depositaries for processing FTD payments. Treasury is reducing the current per-item fee structure for large depositaries that process FTD dollar deposit volumes in excess of $10 million annually. The affected depositaries include depositaries in the remittance option Class 1 category and the note option Class B and Class C categories. Until further evaluation is completed, fee reductions will not be implemented for depositaries that process the smaller FTD dollar deposit volumes (depositaries in the note option Class A category and remittance option Class 2 category) or any depositary that participates in the Federal Government's Minority Bank Deposit Program (MBDP).

Treasury finds, for good cause, that a delay in the rule's effective date would be contrary to the important public interest of meeting budgetary constraints imposed on the Financial Management Service. *See* S. Rep. No. 387, 100th Cong., 2d Sess. 16 (1988). Thus, this rule shall be effective upon publication as a final rule in the **Federal Register**. The fee reduction is effective with the Federal Reserve Banks' March reporting cycle which begins March 2, 1989.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Michael C. Salapka at (202) 287-0590.

**SUPPLEMENTARY INFORMATION:** On January 3, 1989, Treasury published a notice of proposed rulemaking concerning the amendment in the **Federal Register** [54 FR 40]. In the notice of proposed rulemaking, interested persons were given until February 2, 1989, to submit comments.

### Discussion of Final Rule and Comments

In order to achieve budget reductions in Fiscal Year 1989, Treasury is reducing the per-item fee paid to the large note option and remittance option depositaries from the current fifty ($0.50) cents per Federal tax deposit coupon processed to thirty ($0.30) centes for each Federal tax deposit coupon processed. Payment of fees for processing FTD payments is not required by statute. Therefore, Treasury is transferring these administrative procedures to the "Treasury Financial Manual." This manual may be obtained from any Federal Reserve Bank.

Four comments were timely received and a fifth comment was received after the comment period had expired. The first comment was from an association representing the interest of independent banks. The request regarded clarification on the effect of the fee reduction on the note option depositaries. Specifically, the association inquired as to the size of depositaries which would be affected. Treasury responded that fees would not be reduced for the depositaries processing less than $10 million annually in Federal tax deposit volume or any depositary participating in the MBDP.

The second comment was received from an association of banking institutions. It addressed the cost associated with accepting Federal tax deposits. The association suggested that depositaries processing the largest dollar deposit volumes incur increased processing risks. Furthermore, the association requested that depositaries be given the option of recovering their processing costs from their customers by charging a fee for handling Federal tax deposits. The association acknowledged that depositaries receive compensation for handling costs from the Treasury fee paid for each FTD coupon processed and the overnight use of deposited funds.

The intent of Treasury's policy is to reduce fees for the largest depositaries because they are in a more favorable position to accommodate the change in fee structure than the smaller depositaries. The larger depositaries process the largest dollar deposit volumes and generally benefit most from the overnight use of Federal funds. Regarding processing risks it should be noted that current regulations provide that depositaries may at their discretion accept checks drawn on another financial institution, but they do so purely on a voluntary basis. 31 CFR 214.6(a)(1).

Regarding processing costs, the association suggested that depositaries recover processing costs from their customers. This issue was not addressed in the proposed rule. Current regulations forbid depositaries to accept compensation from taxpayers for accepting deposits of Federal taxes and handling them. 31 CFR 214.6(a)(7). Treasury has determined, as a policy matter, that amending this regulation to allow depositaries to charge taxpayers for providing this service is not appropriate at this time: The proposed rule did not speak to this provision of concern to the association and it will be reviewed independently for consideration of its continued validity.

The third comment was from an association representing independent community banks opposing the removal of the fee schedule from the CFR. The association stated that Treasury should be required to consider the bookkeeping and maintenance costs of banks when establishing its fee structure. The association cited results of a survey among community banks with assets ranging from $10 million to $100 million and stated that the costs to process FTD payments ranged from $1.05 to $0.35 per item. The survey indicated that costs declined as the size of the institution increased. The association stressed that current fees do not fully compensate many community banks and that a reduction in fees would be a hardship for smaller institutions.

Treasury has determined, as a policy matter, to transfer the administrative procedures concerning payment of fees for processing FTD payments to the "Treasury Financial Manual." However, this change will not preclude public comment. It is the Department of the Treasury's intent to announce future rate changes prior to their effective date and allow opportunity for public comment.

There are three reasons for Treasury's policy regarding FTD payments. First, budget constraints imposed on the Financial Management Service preclude paying higher fees to depositaries. Second, depositaries that choose to participate in the Treasury Tax and Loan program earn interest on the overnight use of Federal funds deposited as Federal tax payments. Third, Treasury has determined that the larger depositaries are in a better position to accommodate the fee reduction.

The fourth comment was received from an association representing approximately 3,000 savings associations and savings bank businesses. The comment suggested that the Treasury and depositaries should work together to establish a systematic and unbiased method for deriving an annual fee and that a precise formula should be developed and approved through the public comment process. Furthermore, the association suggested that to arrive at an appropriate profit margin, the Treasury should convene a task force comprised of financial industry representatives and others to set the rate and publish it in the **Federal Register** for comment. As stated above, budget constraints preclude Treasury from paying higher fees. In addition, Treasury estimates the earning capacity of depositaries from the overnight use of Federal tax deposit funds during Fiscal Year 1988 was approximately $142 million. This estimate is based on the FY 1988 Federal tax deposit dollar volume cited in the "Daily Treasury Statement" dated September 30, 1988. Furthermore, Treasury estimates that implementing the new fee structure will save the Treasury $6 million in Fiscal Year 1989.

The fifth comment was received from a savings bank. The bank stated that the Treasury proposal to reduce fees ignores the cost of the processing risk associated with accepting Federal tax deposits and the fifth ($.50) cent fee does not cover the bank's actual processing cost. The bank suggested removing the restriction which prohibits depositaries from accepting compensation from taxpayers to allow

VOL 54 ISS 39 MR 1 1989 UMI

banks to cover their processing costs. These issues were addressed in Treasury's response to the second comment. See discussion above.

There are no substantive differences between the proposed rule and final rule. Subsequent to the publication of the proposed rule, Treasury increased the threshold between the note option Class A and Class B categories to $10 million in annual Federal tax deposit dollar volume. As a consequence of this policy decision, fewer note option depositaries are affected by the fee reduction than originally estimated. The threshold between the remittance option Class 1 and Class 2 categories is also increased to $10 million.

Treasury is reducing fees paid to all depositaries that process over $10 million in Federal tax deposit dollar volume annually, regardless of classification as note option or remittance option depositaries. However, there is an exception for the MBDP participants. MBDP participants are not affected by the fee reduction. Fee reductions for depositaries that process the smaller FTD dollar deposit volumes and depositaries that participate in the MBDP are under review. Treasury will decide at a later date when fee reductions, if any, will be implemented for the smaller depositaries and MBDP depositaries. The new and any subsequent fee schedules will be published in the "Treasury Financial Manual" and an opportunity will be afforded for public comment prior to further reductions becoming final.

**Economic Assessment and Certification**

Approximately 3,400 financial institutions participate as note option depositaries while greater than 11,600 financial institutions participate as remittance option depositaries. Treasury estimates that approximately 4,000 financial institutions will be affected by the fee reduction. The larger financial institutions process the largest dollar deposit volumes and generally benefit most from the overnight use of Federal funds. Therefore, Treasury has determined that the initial fee reduction will be limited to those depositaries that process over $10 million in FTD deposits annually.

Distribution of the revised "Treasury Financial Manual" to the Federal Reserve banks and TT&L depositaries will be coordinated with the regulation revisions.

Treasury has determined that this is not a major rule as defined by Executive Order 12291. Accordingly, a regulatory impact analysis is not required. It is hereby certified pursuant to the Regulatory Flexibility Act that this rule will not have a significant economic impact on a substantial number of small entities. Accordingly, a Regulatory Flexibility Act analysis is not required.

**List of Subjects**

*31 CFR Part 203*

Banks, Banking, Taxes.

*31 CFR Part 214*

Banks, Banking, Taxes.

For the reasons set out in the preamble, Title 31, Part 203 and Part 214 of the Code of Federal Regulations, is amended as set forth below.

**PART 203—[AMENDED]**

1. The authority citation for Part 203 is revised to read as follows:

**Authority:** 31 U.S.C. 3122 and 31 U.S.C. 323.

2. Section 203.10(b)(2)(ii) is revised to read as follows:

**§ 203.10 [Amended]**

* * * * *

(b) * * *

(2) * * *

(ii) Analysis credit. All tax and loan balances which are in excess of a current day's credits will be subject to an analysis credit, as explained in the Procedural Instructions for Treasury Tax and Loan Depositaries.

3. Section 203.14 is revised to read as follows:

**§ 203.14 Compensation for services rendered.**

Except as provided in the Procedural Instructions for Treasury Tax and Loan Depositaries, Depositaries will not be compensated for servicing the tax and loan account or for the bookkeeping costs of maintaining that account.

**PART 214—[AMENDED]**

1. The authority citation for Part 214 is revised to read as follows:

**Authority:** 12 U.S.C. § 265; 12 U.S.C. 391; 31 U.S.C. 3122; 31 U.S.C. 323.

**§ 214.6 [Amended]**

2. Section 214.6 is amended by revising paragraph (b) as follows:

* * * * *

(b) Compensation for services. Except as provided in the Procedural Instructions for Treasury Tax and Loan Depositaries, Depositaries will not be compensated for servicing the tax and loan account or for the bookkeeping costs of maintaining that account.

**W. E. Douglas,**

*Commissioner.*

383.6 Authorities.
Appendix—Delegations of Authority.

**Authority:** 10 U.S.C. 136.

**§ 383.1 Purpose.**

This part is issued pursuant to the authority vested in the Secretary of Defense under 10 U.S.C.

(a) Designates one of the positions of Assistant Secretary of Defense as the Assistant Secretary of Defense (Production and Logistics) (ASD(P&L)) under the direction, authority, and control of the Under Secretary of Defense (Acquisition) (USD(A)).

(b) Assigns responsibilities, functions, relationships, and authorities, as prescribed herein, to the ASD(P&L).

**§ 383.2 Definition.**

*DoD Components.* The Office of the Secretary of Defense (OSD), the Military Departments, the Joints Chiefs of Staff (JCS), the Joint Staff, the Unified and Specified Commands, the Office of the Inspector General of the Department of Defense (OIG, DoD), and the Defense Agencies, and the DoD Field Activities.

**§ 383.3 Responsibilities.**

The *Assistant Secretary of Defense (Production and Logistics)* (ASD(P&L)) is the Principal Staff Assistant and advisor to the USD(A) for management of DoD procurement, production, the National Defense Stockpile, logistics, installations, environmental programs, Total Quality Management, and other related matters. In this capacity, the ASD(P&L) shall:

(a) Develop policies, conduct analyses, provide advice, make recommendations, and issue guidance on DoD plans, programs, and requirements determinations.

(b) Develop systems and standards for the administration and management of approved DoD plans, programs, and policies.

(c) Develop and promulgate plans, programs, actions, and taskings to ensure adherence to DoD policies and national security objectives.

(d) Review and evaluate DoD Component plans and programs to ensure adherence to approved policies and standards.

(e) Participate in all aspects of the Defense Acquisition System.

(f) Participate in planning, programming, budgeting, and followup activities.

(g) Develop functional requirements, plans, and programs to achieve interoperability among modernized DoD production and logistics information systems.

(h) Participate in all aspects of production and logistics automated information system (AIS) life-cycle management, major AIS reviews, and major AIS approval processes.

(i) Promote coordination, cooperation, and mutual understanding, both inside and outside of the Department of Defense, including oversight and policy information for, and implementation of, agreements with allied and other friendly nations in coordination with the Under Secretary of Defense (Policy) (USD(P)).

(j) Serve as primary focal point and principal DoD spokesman for, and serve on, boards, committees, and other groups pertaining to assigned functional areas.

(k) Develop, coordinate, and maintain regulations as necessary and appropriate to implement the acquisition regulatory responsibilities of the Secretary of Defense and the USD(A).

(l) Perform other duties as the Secretary of Defense and the USD(A) prescribe.

**§ 383.4 Functions.**

The ASD(P&L) shall carry out the responsibilities described in § 383.3 for the following functional areas:

(a) Maintenance and administration of the Federal Acquisition Regulation (FAR) and the Defense FAR Supplement (DFARS) and other implementations thereto within the Department of Defense.

(b) Contract policy, administration, cost, pricing, and finance.

(c) Transition to production planning and production management.

(d) Materiel and facilities readiness and sustainability.

(e) Management of the National Defense Stockpile.

(f) Total Quality Management.

(g) Defense Standardization and Specification Program.

(h) Technical data management.

(i) Acquisition logistics, including Integrated Logistics Support, post production support, and weapon support assessment.

(j) Support systems acquisition and technology requirements.

(k) Computer-aided Acquisition and Logistics Support.

(l) International logistics and military construction agreements, in coordination with the USD(P).

(m) Supply, warehousing, and distribution management.

(n) Materiel maintenance management, including repair, overhaul, modification installation, and preventive maintenance of weapon systems, equipment, secondary items, and munitions.

(o) Transportation (including airlift and sealift) and traffic management.

(p) Energy management and petroleum logistics.

(q) Host-nation support.

(r) Mobilization planning guidance for military installations and logistics.

(s) Installation management and real property planning, design, acquisition, maintenance, and disposal.

(t) Military base structure and utilization.

(u) Construction, including construction funded by host nations under the North Atlantic Treaty Organization (NATO) Infrastructure Program.

(v) Commercial activities and Defense Regional Inter-Service Support Programs.

(w) Environmental quality and natural resources management.

(x) Postal services and customs inspection.

(y) Planning and life-cycle management of all technological aspects of modernization within the Department of Defense of automated information systems associated with the preceding functions.

**§ 383.5 Relationships.**

(a) In the performance of assigned functions, the ASD(P&L) shall:

(1) Coordinate and exchange information with other officials in the Department of Defense exercising collateral or related functions.

(2) Use existing systems, facilities, and services of the Department of Defense and other Federal agencies, whenever practicable, to achieve maximum efficiency and economy.

(b) Other OSD officials and heads of DoD Components shall coordinate with the ASD(P&L) on all matters related to the functions cited in § 383.4.

**§ 383.6 Authorities.**

The ASD(P&L) is hereby delegated authority to:

(a) Issue DoD Instructions, DoD publications, and one-time directive-type memoranda, consistent with DoD Directive 5025.1-M, that implement policies approved by the Secretary of Defense in the functions assigned to the ASD(P&L). Instructions to the Military Departments shall be issued through the Secretaries of those Departments or their designees. Instructions to Unified and Specified Commands shall be issued through the Chairman, JCS (CJCS).

(b) Obtain reports, information, advice, and assistance, consistent with DoD Directive 7750.5, as necessary in carrying out assigned functions.

(c) Communicate directly with the heads of DoD Components. Communications to Commanders of the Unified and Specified Commands shall be coordinated with the CJCS.

(d) Establish arrangements for DoD participation in nondefense governmental programs for which the ASD(P&L) is assigned primary DoD cognizance.

(e) Communicate with other Government Agencies, representatives of the legislative branch, and members of the public, as appropriate, in carrying out assigned functions.

(f) Exercise authorities contained in the Appendix to this part.

VOL 54 ISS 39 MR 1 1989 UMI

**Appendix—Delegations of Authority**

Pursuant to the authority vested in the Secretary of Defense, and subject to his direction, authority, and control of the USD(A), and in accordance with DoD policies, Directives, and Instructions, the ASD(P&L) or, in the absence of the ASD(P&L), the person acting for the ASD(P&L), is hereby delegated authority to:

1. Make determinations and decisions regarding contracts, leases, and sales agreements, and take other appropriate actions in the maintenance and monitoring of DoD procurement regulations as delegated by the Defense Acquisition Executive and/or Procurement Executive.

2. Act for the Secretary of Defense on delegations of authority to him by the U.S. Trade Representative to waive the prohibition against procurement from certain countries, pursuant to Title 3 U.S.C., Pub. L. 96–39, Trade Agreements Act of 1979 (19 U.S.C. 2511 *et seq.*), and E.O. 12260, July 26, 1979.

3. Act for the Secretary of Defense in the establishment and granting of waivers under the Buy American Act (41 U.S.C. 10a–b).

4. Act for the Secretary of Defense in the exercise of extraordinary contractual action authority under Pub. L. 85–804, an act to authorize the making, amendment, and modification of contracts to facilitate the national defense, August 28, 1958, in accordance with E.O. 10789, November 14, 1958, as amended, and Part 50 of the Federal Acquisition Regulation.

5. Act for the Secretary of Defense in managing the Competition Advocate Program throughout the Department of Defense (Pub. L. 98–191, the Office of Federal Procurement Policy Act, December 1, 1983, as amended by Pub. L. 98–369, the Competition in Contracting Act, July 18, 1984).

6. Exercise all responsibilities and authority of the Secretary of Defense under Title 10, United States Code, section 2404, with respect to the acquisition of petroleum (DoD Instruction 4220.8, December 20, 1985).

7. Exercise all responsibilities and authority of the Secretary of Defense under Title 10, United States Code, section 2394, with respect to geothermal resources or contracts for the provision and operation of energy production facilities in accordance with Secretary of Defense Memorandum, December 4, 1982.

8. Exercise all authorities delegated to the Secretary of Defense by E.O. 12626, February 25, 1988, concerning management of the National Defense Stockpile.

9. Act for the Secretary of Defense as the DoD claimant to other designated executive departments and agencies for petroleum requirements and allocations in an emergency (DoD Directive 4140.25, May 15, 1980).

10. Act for the Secretary of Defense regarding implementing the provision of 10 U.S.C. 2325 concerning preference for non-developmental items (DoD Directive 5000.37, September 29, 1978).

11. Establish uniform policies and procedures relating to cataloging and standardization of equipment and supplies under Title 10, United States Code, Chapter 145, and other statutes.

12. Implement the agreement between the General Services Administration and the Department of Defense on supply management relationships under the national supply system (DoD Directive 5030.47, May 27, 1971).

13. Act for the Secretary of Defense in establishing and administering policy guidance for DoD Components concerning the efficient and effective use of DoD storage and warehousing resources (DoD Directive 4145.19, August 13, 1975).

14. Act for the Secretary of Defense in the exercise of authority delegated by the Administrator of General Services to dispose of surplus personal property and to waive prescribed demilitarization requirements under DoD Directive 4160.21 December 5, 1980.

15. Make determinations regarding the donation of suplus personal property to educational activities of special interest to the Armed Forces of the United States, as prescribed in DoD Directive 4160.25, April 30, 1984.

16. Act for the Secretary of Defense to approve the disposal of foreign excess property for substantial benefits or the discharge of claims when it is determined to be in the interest of the United States (DoD Instruction 4160.24, July 24, 1981).

17. Act for the Secretary of Defense in the establishment and administration of policy and guidance governing emergency requirements allocations, priorities, and permits for the use of civil transportation within the continental United States (DoD Directive 3005.7, May 30, 1985).

18. Act for, and exercise the powers of, the Secretary of Defense concerning requests for waiver of the navigation and vessel inspection laws of the United States under Pub. L. 61–801, December 27, 1950 (64 Stat. 1120), except on those matters that have been delegated by the Secretary of Defense to the Secretary of the Army, as prescribed in DoD Directive 5100.21, October 30, 1980.

19. Act for the Secretary of Defense in the field of transportation and traffic management under Title II, section 201(a) of the Federal Property and Administrative Services Act of 1949, June 30, 1949, as amended (40 U.S.C. 481(a)) (DoD Directive 5126.9, June 18, 1979).

20. Act of the Secretary of Defense in establishing policies and providing guidance to DoD Components concerning the efficient and effective use of DoD and commercial transportation resources and the establishment and operation of Transportation Single Manager Agencies (DoD Directive 4500.9, June 26, 1978).

21. Act for the Secretary of Defense regarding DoD participation in, or initiation of, proceedings before transportation regulatory bodies (DoD Instruction 4500.17, January 16, 1969).

22. Serve for the Secretary of Defense as the primary DoD focal point for energy matters and establish an office to discharge this responsibility in accordance with Deputy Secretary of Defense Memorandum, November 17, 1973, as amended by Deputy Secretary of Defense Memorandum, January 21, 1974, as amended by Secretary of Defense Memorandum, August 26, 1974.

Make recommendations to the Department of Energy in connection with facilities for transmission of electric energy and natural gas across borders of the United States, pursuant to the authority given the Secretary of Defense in E.O. 10485, September 5, 1953, as amended by E.O. 12038, February 3, 1978.

24. Pursuant to pertinent provisions of Title 10, United States Code, establish and grant waivers to uniform policies and procedures and review and approve programs and specific projects of DoD Components relating to the design, acquisition, construction, operation, maintenance, and disposal of DoD facilities, and the protection of the natural environment in and around DoD facilities.

25. Act for the Secretary of Defense in managing the execution of all overseas military construction, including the provision of guidance and coordination regarding DoD participation in the NATO Infrastructure Program, as prescribed in DoD Directive 2010.5, March 19, 1965. Establish and chair (a) a permanent European Steering Group whose function is the coordination of all long-range facilities planning and interface of U.S.-funded construction in Europe with the NATO Infrastructure Program, and (b) a Southwest Asia Steering Group in order to resolve major Southwest Asia military construction program planning and execution issues in a rapid and coordinated manner.

26. Act of the Secretary of Defense in the implementation of OMB Circular No. A–76, "Performance of Commercial Activities," as revised, August 4, 1983 (DoD Directive 4100.15, August 12, 1985).

27. Act for, and exercise the powers of, the Secretary of Defense concerning requests for waiver of statutory restrictions on core logistics activities (Section 307, Pub. L. 98–525, October 19, 1984; as amended by section 1231, Pub. L. 99–145, November 8, 1985).

28. Exercise all authorities delegated to the Secretary of Defense by E.O. 12580, January 23, 1987, concerning responses to releases of hazardous substances for DoD facilities and vessels under the Comprehensive Environmental Response Compensation and Liability Act (42 U.S.C. 9601, *et seq.*), as amended by the Superfund Amendments and Reauthorization Act (Pub. L. 99–499, October 17, 1986).

29. Exercise all responsibilities and authority of the Secretary of Defense under Title 10, United States Codes, section 2701, *et seq.*, regarding conduct of the Defense Environmental Restoration Program. The ASD(P&L) may redelegate these authorities, as appropriate, and in writing, except as otherwise specifically indicated above or prohibited by law or regulation.

February 23, 1989.

BILLING CODE 3810–01–M

**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 52**

**[FRL–3529–2]**

**Approval and Promulgation of State Implementation Plans; Alaska**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** By this notice, EPA is approving revisions to the State of Alaska Department of Environmental Conservation (ADEC) rules for stack heights and dispersion techniques which were submitted on June 26, 1987, as a revision to the Alaska state implementation plan (SIP). These revisions were submitted to satisfy the requirements of section 123 (Stack Heights) of the Clean Air Act (hereinafter referred to as the Act).

**EFFECTIVE DATE:** May 1, 1989.

**ADDRESSES:** Copies of the materials submitted to EPA may be examined during normal business hours at:

Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Air Programs Branch, Docket #10A–87–12, Environmental Protection Agency, 1200 Sixth Avenue AT–082, Seattle, Washington 98101.

State of Alaska, Department of Environmental Conservation, 3220 Hospital Drive, Juneau, Alaska 99811.

**FOR FURTHER INFORMATION CONTACT:** David C. Bray, Air Programs Branch AT–082, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone: (206) 442–4253, FTS: 399–4253.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

On July 5, 1983 (48 FR 30823), EPA approved Alaska Department of Environmental Conservation (ADEC) rules which restricted the use of stack heights and dispersion techniques in accordance with section 123 of the Act. EPA determined that these rules satisfied the requirements of its stack height regulations as promulgated on February 8, 1982 (47 FR 5864). On July 8, 1985 (50 FR 27892) EPA promulgated revisions to its 1983 stack height regulations.

In response to the revised regulations, on June 26, 1987, ADEC submitted revised rules regulating the use of stack heights and dispersion techniques as a revision to the State of Alaska implementation plan (SIP).

On December 28, 1987 (52 FR 48837) and corrected on January 15, 1988 (53 FR 1043), EPA proposed to approve the revisions to ADEC's rules and provided a 30-day public comment period on this proposed approval. No comments were received.

EPA's stack height regulations were challenged in *NRDC v. Thomas*, 838 F.2d 1224 (D.C. Cir. 1988). On January 22, 1988, the U.S. Court of Appeals for the D.C. Circuit issued its decision affirming the regulations in large part, but remanding three provisions of EPA for reconsideration. These are:

1. Grandfathering pre-October 11, 1983, within-formula stack height increases from demonstration requirements [40 CFR 51.100(kk)(2)];

2. Dispersion credit for sources originally designed and constructed with merged or multiflue stacks [40 CFR 51.100(hh)(2)(ii)(A)]; and

3. Grandfathering pre-1979 use of the refined H + 1.5L formula [40 CFR 51.100(ii)(2)].

**II. Final Rulemaking Action**

Today, EPA is approving revisions to the ADEC rules regulating the height of stacks and the use of dispersion techniques as a revision to the Alaska SIP.

Although EPA is generally approving ADEC's stack height rules on the grounds that they satisfy 40 CFR Part 51, EPA is also providing notice that this action may be subject to modification when EPA completes rulemaking to respond to the decision in *NRDC v. Thomas*, 838 F. 2d 1224 (D.C. Cir. 1988). If EPA's response to the *NRDC* remand modifies the July 8, 1985 regulations, EPA will notify the ADEC that its rules must be changed to comport with EPA's modified requirements. This may result in revised emission limitations or may affect other actions taken by ADEC and source owners or operators.

**III. Administrative Review**

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b) I certify that this revision will not have a significant economic impact on a substantial number of small entities (See 46 FR 8709).

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 1, 1989. This action may not be challenged later in proceedings to enforce its requirements (see 307(b)(2)).

**List of Subjects 40 CFR Part 52**

Air pollution control, Carbon monoxide, Hydrocarbons, Incorporation by Reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and Recordkeeping requirements, Sulfur oxides.

Date: February 21, 1989.

**William K. Reilly,**

*Administrator.*

**Note:** Incorporation by reference of the State Implementation Plan for the State of Alaska was approved by the Director of the Federal Register on July 1, 1982.

Title 40, Part 52 of the Code of Federal Regulations is amended as follows:

**PART 52—[AMENDED]**

**Subpart C—Alaska**

1. The authority citation for Part 52 continues to read as follows:

**Authority:** 42 U.S.C. 7401–7642.

2. Section 52.70 is amended by adding paragraph (c)(14) to read as follows:

**§ 52.70 Identification of plan.**

* * * * *

(c) * * *

(14) On June 26, 1987, the Commissioner of the Alaska Department of Environmental Conservation submitted revised rules regulating the height of stacks and the use of dispersion techniques, specifically revisions to 18 AAC 50.400(a), 18 AAC 50.530(c), 18 AAC 50.900(16), 18 AAC 50.900(20), 18 AAC 50.900(23), and 18 AAC 50.900.(29), and the deletion of 18 AAC 50.900(17).

(i) Incorporation by Reference.

(A) June 26, 1987 letter from the State of Alaska Department of Environmental Conservation to EPA, Region 10.

(B) August 11, 1987 letter from the State of Alaska Department of Environmental Conservation to EPA, Region 10.

(C) 18 AAC 50.400(a) and 18 AAC 50.900 (16), (20), (23), and (29) as adopted by the State of Alaska Department of Environmental Conservation on December 31, 1986.

3. Section 52.75 is revised to read as follows:

**§ 52.75 Contents of the approved State-submitted implementation plan.**

The following sections of the State air quality control plan (as amended on the dates indicated) have been approved and are part of the current State Implementation Plan:

## Approval and Promulgation of Implementation Plans; Oregon

**AGENCY:** Environmental Protection Agency.

**ACTION:** Final rule.

**SUMMARY:** EPA today approves a new section 025 "Conflict of Interest" in Title 12 "Duties and Powers of Board and Director" of the Lane Regional Air Pollution Authority (LRAPA) rules, as a revision to the Oregon state implementation plan (SIP). This revision was adopted by LRAPA and submitted to the Oregon Department of Environmental Quality (ODEQ), which in turn adopted the new section as a revision to the Oregon Administrative Rules, Chapter 340, Division 20, section 047. On September 28, 1988, the ODEQ submitted the new section to EPA as a revision to the Oregon SIP in order to comply with the requirements of section 128 (State Boards) of the federal Clean Air Act (hereinafter the Act).

**EFFECTIVE DATE:** This action will be effective on May 1, 1989 unless notice is received before March 31, 1989 that someone wishes to submit adverse or critical comments. If such notice is received, EPA will open a formal 30-day comment period on this action.

**ADDRESSES:** Copies of material submitted to EPA may be examined during normal business hours at the following locations:

Public Information Reference Unit, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.
Air Programs Branch, Environmental Protection Agency, Docket 10A–88–9, 1200 Sixth Avenue AT–082, Seattle, Washington 98101.
State of Oregon, Department of Environmental Quality, 811 SW Sixth Avenue, Portland, Oregon 97204–1390.

Comments should be addressed to: Laurie M. Kral, Air Programs Branch AT–082, Environmental Protection Agency, 1200 Sixth Avenue (Docket #10A–88–9), Seattle, Washington 98101.

**FOR FURTHER INFORMATION CONTACT:** David C. Bray, Air Programs Branch AT–082, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone: (206) 442–4253, FTS: 399–4253.

**SUPPLEMENTARY INFORMATION:**

### I. Background

The August 7, 1977, amendments to the Clean Air Act included a new section 128 "State Boards," which requires each SIP to contain provisions which ensure that (1) any board or body which approves permits or enforcement orders under the Act shall have at least a majority of members who represent the public interest and do not derive any significant portion of their income from persons subject to permits or enforcement orders under the Act, and (2) any potential conflicts of interest by members of such board or body, or the head of executive agency with similar powers, be adequately disclosed.

On August 25, 1987 (52 FR 32009), EPA approved State of Oregon rules for conflict of interest of state boards with respect to the ODEQ and the Environmental Quality Commission (EQC). However, on that date, EPA disapproved the Oregon SIP for failing to contain provisions for LRAPA which satisfy the requirements of section 128 of the Act.

On October 23, 1987, the Oregon Environmental Council (OEC) and Kathy Williams, a private citizen, filed suit in the United States Court of Appeals for the Ninth Circuit for review of the August 25, 1987, rulemaking, alleging that EPA had failed to perform a nondiscretionary duty under the Act by not promulgating section 128 provisions applicable to LRAPA.

On August 22, 1988, EPA entered into a stipulated agreement with the OEC et al., for resolution of the civil suit. Specifically, EPA and OEC et al., agreed to allow the State of Oregon an opportunity to prepare and submit a revision to the Oregon SIP addressing the application of section 128 to LRAPA, agreed to a schedule for EPA action on such submittal, and agreed to a schedule for EPA action if the State of Oregon failed to submit a SIP revision. If Oregon submitted its revision to EPA on or before September 30, 1988, EPA agreed to commence review of the submittal and, on or before February 28, 1989, propose approval, disapproval, or other action, and on or before September 30, 1989, take final action on the submittal.

### II. Discussion

On September 28, 1988, ODEQ submitted a new section 025 "Conflict of Interest" in LRAPA Title 12, "Duties and Powers of Board and Director" (incorporated into Oregon Administrative Rules, Chapter 340, Division 20, Section 047) as a revision to the Oregon SIP. This new section incorporates the language of section 128 of the Act into LRAPA Title 12, requiring the Director of LRAPA and the LRAPA Board of Directors to comply with its provisions. After a review of this revision, EPA finds that the new section 025 satisfies the requirements of section 128 of the Act with respect to LRAPA.

Under the terms of the stipulated agreement, EPA is today approving this revision to the Oregon SIP. EPA has chosen to proceed directly to final approval under its new SIP processing procedures (see 54 FR 2214, January 19, 1989) because EPA expects this to be non-controversial action. Such a direct final approval satisfies the terms of the stipulated agreement to propose an action on the submittal before February 28, 1989, and to take final action before September 30, 1989.

### III. EPA Action

EPA is today approving the new section 025 "Conflict of Interest" in LRAPA rule Title 12 "Duties and Powers of Board and Director" (incorporated into OAR 340–20–047) as a revision the Oregon SIP. Additionally, EPA is rescinding its previous disapproval of the Oregon SIP with respect to the requirements of section 128 and LRAPA.

### IV. Administrative Review

The public should be advised that this action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments on any or all of these revisions approve herein, the action on these revisions will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action on those revisions and another will begin a new rulemaking by announcing a proposal of the action on these revisions and establish a comment period.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under 5 U.S.C. section 605(b), I certify that this revision will not have a significant economic impact on a substantial number of small entities (See 46 FR 8709).

Under section 307(b) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 1, 1989. This action may not be challenged later in proceedings to enforce its requirements (See 307(b)(2)).

### List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Date: February 15, 1989.

**Robie G. Russell,**
*Regional Administrator.*

**Note.**—Incorporation by reference of the Implementation Plan for the State of Oregon was approved by the Director of the Office of Federal Register on July 1, 1982.

Title 40, Chapter I of Part 52 of the Code of Federal Regulations is amended as follows:

### PART 52—[AMENDED]

### Subpart MM—Oregon

1. The authority citation of Part 52 continues to read as follows:

**Authority:** 42 U.S.C. 7401–7642.

2. Section 52.1970 is amended by adding paragraph (c)(84) to read as follows:

**§ 52.1970 Identification of plan.**

* * * * *

(c) * * *

(84) On September 28, 1988, the Director of the Department of Environmental Quality submitted the Lane Regional Air Pollution Authority Section 12–025 "Conflict of Interest," of Title 12, "Duties and Powers of Board and Director," adopted as Oregon Administrative Rules, Chapter 340, Division 20, Section 047, as a revision to the State implementation plan.

(1) Incorporation By Reference.

(i) September 28, 1988, letter from the Director of the Department of Environmetal Quality to EPA Region 10.

(ii) Lane Regional Air Pollution Authority Section 12–025 "Conflict of Interest," of Title 12, "Duties and Powers of Board and Director," as adopted as Oregon Administrative Rules, Chapter 340, Division 20, Section 047. This rule was adopted by the Environmental Quality Commission on September 9, 1988.

**§ 52.1985 [Amended]**

3. Section 52.1985(b) is removed.

BILLING CODE 6560–50–M

VOL 54 ISS 39 MR 1 1989 UMI

40 CFR Part 180

[PP 8E3661/R1009; RFL-3530-4]

## Pesticide Tolerance for Fluazifop-Butyl

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** This rule establishes a tolerance for residues of the herbicide fluazifop-butyl in or on the raw agricultural commodity coffee. The Interregional Research Project No. 4 (IR-4) petitioned for this tolerance.

**EFFECTIVE DATE:** March 1, 1989.

**ADDRESS:** Written objections, identified by the document control number [PP 8E3661/R1009], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St. SW., Washington, DC 20460.

**FOR FURTHER INFORMATION CONTACT:** By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (TS-767C), Registration Division (TS-767C), Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. Office location and telephone number: Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-2310.

**SUPPLEMENTARY INFORMATION:** EPA issued a proposed rule, published in the **Federal Register** of December 30, 1988 (53 FR 53017), in which it was announced that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 8E3661 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project, and the Agricultural Experiment Station of Hawaii.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the residues of the herbicide (R)-2-[4[[5-(trifluoromethyl)-2-pyridinyl] oxy]phenoxy]-propanoic acid (resolved isomer of fluazifop), both free and conjugated, and of butyl (R)-2-[4[[5-(trifluoromethyl)-2-pyridinyl]-oxy]phenoxy]propanoate (resolved isomer of fluazifop-butyl), all expressed as fluazifop, in or on the raw agricultural commodity coffee at 0.10 part per million (ppm).

The petitioner proposed that this use of the commodity be limited to Hawaii based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and all other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

### List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

BILLING CODE 6560-50-M

## FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket No. FEMA-6950]

## Changes in Flood Elevation Determinations

**AGENCY:** Federal Emergency Management Agency.

**ACTION:** Interim rule.

**SUMMARY:** This rule lists those communities where modification of the base (100-year) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base (100-year) elevations for new buildings and their contents and for second layer insurance on existing buildings and their contents.

**DATES:** These modified elevations are currently in effect and amend the Flood Insurance Rate Map (FIRM) in effect prior to this determination.

From the date of the second publication of notice of these changes in a prominent local newspaper, any person has ninety (90) days in which he can request through the community that the Administrator reconsider the changes. These modified elevations may be changed during the 90-day period.

**ADDRESSES:** The modified base (100-year) flood elevation determinations are available for inspection at the office of the Chief Executive Officer of the community, listed in the fifth column of the table.

Send comments to that address also.

**FOR FURTHER INFORMATION CONTACT:** Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

**SUPPLEMENTARY INFORMATION:** The numerous changes made in the base (100-year) flood elevations on the FIRM(s) make it administratively infeasible to publish in this notice all of the modified base (100-year) flood elevations contained on the map. However, this rule includes the address of the Chief Executive Officer of the community where the modified base (100-year) flood elevation determinations are available for inspection.

Any request for reconsideration must be based on knowledge of changed conditions, or new scientific or technical data.

These modifications are made pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR Part 65.4.

For rating purposes, the revised community number is listed and must be used for all new policies and renewals.

These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

These elevations, together with the floodplain management measures required by 60.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time, enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities.

The changes in the base (100-year) flood elevations listed below are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

### List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains.

1. The authority citation for Part 65 continues to read as follows:

**Authority:** 42 U.S.C. 4001 et seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

2. Section 65.4 is amended by adding in alphabetical sequence new entries to the table.

| State | County | Location | Date and name of newspaper where notice was published | Chief executive officer of community | Effective date of modification | Community No. |
|---|---|---|---|---|---|---|

## FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 80

[PR Docket No. 88-350; FCC 89-39]

## Amendment of the Maritime Services Rules to Permit Noncommercial Communications on VHF Channels 79 and 80

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This document amends the maritime services rules concerning the use of marine VHF frequencies on the Great Lakes. The new rules will relieve congestion on VHF maritime frequencies now assigned for noncommercial use on the Great Lakes by permitting noncommercial vessels to share the use of channels 79 and 80 with commercial vessels on the Great Lakes. The intended effect is to improve marine VHF communications on the Great Lakes.

**EFFECTIVE DATE:** April 3, 1989.

**ADDRESS:** Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Robert P. DeYoung, Private Radio Bureau, Washington, DC 20554, (202) 632-7175.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Report and Order, PR Docket No. 88-350, adopted February 1, 1989 and released February 17, 1989.

The full text of this Commission decision is available for inspection and copying during normal hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The full text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc. (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

### Summary of Report and Order

These rule amendments are in response to a request from the Michigan Steelhead and Salmon Fisherman's Association to provide additional VHF frequencies for use by noncommercial or recreational vessels on the Great Lakes. These rule amendments will relieve congestion on the Great Lakes on VHF

VOL 54 ISS 39 MR 1 1989 UMI

frequencies currently assigned for use by noncommercial or recreational vessels. Congestion on those frequencies will be alleviated by permitting noncommercial vessels to share use of VHF channels 79 and 80 with commercial vessels on the Great Lakes.

In accordance with section 605(b) of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, 5 U.S.C. 605(b)), the Commission certifies that these rules will not have a significant economic impact on a substantial number of small entities. The rules allow noncommercial vessels to use these frequencies voluntarily. The effect on existing users will not be substantial. The use of the frequencies is limited to the Great Lakes where monitoring and licensing data indicate the least potential impact nationwide. The rule amendments herein have been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements; and will not increase burden hours imposed on the public. The authority for this action is contained in 47 U.S.C. 154(i) and 303 (l) and (r).

**Ordering Clauses**

Accordingly, *it is ordered* that Part 80 is amended as shown at the end of this document.

*It is further ordered* that these rule amendments become effective as indicated in the "**EFFECTIVE DATE**" paragraph of this document.

*It is further ordered* that this proceeding is terminated.

A copy of the *Report and Order* will be served on the Chief Counsel for Advocacy of the Small Business Administration.

**List of Subjects in 47 CFR Part 80**

Maritime Radio Services, Great Lakes, Ship stations, Coast stations.

Federal Communications Commission.

**Donna R. Searcy,**

*Secretary.*

**Final Rules**

Part 80 of Chapter 1 of Title 47 of the Code of Federal Regulations is amended as follows:

## PART 80—STATIONS IN THE MARITIME SERVICES

1. The authority citation for Part 80 continues to read as follows:

**Authority:** Secs. 4, 303 48 Stat. 1066, as amended, 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply 48 Stat. 1064–1068, 1081–1105, as amended; 47 U.S.C. 151–155, 301–609; UST 3450, 3 UST 4726, 12 UST 2377, unless otherwise noted.

2. In § 80.373, paragraph (f) is amended by revising the "Noncommercial" portion of the frequency table to read as follows:

**§ 80.373 Private communications frequencies.**

BILLING CODE 6712–01–M

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

### 50 CFR Part 301

**[Docket No. 81270–9036]**

### Pacific Halibut Fisheries

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

**ACTION:** Notice of approval of a Pacific halibut catch sharing plan.

**SUMMARY:** NOAA announces approval by the Secretary of Commerce (Secretary) of a Catch Sharing Plan developed and adopted by the Pacific Fishery Management Council (Council) to allocate the catch of Pacific halibut in 1989 between treaty Indian and non-Indian commercial and recreational fishermen in International Pacific Halibut Commission (IPHC) statistical Area 2A.

The approved 1989 Catch Sharing Plan (Plan) allocates the total allowable catch of Pacific halibut in Area 2A as established by the IPHC between domestic users in accordance with the Northern Pacific Halibut Act of 1982. The intended effect of the Plan is to ensure the conservation and management of Pacific halibut stocks by limiting the total harvest to the level determined by the IPHC to be biologically acceptable while equitably distributing the allowable harvest among affected user groups in Area 2A. The Plan is for 1989 only and has been forwarded by the Council to the IPHC for adoption and implementation by regulations.

**DATE:** Effective February 28, 1989.

**ADDRESSES:** Copies of the Plan are available from Rolland A. Schmitten, Regional Director, National Marine Fisheries Service, Northwest Region, 7600 Sand Point Way NE., BIN C15700, Bldg. 1, Seattle, WA 98115, or Lawrence D. Six, Executive Director, Pacific Fishery Management Council, Metro Center, Suite 420, 2000 SW. First Ave., Portland, OR 97201.

**FOR FURTHER INFORMATION CONTACT:** William L. Robinson at 206–526–6140 or Lawrence D. Six at 503–221–6352.

**SUPPLEMENTARY INFORMATION:** The Northern Pacific Halibut Act, Pub. L. 97–176, 16 USC 773c(c) authorizes the Regional Fishery Management Council having authority for the geographic area concerned to develop regulations governing the allocation of Pacific halibut catch in U.S. Convention waters which are in addition to, but not in conflict with, the regulations of the IPHC. The geographic area involved is all U.S. marine waters lying south of the U.S./Canadian border including Puget Sound, known as IPHC statistical Area 2A. The Council's process for developing its proposed and final Plan in Area 2A involved State, Federal and treaty Indian fishery managers, user group representatives and the general public.

The Council adopted a proposed Plan for public review at its November 16–18, 1988 public meeting in Portland, Oregon. The Council distributed the proposed Plan to user groups on the West Coast and submitted it to the Secretary for review and publication in the **Federal Register** for public comment. The proposed Plan, a description of the need for the Plan, and a description of the Council's process for developing the proposed Plan were published in the **Federal Register** with a request for public comments on January 10, 1989 (54 FR 834). No written comments on the proposed plan were received by the Secretary or the Council. However, the Council received eleven written comments on its proposed recommendations to the IPHC on seasons and size/bag limits for the non-Indian recreational fisheries. These comments were considered by the Council separately from the Plan.

At its January 12, 1989 public meeting, the Council reviewed and considered the recommendations of its Halibut Select Group (HSG) and public comments made on the Plan. In addition, the Council considered the written and public comments made at the meeting on its proposed recommendations to the IPHC on recreational seasons and size/bag limits. The Council subsequently adopted a final Plan and final recommendations to the IPHC on non-Indian recreational fisheries. The final Plan was subsequently forwarded to the Secretary for review and approval and to the IPHC for implementation by regulations. In addition, the Council submission to the IPHC included its final recommendations for harvest goals, proposed seasons, and size and bag limits for the non-Indian recreational fisheries in Area 2A.

The final Plan is essentially the same as proposed except for proportionate reductions in the allocations due to an anticipated reduction in the total allowable catch (TAC) in Area 2A from 750,000 to 650,000 pounds. The Council was advised by IPHC staff at the January 12, 1989 public meeting that Pacific halibut stocks had declined coast-wide and therefore the IPHC staff would be recommending a reduced TAC in Area 2A of 650,000 pounds rather than the 750,000 pounds upon which the proposed Plan was based. In addition, in response to HSG recommendations and public comments, the Council made some minor changes to the proposed recreational seasons and bag limits that were recommended to the IPHC.

**1989 Catch Sharing Plan for Area 2A**

The 1989 Plan as approved by the Secretary is for 1989 only and distributes the anticipated TAC in Area 2A as subquotas between the three user groups as follows:

| | Pounds |
|---|---|
| Treaty Indian subquota | 130,000 |
| Reserve | 22,000 |
| Non-Indian commercial subquota | 274,000 |
| Non-Indian recreational subquota | 224,000 |
| Total | 650,000 |

The Plan is based on the 650,000 pound TAC as determined at the IPHC's January 24–27, 1989 annual meeting in Vancouver, B.C., Canada. The approved Plan provides that the subquotas and the reserve will be adjusted upward or downward proportionately with any change in the TAC.

The reserve is set aside for treaty Indian use, although parts or all of the reserve may be released to non-Indian recreational users during the season if it is determined that all or parts of the reserve are surplus to tribal needs. The reserve release would occur no later than July. Further, if it is determined at that time that some portion of the treaty Indian subquota of 130,000 pounds is surplus to tribal needs, then that portion may be released to the non-Indian fisheries. Additional details of the approved Plan are as follows:

1. The treaty Indian subquota will include both commercial and ceremonial and subsistence (C&S) fishing. The treaty Indian commercial fishing season will extend from March 1 through October 31, 1989 and C&S fishing will be permitted all year. The IPHC commercial 32 inch size limit will apply to fish sold by tribal commercial fishermen; however, no size limits will apply to C&S-caught halibut, including C&S fish retained during commercial fishing. Other IPHC regulations on commercial fishing gear and C&S daily bag limits before and after the commercial fishing season will remain the same as in 1988.

2. The allocation of Pacific halibut among non-Indian fisheries will continue to be divided 55 percent to commercial users and 45 percent to recreational users in accordance with the two-year catch sharing plan approved by the Secretary in 1988 (53 FR 7528, March 9, 1988). The 1989 Plan also provides for possible release of unharvested portions of the non-Indian commercial subquota to non-Indian recreational users. The non-Indian recreational fisheries are divided into four geographic areas within Area 2A as follows: (1) Inside waters of Washington State eastward of the Bonilla-Tatoosh line; (2) North coastal Washington waters from the U.S./Canada border to the Queets River; (3) Southern Washington and northern Oregon waters from the Queets River to Cape Falcon; and (4) Oregon and California waters south of Cape Falcon.

Separate from the Plan, the Council developed recommendations for non-Indian recreational seasons and size/bag limits for the non-Indian recreational catch which are designed to achieve the non-Indian recreational allocation. Seasons and size/bag limits recommended by the Council were divided into the four recreational areas described in the Plan.

**Classification**

The approved 1989 Plan is a general statement of agency policy which does not require notice and comment rulemaking under the Administrative Procedure Act at 5 U.S.C. 553(b)(A). Consequently, the Regulatory Flexibility Act does not apply.

Based on the findings of a regulatory impact review prepared for the proposed Plan to fulfill the requirements of E.O. 12291, the Under Secretary for Oceans and Atmosphere has concluded that actions taken under the Plan are not major and a Regulatory Impact Analysis is not required. An Environmental Assessment (EA) was prepared for the 1988 Plan in accordance with the National Environmental Policy Act (NEPA) and the Assistant Administrator for Fisheries, NOAA, determined that any action taken under the Plan would not have any significant adverse impact on the human environment. Because the alternatives and environmental impacts of the 1989 Plan are no different than those evaluated in the EA for the 1988 Plan, the Assistant Administrator for Fisheries, NOAA, has determined that this action is categorically excluded from NEPA requirements to prepare an EA in accordance with paragraph 5a(3) of the NOAA Directives Manual 02–10. Copies of the 1989 regulatory impact review and the 1988 EA and 1989 NEPA analysis are available from the addresses above.

The approved Plan does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612, nor does it contain any collection of information requirement subject to the Paperwork Reduction Act.

As required by Section 307 of the Coastal Zone Management Act, the coastal States of Washington, Oregon and California have been notified of the determination that this action is consistent to the maximum extent practicable with applicable State coastal zone management programs as required.

# Proposed Rules

Federal Register
Vol. 54, No. 39
Wednesday, March 1, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### 7 CFR Part 927

[Docket No. FV-89-024]

### Winter Pears Grown in Oregon, Washington and California; Proposed Increase in Expenses for 1988-89 Fiscal Period

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** This proposed rule would authorize an increase in expenditures for the Winter Pear Control Committee (committee) established under Marketing Order 927 for the 1988-89 fiscal year. The expenses would be increased from $3,354,351 to $3,802,846. The increase is needed to cover additional market promotion and advertising activities needed to market the record large 1988-89 winter pear crop.

**DATE:** Comments must be received by March 13, 1989.

**ADDRESS:** Interested persons are invited to submit written comments concerning this rule to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456. Three copies of all written materials shall be submitted, and they will be available for public inspection in the Office of the Docket Clerk during regular business hours. All comments should reference the docket number and date and page number of this issue of the **Federal Register**.

**FOR FURTHER INFORMATION CONTACT:** Patrick Packnett, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-So., Washington, DC 20090-6456, telephone (202) 475-3862.

**SUPPLEMENTARY INFORMATION:** This rule is proposed under Marketing Order No. 927 (7 CFR Part 927) regulating the handling of winter pears grown in Oregon, Washington and California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

A final rule establishing expenses in the amount of $3,354,351 for the committee for the fiscal period ending June 30, 1989, was published in the **Federal Register** on August 5, 1988 [53 FR 29441]. Such expenses included $2,774,857 for "paid advertising" as a "contingency" fund of $209,499. The final rule also fixed an assessment rate to be levied on winter pear handlers during the 1988-89 fiscal period.

In a recently conducted mail ballot, the committee voted unanimously to increase its budget of expenses from $3,354,351 to $3,802,846. Of the $448,495 increase in expenditures, $337,803 would be for additional "paid advertising" deemed necessary to market the record large 1988-89 crop. These additional funds are to be allocated among the existing promotional projects which appear to be achieving the best results. The remainder of the proposed increase, $110,692, would be added to the "contingency" expenditures. Contingency funds may be used for emergency spending in any budget category, including promotion and paid advertising.

Because of the unexpected record large crop, additional assessment funds are available to cover the proposed increase in expenses. Hence, no increase in the assessment rate was recommended by the committee.

Therefore, the Administrator of AMS has determined that this action would not have a significant economic impact on the substantial number of small entities.

Based on the foregoing, it is found and determined that a comment period of less than 30 days is appropriate because the budget increase approval needs to be expedited. The committee needs to have authority to pay its expenses which are incurred on the continuous basis and to conduct the additional promotion activities deemed necessary to market the record large crop.

### List of Subjects in 7 CFR Part 927

Marketing agreement and order, Winter pears, Oregon, Washington, California.

For reasons set forth in the preamble, it is proposed that § 927.228 be amended as follows:

### PART 927—WINTER PEARS GROWN IN OREGON, WASHINGTON AND CALIFORNIA

1. The authority citation for 7 CFR Part 927 continues to read as follows:

**Authority:** Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 927.228 is amended as follows:

**§ 927.228 [Amended]**

Section 927.228 is amended by changing "$3,354,351" to "$3,802,846".

Dated: February 24, 1989.

**William J. Doyle,**

*Associate Deputy Director, Fruit and Vegetable Division.*

[FR Doc. 89-4732 Filed 2-28-89; 8:45 am]

BILLING CODE 3410-02-M

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

### 14 CFR Part 39

[Docket No. 88-NM-202-AD]

### Airworthiness Directives; McDonnell Douglas Model DC-9-81, -82, and -87 Series Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** This notice proposes a new airworthiness directive (AD), applicable to McDonnell Douglas Model DC-9-81, -82, and -87 series airplanes equipped with certain Loral Aircraft Braking Systems main landing gear wheels, which would require inspection of the main landing gear wheels, and modification or replacement of cracked wheels. This proposal is prompted by reports of cracks found in wheels. This condition, if not corrected, could result in wheel failure and potential damage to adjacent tires, engines, or the airplane.

**DATE:** Comments must be received no later than April 24, 1989.

**ADDRESSES:** Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-202-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Loral Aircraft Braking Systems, 1210 Massillon Road, Akron, Ohio 44315-0001. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 3229 East Spring Street, Long Beach, California.

**FOR FURTHER INFORMATION CONTACT:** Mr. Robert M. Stacho, Aerospace Engineer, Systems and Equipment Branch, ANM-131L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; telephone (213) 988-5338.

**SUPPLEMENTARY INFORMATION:**

### Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

### Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-202-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

*Discussion:* Approximately forty instances of cracked wheels have been reported by operators of Model DC-9-80 series airplanes equipped with Loral Aircraft Braking Systems main landing gear wheels, part numbers 5004320-2, -3, -4, -5, -6, and -7. The reported cracked wheels had accumulated between 3200 and 8000 landings when discovered. Investigation revealed that the cracking initiates at the inboard wheel subassembly key boss screw holes. (This key boss screw hole area has not been previously inspected by all operators because this area was not specifically addressed in the wheel manufacturer's maintenance manual.) Analyses by the wheel and airframe manufacturers have determined that the cracks are due to fatigue and are attributed to damaged key boss screw threads and/or corrosion. This condition, if not corrected, could result in wheel failure and potential damage to adjacent tires, engines, or the airplane.

The FAA has reviewed and approved Loral Aircraft Braking Systems Service Bulletin MD81-32-1/MD82-32-1/MD87-32-1, dated July 7, 1988, which describes ultrasonic and eddy current inspections of the Loral Aircraft Braking Systems main landing gear wheels, Part Numbers 5004320-2, -3, -4, -5, -6, and -7, for cracks, and replacement of the key boss screws if no cracks are found.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require inspection of the wheel, replacement of the key boss screws, and removal of cracked wheels, if found, in accordance with the service bulletin previously mentioned. Also, this AD proposes to revise the FAA-approved maintenance program to include repetitive inspections of the wheel.

There are approximately 170 Model DC-9-81, -82, and -87 series airplanes in the worldwide fleet that are equipped with this Loral wheel. It is estimated that 32 airplanes of U.S. registry would be affected by this AD, that it would take approximately 10 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $12,800.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 21612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model DC-9-80 series airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

### List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

### The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

### PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

**§ 39.13 [Amended]**

2. By adding the following new airworthiness directive:

**McDonnell Douglas:** Applies to Model DC-9-81, -82, and -87 series airplanes, equipped with Loral Aircraft Braking Systems main landing gear wheels, Part Number 5004320-2, -3, -4, -5, -6, and -7, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent wheel failure, accomplish the following:

A. Prior to the accumulation of 2,000 landings on the wheel or within the next 350 landings after the effective date of this AD, whichever occurs later, unless the wheel was inspected within the last 700 landings, inspect the wheel assembly for cracks in accordance with Loral Service Bulletin MD 81-32-1, MD-82-32-1, and MD-87-32-1, dated July 7, 1988.

1. If no cracks are found, replace the key boss screws in accordance with the previous Loral Service Bulletin.

2. If crack(s) are found, replace the wheel before further flight.

B. Within 90 days after the effective date of this AD, revise the FAA-approved

VOL 54 ISS 39 MR 1 1989 UMI

maintenance program to include inspection of the wheel assembly, and replacement, if necessary, as specified in paragraph A., above, at every fourth tire change or every 1,500 landings, whichever occurs first.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Los Angeles Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with inspection requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Loral Aircraft Braking Systems, 1210 Massillon Road, Akron, Ohio 44315–0001, Attention: Manager of Product Integrity. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

Issued in Seattle, Washington, on February 17, 1989.

**Leroy A. Keith,**

*Manager, Transport Airplane Directorate, Aircraft Certification Service.*

**14 CFR Part 39**

**[Docket No. 88-ASW-37]**

## Airworthiness Directives; Schweizer Aircraft Corporation Model 269A, 269A–1, 269B, and 269C Helicopters

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** This notice proposes to adopt an airworthiness directive (AD) that would require inspection of all throttle cable assemblies for type of construction, removal of throttle cables that incorporate aluminum end fittings, and replacement within 25 hours' time in service of such cable assemblies with swaged steel end fittings on Schweizer Aircraft Corporation Model 269A, 269A–1, 269B, and 269C helicopters. A daily check also would be required on all remaining cable assemblies with threaded steel end fittings until they are replaced by cable assemblies with swaged steel end fittings within 400 hours' time in service or 12 months from the effective date of this AD, whichever occurs first. The proposed AD is needed to prevent throttle cable end fitting separation in flight which could result in loss of throttle control and subsequent damage or loss of the rotorcraft.

**DATES:** Comments must be received on or before April 17, 1989.

**ADDRESSES:** Comments on the proposal may be mailed in duplicate to: Regional Rules Docket, Office of the Assistant Chief Counsel, FAA, Fort Worth, Texas 76193–0007, or delivered in duplicate to: Office of the Assistant Chief Counsel, FAA, Room 158, Building 3B, 4400 Blue Mound Road, Fort Worth, Texas. Comments must be marked: Docket No. 88–ASW–37. Comments may be inspected in Room 158, Building 3B, Office of the Assistant Chief Counsel, between 8 a.m. and 4 p.m. weekdays, except Federal holidays

The applicable service bulletin (Schweizer Service Information Notice (SIN) N–210, dated April 15, 1988) may be obtained from Schweizer Aircraft Corporation, P.O. Box 147, Elmira, New York 14902.

A copy of SIN N–210, dated April 15, 1988, is contained in the Rules Docket, Office of the Assistant Chief Counsel, FAA, 4400 Blue Mound Road, Fort Worth, Texas.

**FOR FURTHER INFORMATION CONTACT:** Mr. Raymond J. O'Neill, ANE–174, New York Aircraft Certification Office, FAA, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581, telephone (516) 791–7421.

**SUPPLEMENTARY INFORMATION:** Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the FAA before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket, Office of Assistant Chief Counsel, 4400 Blue Mound Road, Fort Worth, Texas, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: Comment to Docket No. 88–ASW–37. The postcard will be date/time stamped and returned to the commenter.

The FAA has received a report of an end fitting separating from the throttle cable assembly, resulting in loss of throttle control which prevented an increase of power during the final flare prior to landing. A hard landing ensued, causing damage to the helicopter.

Subsequent investigations revealed that if aluminum fittings (either threaded or swaged) or threaded steel end fittings are installed on throttle cable assemblies, they may loosen in service due to the effects of vibration and improper maintenance and eventually may separate and result in loss of throttle control in flight. Threaded fittings are secured to the cable with locking compound and are not intended to be disassembled or loosened after initial installation. Looseness in the assembly can permit relative motion and consequent thread wear, resulting in cable separation, and loss of throttle control. All aluminum fittings (swaged or threaded) because of their relative softness, are particularly vulnerable to wear, galling, and subsequent failure and require more rapid replacement than their threaded steel counterparts. Nearly one-half of the currently installed cable assemblies are fabricated with either aluminum end fittings or with threaded steel end fittings. Fitting failure can occur during any phase of flight and may lead to subsequent loss of the rotorcraft.

Schweizer issued SIN No. N–210 on April 15, 1988, addressing identification, inspection, and replacement, if necessary, of throttle cable end fittings. Service experience has shown that cable assemblies using swaged steel end fittings correct the problem of end fitting loosening and failure. The Schweizer SIN N–210 specifies replacement end fittings to be swaged steel end fittings.

Since this condition is likely to exist or develop in other helicopters of the same type design, an AD is being issued which requires inspection of throttle cable assemblies and replacement of end fittings, as necessary, on Schweizer Model 269A, 269A–1, 269B, and 269C helicopters.

The regulations proposed herein would not have substantial direct effects

on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this proposed regulation involves a total of 1,000 helicopters; it requires a one-time, 1-hour inspection at a cost of $40 per helicopter. It is estimated that five hundred of the helicopters will require daily inspections and throttle cable replacement at a cost of $2,300 per helicopter. The total fleet cost to comply with the AD is estimated as $1,190,000. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not "a significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979; (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects 14 CFR Part 39**

Air transportation, Aircraft, Aviation safety, Safety.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

**PART 39—AIRWORTHINESS DIRECTIVES**

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85.

**§ 39.13 [Amended]**

2. By adding the following new AD:

**Schweizer Aircraft Corporation:** Applies to all Schweizer Model 269A, 269A–1, 269B, and 269C helicopters, certificated in any category, with Serial Numbers 0004 through 1347 which have had throttle cables replaced in the field. (Docket No. 88–ASW–37)

Compliance is required as indicated, unless already accomplished.

To prevent loss of throttle control, accomplish the following:

(a) Within the next 25 hours' time in service or within 30 days, whichever occurs first after the effective date of this AD, identify, inspect, and replace as indicated, the throttle cable assembly as follows:

(1) Determine if aluminum fittings are installed as follows:

(i) Check both end fittings of the cable assembly with a magnet to determine whether they are magnetic.

Note.—Cables which incorporate magnetic fittings (magnet adheres to fitting) do not require the hardness test specified by step (a)(1)(ii) below. For these cable assemblies, omit step (a)(1)(ii) and continue inspection with step (2) below.

(ii) If the magnet does not adhere to the fitting, perform a hardness test on the fitting. If Rockwell hardness is less than B–85, remove and replace the cable assembly with a swaged steel cable assembly in accordance with paragraph (c) of this AD before further flight.

Note.—Performance of the hardness test will require removal of the throttle cable assembly from the helicopter in accordance with standard maintenance instructions.

(2) Visually check both ends of the cable to determine whether the cable incorporates swaged or threaded steel and fittings.

Note.—Throttle cables which incorporate swaged end fittings may be identified by six evenly spaced flat spots around the barrel of the fitting just behind the lug. Threaded end fittings incorporate a cylindrical barrel (no flat spots).

(3) If cable incorporates swaged steel end fittings (as determined from steps (a) (1) and (2) above), further compliance is not required. For these cable assemblies, record compliance in the helicopter log book as "THROTTLE CABLE WITH SWAGED STEEL END FITTINGS INSTALLED."

(4) If cable incorporates a threaded steel end fitting (as determined from steps (a) (1) and (2) above), perform an inspection before further flight and perform repetitive daily inspections in accordance with paragraph (b) of this AD until cable is replaced in accordance with paragraph (c) of this AD.

(5) Record compliance with paragraph (a) of this AD in the compliance record of the helicopter log book.

(b) Prior to the first flight of each day, conduct a visual check of throttle cable assemblies with threaded steel end fittings as follows:

(1) Inspect cable end fittings for general condition and security of attachment. If any abnormality or damage is noted, replace cable assembly in accordance with paragraph (c) of this AD.

(2) Using a flashlight, visually inspect cable push rod for exposed threads adjacent to end fitting (both ends of cable assembly).

Note.—The cable push rod is the movable rod that is attached directly to the cable end fitting (lug).

(3) If threads are visible, replace cable assembly before further flight, in accordance with paragraph (c) of this AD.

(4) Record compliance with paragraph (b) of this AD in the compliance record of the helicopter log book.

(c) Within the next 400 hours' time in service from the effective date of this AD, or within 12 months, whichever occurs first, replace with swaged steel end fittings all threaded steel end fittings which were not replaced during the inspections and rework required by paragraphs (a) and (b) of this AD. Replacement parts applicability is as follows:

| Model | Swaged Steel Cable Assembly Part Numbers (P/N) |
|---|---|
| 269A | 269A4683–9 |
| 269A–1 | 269A4683–9 |
| 269B | 269A4683–7 |
| 269C | 269A4683–7 |

(1) Remove throttle control cable in accordance with Basic Helicopter Maintenance Instructions (HMI), paragraph 4–11.

Caution: Do not bend throttle cable support tubes more than 8 degrees from centerline of cable. Doing so could cause deformation of the support tubes, premature failure of the cable, and loss of throttle control.

Note.—The cable support tube is the stationary cylinder on the end of the cable through which the cable push rod slides.

(2) Install P/N 269A4683–7 or –9 throttle control cable assembly in accordance with Basic HMI, paragraph 4–11.

(3) Rig throttle control in accordance with Basic HMI.

(4) Check idle speed and idle mixture in accordance with appropriate maintenance instructions. (Adjust as required.)

Note.—Installation of the upgraded cable assembly, P/N 269A4683–7 or –9, cancels the repetitive inspection required by paragraph (b) of this AD.

(5) Record compliance with paragraph (c) of this AD in the compliance record and in the maintenance record of the helicopter log book.

Note.—The instructions in this AD are similar to those contained in Schweizer SIN N–210, dated April 15, 1988.

(d) Upon the submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, New York Aircraft Certification Office, FAA, New England Region, may adjust the compliance times specified in this AD.

(e) An alternate method of compliance which provides an equivalent level of safety with this AD may be used when approved by the Manager, New York Aircraft Certification Office, 181 South Franklin Avenue, Valley Stream, New York 11581.

(f) In accordance with FAR §§ 21.197 and 21.199, flight is permitted to a base where the requirements of this AD may be accomplished.

Issued in Fort Worth, Texas, on February 14, 1989.

**L.B. Andriesen,**

*Manager, Rotorcraft Directorate, Aircraft Certification Service.*

VOL 54 ISS 39 MR 1 1989 UMI

14 CFR Part 39

[Docket No. 88-NM-203-AD]

## Airworthiness Directives; Boeing Model 737 Series Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** This notice proposes a new airworthiness directive (AD), applicable to all Boeing Model 737 series airplanes through line number 1581 with a second observer's seat installed, which would require installation of a placard, inspection of the second observer's seat for missing fasteners that may have been omitted during installation, and repair, if necessary. This proposal is prompted by reports of two missing fasteners that were inadvertently omitted on some airplanes during the installation of the second observer's seat, and are required to secure that seat to the forward lavatory. This condition, if not corrected, could result in failure of the attaching hardware to provide adequate strength for the lavatory mounted second observer's seat.

**DATE:** Comments must be received no later than April 24, 1989.

**ADDRESSES:** Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-203-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

**FOR FURTHER INFORMATION CONTACT:** Mr. Pliny Brestel, Airframe Branch, ANM-120S, telephone (206) 431-1931. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

**SUPPLEMENTARY INFORMATION:**

### Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

### Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-203-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

### Discussion:

The manufacturer has reported that two fasteners may have been omitted on some Boeing Model 737 series airplanes when installing the second observer's seat on the forward wall of the forward lavatory. The seat installation requires that those fasteners be in place in order to provide adequate strength when the seat is occupied during flight or emergency landing conditions.

The FAA has reviewed and approved Boeing Service Letter 737-SL-25-41, dated October 14, 1988, which describes procedures for inspection of the second observer's seat installation for missing fasteners, and repair, if necessary.

Since this condition is likely to exist on other airplanes of this same type design, an AD is proposed which would require installation of a placard, inspection of the second observer's seat installation, and repair, if necessary, in accordance with the service letter previously mentioned.

There are approximately 1,554 Model 737 series airplanes of the affected design in the worldwide fleet. It is estimated that 722 airplanes of U.S. registry would be affected by this AD, that it would take approximately two manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The placard may be manufactured locally and the cost is expected to be negligible. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $57,760.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model 737 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

### List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

### The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

**PART 39—[AMENDED]**

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

**§ 39.13 [Amended]**

2. By adding the following new airworthiness directive:

**Boeing:** Applies to all Model 737 series airplanes through line number 1581, equipped with a second observer's seat, certificated in any category. Compliance required as indicated, unless previously accomplished.

To ensure structural integrity of the second observer's seat, accomplish the following:

A. Within 30 days after the effective date of this AD, install a placard above the second observer's seat, stating: "NO OCCUPANCY." This placard may be removed once the terminating action of paragraph B., below, has been accomplished.

B. Within 6 months after the effective date of this AD, inspect the second observer's seat installation for missing fasteners, in accordance with Boeing Service Letter 737-SL-25-41, dated October 14, 1988. If fasteners are found to be missing, repair prior to further flight, in accordance with the service bulletin.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

**Note.**—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on February 17, 1989.

**Leroy A. Keith,**

*Manager, Transport Airplane Directorate, Aircraft Certification Service.*

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 88-NM-218-AD]

## Airworthiness Directives; British Aerospace Model BAC 1-11 200 and 400 Series Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** This notice proposes a new airworthiness directive (AD), applicable to British Aerospace Model BAC 1-11 200 and 400 series airplanes, which would require repetitive visual inspections of the fuselage station 178 frame splice joint, skin, stringers, and connecting structure in the crown area for cracks, and repair of all cracks prior to further flight. This proposal is prompted by reports of fatigue cracks found in the fuselage crown area of the frame joint at Station 178. This condition, if not corrected, could compromise the structural capability of the fuselage.

**DATES:** Comments must be received no later than April 24, 1989.

**ADDRESSES:** Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-218-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from British Aerospace, Inc., Service Bulletin Librarian, P.O. Box 17414, Dulles International Airport, Washington, D.C. 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

**FOR FURTHER INFORMATION CONTACT:** Mr. William Schroeder, Standardization Branch, ANM-113; telephone (206) 431-1565. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

**SUPPLEMENTARY INFORMATION:**

### Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

### Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-218-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

### Discussion

The United Kingdom (UK) Civil Aviation Authority (CAA), in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on certain British Aerospace BAC 1-11 series airplanes. There have been numerous reports of cracks found in the frame splice joint at fuselage Station 178 and associated structure in the fuselage crown area between stringers 2 left and 2 right. The cracking has initiated due to fatigue occurring in areas of stress concentration. This condition, if not corrected, could compromise the structural capability of the fuselage.

British Aerospace has issued Alert Service Bulletin 53-A-PM5964, Issue 2, dated June 1, 1988, which describes procedures for repetitive visual inspections for cracking of the fuselage frame splice joint, skin, stringers, and connecting structure at fuselage station 178 between stringers 2 left and 2 right, and repair, if necessary. The United Kingdom CAA has classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require repetitive visual inspection for fatigue cracking in the area of fuselage joint station 178, and repair, if necessary, in accordance with the service bulletin previously described.

Although the British Aerospace Service Bulletin recommends conducting continued operations with cracks that do not exceed specified limits, the FAA has determined that continued operation of airplanes with damage is unacceptable when undetected multiple site damage may be involved. Therefore, the proposed AD would require repair of damaged parts prior to further flight.

It is estimated that 70 airplanes of U.S. registry would be affected by this AD, that it would take approximately 1 manhour per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $2,800.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and

VOL 54 ISS 39 MR 1 1989 UMI

the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, British Aerospace Model BAC 1-11 series airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

**List of Subjects in 14 CFR Part 39**

Aviation safety, Aircraft.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

**PART 39—[AMENDED]**

The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

**British Aerospace:** Applies to all Modal BAC 1-11 200 and 400 series airplanes, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent structural failure of the fuselage accomplish the following:

A. Prior to the accumulation of 30,000 landings or within 1,000 landings after the effective date of this AD, whichever occurs later, and thereafter at intervals not to exceed 1,000 landings, perform visual inspections of the fuselage frame splice joint, skin, stringers, and connecting structure at fuselage station 178 between stringers 2 left and 2 right, in accordance with British Aerospace Alert Service Bulletin 53-A-PM5064, Issue 2, dated June 1, 1988. Any cracks found must be repaired prior to further flight, in accordance with the service bulletin.

B. If cracks are found during inspections required by paragraph A., perform additional inspections in accordance with paragraph 2.2. of the Accomplishment Instructions, of British Aerospace Alert Service Bulletin 53-A-PM5064, Issue 2, dated June 1, 1988, and repair all cracks, prior to further flight, in accordance with the service bulletin.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note.— The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM-113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to British Aerospace, Inc., Service Bulletin Librarian, P.O. Box 17414, Dulles International Airport, Washington, D.C. 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on February 17, 1989.

**Leroy A Keith,**

BILLING CODE 4910-13-M

---

**14 CFR Part 39**

**[Docket No. 89-NM-01-AD]**

**Airworthiness Directives; Lockheed Model 382 Series Airplanes**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** This notice proposes a new airworthiness directive (AD), applicable to Lockheed Model 382 series airplanes, which would require periodic inspections of the nose landing gear (NLG) strut assemblies to detect corrosion and cracking in the steering collar area. This proposal is prompted by a report of failure of a NLG strut assembly, which resulted in the separation of the NLG from the airplane during landing. This condition, if not corrected, could lead to loss of controllability of the airplane upon landing.

**DATE:** Comments must be received no later than April 24, 1989.

**ADDRESSES:** Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-01-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Lockheed Aeronautical Systems Company, 86 South Cobb Drive, Marietta, Georgia 30063. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Atlanta Aircraft Certification Office, FAA, Central Region, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia.

**FOR FURTHER INFORMATION CONTACT:** Mr. Jack Bentley, Aerospace Engineer, Airframe Branch (ACE-120A), Atlanta Aircraft Certification Office, FAA, Central Region, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349; telephone (404) 991-2910.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

**Availability of NPRM**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-01-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

**Discussion**

The FAA has received a report that a Lockheed Model 382G series airplane experienced a separation of the nose landing gear (NLG) during landing of the airplane. The separation occurred as a result of the failure of the NLG strut assembly due to stress corrosion cracking in the steering collar area. This condition, if not corrected, could lead to failure of the NLG, and resulting loss of controllability of the airplane upon landing.

The FAA has reviewed and approved Lockheed Service Bulletin 382-32-21, dated September 5, 1979, which describes procedures for inspection for corrosion and cracking in the NLG strut assembly, part number 388071-3, and rework, if necessary; and Lockheed Service Bulletin 382-32-23, dated March 17, 1978, which describes procedures for installation of an improved NLG strut assembly, part number 3303591-1.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require repetitive inspections and rework or replacement, if necessary, of the NLG strut assembly, in accordance with Lockheed Service Bulletin 382-32-21. Additionally, this proposed AD provides for terminating action for the repetitive inspections by installing the improved NLG strut assembly in accordance with Lockheed Service Bulletin 382-32-23. The improved NLG strut assembly, was installed in production on Model 382 series airplanes beginning with serial number 4638; therefore, those airplanes are not subject to the requirements of this proposed AD.

There are approximately 691 Lockheed Model 382 series airplanes of the affected design in the worldwide fleet. It is estimated that 18 airplanes of U.S. registry would be affected by this AD, that it would take approximately 74 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $53,280.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assesament.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because Lockheed Model 382 series airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

**List of Subjects in 14 CFR Part 39**

Aviation safety, Aircraft.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

**PART 39—[AMENDED]**

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

**§ 39.13 [Amended]**

2. By adding the following new airworthiness directive:

**Lockheed:** Applies to Model 382 series airplanes, serial numbers 3946 through 4637, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent failure of the nose landing gear strut assembly, accomplish the following:

A. Within the next 250 hours time-in-service after the effective date of this AD, and thereafter at intervals not to exceed 3,000 hours time-in-service, perform an inspection for corrosion of the nose landing gear strut assembly, part number 388071-3, in accordance with Lockheed Service Bulletin 382-32-31, dated September 5, 1979.

1. If corrosion is detected which is within the limits specified in the service bulletin, rework in accordance with the service bulletin prior to further flight.

2. If corrosion is detected which is outside the limits specified in the service bulletin, prior to further flight, accomplish one of the following:

a. Replace the defective cylinder assembly, part number 371675-1 with a serviceable cylinder assembly; or

b. Modify the nose landing gear strut and components in accordance with Lockheed Service Bulletin 382-32-23, dated March 17, 1978.

B. Modification of the nose landing gear strut and components in accordance with Lockheed Service Bulletin 382-32-23, dated March 17, 1978, constitutes terminating action for the inspection requirements of this AD.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Atlanta Aircraft Certification Office, FAA, Central Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Atlanta Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Lockheed Aeronautical Systems Company, 86 South Cobb Drive, Marietta, Georgia 30063. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Atlanta Aircraft Certification Office, FAA, Central Region, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia.

Issued in Seattle, Washington, on February 17, 1989.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of that proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ASO-6." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the Covington, KY, Control Zone by deleting the arrival area extension predicated on the Runway 36 ILS localizer south course and correcting the geographic position coordinates of the Greater Cincinnati International Airport. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in FAA Order 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Control zone.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g); (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.171 [Amended]**

2. Section 71.171 is amended as follows:

**Covington, KY [Revised]**

Within a 5-mile radius of Greater Cincinnati International Airport (Lat. 39°02'52" N, Long. 84°40'00" W).

Issued in East Point, Georgia, on February 14, 1989.

listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ASO-10." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend the Springfield, KY, transition area. An arrival area extension is necessary to provide additional controlled airspace for protection of aircraft executing a NDB instrument approach procedure planned for Runway 11 at the Lebanon-Springfield Airport. Also, this action would make a minor correction to the latitude/longitude coordinates for the geographic position of the airport. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition area.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. Section 71.181 is amended as follows:

**Springfield, KY [Amended]**

By amending the Lebanon-Springfield Airport coordinates to read, "(Lat. 37°38'01" N, Long. 85°14'32" W)" and by adding the following statement to the end of the existing description: "and within three miles each side of the 280° bearing from the Springfield NDB (Lat. 37°38'22" N, Long. 85°14'10" W), extending from the 6.5-mile radius area to 9 miles west of the NDB."

Issued in East Point, Georgia, on February 17, 1989.

**William D. Wood,**

**14 CFR Part 71**

**[Airspace Docket No. 89-ASO-4]**

**Proposed Designation of Transition Area, Huntingdon, TN**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to designate the Huntingdon, Tennessee, transition area to accommodate Instrument Flight Rule (IFR) operations at the Carroll County Airport. This action will lower the base of controlled airspace from 1,200 feet to 700 feet above the surface in the vicinity of the airport. A Standard Instrument Approach Procedure (SIAP) is being developed to serve the airport and the controlled airspace is required for protection of IFR aeronautical operations. Concurrent with the publication of the SIAP, the operating status of the airport will change from Visual Flight Rules (VFR) to Instrument Flight Rules (IFR).

**DATE:** Comments must be received on or before: April 21, 1989.

**ADDRESSES:** Send comments on the proposal in triplicate to: Federal Aviation Administration, ASO-530, Manager, Airspace and Procedures Branch, Docket No. 89-ASO-4, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

**FOR FURTHER INFORMATION CONTACT:** James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ASO-4." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed

VOL 54 ISS 39 MR 1 1989 UMI

in the light of comments received. All comments submitted will be available for examination in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate the Huntingdon, Tennessee, transition area. This action will provide controlled airspace for aircraft executing a new Standard Instrument Approach Procedure to the Carroll County Airport. If the proposed designation of the transition area is found acceptable, the operating status of the airport will be changed to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition area.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10654; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. Section 71.181 is amended as follows:

**Huntingdon, TN [New]**

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the Carroll County Airport (Lat. 36°05'23" N, Long. 88°27'45" W); within 3.5 miles each side of the 186° bearing from the Huntingdon RBN. (Lat. 36°05'17" N, Long. 88°28'10" W), extending from the 7-mile radius area to 10 miles south of the RBN."

Issued in East Point, Georgia, on February 14, 1989.

**Proposed Revision of Transition Area; Morrilton, AR**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to revise the transition area located at Morrilton, AR. The development of a new standard instrument approach procedure (SIAP) to Runway 27 at the Morrilton Municipal Airport, utilizing the Bridge Nondirectional Radio Beacon (NDB), has made this proposed revision necessary. The intended effect of the proposal is to provide adequate controlled airspace for aircraft executing the new NDB RWY 27 SIAP to the Morrilton Municipal Airport. Coincident with this action, the status of the Morrilton Municipal Airport will change from visual flight rules (VFR) to instrument flight rules (IFR).

**DATES:** Comments must be received on or before April 7, 1989.

**ADDRESSES:** Send comments on the proposal in triplicate to:

Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 88-ASW-63, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

**FOR FURTHER INFORMATION CONTACT:** Bruce C. Beard, Airspace and Procedures Branch, Department of Transportaion, Federal Aviation Administration, Fort Worth, TX 76193-0530; telephone: (817) 624-5561.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 88-ASW-63." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal

Aviation Administration, Fort Worth, TX 76193-0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) by revising the transition area located at Morrilton, AR. The development of a new SIAP to Runway 27 at the Morrilton Municipal Airport, utilizing the Bridge NDB, has necessitated this proposed revision. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the new NDB RWY 27 SIAP. Coincident with this action is the changing of the status of the Morrilton Municipal Aiport from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 1, 1988.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is no minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition areas.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10654; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. Section 71.181 is amended as follows:

**Morrilton, AR [Amended]**

By adding to the end of the existing legal description: "and within a 10.0-mile radius of the Morrilton Municipal Airport (latitude 35°08' 10"N., longitude 92°42'48"W.); excluding that portion that overlies the Little Rock AR, Transition Area."

Issued in Fort Worth, TX on February 15, 1989.

**Proposed Revision of Control Zone; Hood Army Airfield (AAF), TX**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to revise the control zone located at Hood Army Airfield (AAF), TX. The existing Hood AAF Control Zone became effective on November 19, 1987, and was described as "within a 3-mile radius of the Hood AAF * * *." This 3-mile radius around the Hood AAF was to be large enough to touch the Robert Gray AAF Control Zone. However, it has been determined that the 3-mile radius is too small to do this and must be enlarged to a 3.5-mile radius around the Hood AAF. This will be the only change to the existing Hood AAF Control Zone. The Robert Gray AAF Control Zone will not be affected by the proposed revision.

**DATE:** Comments must be received on or before April 7, 1989.

**ADDRESSES:** Send comments on the proposed in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 88-ASW-54, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) by establishing a new transition area at Spearman, TX. There is an existing VOR/DME RWY 2 SIAP to the Spearman Municipal Airport, utilizing the Borger VORTAC, which has necessitated the proposal. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the existing VOR/DME RWY 2 SIAP. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 1, 1988.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition areas.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 108(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. Section 71.181 is amended as follows:

**Spearman, TX [New]**

That airspace extending upward from 700 feet above the surface within a 7.0-mile radius of the Spearman Municipal Airport (latitude 36°13'05" N., longitude 101°11'47" W.).

Issued in Fort Worth, TX on February 15, 1989.

**Establishment of Deadlines for First Sellers to Make and Report Refunds; Proposed Rulemaking**

February 23, 1989.

**AGENCY:** Federal Energy Regulatory Commission, DOE.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Federal Energy Regulatory Commission (Commission) proposes to revise its regulations for carrying out wellhead pricing refund requirements under the Natural Gas Policy Act of 1978 (NGPA) (15 U.S.C. 3301-3432 (1982)). The proposed revisions are in response to an audit of the Commission's wellhead pricing refund program conducted at the Commission's request by the Office of Inspector General, United States Department of Energy.

In this order, the Commission establishes specific time limits by which first sellers must make refunds of overcollections or unauthorized collections of prices and file refund reports.

**DATE:** An original and 14 copies of the written comments on this proposed rule must be filed with the Commission by May 1, 1989.

**ADDRESS:** All filings should refer to Docket No. RM89-6-000 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

**FOR FURTHER INFORMATION CONTACT:** Tamera A. Rudd, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8530.

**SUPPLEMENTARY INFORMATION:** In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in room 1000 at the Commission's Headquarters, 825 North Capitol Street NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 357-8997. To access CIPS, set your communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this proposed rulemaking will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in Room 1000, 825 North Capitol Street NE., Washington, DC 20426.

**I. Introduction**

The Federal Energy Regulatory Commission (Commission) proposes to revise its regulations for carrying out wellhead pricing refund requirements under the Natural Gas Policy Act of 1978 (NGPA).[1] This action is being taken in response to an audit of the Commission's wellhead pricing refund program conducted at the Commission's request by the Office of Inspector General, United States Department of Energy.[2] The proposed revisions establish specific time limits by which first sellers must make refunds of over-collections or unauthorized collections of prices and file refund reports.

**II. Public Reporting Burden**

The Commission estimates that the public reporting burden for the collection of information in this notice of proposed rulemaking to be one hour per response. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Interested persons may send comments regarding this burden estimate or any other aspect of this collection of information, including sugestions for reducing this burden, to Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC (Attention: Michael Miller (202) 357-9205); and to the Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission).

**III. Background and Discussion**

The Commission oversees the maximum lawful price (MLP) for first sales of certain natural gas under the NGPA. The NGPA establishes eight pricing categories, each of which has a different maximum lawful price.[3]

*A. The Refund Obligation*

Producers and other first sellers must refund any collections in excess of the applicable MLP and report the refunds to the Commission. Refunds are made under two provisions of the Commission's regulations: [4] (1)

[1] 15 U.S.C. 3301-3432 (1982)

[2] U.S. Dept. of Energy, Office of Inspector General, The Federal Energy Regulatory Commission's Wellhead Pricing Refund Program, No. 0259 (Sept. 29, 1988).

[3] 15 U.S.C. 3311-3319 (1982).

[4] First sellers are permitted to collect the NGPA section 108 MLP subject to refund provisions of § 271.805(f), but those refund provisions take ther refund authority from § 270.101(e).

VOL 54 ISS 39 MR 1 1989 UMI

§ 273.302, which applies to the obligation to refund interim collections; [4] and (2) § 270.101, which applies to all other refund obligations. Section 273.302 specifies the timing for making and reporting refunds.[5] Section 270.101(e) does not. It requires only that refunds be made "promptly," and therefore it is the focus of our proposal here.

Section 270.101(e) is a general provision that includes all refund obligations other than interim collection refunds that fall under § 272.302 of the regulations. Most of the refunds under § 270.101(e) involve wells previously determined to be stripper wells under NGPA section 108 but which were subsequently disqualified.[7] Section § 270.101(e) refunds obligations also arise in any sale of gas at a particular NGPA incentive price where the first seller was not eligible, even on an interim basis under Part 273 of the Commission's regulations, to collect a price in excess of the otherwise applicable MLP because the first seller has not yet filed an application with the appropriate jurisdictional agency for a determination of eligibility to charge the incentive price. Not having applied for the necessary NGPA category eligibility determination, the first seller has not interim collection authority under Part 273 to collect that NGPA incentive price and the seller is limited to the otherwise applicable maximum lawful price.

Refund obligations under the § 270.101(e) general refund requirements also include those arising as the result of sales of misvintaged gas. For example, factors such as the date that surface drilling of a well began affect the proper classification for "old" interstate gas (*i.e.*, gas subject to NGPA section 104). If the first seller misvintages gas, a § 270.101(e) refund obligation is triggered.

*B. The Audit and the Need for Revisions to the Refund Regulations.*

The Commission has been and continues to be committed to ensuring that refunds owed by first sellers to their customers are made as expiditiously as possible in order to hasten their ultimate pass-through to residential customers and other end users. To this end, the Inspector General's review was conducted to determine whether the Commission has adequate policies and purchasers and report refunds to the Commission in a timely manner as required by the NGPA.

The audit was performed in accordance with generally accepted government auditing standards. The 60-day and 90-day criteria established for refunds under § 273.302 [6] were applied to randomly selected cases. The audit report found that only six percent of the refunds were paid within 60 days, that only 24 percent of the required refund reports were submitted to the Commission within 90 days, and that, on average, first sellers took a year and a half to make refunds and submit reports. Based on these findings, the audit report concluded that, overall, first sellers did not refund overcharges or file reports in a timely manner, and that as a result an estimated $200 million (or approximately $22 million a year) was not refunded promptly.

The audit report attributed late refunds and reports primarily to, *inter alia*, the lack of specific time limits for first sellers to make refunds and reports for all types of refund actions, and the absence of penalty actions for late refunds or late reports. It recommended that corrective action be taken. The Commission concurs with the Inspector General's findings and conclusions and agrees that remedial action is necessary. Requiring timely refunds should help to ensure that residential customers and other end uses who pay the overcharges are not unreasonably deprived of the use of funds to be refunded.[9]

## IV. The Proposed Rule

*A. Section 270.101(e)*

Section 270.101(e) now provides that refunds shall be made "promptly." The proposed revisions would specify that refunds must be paid within 60 days after a first seller is notified that a refund is due or becomes aware that a refund is due, unless the refund is recovered through a billing adjustment. New provisions would be added to specify that if a refund is made through a billing adjustment, the first seller and purchaser may agree to a reasonable period for completion of the billing adjustment not to exceed 120 days.

A purchaser would not be able to use a billing adjustment prior to expiration of the 60-day period without the first seller's prior approval. After the 60-day period expires, the purchaser would be able to use the billing adjustment to recover the refund without the first seller's prior approval. However, before the billing adjustment could be implemented, the purchaser would have to inform the seller of the amount of the refund and the time period during which the adjustment would be completed.

New provisions would also require the seller to file a refund report, consisting of an original and two copies with a purchaser concurrence, within 90 days of receiving notice of the refund obligation or becoming aware that the refund is due. This report would not be required if a refund is recovered by an interstate pipeline purchaser through a billing adjustment.

*B. Section 271.805(f)*

Under section 108(b) of the NGPA, a well that produces an average of 60 Mcf or less per production day of nonassociated natural gas for a 90-day production period (60 Mcf limit) can qualify as a stripper well. Under 271.805, once a well has been determined to be a stripper well, that status is not forfeited when production exceeds stripper well levels in any 90-day production period; however, the seller is limited to the otherwise applicable MLP, not the stripper well incentive price, until a new 90-day qualifying period is established.[10]

Under § 271.805(f), an operator who files either a petition for a determination under § 271.806, or a motion contesting the disqualification of the stripper well, may collect, subject to refund, the MLP provided in § 271.802. A new paragraph would be added to provide that when the petition for determination under § 271.806 or the motion contesting disqualification is denied or withdrawn, then the operator must comply with § 270.101(e), as it is proposed to be revised.

Now provisions also would require, in the case of refunds due to disqualification, that the seller refund all amounts collected in excess of the ceiling price, with interest, within 180 days after the last day of the disqualifying 90-day or 12-month period,[11] unless the seller files a petition under § 271.806 within 150 days after the last day of the disqualifying period or unless the refund is recovered through a billing adjustment in accordance § 270.101(e) (1) and (2). Compliance with the interim collection refund requirements under § 273.302 would not eliminate this obligation.

Other new provisions would require the seller to file a refund report or statement that no refunds are due, consisting of an original and two copies with a purchaser concurrence, within 210 days after the last day of the disqualifying 90-day or 12-month period.[12] This report would not be required if a refund is recovered by an interstate pipeline through a billing adjustment.

## V. Additional Remedies

By our action in this proceeding, we are seeking to ensure that refunds owed by first sellers are made as quickly as possible and ultimately passed through to residential customers and other end users. There are two provisions presently available to the Commission that should also facilitate the refund and reporting process: (1) § 273.302 of the Commission's regulations, which permits recovery of interim collection refunds through billing adjustments by purchasers;[13] and (2) section 504 of the NGPA, which provides for the assessment of civil penalties for late refunds and late reports.[14]

*A. Order No. 423*

In Order No. 423, the Commission was concerned about delays in refunds of interim collections under § 273.302. At that time, § 273.302 provided that interim collection refunds could be made only by lump sum payments. The Commission concluded that permitting interim collection refunds to be made through billing adjustments as well as through lump sum payments would ensure that refunds owed by producers and other first sellers would be made as quickly as possible. It reasoned that billing adjustments would provide pipeline companies and other first-sale purchasers a positive means of recovering refunds without waiting for producers to make their lump sum payments. It concluded that because many pipeline companies use billing adjustments to recoup most types of overcollections, pipelines would be in a position to use billing adjustments to take the initiative in recovering first sellers' interim collection refunds when sellers fail to make timely lump sum payments. In addition, the Commission stated that § 270.101(e) permits the use of billing adjustments to recover refunds and added § 270.101(f) to require interstate pipelines to report refunds collected through billing adjustments.

Prior to the issuance of Order No. 423, the Commission issued a policy statement on the duty of interstate pipelines to pursue refunds in Order No. 423's notice of proposed rulemaking.[15] The Commission emphasized that even though a seller continues to carry the primary responsibility for its refund obligations, the pipelines also have an obligation, as part of prudent management, to ensure that they recover and pass through refunds owed their customers. The commission notes that most interstate pipelines have not taken advantage of billing adjustments as a remedy to first sellers' almost chronic delays in making refunds. Therefore, the Commission advises interstate pipelines that it intends to pursue corrective action if the billing adjustment provisions continue to be ignored.

*B. Civil penalties.*

Under section 504(b)(6) of the NGPA, the Commission has the authority to assess civil penalties for knowing violations of its regulations. If the problem of delay in refunding persists, the Commission will consider the civil penalty remedy on a case-by-case basis.

## VI. Environmental Statement

Commission regulations require that an environmental assessment or an environmental impact statement must be prepared for any Commission action that may have a significant adverse effect on the human environment.[16] The Commission has categorically excluded certain actions from this requirement as not having a significant effect on the human environment.[17] No environmental consideration is necessary for the promulgation of a rule that is clarifying, corrective, or procedural or that does not substantially change the effect of legislation or regulations being amended.[18] This rule is procedural in nature and merely sets time frames for existing refunds and reporting requirements. Consequently, since this rule falls within the categorical exemptions provided in the Commission's regulations, neither an environmental impact statement nor an environmental assessment are required.[19]

## VII. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) [20] requires certain statements, descriptions and analyses of proposed rules that will have "a significant economic impact on a substantial number of small entities." The Commission is not required to make an RFA analysis if it certifies that a proposed rule will not have a "significant economic impact on a substantial number of small entities."

The proposal would, first, revise § 270.101(e) by setting a time limit of 60 days for the seller to refund excess charges and report to the Commission within 90 days. Currently, overcharges must be refunded and reported promptly. Thus, this proposal simply provides time frames for the refund and reporting requirements which are already in place.

The proposal would, secondly, revise § 271.805(f) to specify that refunds due to the disqualification of stripper wells are due within 180 days after the last day of the disqualifying 90-day or 12-month period. A refund report or statement of no refund due for stripper wells would be due within 210 days after the last day of the disqualifying 90-day or 12-month period. The reports

[4] The MLP in any first sale of natural gas depends on the applicable NGPA category of the gas. Sellers must apply to Federal and State jurisdictional agencies for a determination of eligibility to collect the MLP for certain categories of gas. Under section 503 of the NGPA and the Commission's implementing regulations in Part 273 (18 CFR Part 273 (1988)), once a first seller of natural gas has filed an application with a jurisdictional agency, it may collect, on an interim basis, prices up to the MLP for the applied for category of natural gas. However, a first seller must refund these interim collections upon denial or withdrawal of its application.

[5] Section 273.302 requires a seller to refund with interest, within sixty days after either withdrawing its application or receiving a negative determination, any portion of an interim collection that is in excess of the actual maximum lawful price for the correct NGPA category of the gas sold. Within ninety days of either a negative eligibility determination or an application withdrawal, a seller must file either a refund report or a statement with the Commission certifying that no refund is required. If the seller does not make such payment in 60 days, § 273.302 permits the pipeline to make a billing adjustment. If the pipeline makes a billing adjustment, the first seller is not obligated to file a refund report. *See* Purchased Gas Adjustments, Final rule, Order No. 423, 30 Fed. Reg. 23,888 (June 3, 1985); FERC Stats. & Regs. [Regulations Preambles 1982–1985] ¶ 30,665 (May 30, 1985).

[6] Disqualification occurs when production in a 90-day production period exceeds the stripper well qualification level.

[7] *See* note 5.

[8] Competitors that do not promptly refund overcharges have the use of these funds until refunds are made. Although they must may interest on the late refunds, the amount of interest they must pay may not be enough to achieve equity.

[9] *See* Reduction in Filing Requirements for Well Category Applications under Sections 102, 103, 107 and 108 of the Natural Gas Policy Act of 1978; Regulations for Temporary Pressure Buildup Determinations under Section 108 of the Natural Gas Policy Act, Order No. 336, 48 FR 44,508 (Sept. 29, 1983); FERC Stats. & Regs. [Regulations Preambles 1982–1985] ¶ 30,498 (Sept. 27, 1983).

[11] *See* § 271.805 (a) and (b) for explanation of the 90-day and 12-month period.

[12] When no petition is filed under section 271.806 within 150 days from the last day of the disqualifying period the first seller must make refunds within 30 days from that date and file a refund report within 60 days of that date.

[13] *See* note 6.

[19] *See* 18 CFR 380.4(a)(1) (1988).

[20] 5 U.S.C. 601–612 (1982).

VOL 54 ISS 39 MR 1 1989 UMI

required by § 270.101(e)(4) and § 271.805(g)(2) will not include any information regarding a refund recovered by a purchaser through a billing adjustment.

In view of these considerations, the Commission has determined, pursuant to section 605(a) of the RFA, that the proposed filing dates for refunds and reports will not have "a significant economic impact on a substantial number of small entities."

### VIII. Paperwork Reduction Act

The Paperwork Reduction Act [21] and the Office of Management and Budget's (OMB) regulations [22] require that OMB approve certain information collection requirements imposed by agency rule. The information collection provisions in this NOPR are being submitted to OMB for its approval.

The Commission promulgated the information collection provisions of this rule in order to ensure that refunds owed by producers and other first sellers of natural gas are made as quickly as possible and ultimately passed through to residential customers and other end users. These proposals do not change the current requirement to report refunds to the Commission. The provisions clarify the current obligation under §§ 270.101(e) and 271.805 to report refunds, and establish deadlines for first sellers to comply with the existing reporting requirements.

Pursuant to OMB's regulations,[23] the Commission is providing the following information.

(1) The title of the collection of information in this Notice of Proposed Rulemaking is "Establishment of Deadlines for First Sellers to Make and Report Refunds."

(2) The Commission needs to collect this information to ensure that first sellers are making required refunds to their customers for overcollections or unauthorized collections of prices for first sales of natural gas, pursuant to NGPA and Commission regulations.

(3) Respondents that will provide the needed information will be first sellers of natural gas.

(4) The Commission estimates that: (a) The public reporting burden is one hour per response; (b) the frequency of responses is based upon the frequency of occurrence of the refunds per year and can not be projected; and (c) the total annual number of likely respondents is 4,000.

Interested persons can obtain information on the information collection provisions by contacting the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 (Attention: Michael Miller at (202) 357-9205). Comments on the information collection provisions can be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission).

### IX. Written Comment Procedures

Interested persons are invited to submit written comments, data, views or arguments with respect to this proposal. An original and 14 copies should be filed with the Secretary of the Commission. All comments received on or before May 1, 1989, will be considered by the Commission prior to promulgation of any final regulation issued as a result of this proceeding. All written submissions will be placed in the Commission's public files and will be available for public inspection in the Commission's Office of Public Information, 825 North Capitol Street NE., Washington, DC, during regular business hours. Comments should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, and should refer to Docket No. RM89-6-000.

### List of Subjects

*18 CFR Part 270*

Natural gas, Price controls, Reporting and recordkeeping requirements.

*18 CFR Part 271*

Continental Shelf, Natural Gas, Price controls, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission proposes to amend Parts 270 and 271, Chapter I, Title 18, Code of Federal Regulations as set forth below.

By direction of the Commission.

**Lois D. Cashell,**

*Secretary.*

## PART 270—RULES GENERALLY APPLICABLE TO REGULATED SALES OF NATURAL GAS

1. The authority citation for Part 270 continues to read as follows:

**Authority:** Natural Gas Act, 15 U.S.C. 717-717w (1982); Department of Energy Organization Act, 42 U.S.C. 7101-7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142; Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432 (1982).

2. In § 270.101, paragraph (e) is revised to read as follows:

**§ 270.101 Application of ceiling prices to first-sales of natural gas.**

* * * * *

(e) *General refund obligation and filing requirements for first sellers.* (1) Any price collected with respect to a first sale of natural gas to which Subchapter H applies is collected subject to a general obligation to refund any portion of the price, together with interest determined in accordance with §§ 154.102 (c) and (d) of this chapter, which is in excess of the maximum lawful price or collection of which is not authorized by Subchapter H. The refund, including interest, must be paid within 60 days after the seller is notified that a refund is due or becomes aware that a refund is due unless the refund is recovered through a billing adjustment as provided in paragraph (e)(2) or (e)(3) of this section. Compliance with the specific refund requirements of § 273.302 of this chapter will not terminate the general refund obligation under Subchapter H.

(2) if a refund required by paragraph (e)(1) of this section is made through a billing adjustment, the seller and purchaser may agree that the billing adjustment will be completed in a reasonable period not to exceed one hundred and twenty (120) days.

(3) A purchaser may not use a billing adjustment to recover a refund required by paragraph (e)(1) of this section before the expiration of the 60-day period for the seller to make the refund unless the seller has previously agreed to the billing adjustment. If the seller fails to make a refund within the 60-day period, the purchaser may use a billing adjustment to recover the refund without agreement by the seller. Before making a billing adjustment, the purchaser must provide the seller written notice of the amount of the refund to be recovered and the time period during which the billing adjustment will be completed.

(4) Within 90 days after a seller has been notified that a refund is due or has become aware that a refund is due, the seller must file an original and two copies of a refund report, together with a purchaser concurrence, containing the information specified in § 273.302(f) of this chapter. A seller is not required to include in a report filed under this paragraph any information regarding a refund recovered by a purchaser through a billing adjustment.

* * * * *

## PART 271—CEILING PRICES

3. The authority citation for Part 271 continues to read as follows:

[21] 44 U.S.C. 3501-3520 (1982).

[22] 5 CFR 1320-12 (1988).

[23] 5 CFR 1320.13(a) (1988).

**Authority:** Natural Gas Act, 15 U.S.C. 717-717w (1982); Department of energy Organization Act, 42 U.S.C. 7101-7352 (1982); E.O. 12009, 3 CFR 1978 Comp., p. 142; Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432 (1982).

4. In § 271.805, paragraph (f) is revised, paragraph (g) is redesignated as paragraph (h) and a new paragraph (g) is added.

**§ 271.805 Continuing qualification.**

* * * * *

(f) *Collection subject to refund.* (1) An operator who files a petition or motion under paragraph (e) may collect, subject to refund, the maximum lawful price provided in § 271.802:

(i) From the last day of the 90-day or the 12-month disqualifying period if the petition or motion is filed within 150 days after the last day of the 90-day or the 12-month disqualifying period, or

(ii) In all other cases, after the date the petition is filed.

(2) When the petition or motion filed under paragraph (e) is denied or withdrawn, the operator or purchaser must comply with the provisions of § 270.101(e) of this chapter.

(g) *Refunds due to disqualification.* (1) Unless the seller files a petition under § 271.806 within 150 days after the last day of the disqualifying 90-day or 12-month period, and unless the refund is recovered through a billing adjustment as provided in § 270.101(e) (1) and (2) of this chapter, the seller must refund to the purchaser the amount collected in excess of the maximum lawful price, together with interest determined in accordance with §§ 154.102 (c) and (d) of this chapter, within 180 days after the last day of the disqualifiying 90-day or 12-month period. Compliance with the specific refund requirements of § 273.302 of this chapter will not terminate the general refund obligation under Subpart H.

(2) Within 210 days after the last day of the disqualifying 90-day or 12-month period, the seller must file either: an original and two copies of a refund report, together with a purchaser concurrence, containing the information specified in § 273.302(f) of this chapter; or a statement, including a purchaser concurrence, that no refunds are due. A seller is not required to include in a report filed under this paragraph any information regarding a refund recovered by a purchaser through a billing adjustment.

## DEPARTMENT OF THE INTERIOR

### Office of Surface Mining Reclamation and Enforcement

### 30 CFR Part 935

### Ohio Permanent Regulatory Program; Liability for Subsidence Damage

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

**ACTION:** Proposed rule.

**SUMMARY:** OSMRE is announcing the receipt of proposed Program Amendment Number 38 to amend the Ohio permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments are intended to incorporate rule changes initiated by the State. The proposed amendments would delete an existing provision from the Ohio program under which underground mine operators are exempted from repairing or compensating for damage to structures caused by mine subsidence if the operator has been relieved of liability for the damage through an agreement with the owner of the affected structure.

This notice sets forth the times and locations that the Ohio program and proposed amendments to that program will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendments, and the procedures that will be followed regarding the public hearing, if one is requested.

**DATES:** Written comments must be received on or before 4:00 p.m. on March 31, 1989. If requested, a public hearing on the proposed amendments will be held at 1:00 p.m. on March 27, 1989. Requests to present oral testimony at the hearing must be received on or before 4:00 p.m. on March 16, 1989.

**ADDRESSES:** Written comments and requests to testify at the hearing should be mailed or hand-delivered to Ms. Nina Rose Hatfield, Director, Columbus Field Office, at the address listed below. Copies of the Ohio program, the proposed amendments, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive, free of charge, one copy of the proposed amendments by contacting OSMRE's Columbus Field Office.

Office of Surface Mining Reclamation Enforcement, Columbus Field Office, 2242 South Hamilton Road, Room 202, Columbus, Ohio 43232, Telephone: (614) 866-0578.

Office of Surface Mining Reclamation and Enforcement, 1100 "L" Street, NW., Room 5131, Washington, DC 20240, Telephone: (202) 343-5492.

Ohio Department of Natural Resources, Division of Reclamation, Fountain Square, Building B-3, Columbus, Ohio 43224, Telephone: (614) 265-6675.

**FOR FURTHER INFORMATION CONTACT:** Ms. Nina Rose Hatfield, Director, Columbus Field Office, (614) 866-0578.

**SUPPLEMENTARY INFORMATION:**

### I. Background

On August 16, 1982, the Secretary of the Interior conditionally approved the Ohio program. Information on the general background of the Ohio program submission, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program, can be found in the August 10, 1982 **Federal Register** (47 FR 34688). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 935.11, 935.12, 935.15, and 935.16.

### II. Discussion of the Proposed Amendments

By letter dated February 6, 1989 (Administrative Record No. OH-1142), the Ohio Department of Natural Resources, Division of Reclamation (Ohio) submitted proposed amendments to the Ohio program at Ohio Administrative Code (OAC) Section 1501:13-12-03 (B), (D)(2) (a) and (b), (D)(4)(a)(ii), and (D)(4)(b). The proposed amendments were initiated by the State.

The proposed changes to paragraphs (B), (D)(4)(a)(ii), and (D)(4)(b) are nonsubstantive changes to paragraph letter notations.

The proposed changes to OAC Section 1501:13-12-03(D)(2) (a) and (b) rewrite these paragraphs to delete an existing provision in the Ohio regulations concerning liability for subsidence damage. This existing provision exempts underground mine operators from the liability to repair or compensate for damage to structures from mine subsidence if the mine operator has an agreement with the owner of the affected structure relieving the mine operator of that liability. The proposed amendments would delete this exemption and provide that underground mine operators are relieved of the liability to repair or compensate for subsidence damage only

VOL 54 ISS 39 MR 1 1989 UMI

if the mine operator is the owner of the affected structure.

**III. Public Comment Procedures**

In accordance with the provisions of 30 CFR 732.17(h), OSMRE is now seeking comment on whether the amendments proposed by Ohio satisfy the applicable program approval criteria of 30 732.15. If the amendments are deemed adequate, they will bcome part of the Ohio program.

*Written Comments*

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "**DATES**" or at locations other than the Columbus Field Office will not necessary be considered in the final rulemaking or included in the Administrative Record.

*Public Hearing*

Persons wishing to comment at the public hearing should contact the person listed under "**FOR MORE INFORMATION CONTACT**" by 4:00 p.m. on March 16, 1989. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statments in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions. The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and who wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

*Public Meeting*

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSMRE representatives to discuss the proposed amendments may request a meeting at the Columbus Field Office by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT**." All such meetings shall be open to the public and, if possible, notices of the meetings will be posted at the locations listed under "**ADDRESSES**." A written summary of each public meeting will be made a part of the Administrative Record.

**List of Subjects in 30 CFR Part 935**

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Date: February 14, 1989.

BILLING CODE 4310-05-M

**30 CFR Part 935**

**Ohio Permanent Regulatory Program; Public Comment Period and Opportunity for Public Hearing on Amendments; Crop Yields and Standards for Tree and Shrub Plantings**

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

**ACTION:** Proposed rule.

**SUMMARY:** OSMRE is announcing the receipt of proposed amendments to the Ohio permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments are intended to revise the State program to be consistent with the corresponding Federal regulations and to clarify other provisions of the Ohio program rules. The proposed revisions concern the use of crop yield data in bond release; success standards for tree plantings; approval by other State agencies of tree, shrub, and herbaceous species selection and stocking levels; and the definition of "countable tree."

This notice sets forth the times and locations that the Ohio program and proposed amendments to that program will be available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendments, and the procedures that will be followed regarding the public hearing, if one is requested.

**DATES:** Written comments must be received on or before 4:00 p.m. on March 31, 1989. If requested, a public hearing on the proposed amendments will be held at 1:00 p.m. on March 27, 1979. Requests to present oral testimony at the hearing must be received on or before 4:00 p.m. on March 16, 1989.

**ADDRESSES:** Written comments and requests to testify at the hearing should be mailed or hand-delivered to Ms. Nina Rose Hatfield, Director, Columbus Field Office, at the address listed below. Copies of the Ohio program, the proposed amendments, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive, free of charge, one copy of the proposed amendments by contacting OSMRE's Columbus Field Office.

Office of Surface Mining Reclamation and Enforcement, Columbus Field Office, 2242 South Hamilton Road, Room 202, Columbus, Ohio 43232, Telephone: (614) 866-0578.

Office of Surface Mining Reclamation and Enforcement, 1100 "L" Street, NW., Room 5131, Washington, DC 20240, Telephone: (202) 343-5492.

Ohio Department of Natural Resources, Division of Reclamation, Fountain Square, Building B-3, Columbus, Ohio 43224, Telephone: (614) 265-6675.

**FOR FURTHER INFORMATION CONTACT:** Ms. Nina Rose Hatfield, Director, Columbus Field Office, (614) 866-0578.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

On August 16, 1982, the Secretary of the Interior conditionally approved the Ohio program. Information on the general background of the Ohio program submission, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program, can be found in the August 10, 1982 **Federal Register** (47 FR 34688). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 935.11, 935.12, 935.15, and 935.16.

**II. Discussion of the Proposed Amendments**

By letter dated May 6, 1987 (Administrative Record No. OH-937), the Ohio Department of Natural Resources, Division of Reclamation (Ohio), submitted a proposed amendment to the Ohio program at Ohio Administrative Code (OAC) Section 1501:13-9-15. The proposed revisions concerned revegetation standards and were initiated by Ohio. OSMRE announced receipt of the proposed amendment in the July 7, 1987 **Federal Register** (52 FR 25386), and, in the same notice, opened the public comment period and provided opportunity for a public hearing on the adequacy of the proposed amendment.

On July 27, 1987 (52 FR 28012), OSMRE announced a proposed rule to revise the Federal regulations dealing with the same revegetation FCB standards as were proposed for revision

in Ohio's amendment of May 6, 1987. To avoid the need for Ohio to amend its revegetation regulations a second time following approval of the revised Federal rules, OSMRE and Ohio agreed to defer action on the proposed Ohio amendment until the corresponding Federal rules had been finalized. The final Federal rules were adopted by OSMRE on September 7, 1988 (53 FR 34636).

By letter dated January 26, 1989 (Administrative Record No. OH-1135), Ohio resubmitted the proposed amendment to the Ohio program at Ohio Administrative Code (OAC) Section 1501:13-9-15. The resubmitted revisions, along with accompanying administrative record documents, are intended to make the Ohio program consistent with the Federal revegetation rules adopted on September 7, 1988.

The revisions proposed by Ohio to OAC Section 1501:13-9-15 are briefly discussed below:

(1) *Paragraph (A)(1)(a):* This paragraph is being rewritten to reduce from five years to two years the time period for which a tree or shurb must be in place in order to be considered a "countable tree."

(2) *Paragraph (F):* Paragraph (F)(9) of the existing version of OAC Section 1501:13-9-15 is being moved to this new paragraph. The existing text is also being rewritten to require approval by the Ohio Department of Natural Resources, Division of Forestry, of Ohio's determinations of appropriate species of trees and shrubs, appropriate stocking levels of trees and shrubs, and appropriate herbaceous species for areas where the postmining land use is to be recreation, shelter belts, or non-commercial forest land.

(3) *Paragraph (G):* Paragraph (F)(10) of the existing version of OAC Section 1501:13-9-15 is being moved to this new paragraph. The existing text is also being rewritten to require approval by the Ohio Department of Natural Resources, Division of Forestry, of Ohio's determinations of appropriate species of trees and shrubs, appropriate stocking levels of trees and shrubs, and appropriate herbaceous species for areas where the postmining land use is to be commercial forest land.

(4) *Paragraph (H):* Paragraph (F)(11) of the existing version of OAC Section 1501:13-9-15 is being moved to this new paragraph. The existing text is also being rewritten to require approval by the Ohio Department of Natural Resources, Division of Wildlife, of Ohio's determinations of appropriate species of trees and shurbs, appropriate stocking levels of trees and shurbs, and appropriate herbaceous species for areas where the postmining land use is to be fish and wildlife habitat.

(5) *Paragraph (I)(2)(c):* Paragraph (F)(12) of the existing version of OAC Section 1501:13-9-15 is being moved to this new paragraph. The existing text is also being rewritten to specify that the following agronomic practices will not be considered augmentative when the practices and the rates of application are accepted local practices for comparable unmined land and can be expected to continue as postmining practices:

(a) For cropland or pasture land, seeding, fertilizing, irrigating, and other locally accepeted practices;

(b) For cropland or areas for which the approved postmining land use requires woody plants as the primary vegetation, the repair of rills and gullies; and

(c) For areas for which the approved postmining land use requires woody plants as the primary vegetation, the replanting of trees as a reinforcement measure.

(6) *Paragraph (I)(4)(c):* This paragraph is being rewritten to specify that revegetation shall be determined to be successful for Phase III bond release for row and hay crops when the five-year period of extended responsibility has expired and the yield data of crop harvest on the mined area for any two years of the period of extended responsibility, except the first year, equals or exceeds the average county yield for comparable crops.

(7) *Paragraph (I)(8):* This paragraph is being rewritten to delete the phrase "a cover of" from the requirement to establish trees and shrubs after mining where the approved postmining land use requires woody plants as the primary vegetation.

(8) *Paragraph (I)(8)(b):* This paragraph is being rewritten to reiterate that both consultation with and approval by the appropriate State agency must occur as part of Ohio's determination of tree and shrub species compatible with the postmining land use. The phrase "well-distributed acceptable trees" is also being changed to "properly distributed acceptable trees."

(9) *Paragraph (I)(8)(f)(i):* This paragraph is being rewritten to increase the minimum number of countable trees required for Phase III bond release from four hundred per acre to four hundred and fifty per acre, and to add the requirement that eighty percent of the trees must have been in place for at least three years. For areas where the postmining land use is fish and wildlife habitat, the areas must have a minimum of two hundred fifty countable trees per acre, of which eighty percent must have been in place for three years.

(10) *Paragraph (F)(9), (F)(10), (F)(11), and (F)(12):* These paragraphs are being rewritten and moved to paragraphs (F), (G), (H), and (I)(2)(c), respectively. Paragraph notations throughout OAC Section 1501:13-9-15 are being revised to reflect the relocation of these paragraphs.

(11) *Paragraph (I)(9):* This paragraph is being rewritten to specify that permitees shall file planting reports upon completion of planting rather than prior to, or simultaneously with, an application for Phase II bond release of the planted area.

**III. Public Comment Procedures**

In accordance with the provisions of 30 CFR 732.17(h), OSMRE is now seeking comment on whether the amendments proposed by Ohio satisfy the applicable program approval criteria of 30 CFR 732.15. If the amendments are deemed adequate, they will become part of the Ohio program.

*Written Comments*

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Columbus Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

*Public Hearing*

Persons wishing to comment at the public hearing should contact the person listed under "**FOR MORE INFORMATION CONTACT**" by 4:00 p.m. on March 16, 1989. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and who wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

VOL 54 ISS 39 MR 1 1989 UMI

*Public Meeting*

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSMRE representatives to discuss the proposed amendments may request a meeting at the Columbus Field Office by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings shall be open to the public and, if possible, notices of the meetings shall be posted at locations listed under "**ADDRESSES.**" A written summary of each public meeting will be made a part of the Administrative Record.

**List of Subjects in 30 CFR Part 935**

## ENVIRONMENTAL PROTECTION AGENCY

**40 CFR Part 60**

**[AD-FRL-3531-4]**

## Standards of Performance for New Stationary Sources; Dry Molecular Weight and Emission Rate Correction Factor or Excess Air

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** This rule proposes to divide Method 3 into Method 3 and Method 3B and amend Subparts D, Da, E, Z, and BB in order to reduce the confusion associated with Method 3. A public hearing will be held, if requested, to provide interested parties an opportunity for oral presentations of data, views, or arguments concerning the proposed rule. Method 3 will be entitled "Gas Analysis for the Determination of Dry Molecular Weight," while Method 3B will be entitled "Gas Analysis for the Determination of Emission Rate Correction Factor or Excess Air."

**DATES:** *Comments.* Comments must be received on or before May 15, 1989.

*Public Hearing.* If anyone contacts EPA requesting to speak at a public hearing by March 22, 1989, a public hearing will be held (April 17, 1989) beginning at 10:00 a.m. Persons interested in attending the hearing should call the contact mentioned under **ADDRESSES** to verify that a hearing will be held.

*Request to Speak at Hearing.* Persons wishing to present oral testimony must contact EPA by March 22, 1989.

**ADDRESSES:** *Comments.* Comments should be submitted (in duplicate if possible) to: Central Docket Section (LE-131), Attention: Docket Number A-88-30, U.S. Environmental Protection Agency, South Conference Center, Room 4, 401 M Street, SW., Washington, DC 20460.

*Public Hearing.* If anyone contacts EPA requesting a public hearing, it will be held at EPA's Emission Measurement Laboratory, Research Triangle Park, North Carolina. Persons interested in attending the hearing or wishing to present oral testimony should notify Ms. Candace Sorrell, Emission Measurement Branch (MD-19), Technical Support Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-1064.

*Docket.* Docket No. A-88-30 containing materials relevant to this rulemaking, is available for public inspection and copying between 8:00 a.m. and 3:30 p.m., Monday through Friday, at EPA's Central Docket Section, South Conference Center, Room 4, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

**FOR FURTHER INFORMATION CONTACT:** Ms. Candace Sorrell, Emission Measurement Branch (MD-19), Technical Support Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-1064.

**SUPPLEMENTARY INFORMATION:**

### I. The Rulemaking

At the present, Method 3 has two procedures—one for molecular weight and the other for emission rate and excess air calculations. The two procedures require different degrees of accuracy. This situation is awkward when making references in subparts; therefore, the method is being divided.

This rulemaking does not impose emission measurement requirements beyond those specified in the current regulations, nor does it change any emission standard. Rather, this rulemaking amends test procedures to which the affected facilities are already subject.

### II. Administrative Requirements

*A. Public Hearing*

A public hearing will be held, if requested, to discuss the proposed rulemaking in accordance with section 307(d)(5) of the Clean Air Act. Persons wishing to make oral presentations should contact EPA at the address given in the **ADDRESSES** section of this preamble. Oral presentations will be limited to 15 minutes each. Any member of the public may file a written statement with EPA before, during, or within 30 days after the hearing. Written statements should be addressed to the Central Docket Section address given in the **ADDRESSES** section of this preamble.

A verbatim transcript of the hearing and written statements will be available for public inspection and copying during normal working hours at EPA's Central Docket Section in Washington, DC (see **ADDRESSES** section of this preamble).

*B. Docket.*

The docket is an organized and complete file of all the information submitted to or otherwise considered by EPA in the development of this proposed rulemaking. The principal purposes of the docket are to: (1) allow interested parties to identify and locate documents so that they can effectively participate in the rulemaking process, and (2) serve as the record in case of judicial review except for interagency review materials (Section 307(d)(7)(A)).

*C. Office of Management and Budget Review*

Under Executive Order 12291, EPA must judge whether a regulation is "major" and, therefore, subject to the requirement of a regulatory impact analysis. This rulemaking would not result in any of the adverse economic effects set forth in Section 1 of the Order as grounds for finding a "major rule." It will not have an annual effect on the economy of $100 million or more, nor will it result in a major increase in costs or prices. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. This rulemaking was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

*D. Regulatory Flexibility Act Compliance*

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this attached rule, if promulgated, will not have any economic impact on small entities because no additional costs will be incurred.

This rule does not contain any information collection requirements subject to OMB review under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

**List of Subjects in 40 CFR Part 60**

Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements, Incorporation by reference, Incinerators, Kraft pulp mills.

Date: February 22, 1989.

**Don R. Clay,**

*Acting Assistant Administrator for Air and Radiation.*

It is proposed that 40 CFR Part 60 be amended as follows:

**PART 60—[AMENDED]**

1. The authority for 40 CFR Part 60 continues to read:

**Authority:** Sections 101, 111, 114, 116, and 301 of the Clean Air Act, as amended (42 U.S.C. 7401, 7411, 7414, 7416, and 7601).

**§§ 60.46, 60.47a, 60.48a, 60.54, 60.266, and 60.285 [Amended]**

2. In §§ 60.46(b)(2)(ii), 60.46(b)(4)(ii), 6046(b)(5)(ii), 60.46(d)(1)(ii), 60.47a (h)(3), 6048a(b)(2)(ii), 60.54(b)(3), 60.54(c)(1)(iii), 60.286(c)(5), 60.285(b)(2), and 60.285(d)(2), the words "Method 3" are revised to read "Method 3B".

3. In § 60.46(d)(6), the words "or 3B" is inserted between "Method 3A" and "may" to read "* * * Method 3A or 3B may * * *".

4. Section 60.46(d)(7) is added to read:

* * * * * *

(d) * * *

(7) For Method 3B, Method 3A may be used.

5. In § 60.47a(j)(3) the words "or 3B" is inserted between "Method 3A" and "may" to read "* * * Method 3A or 3B may * * *."

6. Section 60.47a(j)(4) is added to read:

* * * * * *

(j) * * *

(4) For Method 3B, Method 3A may be used.

7. In § 60.54(c)(2)(ii), the words "Equation 3-1 of Method 3" are revised to read "Equation 3B-3 of Method 3B".

8. Appendix A is amended by revising Method 3 to read as follows:

**Appendix A to Part 60—[Amended]**

**Method 3—Gas Analysis for the Determination of Dry Molecular Weight**

*1. Applicability and Principle*

1.1 Applicability. 1.1.1 This method is applicable for determining carbon dioxide ($CO_2$) and oxygen ($O_2$) concentrations and dry molecular weight of a sample from a gas stream of fossil-fuel combustion process. The method may also be applicable to other processes where it has been determined that compounds other than $CO_2$, $O_2$ carbon monoxide (CO), and nitrogen ($N_2$) are not present in concentrations sufficient to affect the results.

1.1.2 Other methods, as well as modifications to the procedure described herein, are also applicable for some or all of the above determinations. Examples of specific methods and modifications include: (1) a multi-point sampling method using an Orsat analyzer to analyze individual grab samples obtained at each point; (2) a method using $CO_2$ or $O_2$ and stoichiometric calculations to determine dry molecular weight; and (3) assigning a value of 30.0 for dry molecular weight, in lieu of actual measurements, for processes burning natural gas, coal, or oil. These methods and modifications may be used, but are subject to the approval of the Administrator, U.S. Environmental Protection Agency (EPA).

1.1.3 *Note:* Mention or trade names ro specific products does not constitute endorsement by EPA.

1.2 Principle. A gas sample is extracted from a stack by one of the following methods: (1) single-point, grab sampling; (2) single-point, integrated sampling; or (3) multi-point, integrated sampling. The gas sample is analyzed for percent $CO_2$, percent $O_2$, and if necessary, for percent CO. For dry molecular weight determination, either an Orsat or a Fyrite analyzer may be used for the analysis.

2. *Apparatus.* As an alternative to the sampling apparatus and systems described herein, other sampling systems (e.g., liquid displacement) may be used, provided such systems are capable of obtaining a representative sample and maintaining a constant sampling rate, and are, otherwise, capable of yielding acceptable results. Use of such systems is subject to the approval of the Administrator.

2.1 Grab Sampling (Figure 3-1).

2.1.1 Probe. Stainless steel or borosilicate glass tubing equipped with an in-stack or out-stack filter to remove particulate matter (a plug of glass wool is satisfactory for this purpose). Any other materials, inert to $O_2$, $CO_2$, CO and $N_2$ and resistant to temperature at sampling conditions, may be used for the probe. Examples of such materials are aluminum, copper, quartz glass, and Teflon.

2.1.2 Pump. A one-way squeeze bulb, or equivalent, to transport the gas sample to the analyzer.

2.2 Integrated Sampling (Figure 3-2).

2.2.1 Probe. Same as in Section 2.1.1.

2.2.2 Condenser. An air-cooled or water-cooled condenser, or other condenser no greater than 250 ml that will not remove $O_2$, $CO_2$, and $N_2$, to remove excess moisture which would interfere with the operation of the pump and flowmeter.

2.2.3 Valve. A needle valve, to adjust sample gas flow rate.

2.2.4 Pump. A leak-free, diaphragm-type pump, or equivalent, to transport sample gas to the flexible bag. Install a small surge tank between the pump and rate meter to eliminate the pulsation effect of the diaphragm pump on the rotameter.

BILLING CODE 6560-50-M

VOL 54 ISS 39 MR 1 1989 UMI

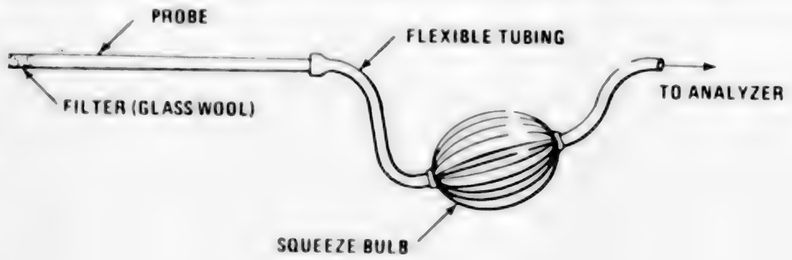

Figure 3-1. Grab sampling train.

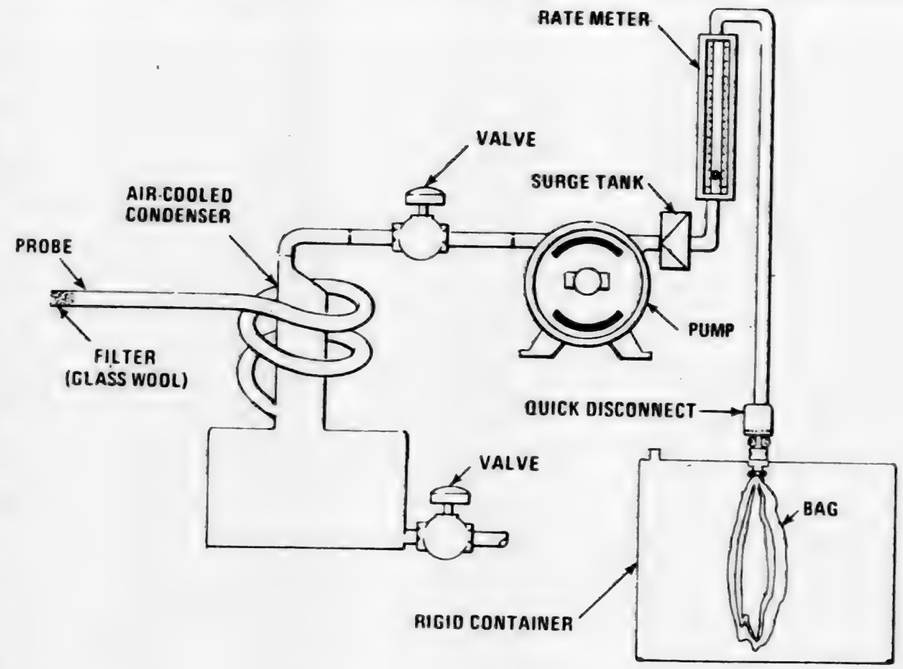

Figure 3-2. Integrated gas sampling train.

BILLING CODE 6560-50-C

VOL 54 ISS 39 MR 1 1989 UMI

2.2.5 Rate Meter. A rotameter, or equivalent rate meter, capable of measuring flow rate to within 2 percent of the selected flow rate. A flow rate range of 500 to 1000 cc/min is suggested.

2.2.6 Flexible Bag. Any leak-free plastic (e.g., Tedlar, Mylar, Teflon) or plastic-coated aluminum (e.g., aluminized Mylar) bag, or equivalent, having a capacity consistent with the selected flow rate and time length of the test run. A capacity in the range of 55 to 90 liters is suggested. To leak check the bag, connect it to a water manometer, and pressurize the bag to 5 to 10 cm $H_2O$ (2 to 4 in. $H_2O$). Allow to stand for 10 minutes. Any displacement in the water manometer indicates a leak. An alternative leak-check method is to pressurize the bag to 5 to 10 cm (2 to 4 in.) $H_2O$ and allow to stand overnight. A deflated bag indicates a leak.

2.2.7 Pressure Gauge. A water-filled U-tube manometer, or equivalent, of about 30 cm (12 in.), for the flexible bag leak check.

2.2.8 Vacuum Gauge. A mercury manometer, or equivalent, of at least 760 mm (30 in.) Hg, for the sampling train leak check.

2.3 Analysis. An Orsat or Fyrite type combusiton gas analyzer. For Orsat and Fyrite analyzer maintenance and operation procedures, follow the instructions recommended by the manufacturer, unless otherwise specified herein.

3. *Single-Point, Grab Sampling and Analytical Procedure.* 3.1 The sampling point in the duct shall either be at the centroid of the cross section or at a point no closer to the walls than 1.00 m (3.3 ft), unless otherwise specified by the Administrator.

3.2 Set up the equipment as shown in Figure 3–1, making sure all connections ahead of the analyzer are tight. If an Orsat analyzer is used, it is recommended that the analyzer be leak checked by following the procedure in Section 6; however, the lead check is optional.

3.3 Place the probe in the stack, with the tip of the probe positioned at the sampling point; purge the sampling line long enough to allow at least five exchanges. Draw a sample into the analyzer, and immediately analyze it for percent $CO_2$ and percent $O_2$. Determine the percentage of the gas that is $N_2$ and CO by subtracting the sum of the percent $CO_2$ and percent $O_2$ from 100 percent. Calculate the dry molecular weight as indicated in Section 7.2.

3.4 Repeat the sampling, analysis, and calculation procedures until the dry molecular weights of any three grab samples differ from their mean by no more than 0.3 g/g-mole (0.3 lb/lb-mole). Average these three molecular weights, and report the results to the nearest 0.1 g/g-mole (0.1 lb/lb-mole).

4. *Single-Point, Integrated Sampling and Analytical Procedure.* 4.1 The sampling point in the duct shall be located as specified in Section 3.1.

4.2 Leak check (optional) the flexible bag as in Section 2.2.6. Set up the equipment as shown in Figure 3–2. Just before sampling, leak check (optional) the train by placing a vacuum gauge at the condenser inlet, pulling a vacuum of at least 250 mm Hg (10 in. Hg), plugging the outlet at the quick disconnect, and then turning off the pump. The vacuum should remain stable for at least 0.5 minute. Evacutae the flexible bag. Connect the probe, and place it in the stack, with the tip of the probe positioned at the sampling point; purge the sampling line. Next, connect the bag, and make sure that all connections are tight.

4.3 Sample at a constant rate. The sampling run should be simultaneous with, and for the same total length of time as, the pollutant emission rate determination. Collection of at least 30 liters (1.00 $ft_3$) of sample gas is recommended; however, smaller volumes may be collected, if desired.

4.4 Obtain one integrated flue gas sample during each pollutant emission rate determination. Within 8 hours after the sample is taken, analyze it for percent $CO_2$ and percent $O_2$ using either an Orsat analyzer or Fyrite type combustion gas analyzer. If an Orsat analyzer is used, it is recommended that Orsat leak check described in Section 6, be performed before this determination; however, the check is optional. Determine the percentage of the gas that is $N_2$ and CO by subtracting the sum of the percent $CO_2$ and percent $O_2$ from 100 percent. Calculate the dry molecular weight as indicated in Section 7.2.

4.5 Repeat the analysis and calculation procedures until the individual dry molecular weights for any three analyses differ from their mean by no more than 0.3 g/g-mole (0.3 lb/lb-mole). Average these three molecular weights, and report the results to the nearest 0.1 g/g-mole (0.1 lb/lb-mole).

5. *Multi-Point, Integrated Sampling and Analytical Procedure.* 5.1 Unless otherwise specified by the Administrator, a minimum of eight traverse points shall be used for circular stacks having diameters less than 0.61 m (24 in.), a minimum of nine shall be used for rectangular stacks having equivalent diameters less than 0.61 m (24 in.), and a minimum of 12 traverse points shall be used for all other cases. The traverse points shall be located according to Method 1. The use of fewer points is subject to approval of the Administrator.

5.2 Follow the procedures outlined in Sections 4.2 through 4.5, except for the following: Traverse all sampling points, and sample at each point for an equal length of time. Record sampling data as shown in Figure 3–3.

| Time | Traverse pt. | Q, liter/min | Percent dev.* |
|---|---|---|---|
| | | | |
| | | | |
| | | | |
| | | | |
| | Average | | |

* Percent dev. $= (Q\text{-}Q_{avg}/Q_{avg}) \times 100$ (Must be $< 10\%$)

Figure 3–3. Sampling rate data.

6. *Leak-Check Procedure for Orsat Analyzer.* Moving an Orsat analyzer frequently causes it to leak. Therefore, an Orsat analyzer should be thoroughly lead checked on site before the flue gas sample is introduced into it. The procedure for leak checking an Orsat analyzer is as follows:

6.1 Bring the liquid level in each pipette up to the reference mark on the capillary tubing, and then close the pipette stopcock.

6.2 Raise the leveling bulb sufficiently to bring the confining liquid meniscus onto the graduated portion of the burette, and then close the manifold stopcock.

6.3 Record the meniscus position.

6.4 Observe the meniscus in the burette and the liquid level in the pipette for movement over the next 4 minutes.

6.5 For the Orsat analyzer to pass the leak check, two conditions must be met:

6.5.1 The liquid level in each pipette must not fall below the bottom of the capillary tubing during this 4-minute interval.

6.5.2 The meniscus in the burette must not change by more than 0.2 ml during this 4-minute interval.

6.6 If the analyzer fails the leak-check procedure, check all rubber connections and stopcocks to determine whether they might be the cause of the leak. Disassemble, clean, and regrease leaking stopcocks. Replace leaking rubber connections. After the analyzer is reassembled, repeat the leak-check procedure.

7. *Calculations*

7.1 Nomenclature.

$M_d$ = Dry molecluar weight, g/g-mole (1b/1b-mole).

$\%CO_2$ = Percent $CO_2$ by volume, dry basis.

$\%O_2$ = Percent $O_2$ by volume, dry basis.

%CO = Percent CO by volume, dry basis.

$\%N_2$ = Percent $N_2$ by volume, dry basis.

0.280 = Molecular weight of $N_2$ or CO, divided by 100.

0.320 = Molecular weight of $O_2$ divided by 100.

0.440 = Molecular weight of $CO_2$ divided by 100.

7.2 Dry Molecular Weight. Use Equation 3–1 to calculate the dry molecular weight of the stack gas.

$$M_d = 0.440(\%CO_2) + 0.320(\%O_2) + 0.280(\%N_2 + \%CO) \quad \text{Eq. 3–1}$$

**Note:** The above equation does not consider argon in air (about 0.9 percent, molecular weight of 39.9). A negative error of about 0.4 percent is introduced. The tester may choose to include argon in the analysis using procedures subject to approval of the Administrator.

9. Appendix A is amended by adding Method 3B to read as follows:

**Method 3B—Gas Analysis for the Determination of Emission Rate Correction Factor or Excess Air**

1. *Applicability and Principle.* 1.1 Applicability.

1.1.1 This method is applicable for determining carbon dioxide ($CO_2$), oxygen ($O_2$), and carbon monoxide (CO) concentrations of a sample from a gas stream of a fossil-fuel combustion process for excess air or emission rate correction factor calculations.

1.1.2 Other methods, as well as modifications to the procedure described herein, are also applicable for all of the above determinations. Examples of specific methods and modifications include: (1) a multi-point sampling method using an Orsat analyzer to analyze individual grab samples obtained at each point, and (2) a method using $CO_2$ or $O_2$ and stoichiometric calculations to determine excess air. These methods and modifications may be used, but are subject to the approval of the Administrator, U.S. Environmental Protection Agency (EPA).

1.1.3 Note: Mention of trade names or specific products does not constitute endorsement by EPA.

1.2 Principle. A gas sample is extracted from a stack by one of the following methods: (1) Single-point, grab sampling; (2) single-point, integrated sampling; or (3) multi-point, integrated sampling. The gas sample is analyzed for percent $CO_2$, percent $O_2$, and, if necessary, percent CO. An Orsat analyzer must be used for excess air or emission rate correction factor determinations.

2. *Apparatus*

The alternative sampling systems are the same as those mentioned in Section 2 of Method 3.

2.1 Grab Sampling and Integrated Sampling. Same as in Sections 2.1 and 2.2, respectively, of Method 3.

2.2 Analysis.

An Orsat analyzer only. For low $CO_2$ (less than 4.0 percent) or high $O_2$ (greater 15.0 percent) concentrations, the measuring burette of the Orsat must have at least 0.1 percent subdivisions. For Orsat maintenance and operation procedures, follow the instructions recommended by the manufacturer, unless otherwise specified herein.

3. *Procedures*

Each of the three procedures below shall be used only when specified in an applicable subpart of the standards. The use of these procedures for other purposes must have specific prior approval of the Administrator.

Note.—A Fyrite-type combustion gas analyzer is not acceptable for excess air or emission rate correction factor determinations, unless approved by the Administrator. If both percent $CO_2$ and percent $O_2$ are measured, the analytical results of any of the three procedures given below may also be used for calculating the dry molecular weight (see Method 3).

3.1 Single-Point, Grab Sampling and Analytical Procedure.

3.1.1 The sampling point in the duct shall be as described in Section 3.1 of Method 3.

3.1.2 Set up the equipment as shown in Figure 3–1 of Method 3, making sure all concentrations ahead of the analyzer are tight. Leak check the Orsat analyzer according to the procedure described in Section 6 of Method 3. this leak check is mandatory.

3.1.3 Place the probe in the stack, with the tip of the probe positioned at the sampling point; purge the sampling line long enough to allow at least five exchanges. Draw a sample into the analyzer. For emission rate correction factor determinations, immediately analyze the sample, as outlined in Sections 3.1.4 and 3.1.5, for percent $CO_2$ or percent $O_2$. If excess air is desired, proceed as follows: (1) Immediately analyze the sample, as in Sections 3.1.4 and 3.1.5, for percent $CO_2$, $O_2$, and CO; (2) determine the percentage of the gas that is $N_2$ by subtracting the sum of the percent $CO_2$, percent $O_2$, and percent CO from 100 percent, and (3) calculate percent excess air as outlined in Section 4.2.

3.1.4 To ensure complete absorption of the $CO_2$, $O_2$, or if applicable, CO, make repeated passes through each absorbing solution until two consecutive readings are the same. Several passes (three or four) should be made between readings. (If constant readings cannot be obtained after three consecutive readings, replace the absorbing solution.)

Note.—Since this single-point, grab sampling and analytical procedure is normally conducted in conjunction with a single-point, grab sampling and analytical procedure for a pollutant, only one analysis is ordinarily conducted. Therefore, great care must be taken to obtain a valid sample and analysis. Although in most cases, only $CO_2$ or $O_2$ is required, it is recommended that both $CO_2$ and $O_2$ be measured, and that Section 3.4 be used to validate the analytical data.

3.1.5 After the analysis is completed, leak check (mandatory) the Orsat analyzer once again, as described in Section 6 of Method 3. For the results of the analysis to be valid, the Orsat anaylzer must pass this leak test before and after the analysis.

3.2 Single-Point, Integrated Sampling and Analytical Procedure.

3.2.1 The sampling point in the duct shall be located as specified in Section 3.1.1.

3.2.2 Leak check (mandatory) the flexible bag as in Section 2.2.6 of Method 3. Set up the equipment as shown in Figure 3–2 of Method 3. Just before sampling, leak check (mandatory) the train as described in Section 4.2 of Method 3.

3.2.3 Sample at a constant rate, or as specified by the Administrator. The sampling run must be simultaneous with, and for the same total length of time as, the pollutant emission rate determination. Collect at least 30 liters (1.00 $ft^3$) of sample gas. Smaller volumes may be collected, subject to approval of the Administrator.

3.2.4 Obtain one integrated flue gas sample during each pollutant emission rate determination. For emission rate correction factor determination, analyze the sample within 4 hours after it is taken for percent $CO_2$ or percent $O_2$ (as outlined in Sections 3.2.5 through 3.2.7). The Orsat analyzer must be leak checked (see Section 6 of Method 3) before the analysis. If excess air is desired, proceed as follows: (1) Within 4 hours after the sample is taken, analyze it (as in Sections 3.2.5 through 3.2.7) for percent $CO_2$, $O_2$, and CO; (2) determine the percentage of the gas that is $N_2$ by subtracting the sum of the percent $CO_2$, percent $O_2$, and percent CO from 100 percent; and (3) calculate percent excess air, as outlined in Section 4.2.

3.2.5 To ensure complete absorption of the $CO_2$, $O_2$, or if applicable, CO, follow the procedure described in Section 3.1.4.

Note.—Although in most instances only $CO_2$ or $O_2$ is required, it is recommended that both $CO_2$ and $O_2$ be measured, and that Section 3.4.1 be used to validate the analytical data.

3.2.6 Repeat the analysis until the following criteria are met:

3.2.6.1 For percent $CO_2$, repeat the analytical procedure until the results of any three analyses differ by no more than (a) 0.3 percent by volume when $CO_2$ is greater than 4.0 percent or (b) 0.2 percent by volume when $CO_2$ is less than or equal to 4.0 percent. Average three acceptable values of percent $CO_2$, and report the results to the nearest 0.1 percent.

3.2.6.2 For percent $O_2$, repeat the analytical procedure until the results of any three analyses differ by no more than (a) 0.3 percent by volume when $O_2$ is less than 15.0 percent or (b) 0.2 percent by volume when $O_2$ is greater than or equal to 15.0 percent. Average the three acceptable values of percent $O_2$, and report the results to the nearest 0.1 percent.

3.2.6.3 For percent CO, repeat the analytical procedure until the results of any three analyses differ by no more than 0.3 percent. Average the three acceptable values of percent CO, and report the results to the nearest 0.1 percent.

3.27 After the analysis is completed, leak check (mandatory) the Orsat analyzer once again, as described in Section 6 of Method 3. For the results of the analysis to be valid, the Orsat analyzer must pass this leak test before and after the analysis.

3.3 Multi-Point, Integrated Sampling and Analytical Procedure.

3.3.1 The sampling points shall be determined as specified in Section 5.3 of Method 3.

3.3.2 Follow the procedures outlined in Sections 3.2.2 through 3.2.7, except for the following: Traverse all sampling points, and sample at each point for an equal length of time. Record sampling data as shown in Figure 3–3 of Method 3.

3.4 Quality Control Procedures.

3.4.1 Data Validation When both $CO_2$ and $O_2$ Are Measures. Although in most instances, only $CO_2$ or $O_2$ measurement is required, it is recommended that both $CO_2$ and $O_2$ be measured to provide a check on the quality of the data. The following quality control procedure is suggested.

Note.—Since the method for validating the $CO_2$ and $O_2$ analyses is based on combustion of organic and fossil fuels and dilution of the gas stream with air, this method does not

VOL 54 ISS 39 MR 1 1989 UMI

apply to sources that: (1) Remove $CO_2$ or $O_2$ through processes other than combustion, (2) add $O_2$ (e.g., oxygen enrichment) and $N_2$ in proportions different from that of air, (3) add $CO_2$ (e.g., cement or lime kilns), or (4) have on fuel factor, $F_o$, values obtainable (e.g., extremely variable waste mixtures). This method validates the measured proportions of $CO_2$ and $O_2$ for fuel type, but the method does not detect sample dilution resulting from leaks during or after sample collection. The method is applicable for samples collected downstream of most lime or limestone flue-gas desulfurization units as the $CO_2$ added or removed from the gas stream is not significant in relation to the total $CO_2$ concentration. The $CO_2$ concentrations from other types of scrubbers using only water or basic slurry can be significantly affected and would render the $F_o$ check minimally useful.

3.4.1.1 Calculate a fuel factor, $F_o$, using the following equation:

$$F_o = \frac{20.9 - \%O_2}{\%CO_2} \qquad \text{Eq. 3B-1}$$

where:

$\%O_2$ = Percent $O_2$ by volume, dry basis.
$\%CO_2$ = Percent $CO_2$ by volume, dry basis.
20.9 = Percent $O_2$ by volume in ambient air.

If CO is present in quantities measurable by this method, adjust the $O_2$ and $CO_2$ values before performing the calculation for $F_o$ as follows:

$$\%CO_2 = (adj) = \%CO_2 + \%CO$$
$$\%O_2 = (adj) = \%O_2 - 0.5\ \%CO$$

where:

%CO = Percent CO by volume, dry basis.

3.4.1.2 Compare the calculated $F_o$ factor with the expected $F_o$ values. The following table may be used in establishing acceptable ranges for the expected $F_o$ if the fuel being burned is known. When fuels are burned in combinations, calculate the combined fuel $F_d$ and $F_o$ factors (as defined in Method 19) according to the procedure in Method 19, Section 5.2.3. Then calcuate the $F_o$ factor as follows:

$$F_o = \frac{0.209F_d}{F_c} \qquad \text{Eq. 3B-2}$$

| Fuel type | $F_o$ range |
|---|---|
| Coal: | |
| Anthracite and lignite | 1.016–1.130 |
| Bituminous | 1.083–1.230 |
| Oil: | |
| Distillate | 1.260–1.413 |
| Residual | 1.210–1.370 |
| Gas: | |
| Natural | 1.600–1.836 |
| Propane | 1.434–1.586 |
| Butane | 1.405–1.553 |
| Wood | 1.000–1.120 |
| Wood bark | 1.003–1.130 |

3.4.1 Calculated $F_o$ values, beyond the acceptable ranges shown in this table, should be investigated before accepting the test results. For example, the strength of the solutions in the gas analyzer and the analyzing technique should be checked by sampling and analyzing a known concentration, such as air; the fuel factor should be reviewed and verified. An acceptability range of ±12 percent is appropriate for the $F_o$ factor of mixed fuels with variable fuel ratios. The level of the emission rate relative to the compliance level should be considered in determining if a retest is appropriate, i.e.; if the measured emissions are much lower or much greater than the compliance limit, repetition of the test would not significantly change the compliance status of the source and would be unnecessarily time consuming and costly.

4. Calculations

4.1 Nomenclature. Same as Section 5 of Method 3 with the addition of the following:

%EA = Percent excess air.
0.264 = Ratio of $O_2$ to $N_2$ in air, v/v.

4.2 Percent Excess Air. Calculate the present excess air (if applicable) by substituting the appropriate values of percent $O_2$, CO, and $N_2$ (obtained from Section 3.1.3 or 3.2.4) into Equation 3B-3.

$$\%EA = \left[\frac{\%O_2 - 0.5\ CO}{0.264\ \%N_2 - (\%O_2 - 0.5\ \%CO)}\right] \times 100 \qquad \text{Eq. 3B-3}$$

Note.—The equation above assumes that ambient air is used as the source of $O_2$ and that the fuel does not contain appreciable amounts of $N_2$ (as do coke oven or blast furance gases). For those cases when appreciable amounts of $N_2$ are present (coal, oil, and natural gas do not contain appreciable amounts of $N_2$) or when oxygen enrichment is used, alternative methods, subject to approval of the Administrator, are required.

4. *Bibliography*

Same as Method 3.

BILLING CODE 6560-50-M

---

**40 CFR Part 60**

[AD-FRL-3530-5]

**Standards of Performance for New Stationary Sources**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule and notice of public hearing.

**SUMMARY:** The purpose of this proposed rule is five-fold: (1) Require (as opposed to being an option) the monitoring of sulfur dioxide ($SO_2$) in gases discharged into the atmosphere from the combustion of fuel gases or, as an alternative, the monitoring of hydrogen sulfide ($H_2S$) in fuel gases; (2) delete the mention of controlling $SO_2$ after combustion of fuel gases; (3) delete the monitoring requirement of $H_2S$ in gases discharged into the atmosphere from Claus sulfur recovery plants, but require the monitoring of total reduced sulfur (TRS) compounds using TRS continuous emission monitoring systems (CEM's) or $SO_2$ CEMS's after oxidizing the TRS compounds to $SO_2$; (4) add Performance Specification (PS) 7 for $H_2S$ CEMS's to Appendix B of this part; and (5) clarify ambiguities in the existing regulations. All affected fuel gas combustion devices and Claus plants in petroleum refineries subject to Subpart J of 40 CFR Part 60 will be required to install and operate CEMS's within 1 year of the promulgation date. These monitoring requirements are not new, but previous $H_2S$ and TRS CEMS installations were contingent upon the Agency's promulgation of PS's.

A public hearing will be held, if requested, to provide interested persons an opportunity for oral presentation of data, views, or arguments concerning the proposed rule.

**DATES:** *Comments.* Comments must be received on or before May 15, 1989.

*Public Hearing.* If anyone contacts EPA requesting to speak at a public hearing by March 22, 1989, a public hearing will be held on April 17, 1989, beginning at 10:00 a.m. Persons interested in attending the hearing should call Foston Curtis at (919) 541-1063 to verify that a hearing will be held.

*Request to Speak at Hearing.* Persons wishing to present oral testimony must contact EPA by March 22, 1989.

**ADDRESSES:** *Comments.* Comments should be submitted (in duplicate if possible) to: Central Docket Section (LE-131), Attention: Docket Number A-88-24, U.S. Environmental Protection Agency, South Conference Center, Room 4, 401 M Street, SW., Washington, DC 20460.

*Public Hearing.* If anyone contacts EPA requesting a public hearing, it will be held at EPA's Emission Measurement Laboratory, Research Triangle Park, North Carolina. Persons interested in attending the hearing or wishing to present oral testimony should notify Foston Curtis, Emission Measurement Branch (MD-19), Technical Support Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-1063.

*Docket.* Docket No. A-88-24, containing materials relevant to this rulemaking, is available for public inspection and copying between 8:00 a.m. and 3:30 p.m., Monday through Friday, at EPA's Central Docket Section, South Conference Center, Room 4, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

**FOR FURTHER INFORMATION CONTACT:** Foston Curtis or Roger T. Shigehara, Emission Measurement Branch (MD-19), Technical Support Division, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-1063.

**SUPPLEMENTARY INFORMATION:**

## I. The Rulemaking

The present monitoring requirements for fuel gas combustion devices under § 60.105(a) (3) and (4) allow the options of monitoring $SO_2$ after fuel gases are combusted or monitoring $H_2S$ in the fuel gases. Since October 6, 1975 (40 FR 46250), affected facilities choosing to monitor $H_2S$ in the fuel gases have been exempted from the monitoring requirements of § 60.105(a)(4) because PS's for $H_2S$ CEMS's had not been established. This rulemaking proposes to amend the emission monitoring requirements to end this exemption. The effect of this rulemaking will be to require affected facilities to monitor $SO_2$ after fuel gas combustion or, as an alternative, $H_2S$ in the fuel gas.

When fuel gases are burned in a combustion device, the $H_2S$ is converted to $SO_2$. The resulting $SO_2$ concentration is substantially less than the corresponding $H_2S$ in the fuel gas due to dilution from added combustion air. The amount of dilution air required for complete fuel gas combustion hinges upon the makeup of fuel gas components (primarily hydrogen and hydrocarbons) and their stochiometric need for oxygen. The EPA investigated a number of typical fuel gas compositions and their combustion products and determined that, at zero percent excess air, the concentration of $SO_2$ formed from combusting fuel gas containing $H_2S$ at the standard level (162 ppm) ranged from 9 to 25 ppm with the majority of values between 15 and 20 ppm. This agrees with the 15- to 20-ppm $SO_2$ level noted in the Background Document to the proposed petroleum refineries standard.

Realizing the complexity of establishing the $SO_2/H_2S$ equivalency on a case-by-case basis, EPA has selected 20 ppm to represent the compliance level for $SO_2$. In addition, rather than requiring monitoring of the effluent after each combustion device, EPA is allowing the monitoring of $SO_2$ after only one of the combustion devices as long as that one location accurately represents the fuel gas being burned by all of the combustion devices.

During 1978 and 1982, EPA conducted evaluations of $H_2S$ CEMS's and concluded that acceptable $H_2S$ CEMS's were not available (see Section 4 of PS 7). However, a State agency and a local agency reported that $H_2S$ CEMS's have been installed under their jurisdiction that are operating satisfactorily. Certification test reports that have been submitted for Agency review indicate that, at least in these cases, acceptable CEMS accuracy and calibration drift are attainable. Other data from regulatory agencies have shown varying degrees of success in certifying and auditing $H_2S$ CEMS's. Most of these data were taken from $H_2S$ CEMS's of the same type, and instrument performance appears to be linked to operator and maintenance proficiency. Thus, EPA had decided to allow the use of $H_2S$ CEMS's for fuel gases as an alternative to $SO_2$ CEMS's for combusted fuel gases. For this purpose, PS 7 is being proposed.

In reviewing the regulations, EPA determined that the option of controlling $SO_2$ after combusting the fuel gases was not being used. Also, this option does not appear to be an economically feasible alternative for future consideration. Therefore, mention of this control option is being deleted from the regulation. This action, however, does not prohibit the use of such control devices. In the future, sources that desire to burn fuel gases containing $H_2S$ in excess of 230 mg/dscm and control the resulting $SO_2$ emissions may petition the Administration for an alternative compliance demonstration.

Hydrogen sulfide and TRS emitted from Claus plants are regulated by standards set at 10 and 300 ppm, respectively. Total reduced sulfur compounds, though determined separately from TRS, are also inclusive of $H_2S$ by definition. The Agency has determined that it is difficult to monitor the disproportionate concentrations of $H_2S$ and TRS on a continual basis, especially at levels near the standards. A separate determination of $H_2S$ apart from TRS will therefore not be required, but only the continuous monitoring of TRS. Performance Specification 5 and Method 15 of 15A are being proposed as the means to evaluate the TRS CEMS performance.

For greater flexibility, EPA is also proposing to allow the use of a CEMS that oxidizes the TRS compounds to $SO_2$ and analyzes the concentration of the resulting $SO_2$. Rather than trying to determine the concentration of $SO_2$ equivalent to the TRS concentration, EPA is proposing to use the level of 250 ppm $SO_2$ (dry basis, zero percent excess air) to represent the $SO_2$ compliance level. This concentration is consistent with the control option of combusting the effluent gases under § 60.102(a)(2)(i).

In addition to the above changes, EPA is proposing to clarify ambiguities in the existing regulations by correcting inconsistencies and by specifying pertinent testing procedures that originally were only implied.

This rulemaking does not impose emission measurement requirements beyond those specified in the current regulations, nor does it change any emission standard or make it more stringent. Rather, the rulemaking will facilitate the use of acceptable CEMS's and allow affected facilities to comply with monitoring requirements to which they are already subject.

## II. Administrative Requirements

### *A. Public Hearing*

A public hearing will be held, if requested, to discuss the proposed revisions in accordance with section 307(d)(5) of the Clean Air Act. Persons wishing to make oral presentations should contract EPA at the address given in the ADDRESSES section of this preamble. Oral presentations will be limited to 15 minutes each. Any member of the public may file a written statement with EPA before, during, or within 30 days after the hearing. Written statements should be addressed to the Central Docket Section address given in the **ADDRESSES** section of this preamble.

A verbatim transcript of the hearing and written statements will be available for public inspection and copying during normal working hours at EPA's Central Docket Section in Washington, DC (see **ADDRESSES** section of this preamble).

### *B. Docket*

The docket is an organized and complete file of all the information

BEST COPY AVAILABLE

VOL 54 ISS 39 MR 1 1989 UMI

submitted to or otherwise considered by EPA in the development of this proposed rulemaking. The principal purposes of the docket are to: (1) allow interested parties to identify and locate documents so that they can effectively participate in the rulemaking process, and (2) serve as the record in case of judicial review (except for interagency review materials) (Section 307(d)(7)(A)).

*C. Office of Management and Budget Review*

Executive Order 12291 Review. Under Executive Order 12291, EPA must judge whether a regulation is "major" and, therefore, subject to the requirement of a regulatory impact analysis. This rulemaking would not result in any of the adverse economic effects set forth in section 1 of the Order as grounds for finding a "major rule." It will not have an annual effect on the economy of $100 million or more, nor will it result in a major increase in costs or prices. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

*D. Regulatory Flexibility Act Compliance*

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this attached rule, if promulgated, will not have any economic impact on small entities because no additional costs will be incurred.

This rule does not change any information collection requirements currently approved by OMB under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Information requirements contained in 40 CFR Part 60, Subpart J are cleared under OMB control number 2060-0022.

**List of Subjects in 40 CFR Part 60**

Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements, Incorporation by reference, and Petroleum refineries.

Date: February 10, 1989.

**Don R. Clay,**

*Acting Assistant Administrator for Air and Radiation.*

It is proposed that 40 CFR Part 60 be amended as follows:

**PART 60—[AMENDED]**

1. The authority for 40 CFR Part 60 continues to read:

Authority: Sections 101, 111, 114, 116, and 301 of the Clean Air Act, as amended (42 U.S.C. 7401, 7411, 7414, 7416, 7601).

**§ 60.103 [Amended]**

2. In § 60.103(a), the phrase "gases which contain carbon monoxide in excess of 0.050 percent by volume." is revised to read "gases that contain carbon monoxide (CO) in excess of 500 ppm by volume (dry basis)."

3. In § 60.104, paragraphs (a)(1), (2)(i), and (2)(ii) are revised to read as follows:

**§ 60.104 Standard for sulfur dioxide.**

(a) * * *

(1) Burn in any fuel gas combustion device any fuel gas that contains hydrogen sulfide ($H_2S$) in excess of 230 mg/dscm (0.10 gr/dscf). Under emergency malfunction situations, the combustion in a flare of process upset gases or fuel gas that is released to the flare as a result of relief valve leakage is exempt from this paragraph.

(2) * * *

(i) For an oxidation control system or a reduction control system followed by incineration, 250 ppm by volume (dry basis) of sulfur dioxide ($SO_2$) at zero percent excess air.

(ii) For a reduction control system not followed by incineration, 300 ppm by volume of total reduced sulfur (TRS) compounds and 10 ppm by volume of hydrogen sulfide ($H_2S$), each calculated as ppm $SO_2$ by volume (dry basis) at zero percent excess air.

4. In § 60.105, paragraphs (a), (d), and (e) are revised to read as follows:

**§ 60.105 Emission monitoring.**

(a) The owner or operator of the affected facility subject to the provisions of this subpart shall install, calibrate, maintain, and operate continuous emission monitoring systems (CEMS's) and continuous opacity monitoring systems (COMS's) as follows:

(1) For fluid catalytic cracking unit catalyst regenerators subject to § 60.102(a)(2), a COMS for continuously measuring and recording the opacity of emissions into the atmosphere. The COMS shall be spanned at 60, 70, or 80 percent opacity.

(2) For fluid catalytic cracking unit catalyst regenerators subject to § 60.103(a), a CEMS for continuously measuring and recording the concentration by volume (dry basis) of CO emissions into the atmosphere, except as provided in paragraph (ii) below.

(i) The span value for this CEMS is 1,000 ppm CO.

(ii) A CO CEMS need not be installed if the owner or operator demonstrates that the average CO emissions are less than 50 ppm (dry basis) and also files a written request for exemption to the Administrator and receives such an exemption. The demonstration shall consist of continuously monitoring CO emissions for 30 days using an instrument that shall meet the requirements of Performance Specification 4 of Appendix B of this part. The span value shall be 100 ppm CO instead of 1,000 ppm, and the relative accuracy limit shall be 10 percent of the average CO emissions or 5 ppm CO, whichever is greater. For CEMS's that are identical to Method 10 and employ the sample conditioning system of Method 10A, the alternative relative accuracy test procedure in Section 10.1 of Performance Specification 2 may be used in place of the relative accuracy test.

(3) For fuel gas combustion devices subject to § 60.104(a)(1), a CEMS for continuously measuring and recording the concentration by volume (dry basis, zero percent excess air) of $SO_2$ emissions into the atmosphere (except where an $H_2S$ CEMS is installed under paragraph (a)(4) of this section). The CEMS shall include an oxygen monitor for correcting the data for excess air.

(i) The span values for this CEMS are 50 ppm $SO_2$ and 10 percent oxygen ($O_2$).

(ii) The $SO_2$ monitoring level equivalent to the $H_2S$ standard under § 60.104(a)(1) shall be 20 ppm (dry basis, zero percent excess air).

(iii) The performance evaluations for this $SO_2$ CEMS under § 60.13(c) shall use Performance Specification 2. Methods 6 and 3 shall be used for conducting the relative accuracy evaluations. Method 6 samples shall be taken at a flow rate of 2 liters/min for at least 30 minutes. The relative accuracy limit shall be 20 percent or 4 ppm, whichever is greater, and the calibration drift limit shall be 5 percent of the established span value.

(iv) Fuel gas combustion devices having a common source of fuel gas may be monitored at only one location (i.e., after one of the combustion devices), if monitoring at this location accurately represents the $SO_2$ emissions into the atmosphere from each of the combustion devices.

(4) In place of the $SO_2$ CEMS in paragraph (a)(3) of this section, a CEMS for continuously measuring and recording the concentration (dry basis) of $H_2S$ in fuel gases before being burned in any fuel gas combustion device.

(i) The span value for this CEMS is 425 mg/dscm $H_2S$.

(ii) Fuel gas combustion devices having a common source of fuel gas may be monitored at only one location, if monitoring at this location accurately represents the concentration of $H_2S$ in the fuel gas being burned.

(iii) The performance evaluations for this $H_2S$ CEMS under § 60.13(c) shall use Performance Specification 7. Method 11 shall be used for conducting the relative accuracy evaluations.

(5) For Claus sulfur recovery plants with oxidation control systems or reduction control systems followed by incineration subject to § 60.104(a)(2)(i), a CEMS for continuously measuring and recording the concentration (dry basis, zero percent excess air) of $SO_2$ emissions into the atmosphere. The CEMS shall include an oxygen monitor for correcting the data for excess air.

(i) The span values for this CEMS are 500 ppm $SO_2$ and 10 percent $O_2$.

(ii) The performance evaluations for this $SO_2$ CEMS under § 60.13(c) shall use Performance Specification 2. Methods 6 and 3 shall be used for conducting the relative accuracy evaluations.

(6) For Claus sulfur recovery plants with reduction control systems not followed by incineration subject to § 60.104(a)(2)(ii), a CEMS for continuously measuring and recording the concentration of TRS and $O_2$ emissions into the atmosphere. The TRS emissions shall be calculated as $SO_2$ (dry basis, zero percent excess air).

(i) The span values for this CEMS are 450 ppm TRS and 10 percent $O_2$.

(ii) The performance evaluations for this TRS (and $O_2$) CEMS under § 60.13(c) shall use Performance Specification 5, except the calibration drift specification is 2.5 percent of the span value rather than 5 percent. Methods 15 or 15A and Method 3 shall be used for conducting the relative accuracy evaluations. If Method 3 yields $O_2$ concentrations below 0.25 percent during the performance specification test, the $O_2$ concentration may be assumed to be zero and the TRS CEMS need not include an $O_2$ monitor.

(7) In place of the TRS CEMS under paragraph (a)(6) of this section, a CEMS using an air or $O_2$ dilution and oxidation system to convert the TRS to $SO_2$ for continuously measuring and recording the concentration (dry basis, zero percent excess air) of the resultant $SO_2$. The CEMS shall include an oxygen monitor for correcting the data for excess oxygen.

(i) The span values for this CEMS are 375 ppm $SO_2$ and 10 percent $O_2$.

(ii) For reporting purposes, the $SO_2$ exceedance level for this CEMS is 250 ppm (dry basis, zero percent excess air).

(iii) The performance evaluations for this $SO_2$ (and $O_2$) CEMS under § 60.13(c) shall use Performance Specification 5. Methods 15 or 15A and Method 3 shall be used for conducting the relative accuracy evaluations.

* * * * *

(d) For any fluid catalytic cracking unit catalyst regenerator under § 60.102 that uses an incinerator-waste heat boiler to combust the exhaust gases from the catalyst regenerator, the owner or operator shall record daily the rate of combustion of liquid or solid fossil-fuels (liters/hr or kg/hr) and the hours of operation during which liquid or solid fossil-fuels are combusted in the incinerator-waste heat boiler.

(e) For the purposes of reports under § 60.7(c), periods of excess emissions that shall be determined and reported are defined as follows (Note: All averages, except for opacity, shall be determined as the arithmetic average of the applicable 1-hour averages, e.g., the rolling 3-hour average shall be determined as the arithmetic average of 3 contiguous 1-hour averages):

(1) *Opacity:* All 1-hour periods that contain two or more 6-minute periods during which the average opacity as measured by the COMS under § 60.105(c)(1) exceeds 30 percent.

(2) *Carbon monoxide.* All 1-hour periods during which the average CO concentration as measured by the CO CEMS under § 60.105(a)(2) exceeds 500 ppm.

(3) *Sulfur dioxide from fuel gas combustion.*

(i) All rolling 3-hour periods during which the average concentration of $SO_2$ as measured by the $SO_2$ CEMS under § 60.105(a)(3) exceeds 20 ppm (dry basis, zero percent excess air); or

(ii) All rolling 3-hour periods during which the average concentration of $H_2S$ as measured by the $H_2S$ CEMS under § 60.105(a)(4) exceeds 230 mg/dscm (0.10 gr/dscf).

(4) *Sulfur dioxide from Claus sulfur recovery plants.*

(i) All 12-hour periods during which the average concentration of $SO_2$ as measured by the $SO_2$ CEMS under § 60.105(a)(5) exceeds 250 ppm (dry basis, zero percent excess air); or

(ii) All 12-hour periods during which the average concentration of TRS (as $SO_2$) as measured by the TRS CEMS under § 60.105(a)(6) exceeds 300 ppm; or

(iii) All 12-hour periods during which the average concentration of $SO_2$ as measured by the $SO_2$ CEMS under § 60.105(a)(7) exceeds 250 ppm (dry basis, zero percent excess air); or

* * * * *

**§ 60.106 Test methods and procedures.**

(a) In conducting the performance tests required in § 60.8, the owner or operator shall use as reference methods and procedures the test methods in Appendix A of this part or other methods and procedures as specified in this section, except as provided in § 60.8(b).

(b) The owner or operator shall determine compliance with the particulate matter (PM) standards in § 60.102(a) as follows:

(1) The emission rate (E) of PM shall be computed for each run using the following equation:

$$E = \frac{K\,(c_s\,Q_{sd})}{R_c}$$

where:

E = Emission rate of PM, kg/1000 kg (lb/1000 lb) of coke burn-off.

$c_s$ = Concentration of PM, g/dscm (lb/dscf).

$Q_{sd}$ = Volumetric flow rate of effluent gas, dscm/hr (dscf/hr).

$R_c$ = Coke burn-off, rate, kg coke/hr (lb coke/hr).

K = Conversion factor, 1.0 $kg^2/g$)/(1000 kg) [$10^3$ lb/(1000 lb)].

(2) Method 5 shall be used to determine the concentation ($c_s$) of PM and volumetric flow rate ($Q_{sd}$) of the effluent gas. The sampling time and sample volume for each run shall be at least 60 minutes and 0.90 dscm (31.8 dscf).

(3) The coke burn-off rate ($R_c$) shall be computed for each run using the following equation:

$$R_c = K_1\,Q_r\,[\%CO_2 + \%CO_2) + K_2\,Q_a - K_3\,Q_r\,[(\%CO/2) + \%CO_2 + \%O_2]$$

where:

$R_c$ = Coke burn-off rate, kg/hr (lb/hr).

$Q_r$ = Volumetric flow rate of exhaust gas from catalyst regenerator before entering the emission control system, dscm/min (dscf/min).

$Q_a$ = Volumetric flow rate of air to FCCU regenerator, as determined from the fluid catalytic cracking unit control room instrumentation, dscm/min (dscf/min).

$\%CO_2$ = Carbon dioxide concentration, percent by volume (dry basis).

%CO = Carbon monoxide concentration, percent by volume (dry basis).

$\%O_2$ = Oxygen concentration, percent by volume (dry basis).

$K_1$ = Material balance and conversion factor, 0.2982 (kg-min)/(hr-dscm-%) [0.0186 (lb-min)/(hr-dscf-%)].

VOL 54 ISS 39 MR 1 1989 UMI

$K_f$ = Material balance and conversion factor, 2.088 (kg-min)/(hr-dscm-%), [0.1303 (lb-min)/(hr-dscf-%)].

$K_a$ = Material balance and conversion factor, 0.0994 (kg-min)/(hr-dscm-%) [0.0062 (lb-min)/(hr-dscf-%)].

(i) Method 2 shall be used to determine the volumetric flow rate ($Q_s$).

(ii) The emission correction factor, integrated sampling and analysis procedure of Method 3 shall be used to determine $CO_2$, CO, and $O_2$ concentrations.

(4) Method 9 and the procedures of § 60.11 shall be used to determine opacity.

(c) If auxiliary liquid or solid fossil-fuels are burned in an incinerator-waste heat boiler, the owner or operator shall determine the emission rate of PM permitted in § 60.102(b) as follows:

(1) The allowable emission rate ($E_a$) of PM shall be computed for each run using the following equation:

$$E_a = 1.0 + A\,(H/R_c)\,K'$$

where:

$E_a$ = Emission rate of PM allowed, kg/100 kg (lb/1000 lb) of coke burn-off in catalyst regenerator.

1.0 = Emission standard, kg coke/1000 kg (lb coke/1000 lb).

A = Allowable incremental rate of PM emissions, 0.18 g/million cal (0.10 lb/million Btu).

H = Heat input rate from solid or liquid fossil fuel, million cal/hr (million Btu/hr).

$R_c$ = Coke burn-off rate, kg coke/hr (lb coke/hr).

K' = Conversion factor to units of standard, 1.0 ($kg^2/g$)/(1000 kg) ($10^2$ lb/(1000 lb)).

(2) Procedures subject to the approval of the Administrator shall be used to determine the heat input rate.

(3) The procedure in paragraph (b)(3) of this section shall be used to determine the coke burn-off rate ($R_c$).

(d) The owner or operator shall determine compliance with the CO standard in § 60.103(a) by using the integrated sampling technique of Method 10 to determine the CO concentration (dry basis). The sampling time for each run shall be 60 minutes.

(e) The owner or operator shall determine compliance with the $H_2S$ standard in § 60.104(a)(1) as follows: Method 11 shall be used to determine the $H_2S$ concentration. The gases entering the sampling train should be at about atmospheric pressure. If the pressure in the refinery fuel gas lines is relatively high, a flow control valve may be used to reduce the pressure. If the line pressure is high enough to operate the sampling train without a vacuum pump, the pump may be eliminated from the sampling train. The sample shall be drawn from a point near the centroid of the fuel gas line. The sampling time and sample volume shall be at least 10 minutes and 0.010 dscm (0.35 dscf). Two samples of equal sampling times shall be taken at about 1-hour intervals. The arithmetic average of these two samples shall constitute a run. For most fuel gases, sampling times exceeding 20 minutes may result in depletion of the collection solution, although fuel gases containing low concentrations of $H_2S$ may necessitate sampling for longer periods of time.

(f) The owner or operator shall determine compliance with the $SO_2$ and the $H_2S$ and TRS standards in § 60.104(a)(2) as follows:

(1) Method 6 shall be used to determine the $SO_2$ concentration. The concentration in mg/dscm (lb/dscf) obtained by Method 6 is multiplied by 0.3754 to obtain the concentration in ppm. The sampling point in the duct shall be the centroid of the cross section if the cross-sectional area is less than 5.00 $m^2$ (54 $ft^2$) or at a point no closer to the walls than 1.00 m (39 in.) if the cross-sectional area is 5.00 $m^2$ or more and the centroid is more than 1 m from the wall. The sampling time and sample volume shall be at least 10 minutes and 0.010 dscm (0.35 dscf) for each sample. Eight samples of equal sampling times shall be taken at about 30-minute intervals. The arithmetic average of these 8 samples shall constitute a run. Method 4 shall be used to determine the moisture content of the gases. The sampling point for Method 4 shall be adjacent to the sampling point for Method 6. The sampling time for each sample shall be equal to the time it takes for two Method 6 samples. The moisture content from this sample shall be used to correct the corresponding Method 6 samples for moisture. For documenting the oxidation efficiency of the control device for total reduced sulfur compounds, Method 15 shall be used following the procedures of paragraph (f)(2) of this section.

(2) Method 15 shall be used to determine the TRS and $H_2S$ concentrations. Each run shall consists of 16 samples taken over a minimum of 3 hours. The sampling point shall be the same as that described for Method 6 in paragraph (f)(1) of this section. The ensure minimum residence time for the sample inside the sample lines, the sampling rate shall be at least 3.0 lpm (0.10 cfm). The $SO_2$ equivalent for each run shall be calculated after being corrected for moisture and oxygen as the arithmetic average of the $SO_2$ equivalent for each sample during the run. Method 4 shall be used to determine the moisture content of the gases as in paragraph (f)(1) of this section. The sampling time for each sample shall be equal to the time it takes for four Method 15 samples.

(3) The oxygen concentration used to correct the emission rate for excess air shall be obtained by the integrated sampling and analysis procedure of Method 3. The samples shall be taken simultaneously with the $SO_2$, TRS and $H_2S$, or moisture samples. The $SO_2$, TRS, and $H_2S$ samples shall be corrected to zero percent excess air using the following equation:

$$C_c = C\,\frac{(20.9)}{20.9 - \%O_2}$$

where:

$C_c$ = Corrected concentration of pollutant, ppm by volume (dry basis).

C = Measured concentration of pollutant, ppm by volume (dry basis).

$\%O_2$ = Oxygen concentration, percent by volume (dry basis).

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

### 50 CFR Part 17

### Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Queen Alexandra's Birdwing Butterfly

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Proposed rule.

**SUMMARY:** The Service proposes to determine endangered status for Queen Alexandra's birdwing butterfly (*Troides (=Ornithoptera) alexandrae*). This species, the world's largest butterfly, occurs only in a small part of Papua New Guinea, where it is rare and is losing its restricted forest habitat to logging and agricultural activity. This proposal, if made final, would implement the protection of the Endangered Species Act of 1973, as amended, for this butterfly. The Service seeks relevant data and comments from the public.

**DATES:** Comments must be received by May 1, 1989. Public hearing requests must be received by April 17, 1989.

**ADDRESSES:** Comments and materials concerning this proposal should be sent to Chief, Office of Scientific Authority; Mail Stop: Room 527, Matomic Building; U.S. Fish and Wildlife Service; Washington, DC 20240. Comments and materials received will be available for public inspection from 8:00 a.m. to 4:00 p.m. Monday through Friday, in room 537, 1717 H Street NW., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Dr. Charles W. Dane at above address or phone (202) 653-5948 or FTS 653-5948.

**SUPPLEMENTARY INFORMATION:**

#### Background

Queen Alexandra's birdwing butterfly was discovered in 1906. Its distribution is restricted to primary and advanced secondary lowland rain forest in or near the Popondetta Plain, a small area in the Northern Province of Papua New Guinea (Collins and Morris 1985). For many years it was known scientifically as *Ornithoptera alexandrae*, but recently Miller (1987) synonymized the genus *Ornithoptera* with *Troides*.

*Troides alexandrae* is the largest butterfly in the world. The females have a wingspan of up to 10 inches (250 millimeters) and are dark brown in color. The males have a wingspan of 6½ to 7½ inches (170 to 190 millimeters) and are light blue, yellow, green, and black (Collins and Morris 1985).

Because of its restricted range, the destruction of much of its habitat by human activity, and its commercial value, *T. alexandrae* has been classified as endangered by the International Union for Conservation of Nature (Collins and Morris 1985; Wells, Pyle, and Collins 1983). The IUCN's Species Survival Commission selected it as one of the 12 most endangered animals in the world (Fitter 1985). It also has been placed on Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

On March 30, 1988, the Service received a petition from Ms. Marion Kelly Murphy, requesting that *T. alexandrae* be added to the U.S. List of Endangered and Threatened Wildlife. On July 1, 1988, the Service made a finding that this petition had presented substantial information. The Service also has gathered other information through its own status review of the species. Section 4(b)(3)(B) of the Endangered Species Act requires that, within 12 months after receiving a petition found to present substantial information, a finding be made as to whether the requested action is warranted, not warranted, or warranted but precluded by other listing activity. This proposal incorporates the Service's final finding that listing of *T. alexandrae* is warranted.

#### Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to Queen Alexandra's birdwing butterfly (*Triodes alexandrae*) are as follows (information from Collins and Morris 1985).

*A. The present or threatened destruction, modification, or curtailment of its habitat or range.*

The greatest current danger is the expanding oil palm industry in the Popondetta region of Papua New Guinea, though development of cocoa and rubber plantations has also been a problem. These activities eliminate the natural forest required by *T. alexandrae*, and have already claimed large tracts of its restricted habitat. Local disappearances of the species are occuring because of clearing of forest to make food gardens. Negotiations to exploit reserves of timber in the region are also underway.

*B. Overutilization for commercial, recreational, scientific, or educational purposes.*

*T. alexandrae* is the world's largest butterfly and is aesthetically very attractive. Birdwing butterflies have long been held in high esteem by insect collectors and are in great demand worldwide. Species such as *T. alexandrae*, which are not only impressive, but restricted in range and hard to obtain, realize extremely high prices. Some illegal trade in *T. alexandrae* has undoubtedly occurred.

*C. Disease or predation.*

Adults are subject to little predation, but eggs are attacked by ants and heteropterous bugs. The larvae are preyed upon by toads, lizards, and birds. Parasitism of larvae by unidentified flies, and of pupae by parasitic wasps, has been reported.

*D. The inadequacy of existing regulatory mechanisms.*

*T. alexandrae* is completely protected from collection by the laws of Papua New Guinea, and a large wildlife management area has been established within its range, but it is not yet clear that these measures have helped prevent habitat loss, which is the main threat confronting the species.

*E. Other natural or manmade factors affecting its continued existence.*

None now known.

The decision to propose endangered status for *T. alexandrae* was based on an assessment of the best available scientific and commercial information concerning past, present, and probable future threats to the species. A decision to propose no action would exclude this butterfly from benefits provided by the Endangered Species Act. A decision to propose only threatened status would not adequately reflect the evident rarity and multiplicity of problems confronting the species. Critical habitat is not being proposed, as its designation is not applicable to foreign species.

#### Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages conservation measures by Federal, international, and private agencies, groups, and individuals.

Section 7(a) of the Act, as amended, and as implemented by regulations at 50 CFR Part 402, requires Federal agencies to evaluate their actions that are to be conducted within the United States or on the high seas, with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is subsequently listed, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service. The Service has not identified any ongoing or proposed projects with Federal involvement that may affect Queen Alexandra's birdwing butterfly.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general trade prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part,

VOL 54 ISS 39 MR 1 1989 UMI

make it illegal for any person subject to the jurisdiction of the United States to take (within the United States or on the high seas), import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce any endangered wildlife species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are codified at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance propagation or survival, and/or for incidental take in connection with otherwise lawful activities. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship that would be suffered in such relief were not available.

**Public Comments Solicited**

The Service intends that any final rule adopted will be accurate and as effective as possible in the conservation of endangered or threatened species. Therefore, comments and suggestions concerning any aspect of this proposed rule are hereby solicited from the public, concerned governmental agencies, the scientific community, industry, private interests, and other parties. Comments are particularly sought concerning the following:

(1) Biological, commercial, or other relevant data concerning any threat (or lack thereof) to the subject species;

(2) The location of any additional populations of the subject species;

(3) Additional information concerning the distribution of this species; and

(4) Current or planned activities in the involved areas, and their possible effect on the subject species.

The final decision on this proposed listing will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal, should be in writing, and should be directed to the party named in the above **"ADDRESSES"** section.

**National Environmental Policy Act**

The Service has determined that an Environmental Assessment, as defined under authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** of October 25, 1983 (48 FR 49244).

**Proposed Regulation Promulgation**

**PART 17—[AMENDED]**

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for Part 17 continues to read as follows:

**Authority:** Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411; Pub. L. 100–478, 102 Stat. 2306; Pub. L. 100–653, 102 Stat. 3825 (16 U.S.C. 1531 *et seq.*); Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. It is proposed to amend § 17.11(h) by adding the following, in alphabetical order under "INSECTS," to the List of Endangered and Threatened Wildlife:

**§ 17.11 Endangered and threatened wildlife.**

# Notices

Federal Register
Vol. 54, No. 39
Wednesday, March 1, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## ACTION

**National Volunteer Advisory Council Meeting**

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given of a meeting of the National Volunteer Advisory Council.

Date, time and place: March 17, 1989, 9:00 a.m., Grand Hyatt Hotel, 100 H Street NW., Washington, DC.

Purpose: To select nominees for the President's Volunteer Action Awards for 1989 and hold the regular Council meeting.

In accordance with the determination of the Director of ACTION, this meeting will be partially closed to the public from 9:00 a.m. until 1:00 p.m., pursuant to subsection (c)(9)(B) of section 552b of Title 5, United States Code. The determination of the Director of ACTION is available for public inspection at 806 Connecticut Avenue, NW., Washington, DC 20525, during regular business hours of 8:30 a.m. to 5:30 p.m.

**FOR FURTHER INFORMATION CONTACT:** Alyse Best, Special Assistant to the Director, at (202) 634–9380.

Signed this 21st day of February 1989, in Washington, DC.

**Donna M. Alvarado,**

*Director of ACTION.*

## DEPARTMENT OF AGRICULTURE

**Forms Under Review by Office of Management and Budget**

February 24, 1989.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of P.L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

## Federal Grain Inspection Service

**Designation Renewal of the Ohio Valley (IN) and Quincy (IL) Agencies**

**AGENCY:** Federal Grain Inspection Service (Service).

**ACTION:** Notice.

**SUMMARY:** This notice announces the designation renewal of James L. Goodge, Sr., dba Ohio Valley Grain Inspection (Ohio Valley), and Anthony L. Marquardt dba Quincy Grain Inspection & Weighing Service (Quincy) as official agencies responsible for providing official services under the U.S. Grain Standards Act, as amended (Act).

**EFFECTIVE DATE:** April 1, 1989.

**ADDRESS:** James R. Conrad, Chief, Review Branch, Compliance Division, FGIS, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090–6454.

**FOR FURTHER INFORMATION CONTACT:** James R. Conrad, telephone: (202) 447–8525.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to his action.

The Service announced that the Ohio Valley and Quincy designations terminate on March 31, 1989, and requested applications for official agency designation to provide official services within specified geographic areas in the October 5, 1988, **Federal Register** (53 FR 39121). Applications were to be postmarked by November 3, 1988. Ohio Valley and Quincy were the only applicants for designation in their area and each applied for designation renewal in the entire area currently assigned to each agency. The Service announced the applicant names in the December 1, 1988, **Federal Register** (53 FR 48564) and requested comments on the applicants for designation. Comments were to be postmarked by January 17, 1989; no comments were received.

The Service evaluated all available information regarding the designation criteria in section 7(f)(1)(A) of the Act; and in accordance with section 7(f)(1)(B), determined that Ohio Valley

VOL 54 ISS 39 MR 1 1989 UMI

and Quincy are able to provide official services in the geographic area for which the Service is renewing their designations. Effective April 1, 1989, and terminating March 31, 1992, Ohio Valley and Quincy are designated to provide official inspection functions in their specified geographic areas, as previously described in the October 1 **Federal Register**.

Interested persons my obtain official services by contacting the agencies at the following telephone numbers: Ohio Valley at (812) 858–5444, Quincy at (217) 222–7592.

(Pub. L. 94–582, 90 Stat. as amended (7 U.S.C. 71 *et seq.*))

Date: February 17, 1989.

**J.T. Abshier,**

*Director, Compliance Division.*

BILLING CODE 3410–EN–M

## Request for Comments on Designation Applicants in the Geographic Area Currently Assigned to the Enid (OK) and Erie (OH) Agencies

**AGENCY:** Federal Grain Inspection Service.

**ACTION:** Notice.

**SUMMARY:** This notice requests comments from interested parties on the applicants for official agency designation in the geographic areas currently assigned to Enid Grain Inspection Company, Inc. (Enid), and Dennis L. Boltenhouse dba Erie Grain Inspection Service (Erie).

**DATE:** Comments must be postmarked on or before April 17, 1989.

**ADDRESS:** Comments must be submitted in writing to Lewis Lebakken, Jr., RM, FGIS, USDA, Room 0628 South Building, P.O. Box 96454, Washington, DC 20090–6454.

*Telemail* users may respond to [LLEBAKKEN/FGIS/USDA] telemail.

*Telex* users may respond as follows:

TO: Lewis Lebakken

TLX:7607351, ANS:FGIS UC.

All comments received will be made available for public inspection at the above address located at 1400 Independence Avenue, SW., during regular business hours (7 CFR 1.27(b)).

**FOR FURTHER INFORMATION CONTACT:** Lewis Lebakken, Jr., telephone (202) 475–3428.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed and determined not to be rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

The Service requested applications for official agency designation to provide official services within specified geographic areas in the January 4, 1989, **Federal Register** (54 FR 162). Applications were to be postmarked by February 3, 1989. Enid and Erie were the only applicants for designation in those areas and each applied for designation renewal in the entire area currently assigned to that agency.

This notice provides interested persons the opportunity to present their comments concerning the applicants for designation. Commenters are encouraged to submit reasons for support or objection to these designation actions and include pertinent data to support their views and comments. All comments must be submitted to the Resources Management Division, at the above address.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the **Federal Register**, and the applicants will be informed of the decision in writing.

(Pub. L. 94–582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Date: February 17, 1989.

**J.T. Abshier,**

*Director, Compliance Division.*

BILLING CODE 3410–EN–M

## Request for Designation Applicants To Provide Official Services in the Geographic Area Currently Assigned to the Fremont (NE) and Titus (IN) Agencies

**AGENCY:** Federal Grain Inspection Service (Service).

**ACTION:** Notice.

**SUMMARY:** Pursuant to the provisions of the U.S. Grain Standards Act, as Amended (Act), official agency designations shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act. This notice announces that the designation of two agencies will terminate, in accordance with the Act, and requests applications from parties interested in being designated as the official agency to provide official services in the geographic area currently assigned to the specified agencies. The official agencies are the Fremont Grain Inspection Department, Inc. (Fremont) and Titus Grain Inspection, Inc. (Titus).

**DATE:** Applications must be postmarked on or before March 31, 1989.

**ADDRESS:** Applications must be submitted to James R. Conrad, Chief, Review Branch, Compliance Division, FGIS, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090–6454. All applications received will be made available for public inspection at this address located at 1400 Independence Avenue, SW., during regular business hours.

**FOR FURTHER INFORMATION CONTACT:** James R. Conrad, telephone (202) 447–8525.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

Section 7(f)(1) of the Act specifies that the Administrator of the Service is authorized, upon application by any qualified agency or person, to designate such agency or person to provide official services after a determination is made that the applicant is better able than any other applicant to provide official services in an assigned geographic area.

Fremont, located at 603 East Dodge Street, Fremont, NE 68025 and Titus located at 1111 East 800 North, West Lafayette, IN 47906, each were designated under the Act as an official agency on September 1, 1986, to provide official inspection functions.

The official agencies' designations terminate on August 31, 1989. Section 7(g)(1) of the Act states that designations of official agencies shall terminate not later than triennially and may be renewed according to the criteria and procedures prescribed in the Act.

The geographic area presently assigned to Fremont, in the States of Iowa and Nebraska, pursuant to section 7(f)(2) of the Act, which may be assigned to the applicant selected for designation is as follows:

In Iowa: Carroll (west of U.S. Route 71); Clay (west of U.S. Route 71); Crawford; Dickinson (west of U. S. Route 71); Harrison (east of State Route 183); O'Brien (north of B24 and east of U.S. Route 59); Osceola (east of U.S. Route 59); and Shelby Counties.

In Nebraska:

Bounded on the North by U.S. Route 20 east to the Pierce County line; the eastern Pierce County line; the northern Wayne, Cuming, and Burt County lines east to the Missouri River;

Bounded on the East by the Missouri River south-southeast to State Route 91; State Route 91 west to the Dodge County line; the eastern and southern Dodge County lines west to U.S. Route 77; U.S. Route 77 south to the Saunders County line;

Bounded on the South by the southern Saunders, Butler, and Polk County lines; and

Bounded on the West by the western Polk County line north to the Platte River; the Platte River northeast to the western Platte County line; the western and northern Platte County lines east to U.S. Route 81; U.S. Route 81 north to U.S. Route 20.

The following locations, outside of the above contiguous geographic area, are part of this geographic area assignment: Juergens Produce and Seed, and Farmers Grain and Lumber Company, both in Carroll, Carroll County, Iowa (located inside Central Iowa Grain Inspection Service, Inc.'s area); and Farmers Cooperative, and Krumel Grain and Storage, both in Wahoo, Saunders County, Nebraska (located inside Omaha Grain Inspection Service, Inc.'s area).

Exceptions to Fremont's assigned geographic area are the following locations inside Fremont's area which have been and will continue to be serviced by the following official agencies:

1. Hastings Grain Inspection, Inc.: Farmers Cooperative Grain Company, and Wagner Mills, Inc., both in Columbus, Platte County, Nebraska;

2. Omaha Grain Inspection Service, Inc.: Farmers Coop Business Assn., Rising City, Butler County, Nebraska, and Farmers Coop Business Assn., Shelby, Polk County, Nebraska; and

3. Sioux City Inspection & Weighing Agency, Inc.: Charter Oak Grain & Seed, and Delanty Grain Company, both in Charter Oak, Crawford County, Iowa.

The geographic area presently assigned to Titus, in the State of Indiana, pursuant to section 7(f)(2) of the Act, which may be assigned to the applicant selected for designation is as follows:

Bounded on the North by the northern Pulaski County line;

Bounded on the East by the eastern and southern Pulaski County lines; the eastern White County line; the eastern Carroll County line south to State Route 25; State Route 25 southwest to Tippecanoe County; the eastern Tippecanoe County line;

Bounded on the South by the southern Tippecanoe County line; the eastern and southern Fountain County lines west to U.S. Route 41; and

Bounded on the West by U.S. Route 41 north to the northern Benton County line; the northern Benton County line east to State Route 55; State Route 55 north to U.S. Route 24; U.S. Route 24 east to the White County line; the western White and Pulaski County lines.

The following locations, outside of the above contiguous geographic area, are part of this geographic area assignment: Boswell Grain Company, Boswell, Benton County; Dunn Grain, Dunn, Benton County; York Richland Grain Elevator, Inc., Earl Park, Benton County; Raub Grain Company, Raub, Benton County (located inside Champaign-Danville Grain Inspection Departments, Inc.'s area); and The Andersons, Delphi, Carroll County; Buckeye Feed and Supply Company, Leiters Ford, Fulton County; and Cargill, Inc., Linden, Montgomery County (located inside Frankfort Grain Inspection, Inc.'s area).

Exceptions to Titus' assigned geographic area are the following locations inside Titus' area which have been and will continue to be serviced by the following official agency:

Schneider Inspection Service, Inc.: Central Soya, and Farmers Grain, both in Winamac, Pulaski County.

Interested parties, including Fremont and Titus, are hereby given opportunity to apply for official agency designation to provide the official services in the geographic area, as specified above, under the provisions of section 7(f) of the Act and § 800.196(d) of the regulations issued thereunder. Designation in each specified geographic area is for the period beginning September 1, 1989, and ending August 31, 1992. Parties wishing to apply for designation should contact the Review Branch, Compliance Division, at the address listed above for forms and information.

Applications and other available information will be considered in determining which applicant will be designated to provide official services in a geographic area.

(Pub. L. 94–582 90 Stat. 2867, as amended (7 U.S.C..71 *et seq.*))

Date: February 17, 1989.

**J.T. Abshier,**

*Director, Compliance Division.*

BILLING CODE 3410–EN–M

## Forest Service

## Polk Timber Sale, Lassen National Forest, CA; Intent To Prepare Environmental Impact Statement

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The Forest Service will prepare a draft environmental impact statement (DEIS) for a proposal to harvest timber in the Lower Mill Creek, Middle Deer Creek and Lower Deer Creek Management Areas (#'s 40, 41, and 42, respectively) on the Almanor Ranger District, Lassen National Forest, Tehama County, California. The agency has conducted preliminary public scoping on the proposal and has received written comment and suggestions. The agency invites further comments and suggestions on the scope of the analysis. In addition, the agency gives notice of the full environmental analysis and decision-making process that is occurring on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

**DATE:** Comments concerning the scope of the analysis must be received by March 31, 1989.

**FOR FURTHER INFORMATION CONTACT:** Direct comments, suggestions and questions about the proposed action and DEIS to Laurence Crabtree, District Planning Officer, Almanor Ranger District, Lassen National Forest, P.O. Box 767, Chester, California 96020, phone 916–258–2141.

**SUPPLEMENTARY INFORMATION:** The Lassen National Forest Timber Management Plan (1975) and the proposed Lassen National Forest Land and Resources Management Plan (1986) provide guidance for the orderly and sustained development of the timber growing capacity of the Lassen National Forest. Plan direction for Management Areas 40, 41 and 42 includes timber harvest, while also considering visual quality, the proposed Wild and Scenic River corridors along Deer Creek and Mill Creek, the proposed Mill Creek Wilderness Area, the Ishi Wilderness Area, semi-primitive non-motorized and semi-primitive motorized recreation areas, the maintenance of habitat for species that are at least partially dependent on old growth timber stands, and other resources.

In preparing the DEIS, the Forest Service will identify and consider alternatives, including no action.

Richard A. Henry, Forest Supervisor, Lassen National Forest, Susanville, California, is the responsible official.

Public participation will be especially important at several points during the analysis. The first point is during the scoping process (40 CFR 1501.7). In May, 1987, the Forest Service sent a letter of management intent to Federal and State agencies and other individuals or organizations with possible interest in, or who may be affected by, the proposed action. The letter sought

VOL 54 ISS 39 MR 1 1989 UMI

information, comments, and assistance regarding the proposed timber sale. This input will be used in preparation of the DEIS. The scoping process includes:

1. Identifying potential issues.
2. Identifying issues to be analyzed in depth.
3. Eliminating insigificant issues or those which have been covered by a relevant previous environmental analysis.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed action and alternatives (i.e., direct, indirect, and cumulative effects and connected actions).
6. Determining potential cooperating agencies and task assignments.

Responses to the letter of management intent, and input from Forest Service specialists, have identified several issues and concerns. These are:

1. Approximately one-fourth of the proposed sale area was part of the Polk Springs Roadless Area which the California Wilderness Act of 1984 made available for non-wilderness management.
2. Management activities should maintain the recreational and aesthetic values of the proposed Wild and Scenic River corridors of Mill Creek and Deer Creek.
3. Management activities should not degrade the water quality or the anadromous and resident fisheries habitat of Mill Creek, Deer Creek and their tributaries.
4. The Polk Springs area includes habitat for the East Tehama deer herd.
5. Suitable old growth forests to meet the habitat requirements of cetain wildlife species are limited in the proposed sale area.
6. Several raptor nest sites have been identified in the proposed sale area, including a potential peregrine falcon nest (Federal Endangered species).
7. Slope stability and soil erosion potential is a concern in parts of the sale area.
8. Regeneration may be difficult on some soils.
9. Road construction will be difficult and expensive in some places.
10. The creation of slash accumulations adjacent to either private lands or Wilderness Area boundaries could increase fire risks to these areas.
11. Potential areas for land ownership exchange are within the proposed sale area.

The DEIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review in April, 1989. At that time EPA will publish a notice of availability of the DEIS in the **Federal Register**.

The comment period on the DEIS will be 45 days from the date the EPA's notice of availability appears in the **Federal Register**. It is very important that those interested in the management of the Lower Mill Creek, Middle Deer Creek and Lower Deer Creek areas participate at that time. To be the most helpful, comments on the DEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed.

Comments on the DEIS will be analyzed and considered by the Forest Service in preparing the final EIS (FEIS), which is scheduled to be completed in June, 1989. In the FEIS the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the FEIS, and applicable laws, regulations, and policies is making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR 217.

Date: February 22, 1989.

**H.R. Tatman,**

*Acting Forest Supervisor.*

BILLING CODE 3410-11-M

## Alder Timber Sale, Lassen National Forest CA; Intent To Prepare Environmental Impact Statement

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The Forest Service will prepare a draft environmental impact statement (DEIS) for a proposal to harvest timber in the Middle Deer Creek Management Area (#41) on the Almanor Ranger District, Lassen National Forest, Tehama County, California. The agency has conducted preliminary public scoping on the proposal and has received written comments and suggestions. The agency invites further comments and suggestions on the scope of the analysis. In addition, the agency gives notice of the full environmental analysis and decision-making process that is occurring on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decison.

**DATE:** Comments concerning the scope of the analysis must be received by March 31, 1989.

**FOR FURTHER INFORMATION CONTACT:** Direct comments, suggestions and questions about the proposed action and DEIS to Laurence Crabtree, District Planning Officer, Almanor Ranger District, Lassen National Forest, P.O. Box 767, Chester, California 96020, phone 916-258-2141.

**SUPPLEMENTARY INFORMATION:** The Lassen National Forest Timber Management Plan (1975) and the proposed Lassen National Forest Land and Resource Management Plan (1988) provide guidance for orderly and sustained development of the timber growing capacity of the Lassen National Forest. Plan direction for the Middle Deer Creek Management Area (#41) includes timber harvest, while also considering visual quality, the proposed Wild and Scenic River corridor along Deer Creek, the maintenance of habitat for species that are at least partially dependent on old growth timber stands, and other resources.

In preparing the DEIS, the Forest Service will identify and consider alternatives, including no action.

Richard A. Henry, Forest Supervisor, Lassen National Forest, Susanville, California, is the responsible official.

Public participation will be especially important at several points during the analysis. The first point is during the scoping process (40 CFR 1501.7). In April, 1988, the Forest Service sent a letter of management intent to Federal and State agencies and other individuals or organizations with possible interest in, or who may be affected by, the proposed action. The letter sought information, comments, and assistance regarding the proposed timber sale. This input will be used in preparation of the DEIS. The scoping process includes:

1. Identifying potential issues.
2. Identifying issues to be analyzed in depth.
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed action and alternatives (i.e. direct, indirect, and cumulative effects and connected actions).
6. Determining potential cooperating agencies and task assignments.

Responses to the letter of management intent, and input from Forest Service specialists, have identified several issues and concerns. These are:

1. The proposed sale area was part of the Cub Creek Roadless Area which the California Wilderness Act of 1984 made available for non-wilderness management.
2. Management activities should maintain the recreational and aesthetic values of Highway 32 and the proposed Wild and Scenic River corridor of Deer Creek.
3. Management activities should not degrade the water quality or the anadromous and resident fisheries habitat of Deer Creek and its tributaries.
4. The proposed sale area includes habitat for deer and bear, and for wildlife species which are at least partially dependent on old growth forests.
5. Old landslides, rock outcrops, steep slopes and shallow soils could make development of a transportation system expensive.

The DEIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review in April, 1989. At that time EPA will publish a notice of availability of the DEIS in the **Federal Register.**

The comment period on the DEIS will be 45 days from the date the EPA's notice of availability appears in the **Federal Register**. It is very important that those interested in the management of the Middle Deer Creek area participate at that time. To be the most helpful, comments on the DEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed.

Comments on the DEIS will be analyzed and considered by the Forest Service in preparing the final EIS (FEIS), which is scheduled to be completed in June, 1989. In the FEIS the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the FEIS, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR 217.

## COMMISSION ON CIVIL RIGHTS

### Missouri Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Missouri Advisory Committee to the Commission will convene at 10:00 a.m. and adjourn at 4:30 p.m., on Wednesday, March 22, 1989, at the Days Inn-University Center, 1900 I-70 Drive SW., Columbia, Missouri. The purpose of the meeting is to receive information on the nature and extent of bigotry-related crime and harassment on selected college campuses in Missouri.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson Joanne M. Collins, or William F. Muldrow, Acting Director of the Central Regional Division (816) 426-5253, (TDD 816/426-5009). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC., February 21, 1989.

### Wisconsin Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Wisconsin Advisory Committee to the Commission will convene at 1:00 p.m. and adjourn at 4:00 p.m., on March 16, 1989, at the Concourse Hotel, One West Dayton Street, Madison, Wisconsin. The purpose of the meeting is to discuss current projects and to plan future activities for FY 1989.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson James L. Baughman, or William F. Muldrow, Acting Director of the Central Regional Division (816) 426-5253, (TTD 816/426-5009). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

VOL 54 ISS 39 MR 1 1989 UMI

Dated at Washington, DC, February 15, 1989.

## DEPARTMENT OF COMMERCE

### Bureau of Export Administration

**[Docket No. 7885-01]**

### Actions Affecting Export Privileges; Andre A. Buccolier

**Summary**

The Decision and Order of the undersigned dated March 2, 1988 is hereby modified to provide that the denial of export privileges set forth in said Order shall not apply to commodities or technical data which may be exported pursuant to General License G-Dest as provided in 14 CFR 771.3.

**Order**

On March 16, 1988 Respondent Andre Buccolier sought relief from the March 2, 1988 Order of the undersigned denying him export privileges for a period of ten years. The relief sought, *inter alia*, was the right to export commodities and technical data from the United States pursuant to General License G-Dest.

Upon consideration of Respondent's request, and the relief sought appearing justified, it is hereby ordered that the Respondent's privileges of participating in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, are hereby reinstated with respect to those commodities and technical data which may be exported pursuant to General License G-Dest as provided in 14 CFR 771.3; provided however, that this reinstatement shall be valid only so long as Respondents, or the Final Order entered in this proceeding.

This constitutes final agency action in this matter.

Date: February 23, 1989.

**Paul Freedenberg,**

*Under Secretary, Bureau of Export Administration.*

BILLING CODE 3510-DT-M

### Order Denying Permission To Apply For or Use Export Licenses; Peter Walaschek

In the Matter of: Peter Walaschek, Marzellenstrasse, 5000 Cologne, Federal Republic of Germany.

On August 28, 1986, Peter Walaschek (Walaschek) was convicted of violating section 2410(b) of the Export Administration Act of 1979 (50 U.S.C. app. 2401–2420 (1982 and Supp. III 1985), as amended by Pub. L. 100-418, 102 Stat. 1107 (August 23, 1988)) (the Act). As provided in section 11(h) of the Act, no person convicted of a violation of the Act, or certain other provisions of the United States Code, shall be eligible, at the discretion of the Secretary,[1] to apply for or use any export license issued pursuant to the Act or the Export Administration Regulations (15 CFR Parts 768–799) (the Regulations),[2] for a period of up to ten years from the date of conviction. In addition, the Secretary may revoke any export license issued under the Act in which a person convicted of violating the Act has an interest at the time of conviction.

Pursuant to 770.15 and 772.1(h) of the Regulations, as amended, 54 FR 4004–4006 (Jan. 27, 1989), upon notification that a person has been convicted of violating the Act, the Director, Office of Export Licensing, in consultation with the Director, Office of Export Enforcement, shall determine whether to deny that person permission to apply for or use any export license issued pursuant to the Act and the Regulations and shall also determine whether to revoke any export license previously issued to such a person. Having received notice of Walaschek's conviction for violating the Act, and, following consultations with the Director, Office of Export Enforcement, I have decided that Walaschek may not apply for or use any export license until August 28, 1996, ten years from the date of his conviction.

Accordingly, it is hereby ordered:

I. All outstanding individual validated licenses in which Walaschek appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Walaschek's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, or in any general license are hereby revoked.

II. Until August 28, 1996, Peter Walaschek, Marzellenstrasse, 5000 Cologne, Federal Republic of Germany, is denied the privilege of applying for or using any export license, including, but not limited to, any individual validated license, bulk license or general license, issued under or authorized by the Act and the Regulations. Pursuant to this Order, Walaschek may not participate in any export license-related activity, including any participation: (a) As a party or as a representative of a party to any export license application submitted to the Department, (b) in preparing or filing with the Department any export license application or reexport authorization, or any document to be submitted therewith, (c) in obtaining or using any validated or general export license, or other export control document, (d) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of any commodities or technical data, in whole or in part, exported or to be exported from the United States and subject to the Regulations, and (e) in financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities and technical data which are subject to the Act and the Regulations.

III. After notice and opportunity for comment as provided in § 770.15(b) of the Regulations, any firm, corporation or business organization related to Walaschek by affiliation, ownership, control or position of responsibility may also be subject to the provisions of this Order.

IV. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Licensing, shall, with respect to U.S.-origin commodities and technical data which are subject to the denial of export privileges set forth herein, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with Walaschek or whereby Walaschek may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly, in any manner or capacity: (a) Apply for, obtain, transfer, or use any export license, Shipper's Export Declaration, bill of lading or any other export control document relating to any export, reexport, transshipment or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for Walaschek, or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance or otherwise service or participate in any export, reexport, transshipment or diversion of any commodity or technical data exported or to be exported from the United States. These prohibitions apply only to those commodities and technical data which are subject to the Act and the Regulations.

V. This Order is effective immediately and shall remain in effect until August 28, 1996.

A copy of this Order shall be delivered to Walaschek. This Order shall be published in the **Federal Register**.

Dated: February 24, 1989.

**Iain S. Baird,**

*Director, Office of Export Licensing.*

[FR Doc. 89-4747 Filed 2-28-89; 8:45 am]

BILLING CODE 3510-DT-M

[1] Pursuant to the Regulations, the Director, Office of Export Licensing, in consultation with the Director, Office of Export Enforcement, exercises the authority granted to the Secretary by section 11(h) of the Act.

[2] Effective October 1, 1988, the Export Administration Regulations were redesignated as 15 CFR Parts 768–799 (53 FR 37751, Sept. 28, 1988). The transfer merely changed the first number of each Part from "3" to "7". Until such time as the Code of Federal Regulations is republished, the Regulations may be found in 15 CFR Parts 368–399 (1988).

## International Trade Administration

### Export Trade Certificate of Review; Application

**AGENCY:** International Trade Administration, Commerce.

**ACTION:** Notice of application.

**SUMMARY:** The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and requests comments relevant to whether the Certificate should be issued.

**FOR FURTHER INFORMATION CONTACT:** Thomas H. Stillman, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

**SUPPLEMENTARY INFORMATION:** Title III of the Export Trading Company Act of 1982 (Pub. L. 97-290) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and Federal government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

**Request for Public Comments**

Interested parties may submit written comments relevant to the determination whether a Certificate should be issued. An original and five (5) copies should be submitted not later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 1223, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 89-00003." A summary of the application follows:

Applicant: Passport International (PI), 9721 Kempwood Drive, Suite 1005, Houston, Texas 77080, Contact: David N. Williams, President, Telephone: (713) 895-9612

Application No.: 89-00003

Date Deemed Submitted: February 15, 1989

Members (in addition to applicant): None

*Summary of the Application*

Export Trade Products

Process control equipment, computer hardware and software, electronic test and repair equipment, medical equipment, paper and paper products, and consumer products.

*Export Trade Facilitation Services (as they relate to the export of Products)*

Consulting, international market research, financing, insurance, advertising, packing and crating, warehousing, trade documentation and shipping, foreign exhibit marketing, and customs brokerage.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation

Under the terms of its Certificate, PI seeks to: 1. Coordinate the participation of various suppliers in foreign trade exhibitions through the sharing of trade information that is generally available to the public,

2. Provide Export Trade Facilitation Services to domestic suppliers for the export of their Products to foreign customers,

3. Enter into exclusive agreements with domestic suppliers to arrange for the export of Products to foreign customers in response to foreign invitations to bid,

4. Enter into exclusive agreements with foreign customers to select domestic suppliers of Products in order to match foreign buyer specifications,

5. Meet and negotiate with domestic suppliers concerning the terms of their participation in each bid, invitation or request to bid, or other sales opportunity in the Export Markets,

6. Establish export prices for domestic suppliers seeking to respond to a foreign bid opportunity, and

7. Contract with other Export Intermediaries for the export of the Products of domestic suppliers to the Export Markets.

Dated: February 24, 1989.

## National Oceanic and Atmospheric Administration

### Sea Turtle Conservation; Shrimp Trawling Requirements

**AGENCY:** National Marine Fisheries Service (NOAA Fisheries), NOAA, Commerce.

**ACTION:** Notice.

**SUMMARY:** NOAA Fisheries has contracted with the National Academy of Sciences to conduct an independent review of scientific information pertaining to the conservation of sea turtles. The study, mandated in recent amendments to the Endangered Species Act of 1973 (ESA) to be completed by April 1, 1989, will not be completed until January 31, 1990.

**ADDRESS:** Dr. Nancy Foster, Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1335 East-West Highway, Silver Spring, MD 20910.

**FOR FURTHER INFORMATION CONTACT:** Phil Williams (301-427-2322).

**SUPPLEMENTARY INFORMATION:**

**Background**

The Endangered Species Act Amendments of 1988 (Public Law 100-478) includes, among other things, provisions on sea turtle conservation.

VOL 54 ISS 39 MR 1 1989 UMI

The Amendments require the Secretary of Commerce to contract with the National Academy of Sciences for an independent review of sea turtle biology and conservation. The primary purpose of the review is to further the long-term conservation of sea turtles by reviewing available data to ensure that the Federal government is promoting the conservation of sea turtles in the most effective and comprehensive manner possible. In particular, the review will address whether more or less stringent measures to reduce the drowning of sea turtles in shrimp nets are necessary and advisable to provide for the conservation of sea turtles. Congress directed the Academy to report its finding by April 1, 1989. If the Academy cannot complete its review by April 1, then it should give priority to completing the review of Kemp's Ridley sea turtle, and complete its review of other species as expeditiously as possible.

Shortly after the ESA Amendments were passed, NOAA Fisheries contacted the National Academy of Sciences concerning this study. NOAA has accepted the Academy's proposal dated December 27, 1988, for a one-year study to begin on February 1, 1989, and conclude on January 31, 1990. Prior to the enactment of the Amendments, the Academy informed the Congress that at least a year was needed to complete the study. NOAA has requested the Academy to provide progress reports on April 1 and September 29, 1989.

Dated: February 17, 1989.

## National Technical Information Service

### Government-Owned Inventions; Availability for Licensing

February 21, 1989.

The inventions listed below are owned by agencies of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally funded research and development. Foreign patents are filed on selected inventions to extend market coverage for U.S. companies and may also be available for licensing.

Licensing information and copies of patent applications bearing serial numbers with prefix E may be obtained by writing to: Office of Federal Patent Licensing, U.S. Department of Commerce, P.O. Box 1423, Springfield, Virginia 22151. All other patent applications may be purchased, specifying the serial number listed below, by writing NTIS, 5285 Port Royal Road, Springfield, Virginia 22161 or by telephoning the NTIS Sales Desk at (703) 487-4650. Issued patents may be obtained from the Commissioner of Patents, U.S. Patent and Trademark Office, Washington, DC 20231.

Please cite the number and title of inventions of interest.

### Amendment of Export Visa and Certification Requirements for Certain Textile Articles Produced, Manufactured or Assembled in the United Mexican States

February 24, 1989.

**AGENCY:** Committee for the Implementation of Textile Agreements (CITA).

**ACTION:** Issuing a directive to the Commissioner of Customs amending the existing visa and certification requirements.

**EFFECTIVE DATE:** March 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

**SUPPLEMENTARY INFORMATION:**

**Authority:** Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The existing visa and certification requirements are being amended to include coverage of cotton and man-made fiber textile products in merged Categories 347/348/647/648 and 359-C/659-C, produced, manufactured or assembled in Mexico and exported from Mexico on and after January 1, 1989. Customs is being directed to accept shipments of the above products exported on or after January 1, 1989 which list on the visa or accompanying Shippers Declaration (Form ITA-370P) either the cotton or man-made fiber category numbers.

In addition, the visa and certification requirements are being amended to include coverage of man-made fiber products in merged Categories 645/646.

A copy of the current visa and certification arrangement is available from the Textile Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647-1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 15724, published on May 3, 1988; 53 FR 32421, published on August 25, 1988; and 53 FR 52464, published on December 28, 1988.

February 24, 1989.

**James H. Babb,**

*Chairman, Committee for the Implementation of Textile Agreements.*

**Committee for the Implementation of Textile Agreements**

February 24, 1989.

Commissioner of Customs,
*Department of the Treasury,*
*Washington, D.C. 20229.*

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of August 22, 1988, as amended, which directed you to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton, wool and man-made fiber textile products in certain specified categories, including any part or merged categories as established in the bilateral agreement, produced, manufactured or assembled in Mexico for which the Government of the United States has not issued an appropriate export visa or exempt certification.

Effective on March 1, 1989, you are directed to permit entry of cotton and man-made fiber textile products visaed as merged Categories 347/348/647/648 and 359-C/659-C [1] which are produced, manufactured or assembled in Mexico and exported from Mexico on and after January 1, 1989 provided the Government of the United Mexican States has issued an appropriate export visa or exempt certification.

You are directed to permit entry of shipments of these products exported from Mexico on or after January 1, 1989 which list on the visa or accompanying Shippers Declaration (Form ITA-370P) either the cotton or man-made fiber category number, i.e. 347/348, 647/648, 359-C or 659-C.

In addition, you are directed to permit entry of man-made fiber textile products visaed as merged Categories 645/646, which are produced, manufactured or assembled in Mexico and exported from Mexico on and after March 1, 1989.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

[1] In Categories 359-C/659-C, only HTS numbers 6103.42.2025, 6103.49.3034, 6104.62.1020, 6104.69.3010, 6114.20.048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025 and 6211.42.0010 in Category 359-C; and 6103.23.0055, 6103.43.2020, 6103.49.2000, 6103.49.3038, 6104.63.1020, 6104.69.1000, 6104.69.3014, 6114.30.3040, 6114.30.3050, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.4020, 6211.33.0010, 6211.33.0017 and 6211.43.0010 in Category 659-C.

Sincerely,

James H. Babb,

*Chairman, Committee for the Implementation of Textile agreements.*

## DEPARTMENT OF DEFENSE

### Department of the Navy

### Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given that the Naval Research Advisory Committee Panel on Countermine Capabilities for Amphibious Operations will meet on March 13-14, 1989. The meeting will be held at the Center for Naval Analyses, 4401 Ford Avenue, Alexandria, Virginia. The meeting will commence at 8:30 a.m. and terminate at 4:30 p.m. on March 13; and commence at 8:30 a.m. and terminate at 5:00 p.m. on March 14, 1989. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to provide briefings for the panel members related to an assessment of the mine/countermine threat and current capabilities and limitations, and an evaluation of the technological approaches to detection, neutralization, marking and reporting problems. The agenda will include briefings and discussions related to amphibious concepts and doctrine, lessons learned from specific operations, an assessment of the threat, applicable technologies and systems, investment strategy, and highlights of previous studies. These briefings and discussions contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive order. The classified and non-classified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander L.W. Snyder, U.S. Navy, Office of Naval Research, 800 North Quincy Street, Arlington, VA 22217-5000, Telephone Number: (202) 696-4870.

## Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given that the Naval Research Advisory Committee Panel on Survivability of Navy Tactical Communications in a Hostile Environment will meet on March 14 and 15, 1989. The meeting will be held at the Center for Naval Analyses, 4401 Ford Avenue, Alexandria, Virginia. The meeting will commence at 9:00 A.M. and terminate at 4:00 P.M. on March 14 and 15, 1989. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to provide briefings for the panel members related to the survivability of Navy tactical communications in a hostile environment. The agenda will include briefings and discussions on the connectivity for C¶, Navy tactical command and control, jam resistance and interoperability, AAW C¶, and a JCS C³ assessment. These briefings and discussions will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive order. The classified and non-classified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

## DEPARTMENT OF EDUCATION

### Meeting; Postsecondary Education Improvement Fund National Board

**AGENCY:** National Board of the Fund for the Improvement of Postsecondary Education.

**ACTION:** Notice of closed meeting.

**SUMMARY:** This notice sets forth the proposed agenda of a forthcoming meeting of the National Board of the Fund for the Improvement of Postsecondary Education. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

**DATE:** March 16, 1989 from 5:00 p.m to 7:00 p.m., and on March 17, 1989 from 8:00 a.m. to 7:00 p.m.

**ADDRESS:** Georgetown University Conference Center, The Thomas and Dorothy Leavey Center, 3800 Reservoir Road, NW., Washington, DC 20057.

**FOR FURTHER INFORMATION CONTACT:** Charles Karelis, Director, Fund for the Improvement of Postsecondary Education, 7th & D Streets, SW., Washington, DC 20202 (202) 732-5750.

**SUPPLEMENTAL INFORMATION:** The National Board of the Fund for the Improvement of Postsecondary Education is established under section 1001 of the Higher Education Amendments of 1980, Title X (20 U.S.C. 1135a-1). The National Board of the Fund is authorized to recommend to the Director of the Fund and the Assistant Secretary for Postsecondary Education priorities for funding and approval or disapproval of grants of a given kind.

The meeting of the National Board is closed to the public. The meeting is for the purpose of reviewing and evaluating grant application submitted to the Fund under the Innovative Projects for Community Services and Student Financial Independence Program.

The meeting of the National Board will be closed to the public from March 16, from 5:00 p.m. to 7:00 p.m., and on March 17, from 8:00 a.m. to 7:00 p.m. The meeting will be closed under the authority of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. Appendix 2) and under exemptions (4) and (6) of 5 U.S.C. 552b(c) (Pub. L. 94-409). The review and discussions of the applications and the qualifications of proposed staff may disclose commercial or financial information obtained from a person and privileged or confidential or which would disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session.

A summary of the activities at the closed session and related matters which are informative to the public consistent with the policy of title 5 U.S.C. 552b will be available to the public within fourteen days of the meeting.

Records are kept of all Board proceedings, and are available for public inspection at the office of the Fund for the Improvement of Postsecondary Education, Room 3100, Regional Office Building #3, 7th & D Streets, SW., Washington, DC 20202 from the hours of 8:00 a.m. to 4:30 p.m.

**Kenneth D. Whitehead,**

*Assistant Secretary for Postsecondary Education.*

BILLING CODE 4000-01-M

## DEPARTMENT OF ENERGY

### Idaho Operations Office; Industrial Drying Concepts Using a Superheated Steam Atmosphere With Exhaust Recompression

**AGENCY:** Department of Energy.

**ACTION:** Solicitation for financial assistance applications No. DE-PS07-89ID12826 for research and development of industrial drying concepts using a superheated steam atmosphere with exhaust recompression.

**SUMMARY:** The U.S. Department of Energy (DOE), Idaho Operations Office, is seeking applications on the basis of open competition, for cost-sharing research and development of industrial drying concepts which utilize a superheated steam atmosphere with exhaust recompression. This announcement is the complete solicitation document and no other document for this work is available. The objective of this program is the execution of one or more cooperative agreements to conduct research and development of this technology leading to improvements in industrial drying efficiencies. Up to three-fourths of the energy used for drying may be saved by recovering the latent heat of vaporization. This technology permits that recovery to be made by compressing the exhaust steam from the dryer to a higher pressure with a mechanically driven compressor. The compressor produces a temperature increase along with the pressure increase. Recovery of the latent heat of vaporization is enhanced by excluding as much air as possible from the dryer,

significantly improving the heat transfer coefficient of the condensing steam. The use of either a reheat boiler or a desuperheater in a proposed concept is acceptable if appropriate for the particular type of application, and if such use has potential for significant nationwide utilization. The applicant should describe the proposed concept thoroughly in the application. The description should present convincing arguments as to the technical feasibility and utility of the concept, and should explain the beneficial and advantageous aspects that will enhance the potential for widespread implementation of the concept. Proposals should focus on a specific product or products, and development should include both overall system concepts and design of individual components. An explanation is required of how this concept is applicable to other processes and products.

Product heat sensitivity in a steam atmosphere is perceived as being different from that in air, and may have a significant effect on actual energy savings. Energy savings may be achieved either by using the compressed exhaust steam to partially power the drying process or by showing where in the overall process of producing the product the energy may be used. A wide variety of dryer types and dried products are considered candidates for this technology.

The allowable research and development activities may be nominally divided into three phases: *Phase I—Feasibility Investigation*—applied research to evaluate industrial applicability, explore system configurations, design system elements, and conduct appropriate laboratory testing to provide technical and economic feasibility confirmation and an updated energy savings estimate.

*Phase II—Engineering Development*—additional laboratory testing, system design, construction, and pilot scale testing/evaluation to document technical performance and predict the energy and economic performance of a full-scale system.

*Phase III—Proof-of-Principle-Testing*—full or major-scale system testing and evaluation to confirm in-service performance and operability and to finalize energy, economic, and environmental analyses. The proposer may initiate activities in any of the above phases provided that completion of any previous phase(s) can be demonstrated.

Funding of subsequent phases will depend on the results of the initial work, the availability of funding, the DOE program requirements, and the ability to reach a mutual agreement on scope and cost-sharing. All projects will be cost-shared by DOE and the Participant, with the Participant's cost-share increasing as the project proceeds through the various phases. No fee or profit will be paid to the Participant.

DOE anticipates that approximately $500,000 will be available for support of initial phase activities, and that this solicitation will result in one or more cooperative agreements. Negotiation, award, and administration will be in accordance with DOE Financial Assistance Regulations (10 CFR Part 600). The Catalog of Federal Domestic Assistance number for this program is 81.078.

Profit making entities, individuals, educational institutions, nonprofit institutions and other entities are eligible to submit applications in response to this solicitation. Federal agencies and/or laboratories owned, operated, or under the cognizance of the Federal Government are not eligible for award and should not submit applications. Applications which anticipate participation of such a laboratory by subcontract, use agreement, or other arrangement must include satisfactory evidence of specific authorization from the cognizant Federal agency.

All proposals received within 10 CFR 600.13 Application Deadlines will be evaluated and point-scored in accordance with the following four evaluation criteria:

*Criterion 1* is the technical viability and applicability of the concept. This criterion is divided into two parts and must include a detailed description of the concept showing innovative aspects, development status, how it will be adopted in industry and the energy savings. The energy value of industrial drying in the U.S. has been estimated to be approximately $1.5 \times 10^{15}$ Btu/year, or about 5.5 percent of U.S. industrial energy consumption. The proposed concept should be shown to have at least a nominal net energy savings potential on a national basis of $10^{12}$ Btu/year, together with attractive economic and environmental features. In this context, net energy savings is defined as energy conserved relative to present drying practices by utilizing superheated steam drying, less any energy expense associated with process modification, expressed in Btu per product unit. The national net energy savings is estimated by multiplying the unit energy savings by the total number of units estimated to be produced annually in the U.S. and by the estimated percent market share where the process innovation may be implemented. (All assumptions should be stated and discussed.)

*Criterion 1a* is technical viability of the proposed technology(s). Factors considered favorable are high feasibility of the technology(s); low development cost and time needed to proceed to a commerical products(s); and high advancement of the technology relative to other systems commercially available or currently under development in terms of the potential for achieving energy savings, product cost reductions, and quality improvements.

*Criterion 1b* is the applicability of the concept. Factors to be considered favorable are the identity of products and specific industrial applications where a high potential for use exists within industry; the estimated number of applications projected; and the market share and associated energy savings based on the proposers projections for implementation on a national basis.

*Criterion 2* is the Statement of Work; it shall be evaluated relative to clarity, completeness, responsiveness, and adequacy to accomplish the project objectives. A description shall be provided for the complete project (all phases). A statement of objectives (what is to be accomplished) and a detailed Statement of Work (specific tasks and subtasks to accomplish the objectives) are required for the proposed initial phase. For subsequent phases, the objectives shall be stated and the work outlined to indicate how the objectives will be accomplished. The work effort may be started in any of the three phases.

Conclusive evidence should be presented showing the conduct and conclusions of the previous phase(s) of work.

*Criterion 3* is the ability of the proposer to successfully complete all phases of the project. Factors to be considered are the proposer's general knowledge of industrial drying technologies plus specific knowledge of the proposed technology for industrial drying; the proposed industrial application; market factors affecting acceptance by industry of an industrial dryer using superheated steam with exhaust recompression; the facilities available for building and testing the proposed concept; qualifications of the key individuals and the percentage of their time devoted to the project; background on the proposer's marketing channels for related lines; and facilities and personnel for production and commercialization.

Annual financial statements (balance sheet and income and expense statements) for the past three years shall

VOL 54 ISS 39 MR 1 1989 UMI

be attached for the applicant, subcontractors, consulting firms, and other principals composing the project team. Where available, financial statements prepared by certified public accountants should be submitted. If plant owners, or subcontractors, or consultants are not involved in the initial phase, they must submit their annual Financial Statements prior to involvement in later phases.

*Criterion 4* is the project management plan. A project management plan is required that shows how the proposed work is to be managed.

The plan shall be evaluated relative to the completeness and adequacy of the work breakdown structure, the schedule (sequence of project tasks), individual responsibilities and task assignments of each project participant, estimates of personnel effort for each of the tasks, resource and manpower availability to satisfy task requirements, project management methods to complete the project in a timely manner and control over budget, schedule, and product quality shall be described. A more general schedule for future phases is also required.

Applications shall be responsive to all the above criteria. The criteria are listed in descending order of importance. Criterion 1 is approximately four-tenths the total evaluation criteria value. Criterion 1a is about twice the value of Criterion 1b. Criterion 2 is about three-tenths the total value, and Criterion 3 and 4 are of equal value and together are approximately three-tenths the total value.

Cost considerations will not be point-scored or adjectively rated. The proposed cost is a function of the management approach, the technical approach, the manpower, the facilities, the organization, the uncertainties of the work, the proposer's competitive strategy, and the economy. The cost consideration will not be an addition to the cumulative score of ratings resulting from the evaluation. Applicants are advised, however, that notwithstanding the lower relative importance of the cost considerations, the evaluated cost may be the basis for selection.

The initial phase is not expected to exceed 12 months; all applicants are required to submit an annual budget provided in detailed breakdown, as part of the applicant's cost proposal. In making the selection decision, the apparent advantages of individual technical and business applications will be weighed against the evaluated probable cost to determine whether better applications, excluding cost considerations are worth the evaluated probable cost differences. When applications are very closely ranked and the Source Selection Official determines that the superiority in the technical and business aspects of the higher related application(s) is not meaningful when viewed in relationship to lower rated applications, evaluated probable costs to the Government may form the basis for selection.

In conducting the evaluation of applications, the Government may utilize assistance and advice from non-Government personnel. Applicants that do not consent to the use of non-Government personnel in evaluating their proposal(s) are required to make that statement on the cover of their application(s). Applicants are further advised that DOE may be unable to give full consideration to an applicant submitted without such consent. Information contained in the applications shall be treated in accordance with the policies and procedures set forth in 10 CFR 600.18.

DOE reserves the right to reject any and all applications received in response to this solicitation or to select any application as a basis for negotiation. DOE may require applications to be clarified or supplemented either through additional written submissions or oral presentations; however, the award may be made solely on the information contained in the proposal. The Government is not liable for any costs incurred in the preparation of an application. Further, costs incurred prior to the signing of a cooperative agreement are not reimbursable.

**Program Policy and Preference Factors**

The Source Selection official may make selections for negotiations and subsequent awards in a manner that will further the objectives of DOE, considering the following policy factors:

(1) The degree of innovation represented by the concept for utilization of Superheated Steam Drying with Exhaust Recompression. It is desirable to develop either new or creative technologies or to develop unique applications of existing technology in this area. Proposals will not be selected for award which are duplicative of research and development already accomplished or underway in private industry.

(2) The priority of the potential energy savings. Recovery and conversion for material or fuel substitution is of highest priority if the energy savings are from displacement of petroleum; the next highest if from displacement of natural gas; and lowest for displacement of coal or renewable materials by a particular proposal.

(3) Total funds available considering the funds required by a particular proposal; and

(4) The desirability of selecting, for award or support, a group of projects which represents a diversity of methods, approaches, applications, or kinds of work.

(5) The desirability to support development of concepts when the potential benefits are high with relatively little Government expenditure.

Stevens Amendment to the DOD Appropriations Act:

When issuing statements, press releases, requests for proposals, bid solicitations, and other documents describing projects or programs funded in whole or in part with Federal money, all grantees receiving Federal funds including but not limited to State and local Governments shall clearly state: (1) The percentage of the total cost of the program or project, which will be financed with Federal money, and (2) the dollar amount of Federal funds for the project or program.

*Instructions for Certification*

1. By signing and/or submitting this application or grant agreement, the grantee is providing the certification set out below.

2. The certification set out below is a material representation of Fact upon which reliance was placed when the agency determined to award the grant.

If it is later determined that the grantee knowingly rendered a false certification, or otherwise violates the requirements of the Drug-Free Workplace Act, the agency, in addition to any other remedies available to the Federal Government may take action authorized under the Drug-Free Workplace Act.

3. For grantees other than individuals, Alternate I applies.

4. For grantees who are individuals, Alternate II applies.

*Certification Regarding Drug-Free Workplace Requirements*

Alternate I

A. The grantee certifies that it will provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing a drug-free awareness program to inform employees about—

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling rehabilitation, and employee assistance programs; and

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will—

(1) Abide by the terms of the statement, and

(2) Notify employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after such a conviction;

(e) Notifying the agency within ten days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction;

(f) Taking one of the following actions, within 30 days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted—

(1) Taking appropriate personnel action against such an employee up to and including termination; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e), and (f).

B. The grantee shall insert in the space provided below the site(s) for the performance of work done in connection with the specific grant; Place of Performance (Street address, city, county, state, zip code).

Alternate II

The grantee certifies that, as a condition of the grant, he or she will not engage in the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance in conducting any activity with the grant.

**Taxpayer Identification Number**

All applicants are required to provide somewhere in their application(s) the nine-digit Taxpayer Identification Number (TIN) assigned by the U.S. Internal Revenue Service.

**Dates**

The closing date will be 4:00 p.m., Mountain Daylight Time, on April 12, 1989. Evaluation of the proposals will commence approximately one week after the closing date. Late applications will be handled in accordance with 10 CFR 600.13. Prospective applicants who intend to submit an application in response to this solicitation should notify the contact above of their intent in writing. Six copies of each application, including the signed original, should be submitted.

Questions regarding this solicitation should also be submitted to the contact above in writing and postmarked prior to March 5, 1989. Questions and answers will be issued in writing by amendment to this solicitation. Copies of all amendments to this solicitation will be sent only to those notifying this office of their intent to submit an application. Selection and award are expected to be made within four months of the closing date of this solicitation.

**Contact**

Six copies of each application, including the signed original, should be submitted to: Dallas L. Hoffer, Contracts Management Division, U.S. Department of Energy, Idaho Operations Office, 785 DOE Place, Idaho Falls, Idaho 83402–1129.

**H. Brent Clark,**

*Director, Contracts Management Division.*

BILLING CODE 6450–01–M

## Federal Energy Regulatory Commission

**[Docket Nos. CP79–382–011 et al.]**

## South Georgia Natural Gas Company, et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

**1. South Georgia Natural Gas Company**

[Docket No. CP79–382–011]

February 22, 1989.

Take notice that South Georgia Natural Gas Company (South Georgia) on February 16, 1989, tendered for filing Twelfth Revised Sheet Nos. 76 and 106 to the First Revised Volume No. 2 of its FERC Gas Tariff. The proposed revised tariff sheets would flow through to South Georgia's two gas storage customers reduced storage transportation charges billed to South Georgia by Southern Natural Gas Company (Southern).

South Georgia states that the Commission's August 22, 1980 order in the captioned proceeding permits South Georgia to flow through to its two storage customers any changes in the amounts which the Commission authorizes Southern to charge South Georgia for storage transportation services. South Georgia further states that the Commission recently accepted for filing to be effective December 1, 1988, subject to refund, revised tariff sheets filed by Southern which reduced Southern's storage transportation charges to South Georgia.

South Georgia requests waivers of § 154.51 of the Commission's Regulations and any other waivers necessary to make the revised tariff sheets effective as of December 1, 1988, the date of the decrease in Southern's charges to South Georgia.

Copies of this filing were served on the two jurisdictional cutomers affected by the filing, interested State Commissioners and all parties in the captioned proceeding.

*Comment date:* March 2, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

**2. United Gas Pipe Line Company**

[Docket No. CP89–840–000]

February 22, 1989.

Take notice that on February 16, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77152–1478, filed in Docket No. CP89–840–000 an application pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Eagle Natural Gas Company (Eagle), a marketer of natural gas, under United's blanket certificate issued in Docket No. 88–6–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport, on an interruptible basis, up to 25,750 MMBtu per day for Eagle. United states that construction of facilities would not be required to provide the proposed service.

United further states that the maximum day, average day, and annual transportation volumes would be approximately 25,750 MMBtu, 25,750 MMBtu and 9,398,750 MMBtu respectively.

United advises that service under Section 284.223(a) commenced January 1, 1989, as reported in Docket No. ST89–1872.

*Comment date:* April 10, 1989, in accordance with standard Paragraph G at the end of this notice.

VOL 54 ISS 39 MR 1 1989 UMI

**3. Texas Gas Transmission Corporation**

[Docket No. CP89-830-000]

February 22, 1989.

Take notice that on February 15, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky, 42301, filed in Docket No. CP89-830-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to transport natural gas for Energy Marketing Services, Inc. (Energy Marketing) under Texas Gas' blanket certificate issued in Docket No. CP-88-686-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 20,000 MMBtu of natural gas equivalent on behalf of Energy Marketing pursuant to a gas transportation agreement dated October 28, 1988, between Texas Gas and Energy Marketing. Texas Gas would receive the gas at various existing points of receipt on its system in Texas, Indiana, Kentucky, Tennessee, Illinois, Arkansas, Ohio and Louisiana and redeliver equivalent volumes, less fuel and lost and unaccounted for volumes, at existing delivery points in Ohio.

Texas Gas further states that the estimated average daily and annual quantities would be 20,000 MMBtu and 7,300,000 MMBtu, reapectively. Service under Section 284.223(a) commenced on January 1, 1989, as reported in Docket No. ST89-1822-000, it is stated.

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**4. ANR Pipeline Company**

[Docket No. CP89-832-000]

February 22, 1989.

Take notice that on February 15, 1989, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89-832-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Coastal Gas Marketing Company (Coastal), a marketer of natural gas, under ANR's blanket certificate issued in Docket No. CP88-532-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANR proposes to transport on an interruptible basis up to 150,000 dt equivalent of natural gas on a peak day, 150,000 dt equivalent on an average day and 54,750,000 dt equivalent on an annual basis for Coastal. It is stated that ANR would receive the gas for Coastal's account at existing receipt points on ANR's system in Texas, offshore Texas, Louisiana, offshore Louisiana, Oklahoma, and Kansas, and would redeliver equivalent volumes at existing points on ANR's system in Illinois. It is asserted that the service would be effected using existing facilities and would require no construction of additional facilities. It is explained that the transportation service has commenced under the self-implementing authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89-2097.

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**United Gas Pipe Line Company**

[Docket No. CP89-841-000]

February 22, 1989.

Take notice that on February 16, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-841-000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to provide an interruptible transportation service on behalf of Amoco Production Company (Amoco), a producer of natural gas, under its blanket certificate issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United states that it proposes to transport natural gas on behalf of Amoco from a point of receipt located in Vermilion Parish, Louisiana to two points of delivery located in Ouachita Parish, Louisiana.

United further states that the maximum daily, average daily and annual quantities that it would transport on behalf of Amoco would be 51,500 MMBtu equivalent, 51,500 MMBtu equivalent and 18,797,500 MMBtu equivalent of natural gas, respectively.

United indicates that in Docket No. ST89-1937, filed with the Commission on January 23, 1989, it reported that transportation service for Amoco had begun under the 120-day automatic authorization provisions of § 284.223(a).

*Comment date:* April 10, 1989 in accordance with Standard Paragraph G at the end of the notice.

**6. Northwest Pipeline Corporation**

[Docket No. CP89-838-000]

February 23, 1989.

Take notice that on February 15, 1989, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-838-000 a request pursuant to §§ 157.205 and 284.223(2)(b) of the Commission's Regulations under the Natural Gas Act for authorization to transport for Nevada Cement Company (Nevada cement), an end user of natural gas, under Northwest's blanket certificate issued in Docket No. CP86-578-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest states that it would transport, on an interruptible basis, up to 7,000 MMBtu per day of natural gas for Nevada Cement. Northwest indicates that vrious receipt points would be located on its pipeline system in Colorado, Oklahoma, Oregon, Utah, Washington, and Wyoming, and the delivery points would be on its pipeline system in Colorado, Idaho, New Mexico, Oklahoma, Oregon, Utah, Washington, and Wyoming. Northwest further states that the maximum day, average day, and annual transportation volumes would be approximately, 7,000 MMBtu, 330 MMBtu and 120,000 MMBtu, respectively. Northwest also states that it would perform the proposed transportation service for Nevada Cement pursuant to a service agreement dated February 24, 1988, as amended, between Northwest and Nevada Cement.

Northwest states that it commenced the transportation service for Nevada Cement on December 20, 1988, at Docket No. ST89-2010-000 for a 120-day period pursuant to § 284.223(a)(1) of the Commission's Regulations and will expire on April 18, 1989. Northwest also states that no construction of new facilities will be required to provide this transportation service.

Northwest states that the natural gas transported under the service agreement dated February 24, 1988, as amended, may be received on behalf of Nevada Cement by any local distribution company or affiliate of Nevada Cement which has and appropriate contractual arrangement with Nevada Cement. Northwest further states that it understands that Nevada Cement has a service agreement with Southwest Gas Corporation, a local distribution company.

*Comment date:* April 10, 1989, in accordance with Standard Pargraph G at the end of this notice.

**Standard Paragraphs**

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its won motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to apear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

**Lois D. Cashell,**

*Secretary.*

BILLING CODE 6717-01-M

---

**[Docket No. RP89-58-000]**

**Bear Creek Storage Co.; Order Instituting Investigation and Setting Matter for Hearing**

Issued February 23, 1989.

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

To provide additional storage capacity, subsidiaries of Southern Natural Gas Company (Southern) and Tennessee Gas Pipeline Company (Tennessee), referred to as applicants, formed a partnership under the name Bear Creek Storage Company (Bear Creek) to own and operate a storage facility. Bear Creek is owned in equal shares by subsidiaries of Southern and Tennessee. Southern operates the storage facility. By order of April 3, 1979 [1] in Docket Nos. CP78-266 *et al.*, the Commission issued certificates of public convenience and necessity authorizing Bear Creek to construct and operate facilities for the transportation and storage of natural gas in interstate commerce for resale from the Petit Storage Reservoir of the Bear Creek Field, Bienville Parish, Louisiana. These services are provided to Southern and Tennessee by Bear Creek. The order was issued pursuant to a Stipulation and Agreement (S&A) filed with the Commission by Southern and Tennessee.

**Discussion**

On June 3, 1981, Bear Creek, in compliance with the S&A filed tariff sheets to be effective July 1, 1981, which established a storage demand charge of $2.36 per Mcf of maximum daily withdrawal rate and a storage capacity charge of $.042 per Mcf of maximum storage capacity volume. These currently effective rates were supported by a cost of service of $46.9 million which reflected a rate base of $224.0 million; an overall rate of return of 12 percent consisting of a return on equity of 15 percent and a debt cost of 11 percent; a cash working capital allowance of 12.5 percent of operating and maintenance expenses; and a Federal income tax rate of 46 percent. The cost of service was filed as part of the S&A. Because the two rates are demand charges, Bear Creek is guaranteed recovery of its cost of service.

A preliminary analysis of Bear Creek's 1987 FERC Form No. 2 shows that Bear Creek's total cost of service rate base appears to be $175.0 million, which was derived from actual book balances at December 31, 1986, and December 31, 1987, where applicable, or a decrease of $49.0 million from that contained in the S&A discussed above; no cash working capital allowance, consistent with section 154.63b of the Commission's regulations; [2] and a Federal income tax rate of 34 percent.

Bear Creek's currently effective rates are based on an estimated cost of service made over seven years ago. Because it appears that Bear Creek's current cost of service may be significantly lower than the cost of service reflected in its rates, the Commission finds that Bear Creek's rates may not be just and reasonable. Additionally, Bear Creek's current rates reflect a cash working capital allowance of 12.5 percent of operation and maintenance expenses. Section 154.63b of the Commission's regulations provides that a pipeline will receive a $0 allowance unless supported by a fully developed lead-lag study. Finally, Bear Creek's rates are based on the old 46 percent Federal income tax rate rather than the current 34 percent rate. Accordingly, pursuant to Section 5 of the Natural Gas Act,[3] we shall initiate an investigation to determine whether Bear Creek's rates are unjust and unreasonable or otherwise unlawful.

**The Commission Orders**

(A) Pursuant to the authority of the Natural Gas Act, particularly Section 5 thereof, and the Commission's rules and regulations, a public hearing shall be held in Docket No. RP89-58-000 concerning the lawfulness of Bear Creek Storage Company's rates, and whether the current rates are unjust, unreasonable, or otherwise unlawful.

(B) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose, pursuant to § 375.304 of the Commission's regulations,[4] shall convene a prehearing conference in this proceeding to be held within 60 days of the issuance of this order, in a hearing or conference room of the Federal Energy Regulatory Commission, 825 North

Capitol Street, NE., Washington, DC 20426. The prehearing conference shall be held for the purpose of clarification of the positions of the participants, and establishment by the Presiding Administrative Law Judge of any necessary procedural dates to ensure that an Initial Decision will be issued not later than six months from the date of this order. The Presiding Administrative Law Judge is authorized to conduct further proceedings in accordance with this order and the rules of practice and procedure.

(C) Bear Creek must file, within 45 days of the issuance of this order, a cost and revenue study showing actual data for the most recently available 12-month period in the form specified by § 154.63 of the Commission's regulations.

(D) Any person desiring to intervene or to protest should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure.[5] All such motions or protests should be filed within 30 days of the date of issuance of this order. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding Any person wishing to become a party must file a motion to intervene.

By the Commission.

## Central Vermont Public Service Corp.; Notice of Filing

February 23, 1989.

Take notice that on January 23, 1989, Central Vermont Public Service Corporation (Central Vermont) filed a letter in response to questions by the Staff concerning the development of the 50 MW sale of Vermont Yankee Nuclear Corporation capacity and energy to New England Power Company.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 9, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

## Portland General Exchange, Inc.; Notice of Filing

February 24, 1989.

Take notice that on February 8, 1989 Portland General Exchange, Inc. (PGX) tendered for filing a second amendment to its filing of Service Schedule PGX-1 for the sale of nonfirm energy.

PGX states that the reasons for the amendment to be the following:

i. To change the shared saving rate to reflect shared savings rate principles permitted by the Commission.

ii. To provide cost support for a two (2) mill mark-up.

Copies of the amendment to the filing of Schedule PGX-1 have been served on the PGX-1 Distribution List, as included in the filing.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 10, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**[Docket No. CP89-875-000]**

## Southern Natural Gas Co.; Notice of Request Under Blanket Authorization

February 24, 1989.

Take notice that on February 21, 1989, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP89-875-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service for Atlanta Gas Light Company (Atlanta Gas), under Southern's blanket certificate issued in Docket No. CP88-316-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern requests authorization to transport, on an interruptible basis, up to a maximum of 500,000 MMBtu of natural gas per day for Atlanta Gas, a local distribution company, from receipt points located in Louisiana, Offshore Louisiana, Texas, Offshore Texas, Alabama, Mississippi and Georgia to delivery points located in Georgia for Atlanta Gas' system supply. Southern anticipates transporting, on an average day 249,315 MMBtu and an annual volume of 91,000 MMBtu.

Southern states that the transportation of natural gas for Atlanta Gas commenced December 17, 1988, as reported in Docket No. ST89-2147-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Southern in Docket No. CP88-316-000.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to invervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

BILLING CODE 6717-01-M

**[Docket No. RP89-60-000]**

## Southwest Gas Storage Co.; Order Instituting Investigation and Setting Matter for Hearing

Issued February 23, 1989.

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

### Background

Southwest Gas Storage Company (Southwest Gas Storage) is a Kansas general partnership. The two, equal partners are Pan Gas Storage Company, a wholly-owned subsidiary of Panhandle Eastern Pipe Line Company (Panhandle), and ANR Western Storage Company, a wholly-owned subsidiary of ANR Storage Company. Pursuant to a 15-year gas storage contract, dated June 11, 1979, as amended, Southwest Gas Storage provides storage service to Panhandle, its sole customer and operator of the facility.

On May 7, 1980, the Commission authorized Southwest Gas Storage: (1) To construct and operate a natural gas storage field in Meade County, Kansas; and (2) to store up to 70.1 Bcf of gas with a top working storage of 35 Bcf in the Borchers North Field.[1] Thus, Southwest Gas Storage is authorized to provide storage service under its S-1 rate schedule. Southwest Gas Storage began providing storage service to Panhandle on April 1, 1982.

### Discussion

Panhandle currently pays Southwest Gas Storage a monthly charge of $1,736,875 for contract storage of up to 35,620,000 Mcf, which is the initial rate authorized in the certificate proceeding. The rate for Southwest Gas Storage's S-1 storage service is based on a unit charge of 59.55 cents per Mcf and is supported by an estimated cost of service of $20,844,200 per year, as contained in the 1979 certificate filing.[2]

Southwest Gas Storage's currently effective rates are based on an estimated cost of service made almost 10 years ago. The components of the cost of service include, among other things, an estimated rate base of $70.5 million, a Federal income tax allowance based on the old 46 percent rate; an overall return of 16.09 percent consisting of a return on equity of 14.25 percent and debt cost of 16.70 percent; a depreciation rate of 5.25 percent; and a working capital allowance of 12.5 percent of operating and maintenance expenses. The Commission is concerned that this cost of service may no longer be reflective of Southwest's actual expenses.

In addition, the Commission's initial review of information on file with the Commission indicates that Southwest Gas Storage's investment in gas plant may have depreciated over $28 million during the seven (7) years it has been in operation. It also appears that this reduction in rate base is not reflected in the currently effective S-1 rate. Further, the Commission's Regulations require that the cash working capital allowances included in charged rates filed by a company must be based on a fully developed and reliable lead-lag study.[3] Thus, Southwest Gas Storage's current working capital allowance may no longer be appropriate. Finally, Southwest Gas Storage's current operation and maintenance expenses, as reported in FERC Form 2, appear to be substantially less than the estimated expenses embedded in the S-1 rate.[4]

The current rates authorized by the Commission were designed to recover a total cost of service of $20,844,200. Based upon the Commission's initial review, it appears that Southwest's rates generate revenues significantly in excess of its current cost or providing the storage service to Panhandle. Section 9.3 of the S-1 tariff rate schedule permits Southwest or Panhandle to seek authorization from the Commission to adjust the rates to assure just and reasonable rates; however, neither has sought to change the initial rates authorized in 1980. Hence, the Commission has decided to examine the justness and reasonableness of the rates pursuant to section 5 of the NGA.

Based on the foregoing, the Commission is of the view that the initial rates currently in effect may be unjust and unreasonable. We shall therefore initiate an investigation, pursuant to section 5 of the NGA, to determine whether the rates currently being charged by Southwest Gas Storage are just, reasonable and lawful. Accordingly, Southwest Gas Storage is directed to file within 45 days of the issuance of this order, a cost and

[1] *See* Southwest Gas Storage Company, 11 FERC ¶ 61,145 (1980); *amended*, 19 FERC ¶ 62,299 (1982).

[2] Panhandle's 1987 FERC Form 2 indicates payments of $20,842,500 for storage service in 1987.

[3] 18 CFR 154.63b (1988).

[4] For example, the current rates reflect operation and maintenance expenses of $2,394,600 while the information contained in Southwest's 1987 FERC Form 2 indicate operation and maintenance expenses of $1,194,900. In addition, the current rates include a Federal Income Tax allowance of $2,176,600, based on the old 46 percent rate. Based upon our initial review of this matter, it appears that the tax allowance under the current tax rate of 34 percent may result in a substantial decrease.

VOL 54 ISS 39 MR 1 1989 UMI

revenue study similar to that required by section 154.63 of the Commission's Regulations.[5] In the cost and revenue study, Southwest Gas Storage shall utilize the most recent 12-month period for which actual data is available.

**The Commission Orders**

(A) Pursuant to the authority of the Natural Gas Act, particularly section 5 thereof, and the Commission's rules and regulations, a public hearing shall be held in Docket No. RP89–60–00 to determine whether the rates currently being charged by Southwest Gas Storage Company are unjust, unreasonable, or otherwise unlawful.

(B) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose, pursuant to § 375.304 of the Commission's Regulations,[6] shall convene a prehearing conference in this proceeding to be held within 60 days of the issuance of this order, in a hearing or conference room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. The prehearing conference shall be held for the purpose of clarification of the positions of the participants and establishment by the Presiding Administrative Law Judge of any necessary procedural dates to ensure that an Initial Decision will be issued not later than six months from the date of this order. The Presiding Administrative Law Judge is authorized to conduct further proceedings in accordance with this order and the rules of practice and procedure.

(C) Southwest Gas Storage must file, within 45 days of the issuance of this order, a cost and revenue study showing actual data for the most recently available 12-month period in the form specified by § 154.63 of the Commission's Regulations.

(D) Any person desiring to intervene or to protest should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure.[7] All such motions or protests should be filed within 30 days of the issuance of this order. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

### Receipt of Application for Specific Exemption To Use Oxyfluorfen; Solicitation of Public Comment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received a specific exemption request from the Wisconsion Department of Agriculture, Trade and Consumer Protection (hereafter referred to as "Applicant") for use of the herbicide oxyfluorfen (goal) to control broadleaf weeds in horseradish in Wisconsin. EPA is soliciting comment before making the decision whether or not to grant this specific exemption request.

**DATE:** Comments must be received on or before March 16, 1989.

**ADDRESS:** Three copies of written comments, bearing the identification notation "OPP–180806," should be submitted by mail to: Public Docket and Freedom of Information Section, Field Operations Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street Sw., Washington, DC 20460. In person, bring comments to: Room 236, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Room 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Gener Asbury, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Office location and telephone number: Room 716C, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–1806).

**SUPPLEMENTARY INFORMATION:** Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption to permit the use of the herbicide oxyfluorfen (CAS 42874 03 3) available as Goal 1.6E, EPA Reg. No. 707–174, to control broadleaf weeds in horseradish. Information in accordance with 40 CFR Part 166 was submitted as part of this request.

Wisconsin has requested authorization to apply 2.5 pints of Goal 1.6E herbicide (0.5 pounds active ingredient) per acre as a ground spray application on 700 acres of horseradish. Goal 1.6E is a selective herbicide recommended for preemegenence control of certain broadleaf weeds. Goal 1.6E will be applied in a minimum of 40 gallons of water per acre.

According to the Applicant, weed control in horseradish fields in Wisconsin is mainly limited to mechanical means. The rising costs of fuel and labor in the past years has made the use of cultivation increasingly impractical. Cultivation at $4.50/acre/operation costs the grower $49.50/season for the normal eleven cultivations for between row weeds and $18.64/acre for the one hand-weeding for weed control within the row. In test plots, yields ranged from 1,500 pounds/acre with no weed control to 10,000 pounds/acre with proper weed control.

Oxyfluorfen was referred to Special Review in Janaury 1980 because pesticide products containing oxyfluorfen as an active ingredient were shown to be contaminated with perchloroethylene (PCE), a liver carcinogen in B6C3F1 mice. The Special Review process was completed on June 23, 1982, and the decision was made to continue registration of the herbicide subject to certain restrictions (on PCE) pertaining to formulation of the product (47 FR 27118).

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of a notice in the **Federal Register** of receipt of an application for a specific exemption proposing use of a pesticide which contains an active ingredient which has been the subject of a Special Review and is intended for a use that could pose a risk similar to the risk posed by any use of a pesticide which is or has been the subject of a Special Review (40 CFR 166.24(a)(5)).

Accordingly, interested persons may submit written views on this subject to the Field Operations Division (TS–757C), at the address given above. The Agency will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the Wisconsin Department of Agriculture, Trade and Consumer Protection.

Dated February 17, 1989.

Office location and telephone number: Rm. 716, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. (703-557-1806).

**SUPPLEMENTARY INFORMATION:** Pursuant to section 18 of the Federal Insecticide Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any provisions of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption for the use of avermectin $B_1$ manufactured as AGRI-MEK 0.15 EC Miticide/Insecticide", by MSD AGVET, a division of Merck & Co., Inc., on pears in Washington. No tolerances have been established for avermectin $B_1$ on any raw agricultural commodities.

Information in accordance with 40 CFR Part 166 was submitted as part of this request. The Applicant proposes ground applications applied at a rate of 10 to 20 ounces of product per acre per application. A maximum of two applications will be made per crop season. Applications would be made through September 1, 1989.

The Applicant indicates that with the recent withdrawal of cyhexatin growers are dependent on inferior products with demonstrated problems. Those products include fenbutatin-oxide, superior sprayy oil, oxamyl, formetanate, and propargite.

The Applicant indicates that without adequate control of these pests economic losses expected could total over $14.8 million.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice in the **Federal Register** and solicit public comment on an application involving the first food use of a pesticide. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period.

Dated: February 8, 1989.

**[OPP-50683; FRL-3539-5]**

## Issuance of Experimental Use Permits; Dow Chemical Co. et al.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

**FOR FURTHER INFORMATION CONTACT:** By mail: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

In person or by telephone: Contact the product manager at the following address at the office location or telephone number cited in each experimental use permit: 1921 Jefferson Davis Highway, Arlington, VA.

**SUPPLEMENTARY INFORMATION:** EPA has issued the following experimental use permits.

464-EUP-99. Issuance. Dow Chemical Company, P.O. Box 1706, Midland, MI 48640. This experimental use permit allows the use of 45 pounds of the insecticide O-(2(1,1-dimethylethyl)-5-pyrimidinyl) O,O-diethylphosphorothioate on 76 acres of field corn to evaluate the control of rootworms. The program is authorized only in the States of Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, New York, Ohio, Pennsylvania, Texas, and Wisconsin. The experimental use permit is effective from December 30, 1988 to December 30, 1989. This permit is issued with the limitation that all treated crops are destroyed or used for research purposes only. (Dennis Edwards, PM-12, Rm. 202, CM#2, (703-557-2386))

352-EUP-146. Issuance. E.I. duPont deNemours & Company, Inc., Agricultural Products Department, Walker's Mill Building, Barley Mill Plaza, Wilmington, DE 19898. This experimental use permit allows the use of 850 pounds of the herbicide methyl 2-[[[[[(4,6-dimethoxypyrimidin-2-yl)amino]carbonyl]amino] sulfonyl]methyl]benzoate for aquatic vegetation management by Federal and State agencies to evaluate the control of aquatic weeds. The program is authorized only in the States of Arizona California, Colorado, Georgia, Florida, Idaho, Texas, and Washington. The experimental use permit is effective from January 6, 1989 to January 6, 1990. A temporary tolerance for residues of the active ingredient in or on fish and an acceptable residue level for potable water has been established. (Richard Mountfort, PM 23, Rm. 237, CM#2, (703-557-1830))

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquiries concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA office, so that the appropriate file may be made available for inspection purposes from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

Authority: 7 U.S.C. 136c.

Dated: February 14, 1989.

**[PP 8G3638/T577; FRL-3527-2]**

## E. I. du Pont de Nemours and Co., Inc.; Establishment of Temporary Tolerances

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has established temporary tolerances for residues of the herbicide methyl 2[[[[[(4,6-dimethoxy-pyrimidin-2-yl) amino]carbonyl]amino]sulfonyl]methyl]benzoate, bensulfuron methyl in or on certain raw agricultural commodities. These temporary tolerances were requested by E.I. du Pont de Nemours and Co., Inc.

**DATE:** These temporary tolerances expire January 6, 1990.

**FOR FURTHER INFORMATION CONTACT:** By mail: Richard Mountfort, Product Manager (PM) 23, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 237, CM#2, 1921 Jefferson Davis Highway, Arlington, VA. (703) 557-1830.

**SUPPLEMENTARY INFORMATION:** E.I. du Pont de Nemours and Co., Inc., Agricultural Products Dept., Walker's Mill Building, Barley Mill Plaza, Wilmington, DE 19898, has requested in pesticide petition (PP) 8G3638 the establishment of temporary tolerances for residues of the herbicide methyl 2[[[[[(4,6-dimethoxy-pyrimidin-2-yl) amino]carbonyl]amino]s ulfonyl]methyl]benzoate, bensulfuron methyl in or on the raw agricultural commodities fish at 0.3 part per million (ppm) and water (potable) at 0.1 ppm. These temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit 352-EUP-146, which is being issued under the the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 95-396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. E.I. du Pont de Nemours and Co., Inc., must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire January 6, 1990. Residues not in excess of these amounts remaining in or on the raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Authority: (21 U.S.C. 346a(j)).

Dated: February 3, 1989.

## FEDERAL MARITIME COMMISSION

**[Docket No. 89-06]**

## South Florida NVOCC and NAOCC Association, Inc. v. Caribbean Shipowners Association; Filing of Complaint and Assignment

Notice is given that a complaint filed by the South Florida NVOCC and NAOCC Association, Inc. and its members (the "Association") against the Caribbean Shipowners Association and its members ("CSA") was served February 23, 1989.

The Association alleges that CSA has violated sections 10(b)(5) and 10(b)(6) of the Shipping Act of 1984 (the "Act"), 46 U.S.C. app. 1709(b)(5) and (6), by unfairly and unjustly discriminating against the Association members through unreasonable rate reductions in the U.S.—St. Maarten trade and unreasonable rate increases in the U.S.—Barbados trade. CSA has also allegedly violated section 10(b)(12) of the Act, 46 U.S.C. app. 1709(b)(12), by subjecting the Association to undue and unreasonable prejudice and disadvantage, and section 10(c)(3) of the Act, 46 U.S.C. app. 1709(c)(3), by attempting to eliminate Association members from the foreign trade from the South Eastern United States to St. Maarten and Barbados.

This proceeding has been assigned to Administrative Law Judge Joseph N. Ingolia ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by February 26, 1990, and the final decision of the Commission shall be issued by June 26, 1990.

## FEDERAL RESERVE SYSTEM

## Banc One Corp., et al.; Applications To Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Health Care Financing Administration

**[HSQ-166-FN]**

**Medicare Program; Peer Review Organizations: Revised Scopes of Work for Maryland; New Jersey; the Virgin Islands; and Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands**

**AGENCY:** Health Care Financing Administration (HCFA), HHS.

**ACTION:** Final notice.

**SUMMARY:** This notice describes requirements for the third Scope of Work for Utilization and Quality Control Peer Review Organizations (PROs). Specifically, this notice: (a) Identifies the requirements of the third Scopes of Work in Maryland and the Virgin Islands; (b) Recognizes the continuing requirements of the Scope of Work currently in effect in the PRO area of Guam/American Samoa/Northern Mariana Islands/the Trust Territory of the Pacific; and (c) Announces a change in the Scope of Work in effect in New Jersey.

This notice also implements section 4091(b)(1) of the Omnibus Budget Reconciliation Act of 1987 (Pub. L. 100-203), which requires us to publish a new

VOL 54 ISS 39 MR 1 1989 UMI

policy or procedure adopted by the Secretary that affects substantially the performance of contract obligations at least 30 days before the date the policy or procedure is to be used. It also implements other provisions of Pub. L. 100–203, as well as requirements of the Omnibus Budget Reconciliation Act of 1986.

**FOR FURTHER INFORMATION CONTACT:**
Patricia Booth, (301) 966–6860.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Peer Review Improvement Act of 1982 (Title I, Subtitle C of the Tax Equity and Fiscal Responsibility Act of 1982, Pub. L. 97–248) (TEFRA) established the Utilization and Quality Control Peer Review Organization (PRO) program. TEFRA requires the Secretary to enter into contracts with private Peer Review Organizations (PROs) for the review of services furnished under Medicare. In the past, these contracts have been subject to renewal on a biennial basis.

The specific review obligations of PROs are outlined in a document known as the Scope of Work, which defines the duties and functions of Medicare review performed by the PRO. Such duties and functions include the implementation and operation of a review system to assure the quality of services for which payment may be made, in whole or in part, under Title XVIII of the Social Security Act, and to eliminate unreasonable, unnecessary, and inappropriate care provided to Medicare beneficiaries. The first Scope of Work covered the 1984–1986 contract period. On November 12, 1985 (50 FR 46702), we published a notice in the **Federal Register** which announced the availability of the proposed second Scope of Work and solicited comments on its content. We subsequently considered the comments and incorporated them into the final second Scope of Work. The second Scope of Work was effective for the 1986–1988 contract period.

On September 12, 1988, we published a notice in the **Federal Register** (53 FR 35234) which identified the requirements of the third Scope of Work for all States except Maryland; the Virgin Islands; and Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

**II. Implementation of Recent Legislation**

Section 4091(a) of Pub. L. 100–203, the Omnibus Budget Reconciliation Act of 1987 (OBRA 87), allows a one-time contract extension (of up to 24 months) for existing contracts in order to permit the Secretary to more effectively administer PRO contract renewals and changes the PRO contract period from two to three years. Accordingly, we have developed a schedule for extending the current contracts and an implementation schedule for the third Scope of Work for the new three-year contract period. Hence, on October 1, 1988, approximately one-fourth of the PRO's began a new 3-year contract period under which they must implement the third Scope of Work. The remaining PROs will implement the third Scope of Work on April 1, 1989 (some through new contracts and others through extensions and modifications to their existing contracts).

Section 4091(b) of OBRA 87 requires that we publish, 30 days prior to the effective date, any new policy or procedure adopted by the Secretary which substantially affects the performance of contract obligations under PRO contracts. Therefore, we are publishing this notice to inform the public that the Third Scope of Work contains some new requirements that substantially impact on PRO contract obligations for Maryland; New Jersey; and the Virgin Islands.

**III. Third Scope of Work**

The third Scope of Work, for all geographical areas, was developed following an extensive analysis of the review requirements of the second Scope of Work. In addition, the third Scope of Work incorporates the provisions of three public laws which impact on PRO review that were passed after the development of the second Scope of Work. These laws are: Pub. L. 99–272, the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA); Pub. L. 99–509, the Omnibus Budget Reconciliation Act of 1986 (OBRA 86); and OBRA 87. Relevant provisions of these laws are discussed in section IV of this notice.

In the September 12, 1988 (53 FR 35234), **Federal Register** we indicated that the requirements of the Scope of Work applicable to the PRO areas of Guam/American Samoa/Northern Mariana Islands/Trust Territory of the Pacific Islands might be changed. We, however, are not making changes at this time; hence the PROs in this area will continue to perform review following the requirements of the second Scope of Work.

Until recently, New Jersey received a waiver from Medicare's prospective payment system (PPS). All acute hospital care in New Jersey was under the State's cost control system, a DRG-based system, and accordingly, the New Jersey PRO contracted under a Scope of Work developed specifically to meet the state's review needs. Effective January 1, 1989, New Jersey converted its Medicare reimbursement program to PPS and, thus, the PRO will now perform PPS-based review outlined in the September 12, 1988, (53 FR 35324), **Federal Register.**

The provisions of the third Scope of Work are effective in Maryland and the Virgin Islands on April 1, 1989. Both Maryland and the Virgin Islands are exempt from Medicare's Prospective Payment System. In Maryland, all acute care hospitals and non-State-owned specialty hospitals are subject to regulatory rate review by an independent State agency, the Health Service Cost Review Commission. The Commission reviews all proposed service charges (based on costs) and, where a proposed rate is not appropriate, changes the rate. The Maryland system and Medicare's PPS provide essentially the same incentives to hospitals. The purpose of Maryland's cost control system is to change hospital behavior through financial incentives which encourage efficient medical care management by doctors and hospitals.

An individual or organization interested in obtaining copies of the second and third Scopes of Work for any of these PRO areas should specify the PRO area Scope he or she wishes to receive and address requests to: Health Care Financing Administration, Attention: Bob Lozosky, Office of Budget and Administration, Room 322A East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

**IV. Program Changes and Legal/Administrative Requirements**

In an effort to achieve consistency and be least disruptive to on-going review activities, we attempted to change review activities in the Maryland and Virgin Islands Scopes of Work only where absolutely warranted. Thus, much of the consent of the second Scope of Work remains a part of the Scopes of Work for these areas. Where changes were made, they were done in the interest of creating a more effective review system and making more efficient use of PRO resources. In some cases, the third Scope of Work in Maryland, and the modified second Scope of Work in the Virgin Islands, contain certain types of review required by legislation. To the extent that we have flexibility, we are amending the review requirements in the interest of increasing PRO effectiveness and efficiency. Some existing requirements which have proven inefficient or ineffective are being deleted.

We have, in an effort to achieve consistency among PROs, developed a basic quality intervention plan (QIP). This plan is a prescribed blueprint which requires each PRO to implement specific interventions in response to confirmed quality problems. The QIP mandates a three level severity indexing system to be used in categorizing quality problems. It also requires the PRO to follow a specific process, along with timeframes, for notifying the involved physician and/or provider. This process provides these parties with an opportunity to discuss the problem. The QIP dicatates what profiling and weighting of quality problems must occur to determine the prescribed quality intervention.

We have modified the HCFA quality screens which PROs use. These screens were made more explicit in response to comments and ongoing data analysis, so that "false positives" were significantly reduced.

Sections V and VI contain summaries of the differences and similarities between the second and third Scope of Work applicable in Maryland and, the second modified second Scope of Work in the Virgin Islands. The review requirements are grouped according to whether they are: (1) Continuing requirements; (2) new requirements; (3) requirements which continue with some amendments; or (4) requirements which have been deleted.

**V. Specific Review Requirements in Maryland**

*A. Continuing Requirements—The PRO must*

- On every case selected, review for quality of care (e.g., Using HCFA generic quality of screens), appropriateness of discharge, length of stay, medical necessity, appropriateness of setting and make limitation of liability (i.e., waiver of liability) and coverage determinations.
- Review the following hospital cases without a change in level of effort from the second Scope of Work:
  + Noncovered Admissions which are followed by a period in which the level of care is covered, and
  + HCFA Regional Office and FI Referrals.
- Review freestanding cardiac catheterization facilities, when requested.
- Upon request, reconsider initial determinations and review DRG changes. When an appeal (i.e., hearing) is required, the PRO will prepare the appeals folder.
- When appropriate, initiate sanction recommendations against practitioners and providers.
- Maintain at least one non-physician consumer member on the PRO's governing board.
- Investigate beneficiary complaints about the quality of care.
- Review, upon request, hospital emergency room records to determine if the hospital has complied with the requirement to serve all individuals in need of emergency care (Anti-Dumping).
- Offer the attending physician and provider at least 20 days to discuss the proposed denial or DRG change.
- For cases selected for review, review each day for which payment was made or billed to determine that each day of inpatient care was necessary and appropriate.
- Review all cases with certain principal diagnoses identified by the Medicare Code Editor.

In addition, in accordance with the Health Maintenance Organization/Competitive Medical Plan (HMO/CMP) Scope of Work, the review of inpatient and ambulatory care provided to a sample of all Medicare beneficiaries who have enrolled in a risk-based HMO/CMP will continue. Cases which are reviewed are:

- A random sample of hospital discharge;
- Sample of hospital readmissions within 31 days;
- Sample of non-trauma death;
- All transfers from a hospital with which the HMO does not have an agreement to one with which the HMO has an agreement;
- A sample of hospital discharges for 13 identified conditions (including, based upon the identified condition, post and/or prehospital care); and
- Random sample of enrollees receiving ambulatory care.

*B. New Requirements—The PRO must*

- Conduct a significant amount of review onsite in at least 20 percent of the rural hospitals as required by section 4090(b) of OBRA 87.
- Determine in cases selected for review if an invasive procedure was reasonable and medically necessary. (Originated because of concern that unnecesary procedures might be performed.)
- Develop a quality intervention plan which meets HDFA requirements. (Originated with intention that quality problems be handled with more consistency across the 54 PRO areas.)
- Conduct a review of ambulatory surgery procedures as required by section 9343(d) of OBRA 1986.
- Use (to the extent possible) a physician reviewer who is trained in psychiatry or physical rehabilitation as required by section 4904(c)(2) of OBRA 1987, when a psychiatric or physical rehabilitation case is reviewed.
- Publish (not less than annually) a report that describes the PRO's finding with respect to the types of cases in which the PRO has frequently determined that care or services were necessary, inappropriate, rendered in an inappropriate setting, or did not meet professionally recognized standards. The findings are to be distributed to providers and practitioners whose services are subject to review. (This requirement is mandated by section 4094(c)(1) of OBRA 1987.)
- Review, as required by section 9352 of OBRA 86, post-hospital intervening care (e.g., home health agency, skilled nursing facility), for which Medicare payment could be made, that is delivered between 2 hospital readmissions where the second admission is within 31 days of the discharge from the first admission.
- Conduct intensified reviews of those physicians, providers, or DRGs found to exhibit a pattern of substandard care. As part of the QIP, implement specific interventions to rectify identified patterns of substandard care.

In addition, if the PRO negotiates with the Office of Civilian Health and Medical Programs of the Uniformed Services (CHAMPUS), the PRO may review inpatient care provided to CHAMPUS beneficiaries. The review is basically the same as Medicare's PPS review and it is estimated that it will consist of approximately 17% of CHAMPUS inpatient cases.

*C. Continuing Requirements with Some Amendment*

- The PRO must continue to select a random sample of discharges for review; however, the sample size has been decreased from 6 percent to 3 percent.
- Conduct coding validation for those cases selected in the 3 percent random sample.
- The PRO must continue to propose objectives to HCFA in order to resolve identified utilization and quality problems (i.e., a dynamic process). Objectives are based on confirmed quality problems identified through application of generic quality screens. Objectives may be statewide or focused by physician, provider, DRG, etc.
- Preadmission/Preprocedure Review—Increased from 5 to 10 procedures, and can extend to outpatient procedures as well. The

VOL 54 ISS 39 MR 1 1989 UMI

mandatory review of pacemaker implants has been changed to a mandatory cataract surgery and carotid endarterectomy review. Therefore, the PRO will choose 8 additional procedures from the following 11 (listed below) or produce evidence why a procedure not on the list should be subjected to 100 percent preadmission review: cholecystectomy, major joint replacement, coronary artery bypass with graft, percutaneous transluminal coronary angioplasty, laminectomy, complex peripheral revascularization, hysterectomy, bunionectomy, inguinal hernia repair, prostatectomy, pacemaker insertion. (HCFA originated this amendment in the interest of efficient and effective review.)

- Community outreach plans for beneficiaries, providers and physicians must meet certain minimal requirements. The plan must provide for:
  - + A toll-free hotline which beneficiaries may use to call the PRO;
  - + Programs to inform beneficiaries about PRO review;
  - + Specific types of informational materials to be developed by the PRO;
  - + Improved educational programs for physicians health care practitioners and providers (including offering to meet with medical and administrative staff at the hospital or at a regional meeting several times a year);
  - + Review by a PRO physicians who practices in a setting similar to that in which the physician whose services are under review practices;
  - + Use, wherever practicable, of board certified or board eligible physicians in the appropriate speciality to make reconsideration determinations.

(Originated with HCFA desire for material consistency and improved relationships with parties affected by PRO review.)

- Review of all requests for use of an assistant at cataract surgery with or without lens insertion, as required by section 9307 of COBRA. Additionally, the PRO will review requests for use of an assistant when an intraocular lens will be implanted after the cataract surgery has been performed. This is required by section 411 of Pub. L. 101-360, the Medicare Catastrophic Coverage Act of 1988, which amended section 1862(a)(15) of the Act.
- Sample the following review categories with new levels of effort:
  - + Readmissions-Reduced from 100 percent of all related readmissions within 15 days of discharge to 25 percent of all readmissions occurring within 31 days from discharge from a hospital.
  - + Focused DRG Review-Seven low volume DRGs related to newborns must be reviewed at 100 percent level of effort, while the requirement to review DRG 462 (Rehabilitation) has been deleted. (HCFA initiated this amendment in the interest of efficient and effective review.)
- Calculate error rates for intensifying utilization review by comparing the number of days denied to the number of days reviewed.

*D. Requirements Which Have Been Deleted*

- The PRO will not review claims for percutaneous lithotripsy.
- For each case reviewed, the PRO is no longer required to perform a review of each ancillary service.

**VI. Specific Review Requirements in the Virgin Islands**

*A. Continuing Requirements—The PRO must*

- On every case selected, review for quality of care (e.g., using HCFA generic quality screens), appropriateness of discharge, medical necessity, appropriateness of setting and make limitation of liability (i.e., waiver of liability) and coverage determinations.
- Review all hospital discharges.

*B. New Requirements—The PRO must*

- Determine in cases selected for review if an invasive procedure was reasonable and medically necessary. (Originated because of concern that unnecessary procedures might be performed.)
- Develop a quality intervention plan which meets HCFA requirements. (Originated with intention that quality problems be handled with more consistency across the 54 PRO areas.)
- Conduct a review of ambulatory surgery procedures as required by section 8343(d) of OBRA 1986.
- Use (to the extent possible) a physician reviewer who is trained in psychiatry or physical rehabilitation as required by section 4094(c)(2) of OBRA 1987, when a psychiatric or physical rehabilitation case is reviewed.
- Published (not less than annually) a report that describes the PRO's findings with respect to the types of cases in which the PRO has frequently determined that care or services were unnecessary, inappropriate, rendered in an inappropriate setting, or did not meet professionally recognized standards. The findings are to be distributed to providers and practitioners whose services are subject to review. This requirement is mandated by section 4094(c)(1) of ORBA 1987.
- Review, as required by section 9352 of OBRA 1986, post-hospital intervening care (e.g., home health agency, skilled nursing facility), for which Medicare payment could be made, that is delivered between 2 hospital readmissions where the second admission is within 31 days of the discharge from the first admission.

In addition, if a PRO negotiates with the Office of Civilian Health and Medical Programs of the Uniformed Services (CHAMPUS), the PRO may review inpatient care provided to CHAMPUS beneficiaries. The review is basically the same as Medicare's PPS review and it is estimated that it will consist of approximately 17% of CHAMPUS inpatient cases.

*C. Continuing Requirements with Some Amendment*

- The PRO must continue to propose objectives to HCFA in order to resolve identified utilization and quality problems (i.e., a dynamic process). Objectives are based on confirmed quality problems identified through application of generic quality screens. Objectives may be statewide or focused by physician, provider, DRG, etc.
- Preadmission/Preprocedure Review—Increased from 5 to 10 procedures, and can extend to outpatient procedures as well. The mandatory review of pacemaker implants has been changed to a mandatory cataract surgery and carotid endarterectomy review. Therefore, the PRO will choose 8 additional procedures from the following II (listed below) or produce evidence why a procedure not on the list should be subjected to 100 percent preadmission review: Cholecystectomy, major joint replacement, coronary artery bypass with graft, percutaneous transluminal coronary angioplasty, laminectomy, complex peripheral revascularization, hysterectomy, bunionectomy, inguinal hernia repair, prostactectomy, pacemaker insertion. (HCFA originated this amendment in the interest of efficient and effective review.)
- Community outreach plans for beneficiaries, providers and physicians must meet certain minimal requirements. The plan must provide for:
  - + A toll-free hotline which beneficiaries may use to call the PRO.
  - + Programs to inform beneficiaries about PRO review.
  - + Specific types of informational materials to be developed by the PRO.
  - + Improved educational programs for physicians, health care practitioners and providers (including offering to meet with medical and administrative staff at the hospital or at a regional meeting several times a year).
  - + Review by a PRO physician who practices in a setting similar to that in which the physician whose services are under review practices.
  - + Use, wherever practicable, of board certified or board eligible physicians in the appropriate speciality to make reconsideration determinations.

(Originated with HCFA desire for national consistency and improved a relationship with parties affected by PRO review.)

- Review all of requests for use of an assistant at cataract surgery with or without lens insertion, as required by section 9307 of COBRA 85. Additionally, the PRO will review requests for use of an assistant when an intraocular lens will be implanted after the cataract surgery has been performed. This is required by section 411 of Pub. L. 101-360, the Medicare Catastrophic Coverage Act of 1988, which amended section 1862(a)(15) of the Act.

**VII. Paperwork Reduction Act**

Provisions of this notice contain information collection requirements which will be implemented with the use of revised PRO reporting forms which are subject to the Office of Management and Budget (OMB) review under authority of the Paperwork Reduction Act of 1980. These forms have been approved under OMB control number 0938-0531.

(1153 of the Social Security Act (42 USC 1320c-2) Catalog of Federal Domestic Assistance Program No. 13.773, Medicare-Hospital Insurance; and No. 13.774, Medicare-Supplementary Medical Insurance.)

Dated: February 13, 1989.

## Health Resources and Services Administration

### Advisory Council Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following National Advisory bodies scheduled to meet during the month of March 1989:

*Name:* National Advisory Committee on Rural Health, Health Services Delivery Work Group.

*Date and Time:* March 14, 1989, 1:00 p.m.

*Place:* Room 14-22 Parklawn Building, Office of Rural Health Policy, 5600 Fishers Lane, Rockville, Maryland 20857.

The meeting is open to the public.

*Purpose:* The Committee provides advice and recommendations to the Secretary with respect to the delivery, Financing, research, development and administration of health care service in rural areas. This Work Group is one of three established by the Committee.

*Agenda:* This meeting will be conducted through a telephone conference call. The conference call will be devoted to a discussion of the issues and work plan activities in preparation of the May and September meeting of the full Committee.

* * * * *

*Name:* National Advisory Committee on Rural Health, Health Professions Work Group.

*Date and Time:* March 23, 1989, 10:00 a.m.

*Place:* Room 14-22 Parklawn Building, Office of Rural Health Policy, 5600 Fishers Lane, Rockville, Maryland 20857.

The meeting is open to the public.

*Purpose:* The Committee provides advice and recommendations to the Secretary with respect to the delivery, Financing, research, development and administration of health care service in rural areas. This Work Group is one of three established by the Committee.

*Agenda:* This meeting will be conducted through a telephone conference call. The conference call will be devoted to a continued discussion of information presented and developed at the Second Meeting of the Committee; reports by Work Group members on their respective areas of investigation; a review of the schedule of work plan activities in preparation of the May and September meeting of the full Committee.

Anyone requiring information regarding the subject Committees should contact Mr. Jeffrey Human, Executive Secretary, National Advisory Committee on Rural Health, Health Resources and Service Administration, Room 14-22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (310) 443-0835.

Persons interested in attending any portion of the above meetings should contact Ms. Arlene Granderson, Program Analyst, Office of Rural Health Policy, Health Resources and Service Administration, Room 14-22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-0835.

Agenda Items are subject to change as priorities dictate.

Date: February 23, 1989.

**Jackie E. Baum,**

*Advisory Committee Management Officer, HRSA.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

**[AZ-027-9-25]**

### Availability of the Goldwater Plan Amendment; Environmental Assessment to the Lower Gila South Resource Management Plan

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of availability of the Goldwater Plan Amendment/ Environmental Assessment to the Lower Gila South Resource Management Plan; Phoenix District.

**SUMMARY:** In compliance with the Federal Land Policy and Management Act of 1976, section 102 (2)(c) of the National Environmental Policy Act of 1969 and the Military Lands Withdrawal Act of 1986 (Pub. L. 96-606), the Bureau of Land Management (BLM) has prepared an amendment and environmental assessment to its Lower Gila South Resource Management Plan. The amendment describes the resource management practices the BLM intends to implement on the Barry M. Goldwater Air Force Range. The amendment involves 1.8 million acres of land in southwest Arizona. The land lies within Maricopa, Pima and Yuma counties. The public review and comment period will end April 7, 1989 after which the Decision will become final.

**SUPPLEMENTARY INFORMATION:** A limited number of copies of the amendment and environmental assessment are available upon request to the Phoenix District Manager, Bureau of Land Management, 2015 W. Deer Valley Road, Phoenix, Arizona 85027. There are also copies available for review at the above location.

**FOR FURTHER INFORMATION CONTACT:** Carole Hamilton, Lower Gila Resource Area Manager, 2015 W. Deer Valley Road, Phoenix, Arizona 85027, telephone (602) 863-4464.

Date: February 21, 1989.

### San Juan River Regional Coal Team (RCT) Meeting; Availability of Draft Data Adequacy Standards; New Mexico and Colorado

**AGENCY:** Bureau of Land Management, Interior.

VOL 54 ISS 39 MR 1 1989 UMI

**ACTION:** Notice of RCT meeting. Notice of availability.

**SUMMARY:** The San Juan River RCT will meet to consider future development plans for Federal Coal in the region. The public is invited to attend.

The primary purposes of the meeting are to:

1. Update the RCT on the status of current competitive lease applications in the region;
2. Reassess operating in a lease by application mode versus a regional leasing mode;
3. Introduce the new RCT science advisors; and
4. Review the draft Data Adequacy Standards for coal leasing in the San Juan River Region.

Proposed Data Adequacy Standards for the San Juan River Region are available upon request beginning March 3, 1989. The public is invited to comment on these standards.

**DATES:** The RCT will meet at 9 a.m. on Friday, April 28, 1989. Public comments on the draft Data Adequacy Standards are requested by Friday, April 21, 1988. Comments should be sent to Russell Jentgen at the address shown below.

**ADDRESS:** The meeting will be held at the Howard Johnson Plaza Hotel, 4048 Cerrillos Road, Santa Fe, New Mexico 87501, telephone (505) 473–4046. A block of 20 rooms is being held on a first come, first served basis for people wanting a room for the night of April 27, 1989. The single rate is $45 per night including tax. Please make any reservations at least a week before the meeting.

Copies of the draft Data Adequacy Standards may be obtained from either Russell Jentgen or Ed Heffern, Bureau of Land Management, New Mexico State Office, Branch of Solid Minerals, NM (921), P.O. Box 1449, Santa Fe, New Mexico 87504–1449, telephone (505) 988–6109.

**FOR FURTHER INFORMATION CONTACT:** Russell Jentgen or Ed Heffern at the above address or telephone number.

**SUPPLEMENTARY INFORMATION:** At this meeting, the Environmental Impact Statement (EIS) contractor will brief the RCT on progress on the EIS for the Fence Lake Coal Lease Application, as well as on the results of public scoping for that effort.

The RCT will also consider whether to return from a lease by application mode to a regional leasing mode. At its last meeting on August 9, 1988, the RCT decided to reconsider whether to shift back to a regional mode if a threshold of two lease applications were received in a calendar year. This threshold was reached in 1988. Salt River Project submitted its application for 6,800 acres near Fence Lake, New Mexico, on October 14, 1988. Blue Flame Coal Company submitted an incomplete lease application for 200 acres near Hesperus, Colorado, on December 17, 1988.

The RCT appointed three science advisors on January 18, 1989, to help prepare Data Adequacy Standards and review lease applications for technical adequacy. Each advisor is an expert on one of the following: nonrenewable resources, renewable resources, and reclamation. They will be introduced at the meeting.

The draft Data Adequacy Standards contain recommended levels of data to be acquired prior to the competitive leasing of Federal coal tracts, whether in the lease by application or regional leasing mode. Data standards are proposed for geology, paleontology, soils, water, vegetation, wildlife, air, cultural resources, socioeconomics, and land-use disciplines within the San Juan River Region.

The standards are being prepared by a multidisciplinary task force composed of Federal and State resource specialists. The task force was appointed and guided by the San Juan River RCT. The Data Adequacy Standards are being prepared, with public input, at the direction of the Department of the Interior as an outcome of the supplemental EIS to the Federal Coal Management Program.

The RCT welcomes comments on any aspect of these standards.

The RCT will consider information obtained from the public in making decisions at this meeting.

Anyone who wishes to be scheduled to speak at the meeting is requested to provide written copies of their remarks to Russell Jentgen or Ed Heffern, Bureau of Land Management, at the above address by April 21, 1989. Written materials will also be accepted in lieu of or in addition to any oral presentation.

Following is a preliminary agenda for this meeting:

1. Introduction
2. Approval of Minutes of Last Meeting
3. Annual BLM Coal Market Assessment
4. Current Activity and Production on Existing Leases
5. Status of Preference Right Lease Applications
6. Status of Industry Interest in San Juan Region Coal
7. Status of Competitive Lease Applications
   a. Fence Lake Project EIS in New Mexico
   b. Blue Flame Lease Application in Colorado
8. Review of Lease by Application versus Regional Leasing
9. Introduction of New Science Advisors
10. Review of Draft Data Adequacy Standards
11. Public Comment
12. Scheduling of Next Meeting
13. Adjourn.

**Larry L. Woodward,**

*Chairman, San Juan River Regional Coal Team.*

### California; Susanville District Advisory Council Meeting

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of meeting.

**SUMMARY:** Notice is hereby given, in accordance with Pub. L. 94–579 (FLPMA), that a Susanville District Advisory Council meeting has been scheduled for Friday, April 14, 1989. The meeting will begin at 10:00 a.m. at the Susanville District Office of the Bureau of Land Management, 705 Hall Street, Susanville, CA 96130, and end at 4:00 p.m. The agenda will include discussion of Malacha Power Project, an Environmental Assessment recommendation to Washoe County on the Silver State Water Project, modification of wild horse plans and an update on the East Lassen Deer Herd. The meeting is open to the public and interested persons may make oral statements to the Council or file a written statement for the Council's consideration.

Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 705 Hall Street, Susanville, CA 96130, by April 17, 1989. Depending on the number of persons wishing to make oral statements, a per-person limit may be established.

**FOR FURTHER INFORMATION CONTACT:** Jeff Fontana at 916–257–5381.

[U-58146]

### Utah; Proposed Reinstatement of Terminated Oil and Gas Lease

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97–451), a petition for reinstatement of oil and gas lease U–58146 for lands in Grand County, Utah, was timely filed and required rentals and royalties accruing from June 1, 1988, the date of termination, have been paid.

The lessee has agreed to new lease terms for rentals and royalties at rates of $7 per acre and 16⅔ percent, respectively. The $500 administrative fee has been paid and the lessee has reimbursed the Bureau of Land Management for the cost of publishing this notice.

Having met all the requirements for reinstatement of lease U–58146 as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective June 1, 1988, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

### Resource Management Plan; Glennallen District, Southcentral Planning Area, AK

**AGENCY:** Department of the Interior, Bureau of Land Management (BLM).

**ACTION:** Notice of intent.

**SUMMARY:** The Glennallen District in Glennallen, Alaska will prepare a Resource Management Plan (RMP) with an Environmental Impact Statement (EIS) for the Southcentral Planning Area. The planning area, situated in the southcentral portion of the state of Alaska, contains some of the most scenic lands in Alaska and because of easy access, is heavily used for a multitude of outdoor recreation and subsistence uses. The RMP will seek to optimize tourism and economic opportunities while protecting and enhancing the present resource values. The plan will address approximately 5.3 million acres of BLM administered lands. These lands are clustered in 3 main blocks of land adjoined by other federal, state and private, lands. BLM recognizes the importance of compatibility with adjacent land managers and will maximize opportunities for cooperation with the public and private sectors. The public is invited to participate in the planning process, beginning with identification of the issues and criteria.

**DATE:** Comments on the planning issues and criteria should be received by April 30, 1989.

**ADDRESSES:** Mail comments to the following address: Office of Management, Planning, and Budget, Bureau of Land Management, 222 W. 7th Avenue, Box 13, Anchorage, Alaska 99513.

**FOR FURTHER INFORMATION CONTACT:** Lynette Nakazawa, Southcentral Planning Team Leader, at the Office of Management, Planning, and Budget, (907–271–5546).

**SUPPLEMENTARY INFORMATION:** The anticipated issues for this plan are summarized below:

1. Under what framework should improvement to existing recreational facilities and trails proceed? Which new areas and opportunities should be developed?
2. Can or should resources such as mineral and mineral materials, and timber be developed, and in what manner?
3. What wildlife habitat programs should the BLM undertake to maintain and enhance the high level of fish and wildlife in the area to support commercial and recreational users?
4. Should special management areas, such as, Areas of Critical Environmental Concern and Wild and Scenic Rivers be used to support recreation and wildlife opportunities?
5. Should lands be acquired for or transferred from BLM administration? What are the opportunities for leases, sales, and permits on the public lands?
6. Where and how should access areas be developed?

The preliminary planning criteria are:

1. Opportunities for public participation will be encouraged throughout the planning process.
2. Actions and activities which are potentially adverse to the existing energy right-of-way will be avoided.
3. Valid existing rights will be protected.
4. Subsistence uses and needs will be considered and adverse impacts will be minimized whenever possible in accordance with ANILCA 810.
5. Plans and policies of adjacent land holders, managers, and local governments will be considered. The RMP will be consistent with these policies wherever practical.
6. Wildlife habitat management will be consistent with Alaska Department of Fish and Game objectives.
7. The plan will be compatible with the Gulkana and Delta River National Wild and Scenic River Management Plans.
8. The plan will utilize existing data, information, plans, and land use analyses.
9. Requirement of Sec. 106 of the National Historic Preservation Act will be considered.
10. The plan will make no wilderness suitability recommendation.

These issues and criteria are presented for public comment and are subject to change based on such comment. Comments should be received by April 30, 1989. The planning team will seek public comment throughout the planning process by direct mailings, media coverage, person-to-person contacts, and coordination with local, state, and other federal agencies. Public meetings to gather comments on the preliminary issues and criteria are scheduled for:

April 4, 1989, 3–5 p.m., Mentasta Lodge, Mile 78, Tok Cuttoff Road, Mentasta, Alaska
April 4, 1989, 7–9 p.m., BG's Lodge, Mile 6, Nabesna Road, Slana, Alaska
April 5, 1989, 7–9 p.m. Paxson Lodge, Mile 185, Richardson Highway, Paxson, Alaska
April 6, 1989, 7–9 p.m., Glennallen High School, Aurora Drive, Glennallen, Alaska
April 11, 1989, 7–9 p.m., Z.J. Loussac Library, Public Conference Room, Level 1, 3600 Denali Street, Anchorage, Alaska
April 12, 1989, 7–9 p.m., BLM Office Building, 1150 University Avenue, Fairbanks, Alaska.

The planning effort will follow the Code of Federal Regulations, Title 43, Subpart 1600. The RMP will be prepared by an interdisciplinary team composed of BLM specialists in fish and wildlife, forestry, plant ecology, soil, water, air, minerals, fire management, cultural resources, recreation, visual resources, subsistence, realty, economics, and environmental protection.

Complete records of all phases of the planning process will be available for public review at BLM Office of Management, Planning, and Budget in the Alaska State Office, 222 West 7th Avenue, Anchorage, Alaska, 99513. Draft and final documents of the RMP will be available upon request.

## Office of Surface Mining Reclamation and Enforcement

### Deep River Basin Lands Unsuitable for Mining Petition

**AGENCY:** Office of Surface Mining Reclamation and Enforcement, Interior.

**ACTION:** Notice to terminate the preparation of an environmental impact statement (EIS) for a petition to designate certain lands in the Deep River Basin in Lee and Chatham

VOL 54 ISS 39 MR 1 1989 UMI

Counties, North Carolina as unsuitable for surface coal mining operations.

**SUMMARY:** Notice is hereby given that the Office of Surface Mining Reclamation and Enforcement (OSMRE) has completed its review of the petition to designate certain private lands in the Deep River Basin, Chatham and Lee Counties, North Carolina, as unsuitable for surface coal mining operations.

The petition allegations were reviewed in accordance with the provisions of § 522(a)(2) of the Surface Mining Control and Reclamation Act and 30 CFR 903.764.13(b)(1)(v). Based on the review, OSMRE notified the petitioners on November 18, 1988 that the petition was being returned because the petition allegations lacked serious merit since they presumed inadequate or no regulation of surface coal mining operations pursuant to the North Carolina Federal Program.

On November 19, 1987, OSMRE published in the **Federal Register** (52 FR 44499) a notice of intent to prepare an EIS, and further stated that should information or analysis show that the proposed action did not require an EIS, OSMRE would terminate the EIS preparation through an appropriate notice in the **Federal Register**.

Since the Deep River Basin lands unsuitable for mining petition process has been concluded, OSMRE is terminating the preparation of an EIS.

**FOR FURTHER INFORMATION CONTACT:** Bruce Klein, Office of Surface Mining Reclamation and Enforcement, 530 Gay Street SW., Suite 500, Knoxville, Tennessee 37902; Telephone: (615) 673-4330.

**Brent Wahlquist,**

## DEPARTMENT OF JUSTICE

### Lodging of Three Consent Decrees Regarding the Recovery of Response Costs Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Department Policy, 28 CFR 50.7, 38 F.R. 19029, notice is hereby given that three proposed Consent Decrees in *United States* v. *bourdeaudhui*, Civ. Action No. H-88-354, were lodged with the United States District Court for the District of Connecticut on February 16, 1989.The proposed Decrees, if entered, will resolve the liability of three of the seven defendants in this action pursuant to section 107(a) of the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. 9607(a), as amended by the Superfund Amendments and Reauthorization Act of 1986 ("CERCLA"), for more than $710,000 in response costs incurred by EPA during the removal of mercury-contaminated soil at two sites in Wilfington, Connecticut. The Decrees propose settlements with the following defendants for the following amounts: Mrs. Elsie Bourdeaudhui, $40,000; Benco Dental Supply Co., $60,000; A. Leventhal & Sons, Inc., $59,000.

The Department of Justice will receive for a period of thirty (30) days from the date of publication of this notice, written comments relating to the proposed Decrees. Comments should be addressed to the Acting Assistant Attorney General, Land and Natural Resources Division, United States Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Bourdeaudhui*, D.J. Ref. No. 90-11-2-362.

The proposed Decrees may be examined at the office of the United States Attorney, Federal Building, Room 250, 450 Main Street, Hartford, Connecticut 06103; at the Region I office of the United States Environmental Protection Agency, John F. Kennedy Federal Building, Room 2203, Boston, Massachusetts 02203; and at the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Decrees may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, at the above address. In requesting a copy, please enclose a check in the amount of $3.60, payable to the Treasurer of the United States, to cover the costs of reproduction.

BILLING CODE 4410-01-M

### Lodging of Settlement Agreement Pursuant to Clean Water Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on February 8, 1989, a proposed consent decree in *United States* v. *City of Hindman, Kentucky, et al.*, Civil Action No. 89-38, was lodged with the United States District Court for the Eastern District of Kentucky. The complaint filed by the United States alleged violations of the Clean Water Act, and the National Pollutant Discharge Elimination System permit issued to defendant Hindman pursuant to the Clean Water Act. The consent decree requires defendant to pay a civil penalty of $2,500. The consent decree also requires Hindman to follow a schedule for construction and other activities designed to bring Hindman into full compliance with the Clean Water Act and its permit by February 1, 1991.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *City of Hindman, Kentucky*, D.J. Ref. No. 90-5-1-1-2928. The proposed consent decree may be examined at the Office of the United States Attorney, Federal Building, 4th Floor, Limestone and Barr Streets, Lexington, Kentucky and at the Region IV Office of the Environmental Protection Agency, 345 Courtland Street, Atlanta, Georgia. A copy of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1714, Tenth and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy please enclose a check in the amount of $1.90 (10 cents per page reproduction costs), payable to the Treasurer of the United States.

## Antitrust Division

### Notice Pursuant To the National Cooperative Research Act of 1984; Deepwater, Aramid Mooring Line Joint Industry Project

Notice is hereby given that, on January 25, 1989, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.*, written notice was filed by Omega Marine Services International, Inc. ("OMSI") simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the project and (2) the nature and objectives of the project. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the project, and its general areas of planned activities, are given below.

The project will comprise three phases. The project participants are:

Amoco Production Company
BP-Exploration
Occidental International Exploration & Production Co.
Exxon Production Research Company
Conoco Inc.
Chevron Corporation
Shell Oil Company
Mobil Research & Development Corporation
National Institute of Standards and Technology on behalf of the Naval Civil Engineering Laboratory and the Minerals Management Service

The purpose of the project is to provide an assessment of deep water mooring technology involving a comparison of steel and aramid-fiber rope as high capacity mooring line. The project will include design and testing of mooring systems for floating production platforms in differing water depths. OMSI will evaluate the mooring lines in terms of performance and cost.

The first phase of the project will involve engineering, design and planning and will include developing designs for the various mooring systems to be tested. Phase one will also include plans for testing the systems in the second and third phases of the project.

Phase two of the project will consist of laboratory testing of aramid rope samples. During this phase, OMSI will build a rope for testing and perform laboratory tests on rope samples for strength and breakage. During this phase, OMSI will also finalize plans for at-sea testing.

The third phase of the project will consist of actual at-sea testing of the aramid rope to evaluate the effectiveness of design and installation plans. Progress reports and the results of each phase of the project will be provided to the firms sponsoring the project.

**Joseph H. Widmar,**

*Director of Operations Antitrust Division.*

### Notice Pursuant to the National Cooperative Research Act of 1984; Petroleum Environmental Research Forum

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* (the "Act"), the Petroleum Environmental Research Forum ("PERF") has filed written notifications on its own behalf and on behalf of the members of PERF simultaneously with the Attorney General and with the Federal Trade Commission disclosing a change in the membership of PERF. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the notifications stated that the membership in PERF of Champlin Petroleum Company and Tenneco Inc. has terminated.

Accordingly, at present the members of PERF are those companies listed below:

Amerada Hess Corporation, 1 Hess Plaza, Woodbridge, New Jersey 07095
Amoco Oil Company, Post Office Box 400, Mail Station H-9, Naperville, Illinois 60566
Ashland Oil Inc., Post Office Box 391, Ashland, Kentucky 41114
Atlantic Richfield Company, 515 South Flower Street, AP 33 Los Angeles, California 90071
Chevron Research Company, Post Office Box 1627, Richmond, California 94802-0627
Conoco Inc., Petroleum R & D, Post Office Box 1267, Ponca City, Oklahoma 74603
Exxon Research and Engineering Company, Route 22 East, Clinton Township, Annadale, New Jersey 08801
Kerr-McGee Corporation, Post Office Box 25861, Oklahoma City, Oklahoma 73125
Koch Refining Company, Post Office Box 64596, St. Paul, Minnesota 55164
Marathon Oil Company, 539 South Main Street, Findlay, Ohio 45840
Mobil Research and Development Corporation, Paulsboro Research Laboratory, Billingsport Road, Paulsboro, New Jersey 08066
Murphy Oil USA, Inc., 200 Peach Street, El Dorado, Arkansas 71730
Occidental Petroleum Corporation, 10889 Wilshire Blvd., Suite 1500, Los Angeles, California 90024
Pennzoil Company, Pennzoil Place, Post Office Box 2967, Houston, Texas 77252-2967
Phillips Petroleum Company, 466 Frank Phillips Building, Bartlesville, Oklahoma 74004
Shell Development Company, Post Office Box 1380, Houston, Texas 77251-1380
Standard Oil Company of Ohio, 4440 Warrensville Center Road, Cleveland, Ohio 44128
Sun Company, Inc., Sun Refining and Marketing Company, Post Office Box 1135, Marcus Hook, Pennsylvania 19061-0835
Texaco Refining & Marketing Inc., Post Arthur Research Laboratories, Post Office Box 1608, Port Arthur, Texas 77641
Union Oil Company of California, 376 South Valencia Avenue, Post Office Box 76, Brea, California 92621

On Feburary 10, 1986, PERF filed its original notification on its own behalf and on behalf of the members of PERF pursuant to section 3(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on March 14, 1986 (51 FR 8903). On May 6, 1986, May 27, 1986 and June 23, 1986, PERF filed additional written notifications. The Department published notices in the **Federal Register** in response to these additional notifications on June 9, 1986 (51 FR 20897), June 19, 1986 (51 FR 22365), and July 17, 1986 (51 FR 25957), respectively.

### Notice Pursuant to the National Cooperative Research Act of 1984; the Importance of Lubricating Oil in Diesel Particulate Emissions Southwest Research Institute

Notice is hereby given that, on February 2, 1989, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), Southwest Research Institute ("SwRI") filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing the addition of a party to its group project regarding "The Importance of Lubricating Oil in Diesel Particulate Emissions." The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the SwRI advised that Royal Lubricants Company, Inc. has become a party to the group research project.

No other changes have been made in either the membership or planned activity of the group research project.

On August 21, 1987, SwRI filed its original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the **Federal Register** pursuant to section 6(b) of the Act on September 18, 1987, 52 FR 35335. On December 22, 1987, May 20, 1988, August 16, 1988, and October 3, 1988, SwRI filed additional written notifications. The Department published notices in the **Federal Register**

VOL 54 ISS 39 MR 1 1989 UMI

in response to these additional notifications on January 19, 1988 (53 FR 1418), June 23, 1988 (53 FR 23704), September 15, 1988 (53 FR 35936), and October 27, 1988 (53 FR 43483) respectively.

**Notice Pursuant to the National Cooperative Research Act of 1984; Cable Television Laboratories, Inc.**

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("The Act"), Cable Television Laboratories, Inc. ("CableLabs") has filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission on February 3, 1989, disclosing additions to its membership. The additional written notification was filed for the purpose of extending the protections of section 4 of the Act, which limit the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On August 8, 1988, CableLabs filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on September 7, 1988 (53 FR 34593). On November 7, 1988, CableLabs filed a notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) on December 16, 1988 (53 FR 50590).

The identities of the new members of CableLabs are set forth below:

Cablevision Systems Corporation, One Media Crossways, Woodbury, NY 11797
Rogers Cable TV Limited, Commercial Union Tower, P.O. Box 249, Toronto, Canada M5K1J5
Vision Cable Communications, Inc., 270 Sylovan Avenue, Englewood Cliffs, NJ 07632
Cablevision Industries, Inc., P.O. Box 311, Liberty, NY 12754
The Cable Company, 1350 North 200 West, P.O. Box 486, Logan, Utah 84321
Metrovision, Inc., 211 Perimeter Center Parkway, Suite 930, Atlanta, GA 30346
New Channels Corporation, P.O. Box 4872, 112 Northern Concourse, Syracuse, NY 13221.

No other changes have been made in either the membership or planned activity of CableLabs. The membership remains open.

**Notice Pursuant to the National Cooperative Research Act of 1984; UNIX International, Inc.**

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), UNIX International, Inc. has filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the venture and (2) the nature and objectives of the venture. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the venture and its general areas of planned activities, are given below.

The members of UNIX International, Inc. are:

Addamax Corporation
Alcatel-SMH
Altos Computer Systems
Amdahl Corporation
American Telephone & Telegraph Company
Arix Corporation
Computer Consoles
Control Data Corporation
Convergent Technologies
Data General Corporation
Floating Point Systems
Fuji Xerox
Fujitsu, Ltd.
Gould Corporation
HCR Corporation
Hitachi, Ltd.
Intel Corporation
Interactive Systems Corporation
International Computer Limited
Lachman Associates
Motorola
NCR Corporation
NEC Corporation
Nippon Telephone & Telegraph
Nokia, Inc.
OKI Electric
Olivetti & Company
Oracle Corporation
Prime Computer
Pyramid Technology
Relational Technology, Inc.
Ricoh Company, Ltd.
SAS Institute, Inc.,
Siemens
Stratus Computer, Inc.
Sun Microsystems, Inc.
System House Ltd.
T. L M Ericsson
Tolerant Systems, Inc.
Toshiba Corporation
Unisoft
UNISYS Corporation
Ventom Com., Inc.
88open

UNIX International plans to engage in research and development related to the improvement of the UNIX operating system, and to promote and encourage the availability of a variety of "open" and compatible UNIX based products and systems which meet the many and varied needs of the end users of those systems.

BILLING CODE 4410-01-M

## Drug Enforcement Administration

**Sajjan Gangappa Chikkannaiah, M.D.; Order to Show Cause/Immediate Suspension of Registration**

The following is an Order to Show Cause and Immediate Suspension of Registration proposing to revoke DEA Certificate of Registration AC7647019, previously issued to Sajjan Gangappa Chikkannaiah, M.D. On November 21, 1988, DEA Investigators went to Dr. Chikkannaiah's office and then to his residence to serve the Order. He was not at either location. Dr. Chikkannaiah's family and office staff were unable to provide any information as to his whereabouts. DEA Investigators returned to Dr. Chikkannaiah's residence on January 9, 1989. His wife was unable to provide any information. Since Dr. Chikkannaiah cannot be located, notice of DEA's proposed action is being given through publication in the **Federal Register.**

Date: February 23, 1989.

**John C. Lawn,**

*Administrator.*

February 23, 1989.

In the Matter of Sajjan Gangappa Chikkannaiah, M.D., 300 Francis Street, Goodlettsville, Tennessee 37072.

**Order to Show Cause; Immediate Suspension of Registration**

Pursuant to sections 303 and 304 of the Controlled Substances Act, Title 21, United States Code, Sections 823 and 824,

Notice is hereby given to afford you an opportunity to Show Cause before the Drug Enforcement Administration, at a place and time to be determined as to why the Drug Enforcement Administration should not revoke your DEA Certificate of Registration, AC7647019, and deny any pending applications for renewal of such registration as a practitioner under 21 U.S.C. 823(f), for reason that:

1. On November 12, 1988, the Tennessee Board of Medical Examiners summarily suspended your license to practice medicine after reviewing numerous documents, the results of two separate drug audits, reports from various hospitals, the findings of investigators and the testimony of witnesses, including an expert consultant in pharmacology. Consequently, you are not currently authorized to handle controlled substances in the State of Tennessee.

2. Your continued registration is inconsistent with the public interest, as that term is used in 21 U.S.C. 823(f) and 824(a)(4), as evidenced by, but not limited to, the following:

a. You prescribed controlled substances to individuals for no legitimate medical purpose and outside the scope of professional practice.

b. You prescribed inappropriate and/or dangerous combinations of controlled substances to individuals. Further, you prescribed controlled substances to individuals even though you knew, or should have known, that these individuals had drug or alcohol abuse problems.

c. Although you were previously charged by the State of Tennessee with overprescribing, your abusive and indiscriminate prescribing practices not only continued but worsened.

d. As a result of your prescribing practices, numerous pharmacies in the Nashville area have refused to fill your prescriptions and all of the Nashville-area hospitals at which you previously had privileges have suspended or revoked your hospital privileges.

In view of the foregoing, and pursuant to 21 U.S.C. 824(d), it is my preliminary finding that your repeated and dangerous prescribing of controlled substances will not be abated by the pendency of this action. Accordingly, it is my preliminary conclusion that your continued registration during the pendency of these proceedings would constitute an imminent danger to the public health and safety. Therefore, pursuant to the provisions of 21 U.S.C. 824(d), and the authority delegated to me under 28 CFR 0.100, DEA Certificate of Registration AC7647019 is hereby suspended, effective immediately, such suspension to remain in effect until a final determination is reached in these proceedings.

Pursuant to 21 U.S.C. 824(f) and 21 CFR 1301.46, the Special Agents and Diversion Investigators of the Drug Enforcement Administration who serve this Order to Show Cause are authorized to place under seal and to remove for safekeeping all controlled substances which you possess pursuant to the registration which I have herein suspended. The said Agents and Investigators are also directed to take into their possession the suspended Certificate of Registration and any unused DEA order forms issued thereunder.

The following procedures are available to you in this matter:

1. Within thirty days after the date on which you receive this Order to Show Cause, you may file with the Administrator of the Drug Enforcement Administration a written request for a hearing in the form set forth in 21 CFR 1316.47. You may request that the Administrator fix a date for such hearing as early as reasonably possible and the Administrator will grant such a request as set forth in 21 CFR 1301.46(c). (See 21 CFR 1301.54(a) and 1301.54(b)).

2. Within thirty days after the date on which you receive this Order to Show Cause, you may file with the Administrator a written waiver of hearing together with a written statement of your position on the matters of fact and law involved herein. (See 21 CFR 1301.54(c)).

3. Should you decline to file a request for a hearing, or should you so file and fail to appear at the hearing, you shall be deemed to have waived your opportunity for a hearing. The Administrator may cancel the hearing, if scheduled, and issue his final order based on the record as it appears, pursuant to 21 CFR 1301.57. (See 21 CFR 1301.54(d) and 1301.54(e)).

Correspondence concerning this matter should be directed to the attention of the Hearing Clerk, Office of the Administrative Law Judge, Drug Enforcement Administration, 1405 I Street, N.W., Washington, D.C. 20537.

**John C. Lawn,**

*Administrator.*

BILLING CODE 4410-09-M

## LIBRARY OF CONGRESS

### Copyright Office

**Implementation of the Satellite Home Viewer Act of 1988; Statements of Account Public Meeting**

**AGENCY:** Copyright Office, Library of Congress.

**ACTION:** Notice of public meeting.

**SUMMARY:** This notice is issued to inform the public that the Copyright Office of the Library of Congress is preparing a new statement of account form which will be filed semiannually by satellite carriers who make secondary transmissions of "superstation" and network signals to satellite "dish" owners for private home viewing pursuant to section 119 of the Copyright Act, as amended by the Satellite Home Viewer Act of 1988, Pub. L. 100-667. This notice invites participation in a public meeting intended to elicit comments, views, and information which will assist the Office in this review of statement of account procedures. This is to be an informal meeting for exchange of opinions and information among interested parties. Written comments are welcome, but are not required.

**DATE:** The meeting will be held on March 14, 1989 in Washington, DC. Participants need not notify the Office of their plans to attend.

**ADDRESSES:** Meeting location: The meeting will be held on march 14, 1989 in the conference room of the Copyright Office, LM-407 (Green Quadrant) of the James Madison Memorial Building, Library of Congress, First and Independence Ave, SE., Washington, DC, begining at 10:00 a.m.

**FOR FURTHER INFORMATION CONTACT:** Dorothy Schrader, General Counsel, Copyright Office, Library of Congress, Washington, DC 20559, (202) 707-8380.

**SUPPLEMENTARY INFORMATION:** The Satellite Home Viewer Act of 1988, Pub. L. 100-667, 102 Stat. 3949 (November 16, 1988) added a new section 119 to the Copyright Act of 1976, effective January 1, 1989. For a six-year period, the law establishes a statutory license for certain secondary transmissions made by satellite carriers to satellite "dish" owners for private home viewing. The license is subject to various conditions, including the requirements that satellite carriers making secondary transmissions of "superstations" and network signals to "dish" owners file statements of account semi-annually and pay statutory royalty fees in accordance with section 119. The statutory royalty fee will sunset in four years, and will be replaced by privately negotiated licenses or an arbitrated fee established on or before December 31, 1992. The entire Act itself terminates on December 31, 1994.

In accordance with the new section 119, the Copyright Office will maintain three types of public files, including: (1) The Network Name and Address File, (2) the Satellite Carrier Voluntary Agreements File, and (3) the Satellite Carrier Statements of Account File. The

VOL 54 ISS 39 MR 1 1989 UMI

new statement of account form has been created and is available upon request to those who wish to attend the public meeting. The Copyright Office solicits comments from interested participants as the meeting on the clarity of the form or lack thereof, and suggestions for changes and improvements in the form.

Accordingly, the Copyright Office will hold a public meeting on March 14, 1989, for the purpose of eliciting comment on the statement of account form. Advance copies of the draft statement of account form may be obtained by calling the Office of Copyright General Counsel, (202) 707–8380.

Dated: February 25, 1989.

Dorothy Schrader,

*Associate Register of Copyrights for Legal Affairs.*

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (89-13)]

### Aerospace Safety Advisory Panel; Meeting.

**AGENCY:** National Aeronautics and Space Administration.

**ACTION:** Notice of meeting.

**SUMMARY:** In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the Aerospace Safety Advisory Panel.

**DATE AND TIME:** March 20, 1989, 2 p.m. to 3:30 p.m.

**ADDRESS:** National Aeronautics and Space Administration, 400 Maryland Avenue, SW, Room 7002, Washington, DC 20546.

**FOR FURTHER INFORMATION CONTACT:** Mr. Gilbert L. Roth, Code Q–1, National Aeronautics and Space Administration, Washington, DC 20546 (202/453–8071).

**SUPPLEMENTARY INFORMATION:** The Aerospace Safety Advisory Panel will present its annual report to the NASA Administrator and Deputy Administrator. This is pursuant to carrying out its statutory duties for which the Panel reviews, identifies, evaluates, and advises on those program activities, systems, procedures, and management activities that can contribute to program risk. Priority is given to those programs that involve the safety of manned flight. The major subjects covered will be the National Space Transportation System, Space Station, and Aeronautical Operations. The Aerospace Safety Advisory Panel is chaired by Joseph F. Sutter and composed of 8 members and 5 consultants. The meeting will be open to the public up to the capacity of the room (approximately 50 persons including members of the Panel).

*Type of Meeting:* Open.

*Agenda:* Monday, March 20, 1989.

2 p.m.—Presentation of findings and recommendations of the Aerospace Safety Advisory Panel.

3:30 p.m.—Adjourn.

February 23, 1989.

Ann Bradley,

*Advisory Committee Management Officer, National Aeronautics and Space Administration.*

## NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

### Agency Information Collection Under OMB Review

**AGENCY:** National Endowment for the Humanities.

**ACTION:** Notice.

**SUMMARY:** The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

**DATE:** Comments on this information collection must be submitted on or before March 31, 1989.

**ADDRESSES:** Send comments to Ms. Ingrid Foreman, Management Assistant, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202–786–0233) and Mr. Jim Houser, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3208, Washington, DC 20503 (202–395–7316).

**FOR FURTHER INFORMATION CONTACT:** Ms. Ingrid Foreman, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202) 786–0233 from whom copies of forms and supporting documents are available.

**SUPPLEMENTARY INFORMATION:** All of the entries are grouped into new forms, revisions, or extensions. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what form will be used for; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to fill out the form. None of these entries are subject to 44 U.S.C. 3504(h).

**Category:** Revisions

*Title:* Application Instructions and Forms for the Tools Category.

*Form Number:* Not applicable.

*Frequency of Collection:* Annual.

*Respondents:* Humanities researchers and institutions.

*Use:* Application for funding.

*Estimated Number of Respondents:* 139 per year.

*Frequency of Response:* Once.

*Estimated Hours for Respondents to Provide Information:* 52 per respondent.

*Estimated Total Annual Reporting and Recording Burden:* 16,528.

Susan Metts,

*Assistant Chairman for Administration.*

BILLING CODE 7536-01-M

## NUCLEAR REGULATORY COMMISSION

[Docket No. 70-1359; License No. SNM-1405]

### Finding of No Significant Impact; Renewal of Special Nuclear Material License for IRT Corp., San Diego, CA

February 22, 1989.

The U.S. Nuclear Regulatory Commission (the Commission) is considering the renewal of Special Nuclear Material License No. SNM–1405 for the continued operation of the IRT Corporation (IRT) at San Diego, California.

**Environmental Assessment**

*Identification of the Proposed Action:* The proposed action is the renewal of the license which allows IRT to continue to possess and store licensed material.

*The Need for the Proposed Action:* IRT must have a license in order to possess material. If license renewal is denied, IRT would have to transfer or dispose of all licensed material.

*Environmental Impacts of the Proposed Action:* The special nuclear material (SNM) at IRT is stored at the Arjons Facility in a vault-type room. The sources are in a non-dispersable form so there will be no effluents. Only a small amount of radioactive waste (e.g., smear papers) is expected to be generated during storage. Any waste that is produced will be properly stored onsite until it is shipped for disposal.

The principal exposure pathway to an individual is via external radiation. The material is in a locked vault and only two people have authorized access; other personnel do not have access to the sources. Because of the limited activities and IRT's radiation protection procedures, staff concluded that storage activities can be carried out without any significant occupational dose to workers or radiological impact to the environment.

The staff has evaluated the nuclear criticality safety limits and controls for the storage area and found them to be adquate to assure safety for all conditions of water moderation and/or reflection. The design of the storage location, combined with facility procedures, will ensure acceptable protection of the general public and plant personnel under either normal or abnormal conditions.

*Conclusion:* Based upon the information presented above, the environmental impacts associated with license renewal are expected to be insignificant. Essentially no effluents, liquid or airborne, will be released, and acceptable controls will be implemented to prevent a radiological accident. Therefore, staff concludes that there will be no significant impacts associated with the proposed action.

*Agencies and Persons Consulted:* Staff utilized the application dated October 14, 1988, in performing this assessment. No other agencies were contacted.

*Alternatives to the Proposed Action:* Alternatives to the proposed action include complete denial of IRT's renewal application. This action would result in IRT transferring all licensed material to another facility. This alternative would be considered only if issues of public health and safety could not be resolved.

*Finding of No Significant Impact:* The Commission has prepared an Environmental Assessment related to the renewal of Special Nuclear Material License No. SNM–1405. On the basis of this assessment, the Commission has concluded that environmental impacts created by the proposed licensing action would not be significant and do not warrant the preparation of an Environment Impact Statement. Accordingly, it has been determined that a Finding of No Significant Impact is appropriate.

The Environmental Assessment and the October 14, 1988, application related to this proposed action are available for public inspection and copying at the Commission's Public Document Room, Gelman Building, 2120 L Street, NW., Washington, DC. Copies of the Environmental Assessment may be obtained by calling (301) 492–3358 or by writing to the Fuel Cycle Safety Branch, Division of Industrial and Medical Nuclear Safety, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Dated at Rockville, Maryland, this 22nd day of February, 1989.

For the Nuclear Regulatory Commission.

Leland C. Rouse,

*Chief, Fuel Cycle Safety Branch, Division of Industrial and Medical Nuclear Safety, NMSS.*

BILLING CODE 7590-01-M

[Docket Nos. 50-443-OL, 50-444-OL; ASLBP No. 82-471-02-OL (Offsite Emergency Planning)]

### Public Service Co. of New Hampshire, et al., Seabrook Station, Units 1 and 2; Hearing

Before Administrative Judges: Iran W. Smith, Chairman Dr. Richard F. Cole, Dr. Kenneth A. McCollom

February 23, 1989.

Notice is hereby given that the evidentiary hearing in this proceeding will resume at 9:00 a.m., March 21, 1989 at Auditorium (main floor), Thomas P. O'Neill Jr. Federal Building, 10 Causeway Street, Boston, Massachusetts.

The Atomic Safety and Licensing Board will receive evidence concerning the offsite radiological emergency plans for the Seabrook Station, a nuclear power facility located in Seabrook, New Hampshire. In particular, the hearing will address the adequacy of the Seabrook plan for the Massachusetts communities lying within the ten-mile emergency planning zone for the Seabrook Station, and the graded exercise of the Seabrook radiological emergency plans conducted by the Federal Emergecy Management Agency in June 1988.

For the Atomic Safety and Licensing Board.

Ivan W. Smith,

*Chairman, Administrative Law Judge.*

Bethesda, Maryland.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-26560; File No. SR-NASD-89-6]

### Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Shareholder Approval

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 15, 1989, the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD.

The NASD has designated this proposal an interpretation with respect to the enforcement of an existing rule of the NASD which renders the interpretation effective upon the Commission's receipt of this filing. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

**I. Self-Regulatory Organization's Satatement of the Terms of Substance of the Proposed Rule Change**

The proposed rule change defers until March 19, 1989 effectiveness of a rule requiring shareholder approval of the issuance of securities in connection with certain transactions by NASDAQ National Market System issuers.[1]

**II. Self-Regulatory Organization's Statement of the Purpose of, And Statuory Basis for, the Proposed Rule Change**

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

The purpose of the delay of effectiveness of the shareholder approval requirements contained in new

[1] *See* Securities Exchange Act Release No. 26433 (January 9, 1989); 54 FR 1403 (January 13, 1989).

BEST COPY AVAILABLE

VOL 54 ISS 39 MR 1 1989 UMI

paragraph (j) of Part III, section 5 of Schedule D to the NASD By-Laws is to allow NASDAQ/NMS issuers who will be affected by the rule, sufficient notice of the requirement to permit compliance with the rule. During the time when the rule was pending Commission approval and subsequent to publication of the approval order in the Federal Register, the NASD received a number of inquiries from issuers and their representatives which raised concerns relating to the degree of issuer awareness of the pendency of the rule change. The NASD has therefore determined that it is appropriate to provide issuers with a grace period before the rule becomes effective. Transactions in progress as of the effective date will be reviewed by the NASD on a case-by-case basis.

Statutory basis for the proposed rule change is found in section 15A(b)(6) of the Securities Exchange Act of 1934 which provides that the rules of a registered securities association be designed to facilitate transactions in securities and to remove impediments to imperfect the mechanism of a free and open market at a national market system for securities transactions. The NASD believes that a proposed rule change will eliminate potential problems in trading of NASDAQ National Market System securities which could result from imposition of the requirements of the rule without adequate notice to issuers.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

The Association does not anticipate that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purpose of the Act.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others*

Comments were neither solicited nor received with respect to the proposed rule changes contained in this filing.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Act and subparagraph (e) of Rule 19b-4 thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate the rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by March 22, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Dated: February 21, 1989.

**Jonathan G. Katz,**

*Secretary.*

---

**[Rel. No. IC-16831; (812-6908)]**

**EBI Series Trust, et al.; Application**

February 22, 1989.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

*Applicants:* The EBI Flex Fund and EBI International Fund of EBI Series Trust (the "Trust"), EBI Equity, Inc. ("EBI Equity"), EBI Income, Inc. ("EBI Income") and EBI Cash Management, Inc. ("EBI Cash").

*Relevant 1940 Act Sections:* Exemption requested under section 6(c) from the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) and Rule 22c-1 thereunder; approval requested under section 11(a).

*Summary of Application:* Applicants seek an order amending an existing order (Investment Company Act Release No. 16283, February 23, 1988) ("Existing Order") which permits the assessment and waiver of a contingent deferred sales load ("CDSL"), and approves certain exchange privileges. The amended order would increase the time period during which the CDSL may be imposed from 30 months to 60 months and change the formula of the CDSL to reflect the additional 30 months.

**DATES:** The application was filed on August 30, 1988, and amended on December 19, 1988, and February 3 and 17, 1989.

*Hearing or Notification of Hearing:* If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on March 15, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

**ADDRESSES:** Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549; Applicants, Suite 500, 1315 Peachtree Street NE., Atlanta, Georgia 30309.

**FOR FURTHER INFORMATION CONTACT:** Paul J. Heaney, Financial Analyst (202) 272-3420, or Brion R. Thompson, Branch Chief (202) 272-3016 (Office of Investment Company Regulation).

**SUPPLEMENTARY INFORMATION:** The following is a summary of the application; the complete application is available for a fee from the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

**Applicants' Representations**

Each of the Applicants is registered under the 1940 Act as an open-end, diversified management investment company. INVESCO Services, Inc. ("Distributor") serves as principal underwriter for each of the Applicants. The Existing Order, which amended two earlier orders (Investment Company Act Release No. 14916, January 27, 1988 and Investment Company Act Release No. 13788, February 24, 1984) was issued on behalf of Applicants and any additional series or classes of shares Applicants may offer in the future on substantially the same basis as Applicants now (other than EBI Cash) offer their shares.

2. Applicants now request that the Existing Order be amended to increase the time period during which an investor is required to pay a CDSL from 30 months to 60 months and change the formula used to calculate the amount of the CDSL to reflect the additional 30 months. Applicants will continue to apply the terms of the CDSL permitted in the Existing Order for those investors who have, or acquired, shares of Applicants prior to the time that the terms of the proposed modifications of the CDSL are set forth in the current prospectuses of the Applicants and mailed to all then current shareholders of the Applicants. In addition, the proposed modifications of the CDSL would not effect the existing exchange privileges of such shareholders. Existing shareholders of Applicants were not notified by way of Applicants' prospectuses that their exchange privileges were subject to change. To ensure that such shareholders would not be harmed by the proposed modification of the CDSL, Applicants agree as a condition to this application, that existing shareholders who were not on notice of the fact that their exchange privilege was subject to change may continue to exchange their shares under the original terms of such exchange privilege.

3. Each of the Applicants (except EBI Cash) distributes its shares pursuant to separate plans of distribution adopted under Rule 12b-1 under the 1940 Act (collectively, "Rule 12b-1 Plans"). EBI Cash does not presently have a Rule 12b-1 Plan and, thus, shares acquired in EBI Cash are not in and of themselves subject to a CDSL.

4. According to the application, no CDSL is charged on exchanges of shares between the Applicants. However, if shares of any of the Applicants are acquired as a result of an exchange of shares from another of the Applicants and the shares tendered ("Exchanged Shares") are subject to a CDSL such charge will carry over to the shares being acquired ("Acquired Shares"). Any CDSL that is carried over to the Acquired Shares is calculated as if the holder of the Acquired Shares has held those shares from the date in which he or she became the holder of the Exchanged Shares. Acquired Shares held in EBI Cash, however, which are subject to a CDSL will not be credited with the time such shares are held in EBI Cash. Applicants represent that in order to effectuate the proposed modification of the CDSL by any of the Applicants it is necessary for EBI Cash to join in this application for an amendment of the Existing Order so that all of the Applicants may be able to collect such a CDSL on behalf of each other.

5. Applicants will institute internal monitoring procedures to insure that exchanges are made at the request of investors and not for any broker's personal gain. Applicants will actively monitor customer complaints and will continue to be alert to possible abuses that might occur regarding the exchange privileges. The Trustees of the Trust and the Board of Directors of EBI Equity and EBI Income, in their periodic review of the Rule 12b-1 Plans, will consider, among other things, the effect of the CDSL and waivers thereof. The Existing Order covers not only the Applicants, but also any additional series or classes of shares the Applicants may offer in the future on substantially the same basis as the Applicants now (other than EBI Cash) offer their shares. Any subsequently created series or classes of shares, the shares of which are issued and sold with a CDSL, on substantially the same basis as the CDSL applicable to the Applicants will utilize distribution plans under Rule 12b-1 comparable to the Rule 12b-1 Plans described in the application. Such distribution plans will comply with the provisions of Rule 12b-1 as they are now in affect and as they may be revised in the future.

6. Applicants will limit any future offers of exchange of any similar series or classes of shares of Applicants, as the case may be, to the terms and conditions described in the application. Applicants will notify their shareholders by means of Applicants' prospectuses of the fact that Applicants reserve the right to modify or terminate the exchange privilege. Applicants will consider, in connection with sales literature and advertising that refer to the Applicants' exchange privilege, the desirability of disclosing that they reserve the right to modify or terminate the exchange privilege. Applicants will notify shareholders in writing at least 60 days prior to any modifications or termination of Applicants' exchange privilege; provided, however, that the temporary cessation of the sale of Applicants' shares under extraordinary circumstances such as when the Applicants are unable to effectively invest amounts in accordance with applicable investment objectives, policies and restrictions, or the suspension of the redemption of Applicants' shares pursuant to section 22(e) of the 1940 Act and the Rules and Regulations thereunder shall not be considered a modification or termination of the Applicants' exchange privilege. Applicants will obtain an amended order from the SEC prior to any modification (*i.e.*, manner, frequency or basis) of the Applicants' exchange privilege in a manner not described in the application; provided, however, that no amended order would be requested by Applicants if they decide to terminate the Applicants' exchange privilege.

**Applicants' Legal Analysis**

1. Applicants assert that the proposed amendment of the CDSL is fair and in the best interests of their shareholders. Applicants have determined that expenditures incurred on their behalf as a result of investors' purchases would be more adequately and fairly recovered among all shareholders when shares are held continuously for at least 60 months. Accordingly, extending the time during which shareholders cannot redeem shares without incurring a CDSL will result in distribution expenses being more adequately allocated among shareholders on a more equitable basis. Under the proposed amendment to the Existing Order, the burden of reimbursing Applicants for distribution expenses would be placed on a more direct basis on those shareholders with respect to which Applicants (other than EBI Cash) incurred distribution expenses.

2. Applicants assert further that granting the amendment to the Existing Order requested is appropriate and in the public interest, consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

**Applicants' Conditions**

If the requested order is granted, Applicants agree to the following conditions:

1. Applicants will comply with provisions of proposed Rule 6c-10 under the 1940 Act as currently stated and as it is adopted.

2. Applicants will comply with the provisions of Rule 12b-1 under the 1940 Act as they are now in effect and as it may be revised in the future.

3. Applicants will comply with the provisions of Rule 22d-1 under the 1940 Act.

4. Applicants will comply with the provisions of revised proposed Rule 11a-3 under the 1940 Act as it is currently stated and as finally adopted.

5. Applicants agree that the exemptive relief requested does not cover any person, or any affiliated person of such person (or any affiliated person of such affiliated person) who holds Applicants out to the public, or who, directly or indirectly, causes Applicants to be held out to the public as being "No Load" or uses, or who, directly or indirectly, causes the use of terminology that, given the context and presentation, is likely to convey to investors the impression that

VOL 54 ISS 39 MR 1 1989 UMI

no charges for sales or promotional expenses are imposed on shares issued by Applicants.

8. Applicants agree to permit existing shareholders who were not on notice of the fact that the exchange privilege was subject to change to continue to exchange their shares under the original terms of the exchange privilege.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

## First Federalist Fund, Inc.; Application

February 23, 1989.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of Application for an Order under the Investment Company Act of 1940 (the "1940 Act").

---

*Applicant:* First Federalist Fund, Inc.

*Relevant 1940 Act Sections:* Section 8(f) and Rule 8f-1 thereunder.

*Summary of Application:* Applicant seeks an order declaring that it has ceased to be an investment company.

*Filing Date:* The application was filed on November 8, 1988 and amended on February 2, 1989 and February 15, 1989.

*Hearing or Notification of Hearing:* If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on March 14, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

**ADDRESSES:** Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, 2985 Brandywine Street NW., Washington, DC 20008.

**FOR FURTHER INFORMATION CONTACT:** Barbara Chretien-Dar, Staff Attorney, at (202) 272-3022 or Stephanie Monaco, Branch Chief, at (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

**SUPPLEMENTARY INFORMATION:** Following is a summary of the Application; the complete Application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier at (800) 231-3282 (in Maryland (301) 258-4300).

**Applicant's Representations**

1. Applicant, a Delaware corporation and unit investment trust, filed a Notification of Registration on Form N-8A on April 4, 1971 and a Registration Statement on Form N-8B-1 on February 29, 1972 under the 1940 Act.

2. Applicant has been dissolved under Delaware state law. Applicant has never made a public offering of its securities and does not propose to make a public offering or to engage in business of any kind.

3. Applicant has no shareholders, debts or liabilities as of the time of filing the application.

4. Within the last 18 months, Applicant has not transferred any of its assets to a separate trust, the beneficiaries of which are securityholders of Applicant.

5. Applicant is not a party to any litigation or administrative proceeding.

6. Applicant is neither engaged in nor proposes to engage in any business activities other than those necessary for the winding up of its affairs.

For the Commission, by the Division of Investment Management, under delegated authority.

**[Rel. No. 34-26566; File No. SR-PHLX-89-02]**

## Self-Regulatory Organizations; Filing of Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating To the Responsibility to Make Ten-Up Markets

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 2, 1989, the Philadelphia Stock Exchange, Inc. ("PHLX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

**I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

The PHLX, pursuant to Rule 19b-4 of the Act, proposes to amend PHLX Rule 1033 and amend and restate PHLX Options Floor Procedure Advice A-11. The text of the current Advice A-11 is proposed to be withdrawn and replaced with the text that appears below. The text of PHLX Rule 1033 is proposed to be amended as follows (brackets indicate deletions; italics indicates additions):

*Rule 1033(a).* All bids or offers made on the Floor for option contracts shall be deemed to be for one option contract unless a specific number of option contracts is expressed in the bid or offer. A bid or offer for more than one option contract shall be deemed to be for the amount thereof or a smaller number of option contracts. [The Exchange, in its discretion, may require that when a specialist and/or Registered Options Trader ("ROT") is quoting the best bid or offer in certain options series, the specialist or ROT is responsible for ensuring that public orders in such series are filled to a minimum depth of ten contracts. The Exchange, in its discretion, may further require that a specialist or ROT is responsible for executing public orders in certain options series at prices reflecting the maximum quotation spreads for those series even where the specialist or ROT is not quoting the best bid or offer in those series.] *The Exchange, in its discretion, may require that specialists and ROTs be responsible for ensuring that public orders are filled to a minimum depth of ten (10) contracts at the best quoted bid or offer.*

*Rule 1033 (b) through (d) No Change.*

PHLX Options Floor Procedure Advice A-11: Responsibility to Make Ten-Up Markets:

Non-contingent public customer market or marketable limit orders shall be filled at the best market price to a minimum of ten contracts by floor traders (*i.e.*, specialists and ROTs) in the crowd, as follows:

(i) If only one floor trader is quoting the availed upon best bid or offer, that floor trader is responsible for providing a fill at the minimum ten contracts;

(ii) If more than one floor trader is quoting the availed upon best bid or offer, and their combined quote size is less than ten contracts, participation for the additional contracts needed to meet the minimum ten contract requirement shall be decided upon by agreement of those floor traders or otherwise divided proportionately amongst them;

(iii) If the availed upon best bid or offer is made by someone other than a floor trader and is not for at least ten contracts, participation for the additional contracts needed to meet the minimum ten contract requirement shall be by the floor trader at the next best bid or offer (whichever the case). If more than one floor trader is quoting the next best bid or offer, participation for the additional contracts shall be decided upon agreement by those floor traders or otherwise divided proportionately amongst them.

Under exceptional circumstances or for good cause shown, exemptions from the ten-up requirement may be granted for a trade day in any option or group of options by two floor officials. Any such exemption shall be in writing and shall set forth the basis upon which the exemption is granted.

*Advice A-11 Fine Schedule*

1st Occurrence: Warning
2nd Occurrence: $50.00
3rd Occurrence: $100.00
4th Occurrence and Thereafter: Sanction is discretionary with the Business Conduct Committee

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the proposed Rule Change**

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

The responsibility to make ten-up markets means that a specialist or ROT must ensure that public customer orders are filled to a minimum of ten contracts. This requirement is intended to facilitate a more liquid market and to benefit public customers by assuring a minimum size of orders for which they can receive executions. Previously, the Commission approved SR-PHLX-87-09 which first imposed a requirement on specialists and ROTs to make ten-up markets under certain circumstances.[1] Under the current Rules, the responsibility to make ten-up markets is limited in that it applies only (1) to the nearest expiring options that are at, just in and just out-of-the-money, and (2) when the specialist or ROT is quoting the best bid or offer for his or her own account. These limitations have resulted in confusion among PHLX members about when and to which option series Advice A-11 applies. Also, the Advise is incomplete in that it does not assure a ten-up commitment if the best bid or offer is made by a public customer.

While the ten-up requirement has certainly benefitted public customers and fostered enhanced competition in PHLX's option markets due to the aforementioned limitations of the Rule, such benefits have not been fully realized. Accordingly, the PHLX proposes to expand the reach of PHLX Rule 1033 and Advice A-11 to every option series traded at the PHLX, regardless of expiration month or strike price. Also, it is proposed that if the best bid or offer is by a floor trader(s) (*i.e.*, specialist or ROT), then he (they) is (are) responsible for assuring a minimum ten contract execution; and, if the best bid or offer is made by one other than a floor trader for less than ten contracts, then the floor trader(s) at the next best bid or offer must ensure the balance of the ten contract minimum at the best bid or offer. In this regard, if the balance must be filled by several floor traders, it shall be done so as agreed upon by them or otherwise be divided propertionately. In all other respects, including the fine schedule for assessed violations, Advice A-11 is substantively unchanged.

The effect of this proposed rule change would be a rule that is easier to enforce and understand, and that fulfills the purposes delineated above. Particularly, the markets in the out-of-the-money and further out term option series would become significantly more liquid. For these reasons, this rule change has been proposed.

The PHLX believes that the proposed rule change is consistent with section 6(b)(5) of the Act in that it will promote just and equitable principles of trade, protect investors, and promote the public interest by assuring a minimum ten contract execution of public customer orders. Additionally, the PHLX believes that the proposal is consistent with section 11A(a)(1)(C)(ii) and (iv) of the Act in that it will promote "fair competition among brokers and dealers" and "the practicability of brokers executing investors' orders in the best market."

*B. Self-Regulatory Organization's Statement on Burden on Competition*

The PHLX does not believe that the proposed rule change will impose any inappropriate burden on competition.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were either solicited or received.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Station, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by March 22, 1989.

## SMALL BUSINESS ADMINISTRATION

### Region IX Advisory Council; Public Meeting

The U.S. Small Business Administration, Region IX Advisory Council, located in the geographical area of Honolulu will hold a public meeting at 9:30 a.m. on Thursday, February 23, 1989, at the Prince Kuhio Federal Building, 300 Ala Moana Boulevard, Conference Room 4113A, Honolulu, Hawaii 96850, to discuss such matters as may be presented by members, staff of the U.S. Small Business Administration, or others present.

For further information, write or call Charles T.C. Lum, District Director, U.S. Small Business Administration, 300 Ala Moana Boulevard, Room 2213, Honolulu, Hawaii 96850, 808/541-2990.

February 15, 1989.

Jeannette M. Faull,
*Acting Director, Office of Advisory Councils.*

[FR Doc. 89-4728 Filed 2-28-89; 8:45 am]
BILLING CODE 8025-01-M

### Region VI; Regional Executive Board, Public Meeting

The U.S. Small Business Administration, Region VI Regional Executive Board, will hold a public meeting beginning at 9:00 a.m. on Friday, March 17, 1989, at the World Trade Center, #2 Canal Street, New Orleans, Louisiana 70130, 504/529-1701, to discuss such matters as may be presented by members, staff of the Small Business Administraiton and others present.

For further information, write or call Joseph Pena, Regional Administrator, U.S. Small Business Administration, 8625 King George Drive, Bldg. C, Dallas, Texas 75235-3391, 214/767-7611.

February 16, 1989.

Jeannette M. Faull,
*Acting Director, Office of Advisory Councils.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

[Summary Notice No. PE-89-7]

### Petition for Exemption; Summary and Disposition

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of petitions for exemption received and of dispositions of prior petitions.

**SUMMARY:** Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

**DATE:** Comments on petitions received must identify the petition docket number involved and must be received on or before: March 21, 1989.

**ADDRESS:** Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Petition Docket No. _____, 800 Independence Avenue SW., Washington, DC 20591.

**FOR FURTHER INFORMATION:** The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267-3132.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on January 21, 1989.

Denise Donohue Hall,
*Manager, Program Management Staff, Office of the Chief Counsel.*

### Petitions for Exemption

*Docket No.:* 25739.
*Petitioner:* Ms. Dorothy Blevins.
*Regulations Affected:* 14 CFR 141.35(e).
*Description of Relief Sought:* To allow petitioner to be designated as a chief instructor for a ground school course without having served for 1 year as an instructor in a certificated pilot school.

*Docket No.:* 25762.
*Petitioner:* General Electric Company.
*Sections of the FAR Affected:* 14 CFR 21.325.
*Description of Relief Sought:* To allow petitioner to use an alternate method to certify the airworthiness of Class III export products.

*Docket No.:* 24427.
*Petitioner:* United States Ultralight Foundation.
*Regulations Affected:* 14 CFR 103.1 (a), (b), and (e)(1).
*Description of Relief Sought/ Disposition:* To extend Exemption No. 4274, as amended, that allows individuals authorized by the petitioner to operate a two-place powered ultralight vehicle of not more than 350 pounds empty weight for the purpose of flight instruction. Exemption No. 4274, as amended, expires on February 28, 1989.
*GRANT, February 10, 1989, Exemption No. 4274B.*

*Docket No.:* 24515.
*Petitioner:* United Airlines, Inc.
*Sections of the FAR Affected:* 14 CFR 121.434(c)(1)(iii).
*Description of Relief Sought/ Disposition:* To allow petitioner to substitute an FAA-designated pilot examiner to complete the observation of an initial operating experience (IOE) flight leg, including takeoff and landing. This substitution would occur *only* when the FAA is unable to schedule one of its own inspectors during IOE.
*DENIAL, February 10, 1989, Exemption No. 5017.*

*Docket No.:* 25643.
*Petitioner:* North American Airline Training Group.
*Sections of the FAR Affected:* Section 63.37(a) and Part 63, Appendix C, paragraphs (a)(3)(i) and (iv)(*a*) and (iv)(*b*).
*Description of Relief Sought/ Disposition:* To allow petitioner to utilize Boeing 727 training vehicle No. 3/023 /24 in its FAA-approved Flight Engineer Training Program.
*DENIAL, February 15, 1989, Exemption No. 5018.*

*Docket No.:* 25794.
*Petitioner:* Mr. Fumio Niwa.
*Sections of the FAR Affected:* 14 CFR 61.3(b), 91.27 (a) and (b), and 91.43(b).
*Description of Relief Sought/ Disposition:* To allow petitioner to enter U.S. airspace and land in the United States after attempting a transpacific solo balloon flight in a helium filled balloon carrying a pressurized gondola.
*GRANT, February 13, 1989, Exemption No. 5016.*

*Docket No.:* 25731.
*Petitioner:* The Experimental Aircraft Association and the Confederate Air Force.
*Sections of the FAR Affected:* 14 CFR Part 45.
*Description of Relief Sought/ Disposition:* To allow aircraft owned and operated by petitioners to operate with 2-inch markings located on the sides of the fuselage under the Horizontal stabilizer or on the sides of the vertical tail surfaces, instead of as is presently provided under §§ 45.25 and 45.29.
*GRANT, February 16, 1989, Exemption No. 5019.*

[FR Doc. 89-4669 Filed 2-28-89; 8:45 am]
BILLING CODE 4910-13-M

### Airway Science Grants; Solicitation for Proposals

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Notice of solicitation for airway science grant proposals.

**SUMMARY:** The Federal Aviation Administration (FAA) is authorized by Pub. L. 100-457 to solicit competitive proposals for Airway Science (AWS) grants from accredited 4-year public or nonprofit private colleges and universities with recognized FAA AWS Curriculum programs. The FAA expects to award most, if not all, of an available $1,000,000 in the form of grants, to a small, select number of these institutions of higher learning. Awards typically will range from $75,000 to $200,000 maximum.

The grant awards are available for the purchase, lease with intent to purchase, or construction of academic buildings and associated facilities to be used in conjunction with an FAA recognized AWS curriculum. In no event shall the total Federal share of any AWS construction project exceed 50% of the cost of the project. In addition, funds may be used for nonexpendable instructional materials or instructional equipment to be used in the actual teaching of the AWS curriculum. No Federal grant funds are to be used for salaries, operating expenses, research and development, travel, consultant fees, indirect costs, office supplies, automobiles, aircraft, maintenance agreements, printing costs, promotional and marketing materials or equipment, general purpose parking lots, land, commercial airport facilities, taxiways, runways, or any project in support of a commercial activity.

**FOR FURTHER INFORMATION:** Virginia Hancock Krohn, Airway Science Grant Manager, Federal Aviation Administration, Office of Training and Higher Education, AHT-30, 400 7th Street SW., NW Plaza, Room PL-100, Washington, DC 20590, telephone: (202) 267-8003.

**DATE:** Closing Deadline: The original and five copies of the Proposal from an interested institution must be received by the FAA by either mail or hand delivery, no later than June 16, 1989 (4:30 p.m. EST).

*Proposals Submitted by Mail:* A proposal submitted by mail must be addressed to: Federal Aviation Administration, Virginia Hancock Krohn, Manager, AWS Grant Program, Office of Training and Higher Education, AHT-30, NW Plaza, Room PL-100, 400 7th Street SW., Washington, DC 20590.

Applicants are encouraged to use registered or, at least, first class mail. Any grant application received after the closing date of June 16, 1989, 4:30 p.m. EST will be treated as a late application and not considered for award of a grant. Each late applicant will be notified if its application was received late.

*Proposals Submitted By Hand Carried Messengers:* A proposal that is hand delivered must be taken to the Federal Aviation Administration at the address listed above. The office of the Manager, AWS Grant program, will accept hand delivered proposals between the hours of 8:30 a.m. and 4:30 p.m. (EST), daily, except Saturdays, Sundays, and Federal holidays. A proposal that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

No supplemental materials received after the application deadline date will be considered unless such material is specifically solicited by the Manager, AWS Grant Program. Questions regarding grant management requirements should be referred to the program manager.

#### Background

The FAA is engaged in a comprehensive program to modernize the Nation's airway system to meet the challenge of aviation growth in the coming decades. The modernization program is reflected in the agency's National Airspace System plan which takes advantage of current technological advances to increase the capacity and efficiency of the Nation's airspace system while reducing relative costs to the Nation's taxpayers.

The FAA recognizes the increasing complexity of technical and managerial skills that will be needed to accommodate the technological advances in equipment, systems and configurations being planned and implemented in the aviation industry. The FAA decision to sponsor an AWS curriculum was a direct result of an FAA assessment of the human resources needed to realize the full benefits of the forthcoming airspace and airway system modernization.

Beginning in 1982, in collaboration with the University Aviation Association, the FAA developed and recommended a specific college-level AWS curriculum. The AWS curriculum was designed to satisfy university academic and accreditation requirements, be easily adaptable to existing aviation-related programs, and yet allow individual educational institutions the option of offering any number of the five areas of concentration according to their individual resources. (48 FR 32490, July 15, 1983).

The five areas of concentration are: (1) airway science management, (2) airway computer science, (3) aircraft systems management, and (4) airway electronics systems, and (5) aviation maintenance management. Graduates of educational institutions offering FAA recognized AWS programs are eligible for recruitment by the FAA in one of four agency career fields: Air traffic control, electronics technology, aviation safety inspection (general aviation operations and maintenance), and computer sciences.

The FAA has recognized 32 institutions with one or more airway science areas of concentration. Their curricula directly support FAA's human resource needs by producing graduates with the necessary knowledge and skills to pursue aviation-related technical careers in the public and private sectors.

#### References

Those parties interested in the FAA's previous AWS activities may refer to the following **Federal Register** Notices: 48 FR 116872, March 18, 1983, (FAA proposed AWS curriculum demonstration project plan); 48 FR 32490, July 15, 1983, (Office of Personnel Management approval of the FAA demonstration project final plan); 49 FR 22903, June 1, 1984; 50 FR 37812, September 16, 1985; and 52 FR 3195, February 2, 1987; (notices announcing the competitive criteria employed by the FAA in selecting the AWS grant recipients under the previous 3 solicitations).

VOL 54 ISS 39 MR 1 1989 UMI

**The Airway Science Grant**

*Authority*

This solicitation represents a continuation of the FAA's AWS Grant Program. This program funds projects at selected institutions of higher learning which have evidenced a commitment to the agency's AWS curriculum program. The grants are authorized by Pub. L. 100-457. An amount of $1,000,000 is available for grant awards for the purchase, lease with intent to purchase, or construction of academic buildings and associated facilities to be used in conjunction with AWS curricula. In addition, funds may be used for nonexpendable instructional materials or instructional equipment to be used in the actual teaching of the AWS curriculum. Monies are not available for salaries, operating expenses, research and development, travel, consultant fees, indirect costs, office supplies, automobiles, aircraft, maintenance agreements, printing costs, promotional and marketing materials or equipment, general purpose parking lots, land, commercial airport facilities, taxiways, runways, or any project in support of commercial activities.

*Eligibility*

Eligible institutions must be accredited 4-year public and non-profit colleges or universities in the United States and its possessions. To be eligible an applicant institution must have an established FAA-recognized AWS curriculum in place and available to students. The curriculum must have been recognized by the Federal Aviation Administrator no later December 31, 1988.

**Proposal Format and Content**

Each AWS grant proposal is subject to the provisions of applicable FAA regulations and OMB Circulars A-21, A-73, A-88, and A-110. Proposals should contain the following information in the order listed.

*1. Cover Sheet*

Near the top of the Cover Sheet, type the title "Airway Science Grant Proposal". The legal name of the proposed grantee institution, its mailing address, and Employer Identification Number, as assigned by the Internal Revenue Service, should be centered on the Cover Sheet. The names, titles, and telephone numbers of the proposed Project Director and of an official authorized to sign for the proposed grantee institution should be typed on the lower left and right corners, respectively, of the Cover Sheet. The Cover Sheet of one Copy of the proposal must bear the original signature and date of each of the above individuals. The signature of the authorized individual signifies institutional endorsement of the proposal, cognizance of the eligibility and limitation requirements, and a commitment to provide the specific support for the proposed activities in the event the grant is made.

*2. Standard Form 424*

Applicants must submit Standard Form 424 (Rev. 4-88), application for Federal Assistance, with the grant proposal. This form may be obtained by writing to the Manager, AWS Grant Program, at the address listed above. *Applications without this form will be disqualified.*

*3. Table of Contents*

A table of contents with page numbers must be included.

*4. Project Summary*

A concise summary of the proposed project, including a statement of the goals and objectives, the plan to achieve these goals and objectives and the long-term benefits of the project to the institutional and national AWS programs is required. The summary should not exceed two (2) double-spaced typewritten pages, and should be written so that individuals in the aviation community can understand the basis for the use of Federal funds to support the proposed project.

*5. Narrative*

The Narrative should be clearly written and not exceed forty (40) double-spaced typewritten pages in length. The Narrative should contain the following:

(a) Introduction

The introduction should present a brief description of the institution including historical background, full-time graduate and undergraduate student enrollment, student body profile, location (rural, urban, etc.), fields of emphasis and degrees awarded.

(b) Background

The Narrative must describe the evolution of the institution's involvement in the AWS Program. Describe how the program relates to other interdisciplinary programs in mathematics, science and engineering, computers sciences, management, and other aviation science programs.

(c) The Existing AWS Program

The Narrative must include a description of the current AWS program. Information must be given on the recognition dates for each area of concentration, number of full-time and part-time faculty, average teaching loads, the total student enrollment in the AWS Program, the number of AWS declared majors by academic year by AWS concentration area, minority and female statistics by AWS concentration, the number of AWS degrees awarded, and projection of student enrollment and expected degrees to be conferred over the next 5 years. Describe institutional plans to attract students to the AWS program including minority and female recruitment activities.

An institution must enclose, with the proposal, a copy of the official course catalog and/or other brochure(s) showing the AWS course offerings to students during the 1988-1989 academic year. *Institutions which do not submit the above information will be disqualified.*

(d) Other Aviation Programs

The Narrative must include a description of current aviation programs other than the AWS program. Discuss how the AWS program interfaces with the other aviation programs. Explain how the grant project will support the goals and objectives of the entire aviation program at the institution. Provide information on the number of faculty, total student enrollment by aviation major including minority and female statistics, number of degrees awarded, projections of student enrollment and expected degrees to be conferred over the next five (5) years. Discuss activities the institution has pursued outside of AWS in support of aviation education at the collegiate level.

(e) Project Plan

A Project Plan in support of an institution's recognized AWS program must be prepared that sets forth the goals and objectives of the proposed grant project and the various activities and tasks necessary to bring the project to a successful conclusion. (An institution may present only one proposed grant project. *Proposals which present alternative projects or modifications to a basic grant project will be disqualified.* The plan must include time schedules for performance with appropriate and realistic milestones relating to the conduct of the project. The Plan should describe the mechanisms that will be used to manage and monitor the progress of the project. Anticipated progress reports, advisory committee meetings and similar events should be described. Discuss the relationship of the proposed grant project to the goals and objectives of the overall AWS program at the institution. Discuss the impact of the project upon the institution's current AWS program including the students, AWS programs at other institutions, the national AWS program, and the FAA.

(f) Institutional Needs in Airway Science

The Narrative must identify and discuss the institution's needs for funds, faculty, facilities, equipment and other resources in terms of the institution's goals and objectives for the AWS program. This should include a realistic long range AWS program plan and activities the institution will pursue to meet the goals and objectives including funding from sources outside of the FAA. The role of the proposed project should be discussed in this context.

(g) Project Personnel

Identify and describe the relevant skills of those individuals who have major AWS program responsibilities. Information should be provided on the number of full-time and part-time faculty, average teaching loads, and the amount of time each person is required to devote to the AWS program must be stated. The role of the AWS Program Director is particularly critical. The proposal must provide information indicating that the director has well-defined responsibilities, sufficient time, and adequate academic and institutional authority and support to effectively manage the program. The AWS grant project director must be identified with a discussion of relevant skills in relation to the proposed project and the time to be devoted to the project.

(h) Evaluation Plan

As part of the Narrative, a project Evaluation Plan must be outlined. The purpose of the Evaluation Plan, when completed at the close of the project, is to permit FAA officials and other educational and aviation specialists to assess whether the objectives of the project have been achieved and the impact of the project upon the AWS program at the institution, other institutions, and to the FAA. The completed Evaluation Plan should give attention to the enhanced skills and subsequent occupational marketability of those AWS students who have benefitted from the project. The Evaluation Plan may be prepared entirely by institutional staff or in collaboration with outside consultants. The results of the completed evaluation are to be included in the Final Report.

The FAA anticipates that FAA representatives will make site visits to each grant institution during the lifetime of the project.

(i) Budget Plan

The proposal must contain a Budget Plan that includes a *detailed itemization* of proposed expenditures according to the following categories:

| Item | Federal dollars | Percent | Non-Federal dollars | Percent |
|---|---|---|---|---|
| (1) Facilities | | | | |
| (2) Equipment | | | | |
| (3) Materials | | | | |
| (4) Travel [1] | | | | |
| (5) Consultant services [1] | | | | |
| (6) Other direct costs [1] | | | | |
| (7) Indirect costs [1] | | | | |

[1] Costs directly related to grant project even though not qualified for Federal funding. FAA grant funds may only be dedicated to categories a, b, and c. Each line item under each of the above categories must show the allocations of expenditures between the FAA grant funds and matching institutional funds and/or equivalent support services. The source of matching funds must be indicated, such as industry, institutional, or private source. Discuss the circumstances under which the funds are allocated to the grant project. In no event shall the total Federal grant funds provided for an AWS construction project exceed 50% of the construction cost of the project. Matching funds include allowable project costs (categories a, b, and c) which are incurred by the institution or the value of in-kind contributions. *Budgets which do not include an itemization of expenditures will be disqualified.* Budgets including construction activities with a general cost per square foot will not be excepted.

(j) Equipment, Facilities, and Materials

The Narrative should present a detailed discussion of the Facilities, Equipment, and Materials for which grant award funds are proposed to be spent as presented in the budget. This must include a description of the item, an explanation of the need for the item, the tentative source of acquisition, and the time table and method (lease to purchase, purchase, or construction) for acquisition. Applicants may submit photographs, architectural drawings, site plans or other visual representations that would aid the reviewing panel in assessing the relative merits of the proposed facilities.

(k) Other Project Costs

The institution must describe the other costs included in the budget and explain how they directly relate to the grant project.

**Reporting Requirements**

Until the proposed project is completed, the FAA requires that each award institution prepare an annual Project Report, not to exceed twenty (20) double-spaced typewritten pages in length. The annual Project Report shall be submitted to the FAA within 90 days of the close of each fiscal year by the award institution. The report should include a summary of project progress, highlights and accomplishments, personnel changes and a status report on expenditures and account balances for each of the line items presented in the proposed Budget Plan.

In addition, a final Project Report shall be prepared and submitted to the FAA within 90 days of the project completion. The final Project should include summaries of project activities, accomplishments and Budget Plan expenditures. The Report must contain the completed Evaluation Plan described above. "Project completion" will be determined by the FAA in terms of the proposed project goals and objectives and will occur after the principal project objectives have been achieved and the awarded funds have been expended.

**Local Review Statement**

The proposal must have attached to it a statement, signed by an appropriate official of the institution, that contains: (a) An endorsement of the proposed project; (b) a description of how the proposed project supports the larger institutional goals and objectives in AWS; and (c) a commitment to provide the institutional resources necessary to meet matching fund obligations; complete the proposed project, maintain the facilities and equipment to an acceptable standard, and continue financial support for the AWS Curriculum Program after the grant funds have been expended.

**Proposal Review**

Proposals will be reviewed, evaluated, and ranked on the basis of merit by a panel of educational and aviation specialists from the public and private sectors, including academia, private industry and/or the Federal government. This input will be used by the FAA in the selection of applicants for award of the grants. The awards typically will range from $75,000 to $200,000 maximum. The FAA does not intend to fund all proposed projects or necessarily all components of a proposal selected for award. The agency expects to distribute most, if not all of the $1,000,000.

**Evaluation Criteria**

The evaluation criteria are designed to enable the reviewing panel and FAA officials to effectively evaluate the relative merit of proposals submitted in response to this solicitation. Each

VOL 54 ISS 39 MR 1 1989 UMI

reviewer will evaluate the proposals based on the following factors listed below and rate each proposal on a 100-point scale.

The evaluation criteria are the following:

(a) *Institutional Impact.* Each proposal will be evaluated to determine the extent to which the applicant institution has demonstrated:

(1) The need for funding of its AWS program in terms of the AWS program goals and objectives;

(2) The role grant funding will play in achieving these goals and objectives;

(3) The impact the grant funding will have upon the existing AWS program;

(4) The consequences to the AWS program if the project is not funded.

(10 points maximum)

(b) *Institutional Commitment.* Each proposal will be evaluated as to the extent of the institution's commitment to the AWS Program in particular and aviation education in general. This includes but is not limited to consideration of the following:

(1) Number and qualifications of dedicated AWS faculty;

(2) Number of recognized AWS curriculum options and the number of enrolled students;

(3) The amount of institutional matching funds provided toward the project;

(4) Efforts to obtain other nonfederal sources of funding in support of the grant project and the long range plan for the AWS program;

(5) Demonstrated continued support and growth of the institution's AWS program.

(6) Activities other than AWS in support of aviation education at the collegiate level.

In addition, the Local Review Statement and level of signature will be considered in determining the overall commitment of the institution to the AWS program.

(15 points maximum)

(c) *Project Plan Quality.* The Project Plan for the proposed AWS project will be evaluated in regard to the following:

(1) The appropriateness of the project in terms of the institution's current AWS program;

(2) The relationship between the goals and objectives of the proposed project and those of the overall AWS program at the institution;

(3) The adequacy of the institutional resources for achieving the goals and objectives of the proposed project;

(4) The effectiveness of the proposed mechanism for the management and coordination of the faculty, administrative, facility, and other institutional resources in achieving the goals and objectives of the proposed project;

(5) Project management mechanisms that provide for the effective administration and technical direction of the project, including the establishment of specific project goals and objectives, time-tables for performance and milestones that permit monitoring of the progress of the project and the measurement of its overall effectiveness;

(6) Adequate institutional budgeting and other fiscal controls that allow for periodic review of resource commitments and determinations that expenditures are in accordance with the Project Plan;

(7) The identification of significant educational, technical and administrative innovations as a result of the grant project that would further the attainment of the institutional and national goals and objectives for the AWS program.

(25 points maximum)

(d) *Budget Plan.* The Budget Plan must sufficiently detail proposed expenditures by budget category and line item and show the allocation between grant funds and institutional funds and/or equivalent support services. The budget figures should be appropriate for the goods and services being procured and consistent with the project narrative presented elsewhere in the Project Plan. (15 points maximum)

(e) *Expected benefits.* The benefits of the proposed project to both the institutional and national programs will be evaluated. The reviewers will consider:

(1) The long-term benefits to the institution, including the AWS students;

(2) The applicability and usefulness of educational, technical, and administrative innovations to AWS programs at other institutions and in other instructional and occupational environments;

(3) The benefit to the future employers of AWS program graduates, including academia, private industry and Federal, State and Local governments;

(4) The salient benefits to the FAA as both the AWS program sponsor of the AWS program and as an employer of the graduates.

(15 points maximum)

(f) *Qualifications of Key Personnel.* The reviewing panel will evaluate the professional qualifications and experience of the institution's present AWS personnel and other key officials who will be involved in the proposed AWS grant project. Particular attention will be given to the AWS Program Director. The relationship of the qualifications and past experiences of these individuals to the goals and objectives of the project will be considered.

(10 points maximum)

(g) *Evaluation Plan.* The reviewing panel will consider the adequacy of the proposed Evaluation Plan in assessing project performance and the impact of the project upon the existing institutional AWS program and the quality of the graduating AWS students.

(10 points Maximum)

**Award Date**

The FAA expects to announce the institutional recipients of the AWS grant awards by September 30, 1989.

**Richard E. Cullen,**

*Acting Director, Office of Training and Higher Education.*

Issued in Washington, DC, on February 7,1989.

## Radio Technical Commission for Aeronautics (RTCA); Executive Committee Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I), notice is hereby given for the Executive Committee Meeting to be held March 17, 1989, at the NASA Goddard Space Flight Center, Building 12, Room C-206, Greenbelt, Maryland 20771, commencing at 9:30 a.m.

The agenda for this meeting is as follows: (1) Chairman's remarks and introductions; (2) approval of the minutes of meeting held January 27, 1989; (3) Executive Director's Report; (4) Special Committee Activities Report for January-February 1989; (5) Fiscal and Management Subcommittee Report; (6) Search Committee for Executive Director Successor Report; (7) consideration of proposals to establish new Special Committees; (8) approval of Special Committee 142 Report, "Minimum Operational Performance Standards (MOPS) for Mode S Aircraft Data Link Processor"; and (9) other business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street NW., Suite 500, Washington, DC 20005; (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on February 22, 1989.

**Geoffrey R. McIntyre,**

*Acting Designated Officer.*

BILLING CODE 4910-13-M

## Federal Highway Administration

## National Motor Carrier Advisory Committee

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Notice of public meetings.

**SUMMARY:** The FHWA announces that the National Motor Carrier Advisory Committee will hold a meeting on March 21 and 22, 1989, in Washington, DC, at the U.S. Department of Transportation Headquarters, 400 7th Street, SW., Washington, DC. The meeting will begin at 9:00 a.m. on both days in Room 4200 and it is open to the public.

The agenda will include: a review of initiatives regarding advanced highway/vehicle technologies, activities regarding the study of driver fatigue, programs to address the driver shortage problem, status or various motor carrier safety regulations as well as the reasonable access regulations, implementation of the Commercial Drivers' Licensing program, the progress being made in the review of the future of the highway program, the status of the DOT drug testing program, and the status of legislation affecting the motor carrier industry. Reports and recommendations will also be presented from the Subcommittee Chairmen.

In conjunction with the full Committee meeting, the Subcommittee on Research will meet on March 20, 1989, to discuss priorities for and possible additions to FHWA's motor carrier research programs. This will be the first meeting of this Subcommittee. The Subcommittee meeting will begin at 9:30 a.m. in Room 4200 of the U.S. Department of Transportation Headquarters, 400 7th Street, SW., Washington, DC. This Subcommittee meeting is also open to the public.

A second Subcommittee will also be meeting in conjunction with the full Committee meeting. The Subcommittee on Government and Taxation will be meeting on March 20, 1989, at 1:30 p.m. in Room 4200 of the U.S. Department of Transportation Headquarters, 400 7th Street, SW., Washington, DC. The Subcommittee will be meeting to discuss potential recommendations on four points: (1) The illegal evasion of payments of Federal highway user fees, (2) the diversion of these fees for non-highway purposes, (3) exemptions to these fees, and (4) the desirability of greater uniformity with respect to the various State tax and operating regulations which motor carriers must observe. This Subcommittee meeting is also open to the public.

**FOR FURTHER INFORMATION CONTACT:** Mr. Joseph S. Toole, Executive Director, National Motor Carrier Advisory Committee, Federal Highway Administration, HOA-1, Room 4218, 400 7th Street, SW., Washington, DC 20590, (202) 366-2238, office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

Issued on: February 23, 1989.

**Robert E. Farris,**

*Federal Highway Administrator.*

## Assistant Commissioner (EP/EO) Employee Plans Ad Hoc Group; Open Meeting

The first meeting of the Assistant Commissioner (Employee Plans and Exempt Organizations) Employee Plans Ad Hoc Group will be held on March 22, 1989 at the IRS Atlanta Service Center. The Service Center is located at 4800 Buford Highway, Atlanta, Georgia. The meeting will begin at 8:30 a.m. on Wednesday, March 22. The agenda will include the following topics:

Tour of Facility for Overview of Service Center Operations and Employee Plans Return Processing.

Discussion of Employee Plans Determination and Examination of Programs.

Discussion of Employee Plans Technical Issues.

Due to the Service Center's security requirements and limited conference space, notification of intent to attend the meeting must be made with Jane Baniewicz, Staff Assistant to the Assistant Commissioner, no later than March 13, 1989. Ms. Baniewicz may be reached on (202) 566-9204 (not toll-free).

**FOR FURTHER INFORMATION CONTACT:** Jane Baniewicz, Staff Assistant to Assistant Commissioner (EP/EO), (202) 566-9204 (not toll-free).

**Robert I. Brauer,**

*Assistant Commissioner (E).*

# Sunshine Act Meetings

Federal Register
Vol. 54, No. 39
Wednesday, March 1, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

**NATIONAL TRANSPORTATION SAFETY BOARD**

**"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT:** Vol. 54, No. 35/Thursday, February 23, 1989/7918–7919.

**PREVIOUSLY ANNOUNCED TIME AND DATE:** 9:30 a.m., Tuesday, February 28, 1989.

**CHANGE IN MEETING:** A majority of the Board Members determined by recorded vote that the business of the Board required revising the agenda of this meeting and that no earlier announcement was possible. Response to FAA's proposed airworthiness directive applicable to certain small airplanes concerning flight into known icing conditions (NPRM) was added to the open portion of the meeting.

**FOR MORE INFORMATION, CONTACT:** Bea Hardesty, (202) 382–6525.

**Bea Hardesty,**
*Federal Register Liaison Officer.*

1989
UMI

**DEPARTMENT OF LABOR**

**Pension and Welfare Benefits Administration**

**29 CFR Part 2520**

**Annual Reporting and Disclosure Requirements**

**AGENCY:** Pension and Welfare Benefits Administration, Department of Labor.

**ACTION:** Final rule.

**SUMMARY:** This document contains amendments to Department of Labor (Department) regulations relating to the annual reporting requirements under Part 1 of Title I of the Employee Retirement Income Security Act of 1974 (ERISA). In part, the amendments contained in this document are necessary to conform to revisions to the annual return/report forms (Form 5500 Series) filed by administrators of employee pension and welfare benefit plans under Part 1 of Title I of ERISA.

Other amendments contained in this document are technical revisions updating the regulations to reflect changes in the annual reporting requirements, simplifying the regulations by deleting certain portions thereof which are duplicative of the instructions to the Form 5500 Series and incorporating address corrections to be used in submitting certain documents filed with the Department.

The amendments will affect the financial and other information required to be reported and disclosed by employee benefit plans filing Form 5500 Series reports under Part 1 of Title I of ERISA.

**DATES:** This regulation is effective January 1, 1988. The amendments are effective for reporting for plan years beginning on or after January 1, 1988.

**FOR FURTHER INFORMATION CONTACT:** Ronald D. Allen, Pension and Welfare Benefits Administration, U.S. Department of Labor, Washington, DC, (202) 523-8515 (this is not a toll-free number).

**SUPPLEMENTARY INFORMATION:** Note: This final regulation imposes no new information collection requirement in addition to the information collection requirement associated with the submission of the Form 5500 Series.

## A. Background

On September 19, 1986, the Department, in conjunction with the Internal Revenue Service and Pension Benefit Guaranty Corporation, published in the **Federal Register** (51 FR 33500) proposed changes to the Form 5500 Series. On January 2, 1987, the Department published in the **Federal Register** (52 FR 84) proposed amendments to the annual reporting regulations (Part 2520 of Chapter XXV of Title 29 of the Code of Federal Regulations) which, in part, were necessary to implement certain of the proposed changes to the Form 5500 Series. A number of technical amendments to the regulations were also proposed in order to update certain of the reporting and disclosure regulations, as well as to eliminate duplication of information also appearing in the instructions to the Form 5500 Series. The Form 5500 Series, as modified by the Agencies, is published in the same separate part of today's **Federal Register**.

The amendments published on January 2, 1987, were proposed to be effective for reporting for plan years beginning on or after January 1, 1987, to coincide with the implementation of revisions to the Form 5500 Series for the 1987 plan year. Subsequent to the publication of the proposed amendments, the Department, in conjunction with the Internal Revenue Service and Pension Benefit Guaranty Corporation, decided to defer forms revisions to the 1988 plan year filing cycle. Accordingly, the amendments contained herein will be effective for reporting for plan years beginning on or after January 1, 1988, to coincide with forms revisions implemented for the 1988 plan year filing cycle.

As discussed in more detail below, the Department received only three comments relating to the proposed amendments to the annual reporting regulations, and the Department has decided to adopt those amendments in the form proposed, except as otherwise noted.

## B. Description of Amendments

*Sections 2520.103-1 and 2520.103-2*

Section 2520.103-1 describes the content of the Form 5500. The Department is adopting the following amendments to § 2520.103-1. (1) Amend paragraph (a)(2) to delete the reference to § 2520.104b-11, which prescribed the summary annual report requirements for plans which constitute a group insurance arrangement. Section 2520.104b-11 was superseded by § 2520.104b-10 pursuant to notice in the **Federal Register** (44 FR 19403) on April 3, 1979. (2) Amend paragraph (b) to delete references to specific line items on the Form 5500 Series in order to avoid future regulation amendments solely to accommodate minor item changes to the forms. (3) Amend paragraphs (b) and (c) to add a reference to Schedule C, the proposed schedule for reporting service provider, trustee, and certain service provider termination information (*see* revised Form 5500 Series in the same separate part of today's **Federal Register**). And, (4) amend paragraphs (c), (d), and (e) to eliminate references to the Form 5500-K, which was eliminated as a reporting form for plan years beginning after December 31, 1983 (*see* Internal Revenue Service Release 84-71, June 18, 1984).[1]

Section 2520.103-2 describes the contents of the Form 5500 for plans which constitute a group insurance arrangement, as defined in § 2520.104-43. Paragraph (b) of § 2520.103-2 is amended to eliminate the references to specific line items on the Form 5500, consistent with the amendments to § 2520.103-1.

*Section 2520.103-6*

Section 2520.103-6 sets forth the definition of reportable transactions for the Form 5500. The Department is amending paragraph (b)(1)(ii) to delete the reference to a specific line item on the Form 5500 Series.

Under paragraph (c) of § 2520.103-6, a reportable transaction is defined as any transaction or series of transactions involving an amount in excess of 3 percent of the current value of a plan's assets.[2] The Department is amending paragraph (c) of § 2520.103-6 by adding a new subparagraph (c)(4) which raises the threshold for reportable transactions from 3 percent to 5 percent for plan years beginning on or after January 1, 1988. This amendment is necessary to implement the increase in the threshold for reportable transactions from 3 percent to 5 percent on the revised Form 5500 Series (*see* in the same separate part of today's **Federal Register**).

The Department also is modifying the examples set forth in paragraph (e) of § 2520.103-6 to reflect the change from 3 percent to 5 percent.

This amendment is being adopted in accordance with the authority granted the Secretary under sections 104(a)(3) and 110, pursuant to which utilization of the Form 5500 under § 2520.103-1 constitutes a limited exemption for welfare plans and an alternative method of compliance for pension plans. The findings required under section 104(a)(3) and section 110 with respect to the use of the Form 5500 as a limited exemption and alternative method of compliance are discussed below.

[1] Form 5500-K was the Return/Report of Employee Benefit Plan for Sole Proprietorships and Partnerships. The Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248, 96 Stat. 324 (1982)) repealed most of the special limitations and restrictions on the design and operation of these Keogh plans, resulting in these plans having the same contribution, deduction, and vesting requirements, and similar coverage requirements, as other plans. These plans are now required to file either Form 5500-C or Form 5500-R.

[2] *See* section 103(b)(3)(H) of ERISA.

*Section 2520.103-10*

Section 2520.103-10 describes the format and content of the financial schedules included as part of the Form 5500. The Department is amending § 2520.103-10 as follows: (1) Delete the references to specific line items (e.g., item 22) in order to avoid the necessity of future amendments to the regulations to accommodate minor changes in the forms; and (2) in an effort to eliminate duplication, delete the schedule formats and other general explanatory information appearing in the regulation which also appears in the instructions to the forms.[3]

The Department had proposed an amendment to § 2520.103-10 that would add a reference to the Form 5500-C to accommodate a proposed change to the Form 5500-C requiring plans with 26 to 99 participants to file a schedule of loans and leases in default (*see* proposed revisions to the Form 5500 Series, 51 FR 33500). Under the revised Form 5500 Series being adopted by the Agencies (*see* in the same separate part of today's **Federal Register**), plans filing the Form 5500-C will not be required to file a schedule of loans and leases in default. Accordingly, the Department is not adopting this amendment.

*Section 2520.104-41*

Section 2520.104-41 provides a simplified method of annual reporting for plans with fewer than 100 participants. Paragraph (c)(2) of that section requires administrators of Keogh plans to file the Form 5500-K. Because the Form 5500-K has been eliminated as an annual reporting form, § 2520.104-41 is being amended to delete paragraph (c)(2) in its entirety.

*Section 2520.104b-10*

Section 2520.104b-10 sets forth the requirements for the summary annual report and prescribes the formats for such reports. Included as an appendix to the regulation is a cross-reference guide which corresponds the line items of the summary annual report formats to the line items on the Forms 5500 and 5500-C to facilitate completion. This document includes a revised appendix which takes into account the changes to the revised Form 5500 Series being adopted by the Agencies.

[3] For clarification purposes, the regulation continues to specify certain transactions with a party-in-interest that are not required to be reported on that schedule. In this respect, it should be noted that, although the form does not require the reporting of publicly traded securities transactions involving a party-in-interest, such transactions are not in all cases exempt from the prohibited transaction provisions of section 406 of ERISA.

*Section 2520.104-46*

Section 2520.104-46 provides a waiver of the examination and report of an independent qualified public accountant for employee benefit plans with fewer than 100 participants. This section is being amended to delete the reference to Form 5500-K appearing in paragraph (d).

*Address Corrections to Reporting Regulations*

Since the publication of many of the reporting regulations, the Office of Pension and Welfare Benefit Programs has changed its name to the Pension and Welfare Benefits Administration, pursuant to Secretary of Labor's Order No. 1-86. In addition, the agency has changed the room for receipt of documents required to be filed under Title I of ERISA with the Department. In order to facilitate the filing and receipt of documents, the Department is amending the following sections to provide an updated address: §§ 2520.104-22(c); 2520.104-23(c); 2520.014a-3(d), and 2520.104a-4(c).

## C. Discussion of Comments

The Department received three comment letters concerning the proposed amendments to the annual reporting regulations. Two of the letters contained comments relating to § 2520.103-6. One of the commentators suggested that raising the reportable transaction threshold from 3 percent to 5 percent would permit, in the case of a plan with substantial assets, transactions involving a significant amount of assets to go unreported. The commentator also recommended that the dates of reportable transactions be required to be reported. The Department recognizes that by increasing the reportable transaction threshold from 3 percent to 5 percent, certain transactions heretofore required to be reported will go unreported. However, the Department has concluded, on the basis of its enforcement experience over the past ten years, that the disclosure of 5 percent transactions will enable it to identify transactions that are sufficiently large to suggest that fiduciary misconduct may be involved and, therefore will provide adequate reporting to the Department. For the same reason, the Department believes that the 5 percent threshold will provide adequate disclosure to plan participants and beneficiaries. It is also noted that the 5 percent threshold is consistent with the threshold under generally accepted accounting principles for identifying "significant" investments, which are required to be reported on the financial statements of plans. Accordingly, the Department has decided to adopt the 5 percent threshold criteria for reportable transactions. The Department also has decided not to require the dates of reportable transactions to be reported. The Department believes that sufficient information concerning reportable transactions is required to be reported, without transaction dates, to apprise the Department and plan participants and beneficiaries of potential abuses. Moreover, because the report is required to be filed annually, the specific date of a particular transaction is of less significance.

The other commentator recommended that the definition of a reportable transaction under § 2520.103-6 be amended to exclude the following transactions involving pooled separate accounts maintained by insurance companies: (a) New employer deposits; (b) transfers between pooled separate accounts; and (c) transfers between general assets accounts and pooled separate accounts. The commentator suggests that the reporting of such 5 percent transactions with pooled separate accounts detracts from other transactions that should be reported. As noted by the commentator, a plan meeting the requirements of 29 CFR 2520.103-4 is not required to report on its annual report individual transactions of the pooled separate account; however, such a plan is required to report any plan transactions with the pooled separate account, including certain reportable transactions under § 2520.103-6. In this regard, the Department notes that, while § 2520.103-6 does not exempt all plan transactions with pooled separate accounts, paragraph (b)(2)(ii)(G) of that section relating to transactions which occurred prior or subsequent to a reportable transaction with the same person during the plan year, does significantly reduce the reporting that would otherwise be required. The Department further notes that, pursuant to 29 CFR 2520.103-11(b)(2)(vi), units of participation in a pooled separate account are excluded from the definition of "assets held for investment" for purposes of the asset schedules required to accompany the annual report. In view of the aforementioned reporting exceptions and the adoption herein of an amendment increasing the reportable transaction threshold from 3 percent to 5

VOL 54 ISS 39 MR 1 1989 UMI

concise reporting of those transactions which because of their size require closer scrutiny.

Further, the Department has determined under section 104(a)(3) that application of the statutory reporting requirements to the extent that the revisions to Form 5500 modify them would be inappropriate in the context of welfare plans for the reasons discussed above.

**Regulatory Flexibility Act**

The Department has determined that this regulation would have no significant economic impact on small entities. In conducting the analysis required under the Regulatory Flexibility Act, it is estimated that adoption of the amendments to the annual reporting regulations—which conform to the changes being made in the annual report forms (Form 5500 Series), make additional technical corrections, and eliminate certain duplicative language—will impose no additional costs on small entities. The purpose of these revisions is to simplify and reduce the burden attributable to the annual reporting requirements.

**Executive Order 12291**

The Department has determined that this regulatory action does not constitute a "major rule" as that term is used in Executive Order 12291 because the action does not result in: an annual effect on the economy of $100 million; a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

**Paperwork Reduction Act**

The amendments to the annual reporting regulations include revisions which are necessary to conform the regulations to changes in the annual report form (Form 5500 Series) which have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (P.L. 96–511). The approved information collection for the Form 5500 Series annual report is assigned control number 1210–0016.

**List of Subjects in 29 CFR Part 2520**

Accountants, Actuaries, Disclosure requirements, Employee benefit plans, Employee Retirement Income Security Act, Health insurance, Life insurance, Pensions, Pension and Welfare Benefits Administration, Reporting and recordkeeping requirements.

**Final Regulation**

For the reasons set out in the preamble, Part 2520 of Chapter XXV of Title 29 of the Code of Federal Regulations is hereby amended as follows:

## PART 2520—RULES AND REGULATIONS FOR REPORTING AND DISCLOSURE

1. The authority citation for Part 2520 is revised to read as follows:

**Authority:** Secs. 101, 102, 103, 104, 105, 109, 110, 111(b)(2), 111(c), and 505, Pub. L. 93–406, 88 Stat. 840–52 and 894 (29 U.S.C. 1021–25, 1029–31, and 1135); Secretary of Labor's Order No. 27–74, 13–76, 1–87, and Labor Management Services Administration Order No. 2–6.

2. In § 2520.103–1, paragraphs (b)(1) and (c) are revised to read as follows:

**§ 2520.103–1 Contents of the annual report.**

* * * * *

(b) * * *

(1) A completed Form 5500 "Annual Return/Report of Employee Benefit Plan (with 100 or more participants)" and any statements or schedules required to be attached to the form, including Schedule A "Insurance Information," Schedule B "Actuarial Information," Schedule C "Service Provider/Trustee/Service Provider Termination Information," and the financial schedules described in § 2520.103–10. *See* the instructions ("What to File" and "Specific Instructions") for this form.

* * * * *

(c) *Contents of the annual report for plans with fewer than 100 participants.* Except as provided in paragraph (d) of this section and in §§ 2520.104–43 and 2520.104a–6, the annual report of an employee benefit plan which covers fewer than 100 participants at the beginning of the plan year shall be a completed Form 5500–C "Return/Report of Employee Benefit Plan (with fewer than 100 participants)," or a completed Form 5500–R "Registration Statement of Employee Benefit Plan (with fewer than 100 participants)," and any statements or schedules which are required to be attached to these forms, including Schedule A "Insurance Information," and Schedule B "Actuarial Information." *See* the instructions ("What to File" and "Specific Instructions") for these forms.

* * * * *

3. Section 2520.103–1 is further amended as follows:

a. In paragraph (a)(2), in the second sentence, remove the words "or § 2520.104b–11."

b. In paragraph (b)(2)(i), in the second sentence, remove the words "listed in columns a and b of item 13 of" and insert in their place "required to be reported on the."

c. In paragraph (b)(2)(ii), remove the words "shown in item 14 of" and insert in their place "required to be reported on the."

d. In paragraph (b)(3), remove the words "information contained in items 13 and 14 of" and insert in their place "assets, liabilities, income, expenses and changes in net assets as required to be reported on the."

e. In paragraph (d), remove the words "Forms 5500–C, K, or R" and insert in their place "Forms 5500–C, or R."

f. In paragraph (e), in the first sentence, remove the reference to "5500–K."

4. Section 2520.103–2 is amended by revising paragraph (b)(1) to read as follows:

**§ 2520.103–2 Contents of the annual report for a group insurance arrangement.**

* * * * *

(b) * * *

(1) A completed Form 5500 "Annual Return/Report of Employee Benefit Plan (with 100 or more participants)" and any statements or schedules required to be attached to the form, including Schedule A "Insurance Information," Schedule C "Service Provider/Trustee/Service Provider Termination Information," and the financial schedules described in § 2520.103–10. *See* the instructions ("What to File" and "Specific Instructions") for this form.

* * * * *

5. Section 2520.103–2 is further amended as follows:

a. In paragraph (b)(2)(i), in the second sentence, remove the words "listed in columns a and b of item 13 of" and insert in their place "required to be reported on the."

b. In paragraph (b)(2)(ii), remove the words "shown in item 14 of" and insert in their place "required to be reported on the."

c. In paragraph (b)(3), remove the words "information contained in items 13 and 14 of" and insert in their place "assets, liabilities, income, expenses and changes in net assets as required to be reported on the."

6. Section 2520.103–6 is amended by revising paragraph (c)(1) introductory text, adding paragraph (c)(4), and revising paragraph (e) to read as follows:

percent, the Department believes that the reporting of new employer deposits, transfers between pooled separate accounts, and transfers between general asset accounts and pooled separate accounts does provide useful information concerning basic transactions involving pooled separate accounts, without imposing undue burdens on either plan administrators or insurance companies maintaining such accounts.

The third commentator offered suggested changes to the requirements of § 2520.103–9, relating to the direct filing of common or collective trust and pooled separate account information by banks and insurance carriers with the Department. The Department did not propose any amendments to § 2520.103–9, accordingly, the suggested changes to that section are beyond the scope of the annual reporting amendments being adopted herein.

**D. Departmental Findings**

For purposes of Part 1 of Title I of ERISA, the filing of a completed Form 5500 (including the report of an independent qualified public accountant and any required statements and schedules) by plans with 100 or more participants constitutes compliance with the limited exemption and alternative method of compliance prescribed in paragraph (b) of § 2520.103–1, promulgated in accordance with the authority granted the Secretary of Labor (the Secretary) under sections 104(a)(3) and 110 of ERISA.

Section 104(a)(3) authorizes the Secretary to exempt any welfare plan from all or part of the reporting and disclosure requirements of Title I of ERISA or to provide simplified reporting and disclosure, if the Secretary finds that such requirements are found to be inappropriate. Section 110 permits the Secretary to prescribe for pension plans alternative methods of complying with any of the reporting and disclosure requirements, if the Secretary finds: (1) That the use of the alternative is consistent with the purposes of ERISA and that it provides adequate disclosure to plan participants and beneficiaries and to the Secretary; (2) that application of the statutory reporting and disclosure requirements would increase the costs to the plan or impose unreasonable administrative burdens with respect to the operation of the plan; and (3) that the application of the statutory reporting and disclosure requirements would be adverse to the interests of plan participants in the aggregate.[4]

As reflected in the revised Form 5500 Series (*see* in the same separate part of today's **Federal Register**), and the amendment to § 2520.103–6, raising the threshold of reportable transactions from 3 percent to 5 percent, a number of changes are being adopted which affect the information required to be reported and disclosed on the Form 5500. With regard to these changes, the Department has made the following findings under sections 110 and 104(a)(3) with regard to the utilization of the revised Form 5500 (and statements and schedules required to be attached to the Form 5500) as an alternative method of compliance and limited exemption pursuant to 29 CFR 2520.103–1(b):

1. The use of the revised Form 5500 as an alternative method of compliance is consistent with the purposes of Title I of ERISA and provides adequate disclosure to plan participants and beneficiaries and adequate reporting to the Secretary. While the information required to be reported on or in connection with the revised Form 5500 deviates, in some respects, from that information delineated in section 103 of the Act, the information essential to ensuring adequate disclosure and reporting under Title I of ERISA is required to be included on or as part of the Form 5500, as revised. With regard to the revision to the definition of "reportable transaction" for purposes of the Form 5500 to include only transactions involving amounts in excess of 5 percent of the plan's assets, the Department believes such a change will assure the reporting of significant transactions which may reveal fiduciary misconduct which is the purpose underlying the 3 percent statutory requirement in section 103. The Department, on the basis of its experience with enforcement cases over the past ten years of ERISA, has concluded that disclosure of 5 percent transactions will enable it to identify transactions that are sufficiently large to suggest that fiduciary misconduct may be involved.[5] For the same reason, the Department believes the 5 percent threshold will provide adequate disclosure to plan participants and beneficiaries.

2. The use of Form 5500 as an alternative method of compliance relieves plans subject to the annual reporting requirements from increased costs and unreasonable administrative burdens by providing a standardized format which facilitates reporting, eliminates duplicative reporting requirements, and simplifies the content of the annual report in general. The Form 5500, as revised, is intended to further reduce the administrative burdens and costs attributable to compliance with the annual reporting requirements.

With regard to the change from 3 percent to 5 percent threshold for reportable transactions, the Department's experience has been that a 3 percent threshold has resulted in the reporting of information which is not necessary for the effective administration of ERISA. Therefore, reporting information regarding transactions involving more than 3 percent, but less than 5 percent of a plan's assets, has resulted in additional costs and unreasonable administrative burdens to plans.

3. Finally, taking into account the above, the Department has determined that application of the statutory annual reporting and disclosure requirements without the availability of the Form 5500 would be adverse to the interests of participants in the aggregate. The revised Form 5500 provides for the reporting and disclosure of basic financial and other plan information described in section 103 in a uniform, efficient, and understandable manner; thereby, facilitating the disclosure of such information to plan participants.

With regard to the 5 percent reportable transaction threshold, the Department's experience has been that the 3 percent threshold tended not to reveal abusive cases that would not otherwise have been revealed at a 5 percent threshold. The additional disclosure of information regarding transactions involving more than 3 percent, but less than 5 percent, therefore only provides participants and beneficiaries with information of negligible value and this information is often voluminous, especially in the case of larger plans. The Department believes that the revised 5 percent threshold should provide for clearer and more

---

[4] Under the authority of sections 104(a)(2)(A) and 104(a)(3), the Secretary has prescribed by regulation a simplified annual report for pension and welfare plans which cover fewer than 100 participants (Form 5500–C). *See* 29 CFR 2520.104–41. Pursuant to this authority, the Department has made changes to the 1988 Form 5500–C. These changes are described in the preamble accompanying the publication of the 1988 annual report forms. (*See* the "notices" section of today's **Federal Register**.)

[5] In the interest of efficient administration of ERISA, the Department has attempted to align the reporting and disclosure requirements, where possible, with generally accepted accounting principles. Recommendations of the Employee Benefit Plans and ERISA Special Committee of the American Institute of Certified Public Accountants in concert with the Financial Accounting Standards Board's Statement No. 35 indicate that, under generally accepted accounting principles, investments representing 5 percent or more of net assets are treated as "significant," and therefore, must be reported on financial statements.

VOL 54 ISS 39 MR 1 1989 UMI

**§ 2520.103-6 Definition of reportable transaction for annual return/report.**

* * * * *

(c) *Application.* (1) Except as provided in paragraph (c)(4) of this section, this provision applies to—

* * * * *

(4) For plan years beginning on or after January 1, 1988, 5 percent shall be substituted for 3 percent in paragraphs (c) (1) and (2) of this section for purposes of determining whether a transaction or series of transactions constitutes a reportable transaction under this section.

* * * * *

(e) *Examples.* These examples are effective for reporting for plan years beginning on or after January 1, 1988.

(1) At the beginning of the plan year, XYZ plan has 10 percent of the current value of its plan assets invested in ABC common stock. Halfway through the plan year, XYZ purchases ABC common stock in a single transaction in an amount equal to 6 percent of the current value of plan assets. At about this time, XYZ plan also purchases a commercial development property in an amount equal to 8 percent of the current value of plan assets. Under paragraph (c)(1)(i) of this section, the 8 percent stock transaction is a reportable transaction for the plan year because it exceeds 5 percent of the current value of plan assets. The 8 percent land transaction is also reportable under paragraph (c)(1)(i) of this section because it exceeds 5 percent of the current value of plan assets.

(2) During the plan year, AAA plan purchases a commercial lot from ZZZ corporation at a cost equal to 2 percent of the current value of the plan assets. Two months later, AAA plan loans ZZZ corporation an amount of money equal to 3.5 percent of the current value of plan assets. Under the provisions of paragraph (c)(1)(ii) of this section, the plan has engaged in a reportable series of transactions with or in conjunction with the same person, ZZZ corporation, which when aggregated involves 5.5 percent of plan assets.

(3) During the plan year NMN plan sells to OPO corporation a commercial property that represents 3.5 percent of the current value of plan assets. OPO simultaneously executes a note and mortgage on the purchased property to NMN which represents 3 percent of the current value of plan assets. Under the provisions of paragraph (c)(1)(ii) of this section, NMN has engaged in a reportable series of transactions with or in conjunction with the same person, OPO corporation, consisting of a simultaneous sale of property and a loan, which, when aggregated, involves 6.5 percent of the current value of plan assets.

(4) At the beginning of the plan year, ABC plan has 10 percent of the current value of plan assets invested equally in a combination of XYZ Corporation common stock and XYZ preferred stock. One month into the plan year, ABC sells some of its XYZ common stock in an amount equal to 2 percent of the current value of plan assets.

(i) Six weeks later the plan sells XYZ preferred stock in an amount equal to 4 percent of the current value of plan assets. A reportable series of transactions has not occurred because only transactions involving securities of the same issue are to be aggregated under paragraph (c)(1)(iii) of this section.

(ii) Two weeks later when the ABC plan purchases XYZ common stock in an amount equal to 3.5 percent of the current value of plan assets, a reportable series of transactions under paragraph (c)(1)(iii) of this section has occurred. The sale of XYZ common stock worth 2 percent of plan assets and the purchase of XYZ common stock worth 3.5 percent of plan assets aggregate to exceed 5 percent of the total value of plan assets.

(5) At the beginning of the plan year, Plan X purchases through broker-dealer Y common stock of Able Industries in an amount equal to 6 percent of plan assets. The common stock of Able Industries is not listed on any national securities exchange or quoted on NASDAQ. This purchase is a reportable transaction under paragraph (c)(1)(i) of this section. Three months later, Plan X purchases short term debt obligations of Charley Company through broker-dealer Y in the amount of 0.2 percent of plan assets. This purchase is also a reportable transaction under the provisions of paragraph (c)(1)(iv) of this section.

(6) At the beginning of the plan year, Plan X purchases from Bank B certificates of deposit having a 180 day maturity in an amount equal to 6 percent of plan assets. Bank B is a national bank regulated by the Comptroller of the Currency. This purchase is a reportable transaction under paragraph (c)(1)(i) of this section. Three months later, Plan X purchases through Bank B 91-day Treasury bills in the amount of 0.2 percent of plan assets. This purchase is not a reportable transaction under paragraph (c)(1)(iv) of this section because the purchase of the Treasury bills as well as the purchase of the certificates of deposit are not considered to involve a security under the definition of "securities" in paragraph (b)(2)(ii) of this section.

(7) At the beginning of the plan year, Plan X purchases through broker-dealer Y common stock of Able Industries, a New York Stock Exchange listed security, in an amount equal to 6 percent of plan assets. This purchase is a reportable transaction under paragraph (c)(1)(i) of this section. Three months later, Plan X purchases through broker-dealer Y, acting as agent, common stock of Baker Corporation, also a New York Stock Exchange listed security, in an amount equal to 0.2 percent of plan assets. This latter purchase is not a reportable transaction under paragraph (c)(1)(iv) of this section because it is not a transaction "with or in conjunction with a person" pursuant to paragraph (b)(3)(ii) of this section.

7. Section 2520.103-6 is further amended in paragraph (b)(1)(ii) by removing the words "on line 13(h) of Form 5500 Annual Return/Report" and insert in their place "as total assets on Form 5500 Annual Return/Report."

8. Section 2520.103-10 is revised to read as follows:

**§ 2520.103-10 Annual Report Financial Schedules.**

(a) *General.* The administrator of a plan filing an annual report pursuant to 29 CFR 2520.103-1(a)(2) or the report for a group insurance arrangement pursuant to 29 CFR 2520.103-2, shall, as provided in the instructions to the Form 5500 "Annual Return/Report of Employee Benefit Plan (with 100 or more participants)", include as part of the annual report the separate financial schedules described in paragraph (b) of this section.

(b) *Schedules—(1) Assets held for investment.* A schedule of all assets held for investment purposes at the end of the plan year (see 29 CFR 2520.103-11).

(2) *Assets acquired and disposed within the plan year.* A schedule of all assets acquired and disposed of within the plan year (see 29 CFR 2520.103-11).

(3) *Party in interest transactions.* (i) Except as provided in paragraph (b)(3)(ii) of this section, a schedule of each transaction involving a person known to be a party in interest.

(ii) Do not include—

(A) A transaction to which a statutory exemption under part 4 of Title I applies;

(B) A transaction to which an administrative exemption under section 408(a) of the Act applies; or

(C) A transaction to which the exemptions of section 4975(c) or 4975(d) of the Internal Revenue Code of 1954, as amended, applies.

(4) *Obligations in default.* A schedule of all loans or fixed income obligations which were in default as of the end of the plan year or were classified during the year as uncollectible.

(5) *Leases in default.* A schedule of all leases which were in default or were classified during the year as uncollectible.

(6) *Reportable transactions.* A schedule of all reportable transactions as defined in § 2520.103-6.

9. Section 2520.104-22 is amended by revising paragraph (c) to read as follows:

**§ 2520.104-22 Exemption from reporting and disclosure requirements for apprenticeship and training plans.**

* * * * *

(c) *Filing Address.* The notice referred to in paragraph (a) of this section shall be filed with the Secretary of Labor by mailing it to: Apprenticeship and Training Plan Exemption, Pension and Welfare Benefits Administration, Room N-5644, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, or by delivering it during normal working hours to the Division of Reports, Office of Program Services, Pension and Welfare Benefits Administration, Room N-5644, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC.

10. Section 2520.104-23 is amended by revising paragraph (c) to read as follows:

**§ 2520.104-23 Alternative method of compliance for pension plans for certain selected employees.**

* * * * *

(c) *Filing Address.* Statements may be filed with the Secretary of Labor by mailing them addressed to: Top Hat Plan Exemption, Pension and Welfare Benefits Administration, Room N-5644, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, or by delivering it during normal working hours to the Division of Reports, Office of Program Services, Pension and Welfare Benefits Administration, Room N-5644, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC.

* * * * *

11. Section 2520.104-41 is amended by revising paragraph (c) to read as follows:

**§ 2520.104-41 Simplified annual reporting requirements for plans with fewer than 100 participants.**

* * * * *

(c) *Contents.* The administrator of an employee pension or welfare benefit plan which covers fewer than 100 participants shall file a Form 5500-C "Return-Report of Employee Benefit Plan (with fewer than 100 participants)," or, as appropriate, a Form 5500-R "Registration Statement of Employee Benefit Plan (with fewer than 100 participants)," in the manner prescirbed in § 2520.104a-5.

12. Section 2520.104-46 is amended by revising paragraph (d) to read as follows:

**§ 2520.104-46 Waiver of examination and report of an independent qualified public accountant for employee plans with fewer than 100 participants.**

* * * * *

(d) *Limitations.* (1) The waiver described in this section does not affect the obligation of a plan described in paragraph (b) (1) or (2) of this section to file a Form 5500-C or, as appropriate, Form 5500-R and all schedules called for therein. *See* § 2520.104-41.

(2) This section does not apply to a plan which elects to file an Annual Return/Report Form 5500 pursuant to § 2520.103-1(d).

13. Section 2520.104a-3 is amended by revising paragraph (d) to read as follows:

**§ 2520.104a-3 Summary plan description.**

* * * * *

(d) *Filing Address.* The summary plan description shall be filed with the Secretary of Labor by mailing it to SPD, Pension and Welfare Benefits Administration, Room N-5644, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, or by delivering it during normal working hours to Room N-5644, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC.

* * * * *

14. Section 2520.104a-4 is amended by revising paragraph (c) to read as follows:

**§ 2520.104a-4 Material modifications to the plan and changes in plan description information.**

* * * * *

(c) *Filing Address.* The summary description of material modifications to the plan and changes in the information required by section 102(b) shall be filed with the Secretary of Labor by mailing it to SMM, Pension and Welfare Benefits Administration, Room N-5644, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, or by delivering it during normal working hours to Room N-5644, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC.

**§ 2520.104b-10 [Amended]**

15. Section 2520.104b-10 is amended by revising the Appendix summary annual report cross-reference guide as follows:

BILLING CODE 4510-29-M

**DEPARTMENT OF THE TREASURY**

**DEPARTMENT OF LABOR**

**Pension and Welfare Benefits Administration**

**PENSION BENEFIT GUARANTY CORPORATION**

**Revision of Annual Information Return/Reports**

**AGENCIES:** Department of the Treasury, Department of Labor, and Pension Benefit Guaranty Corporation.

**ACTION:** Notice of adoption of revised forms.

**SUMMARY:** This document contains revised annual return/report forms (Form 5500 Series) filed by administrators of employee pension and welfare benefit plans under the Employee Retirement Income Security Act of 1974, as amended (ERISA), and the Internal Revenue Code of 1986 (the Code). The revised forms affect the financial and other information required to be reported and disclosed by employee benefit plans filing the Form 5500 Annual Return/Report of Employee Benefit Plan (with 100 or more participants), Form 5500–C Return/Report of Employee Benefit Plan (with fewer than 100 participants), Form 5500–R Registration Statement of Employee Benefit Plan (with fewer than 100 participants), and the statements and schedules required to accompany the forms (collectively, the Form 5500 Series). The Form 5500–EZ is not included as part of this publication.

**EFFECTIVE DATE:** The revised forms are effective for plan years beginning on or after January 1, 1988.

**FOR FURTHER INFORMATION CONTACT:** George M. Holmes, Jr. or Ronald D. Allen, Pension and Welfare Benefits Administration, U.S. Department of Labor, (202) 523–8515, for questions relating to fiduciary, prohibited transaction, bonding, service provider, financial and insurance information items.

Mark O'Donnell, Employee Plans Technical and Actuarial Division, Internal Revenue Service, (202) 566–6395, or George Basta, Tax Forms, Internal Revenue Service, (202) 566–3895, for questions relating to financial and qualification (e.g., discrimination, participation, vesting, minimum funding standards, distributions) information items.

Emerson Beier, Pension Benefit Guaranty Corporation, (202) 778–8851, for questions relating to information items involving Title IV of ERISA.

The telephone numbers given above are not toll-free numbers.

**SUPPLEMENTARY INFORMATION:**

## I. Background

On September 19, 1986, the Internal Revenue Service, Department of Labor and Pension Benefit Guaranty Corporation (the Agencies) published in the **Federal Register** (51 FR 33500) a notice of proposed revisions to the Form 5500 Series. Written comments were solicited from interested members of the public on the Agencies' proposed revisions to the forms. Pursuant to the same September 19, 1986 notice appearing in the **Federal Register**, the Agencies also held a public hearing on October 22, 1986 for the purpose of allowing interested parties the opportunity to present oral testimony, and written comments, on the proposed forms revisions.

Upon consideration of the written comments and the record of the public hearing, as well as the Agencies' respective administrative and enforcement informational needs, the Agencies have decided to adopt the Form 5500 Series contained in this notice for plan years beginning on or after January 1, 1988.[1]

## II. Overview of Forms Revisions

The following is a summary of the major changes to the 1987 Form 5500 Series which are being adopted by the Agencies for plan years beginning on or after January 1, 1988.

### *A. Form 5500*

The Form 5500 is filed by employee benefit plans with 100 or more participants. In addition to eliminating a number of information items and making certain format and item numbering changes, changes to the Form 5500 include: (1) A request for CUSIP number, if one has been assigned to the sponsor of a single employer plan or plan of a controlled group of corporations or common control employers (item 1e); (2) the expanded utilization of check boxes and identifier codes to allow more specific plan characteristics information (items 6, 11 and 12); (3) with regard to collectively bargained plans, a request for the six digit labor-management disclosure file number(s) utilized by sponsoring labor organization(s) in filing LM–2 or LM–3 (item 13b); (4) modifications to the financial statements, which include a more detailed break-out of administrative expenses, limiting the reporting of party in interest investments by increasing reliance on the disclosures in the accountant's report, consolidated reporting of interests in common/collective trusts, master trusts, pooled separate accounts, registered investment companies, and 103–12 investment entities, and changes which are intended to more closely conform the reporting of financial information with FASB standards (items 34 and 35); (5) raising the payment threshold for the reporting of service provider information to $5,000 in a plan year (item 28a); (6) the reporting of service provider information, trustee information and accountant/actuary termination information on Schedule C (a new schedule for the 1988 plan year); (7) a requirement that a terminated accountant and actuary be furnished a copy of the reported reasons for the termination and a notice of their right to send comments to the Department of Labor (the notice is set forth in the instructions) (item 28f and Schedule C); (8) an increase in the threshold for reportable transactions from 3 percent to 5 percent (item 30d); and (9) a new question, designed to ensure compliance with the required distribution rules, asking if the plan has received transfers or rollovers with respect to a participant who has attained age 70½ (item 17).

### *B. Form 5500–C*

The Form 5500–C is required to be filed, at least every third year, by plans with fewer than 100 participants. In the two intervening years, Form 5500–C filers may file a Form 5500–R in lieu of the Form 5500–C.[2] In addition to eliminating certain information items and making certain numbering and format changes, changes to the Form 5500–C include: (1) A request for the CUSIP number, if one has been assigned to the sponsor of a single employer plan or plan of a controlled group of corporations or common control employers; (2) the expanded utilization of check boxes and identifier codes to allow more specific plan characteristics information (items 6, 11 and 12); (3) changes to the statements of assets, liabilities, income and expense; (4) elimination of service provider termination information (1987 Form 18a,

[1] For purposes of Title I of ERISA, the filing of the Form 5500 Series, in accordance with instructions thereto, by the administrator of the plan constitutes compliance with the limited exemption and alternative method of compliance prescribed in 29 CFR § 2520.103–1, promulgated in accordance with the authority granted the Secretary of Labor under sections 104(a)(3) and 110 of ERISA.

[2] Certain one-participant pension benefit plans required to file annual returns under the Internal Revenue Code, but not under Title I of ERISA, can satisfy the filing requirements by filing the Form 5500–EZ, rather than the Form 5500–C and Form 5500–R.

BEST COPY AVAILABLE

b and c); (5) elimination of contract administrator information (1987 Form 18d); (6) elimination of party-in-interest transaction schedule (1987 Form item 19a); and (7) elimination of listing of all fiduciaries (1987 Form 23).

*C. Form 5500–R*

The Form 5500–R may be filed in lieu of the Form 5500–C by plans with fewer than 100 participants for those plan years for which a Form 5500–C is not required to be filed. The major changes to the Form 5500–R include: (1) A requirement that certain basic financial information be reported concerning the plan, i.e., total assets, liabilities, and net assets at the beginning and ending of the plan year, total income and expense for the plan year, net income (loss), plan contributions and total benefits paid during the plan year (items 13 and 14); (2) an increase in the number of yes/no questions and, in cases where a "yes" response is indicated, the entry of the dollars involved may be required (item 15); (3) a request for more specific plan characteristics information (items 4 and 6); and (4) addition of an item concerning PBGC covered plans that have terminated, in order to be consistent with the other forms (item 8c).

*D. Schedules A, B and C*

1. Schedule A (Insurance Information). The Schedule A is required to be filed by plans if any benefits under the plan are provided by an insurance company, insurance service, or other similar organization (such as Blue Cross, Blue Shield, or a health maintenance organization). A notice has been added to the top of the Schedule A referencing the statutory obligation of insurance companies, carriers and services under section 103(a)(2) to provide that information necessary to enable the administrator to comply with the reporting requirements. Section 103(a)(2) provides that such information must be furnished within 120 days after the end of the plan year. The instructions to the Schedule A have been revised to clarify that a policy or contract year cannot exceed 12 months. The instructions also have been revised to clarify that commissions and fees to be reported on the Schedule A include amounts paid by company on the basis of the aggregate value of contracts or policies (or classes thereof) placed or retained by agents and brokers.

2. Schedule B (Actuarial Information). The Schedule B is required to be filed by defined benefit plans subject to the minimum funding standards. Changes to the Schedule B include the requirement that amortization charges be broken out between those attributable to funding waivers (item 9c(i)) and those attributable to other than funding waivers (item 9c(ii)). The unamortized outstanding balance is similarly required to be broken out. There is a new instruction to item 9j to clarify that a funding waiver request(s) pending with the IRS is not to be reported in this item until the waiver(s) is granted.

Lines 6(d) (i) through (iii) are changed to require completion by plans with fewer than 100 participants as well as plans with 100 or more participants. Line 12h has been changed to ask for the rate of return on plan assets for the year ending on the valuation date. The table of codes for mortality tables in the instructions to 12b has been expanded to include additional tables. The instructions for the statement by the enrolled actuary have been revised to provide that the enrolled actuary must sign the Schedule B; however, such signature may be subject to permitted qualifications. Also, the instructions now explicitly state that a stamped or machine-produced signature is not acceptable.

3. Schedule C (Service Provider and Trustee Information). The Schedule C is a new schedule for plan years beginning on or after January 1, 1988. The information required to be reported on the Schedule C includes: service provider information previously required to be reported on the Form 5500 (See: 1987 Form 5500 Item 12), however, the threshold amount for reporting information concerning a service provider has been raised from $600 in a plan year to $5000 in a plan year; trustee information; and information relating to the termination of certain service providers (i.e., accountant, enrolled actuary, insurance carrier, custodian, administrator, investment manager, trustee; See: 1987 Form 5500 items 15a, b and c). The Schedule C is required to be filed only by those plans required to file the Form 5500 (plans with 100 or more participants).

**III. Summary of Comments on Proposed Forms**

The Agencies received a number of comments, suggestions and recommendations concerning the revisions to the Form 5500 Series published in the **Federal Register** on September 19, 1988 (51 FR 33500). In general, most commentators, while supporting the Agencies' efforts to simplify the forms and reduce burden hours, expressed the view that the proposed forms continued to be too detailed and complex and, if implemented, would not result in significant reductions in burden hours or costs. A number of commentators suggested modifications to the reporting requirements which would, in the view of the Agencies, require legislative changes to implement (e.g., increasing the threshold for simplified reporting from 100 participants to 250 or 500 participants, and the elimination of certain schedules required to accompany the annual report, such as the schedule of "assets held for investment") and, accordingly, are beyond the scope of this forms revision initiative. Other commentators questioned, generally and specifically, the need and/or usefulness of the information required to be reported on the forms. Many commentators, recognizing the need for certain information, submitted recommendations and suggestions for simplifying and/or clarifying the forms generally, specific items on the forms, and the instructions to the forms.

As explained in the Supplementary Information section accompanying the Agencies' September 19, 1988 **Federal Register** publication of the proposed revisions to the Form 5500 Series, the Form 5500 Series is the principal source of information and data concerning the operations of 900,000 employee benefit plans, covering an estimated 58 million participants and beneficiaries with assets estimated at $1.4 trillion. Accordingly, the Form 5500 Series information and data necessarily constitute an integral part of each Agency's enforcement, research and policy development programs. The return/reports also serve as the primary means by which the operations of plans can be monitored by participants, beneficiaries and the general public. The ability of the Agencies to effectively and efficiently utilize information reported on the Form 5500 Series, as well as the importance of filers reporting complete and accurate annual report information, will increase significantly with the implementation of a new ERISA database system for processing, analyzing and verifying the Form 5500 Series. While the Agencies were unable to adopt all the submitted suggestions and recommendations for simplification of the forms, the Agencies, in an effort to facilitate both compliance with the annual reporting requirements and the processing of annual reports, have made certain format changes to the forms and, in response to comments, have attempted to clarify the instructions accompanying the forms. In addition, the Agencies are exploring various means by which to provide general information and technical guidance on completing the Form 5500 Series to assist filers in carrying out their statutory annual reporting obligations.

BEST COPY AVAILABLE

In addition to a number of general comments relating to the statutory and regulatory annual reporting scheme, the Agencies received a number of comments relating to specific elements of the proposed revisions to the Form 5500 Series. The following is a form by form, subject by subject, summary of the major comments received by the Agencies on the September 19, 1988 proposed revisions. To avoid having to duplicate comments, and discussions thereof, comments relating to items common to more than one form will be addressed only with respect to the first form and/or item to which the comment relates.

*A. Form 5500*

1. Identification, Plan Characteristics, Participant, and Other General Information Items

a. *General.* A few commentators suggested that identification and certain other information which rarely changes from year to year be simplified and, other than basic identification information, should not be required to be reported annually. The Agencies believe that these suggestions have merit and, while it is not administratively possible to implement the suggestions for the 1988 plan year filings, the Agencies are exploring means by which to limit the annual reporting of such information, after the information is on file, to only that information which actually changes in a given year.

A number of commentators suggested that the signature line should remain on the first page of the forms, rather than the last page as contemplated by the proposed revisions to the forms. The commentators believe that including the signature line on the first page of the forms reduces the likelihood of the signature being omitted from the forms. In an effort to reduce the number of forms rejected for a lack of signature, the Agencies decided to adopt this suggestion.

b. *CUSIP number (item 1e).* A number of commentators indicated that while providing the CUSIP number is not complex, obtaining such numbers may be time consuming, particularly for large multiemployer plans. Because the CUSIP number will both facilitate identification of plans sponsored by a controlled group of employers and afford the Agencies ready access to other data base systems containing employer financial information, the Agencies have decided to retain this item on the forms. However, the Agencies are limiting the plans required to respond to this item to single employer plans and plans of a controlled group of corporations or common control employers.

c. *Identifier and plan characteristics codes (items 3c–g of proposed form/ items 4, 6, 11, and 12 of final form).* A number of commentators indicated that the use of identifier and other codes, which require reference to the instructions to the forms, is more complicated than the check box approach utilized in the current forms and, thus does not simplify preparation, particularly for manual filers. Commentators also expressed the view that the utilization of codes adversely affects disclosure of annual report information to participants and beneficiaries who, as a general matter, do not have ready access to the form instructions. Having considered these comments, the Agencies have decided to limit their utilization of identifier and plan characteristics codes at this time. In general, the final forms reflect an expanded utilization of check boxes for purposes of identifying the type of benefits provided (e.g., dental, vision, prepaid legal, severance, uninsured death benefits, etc.) and other plan features (e.g., leveraged ESOP, common/ collective trust, etc.). However, the Agencies have adopted the utilization of identifier codes for purposes of identifying how the plan is funded (e.g., trust, insurance, general assets of employer) and how benefits are provided (e.g., trust, insurance, general assets of employer).

d. *Total participant information (item 5a of proposed form/item 7a–f of final form).* As proposed, this item merely required the reporting of total participants as of the beginning and end of the plan year. Some commentators indicated that a requirement to count participants at the beginning of the plan year would be unduly burdensome for many multiemployer plans. The Agencies, in response, have decided to drop this requirement. Another commentator indicated that the deletion of detailed participant count information, as is currently required, concerning the number of vested, nonvested, etc., participants would result in the loss of valuable information. The Agencies are persuaded that, at least with respect to large plans, the current reporting of participant information does provide valuable information to both participants and beneficiaries and the Agencies. Accordingly, the Agencies have decided not to adopt the proposed change to this information item. Because the information requested should be readily available to plan administrators, not adopting the proposed change should not result in any significant burden increases.

With regard to the same item, one commentator indicated that it was unclear as to whether "alternate payees" entitled to benefits under a qualified domestic relations order should be counted as participants. In response to this comment, the Agencies have modified the instruction to item 7 to make it clear that, for purposes of item 7, alternate payees should not be counted as participants. Another commentator indicated that the participant count for purposes of item 7 should not included non-vested participants who are separated from service. The Agencies disagree and maintain the requirement, revised to reflect statutory changes, that non-vested participants should be counted as participants until after the breaks in service period for purposes of Form 5500 Series and related schedules. PBGC uses a different approach for premium purposes. In response to similar questions concerning individuals entitled to group health continuation coverage benefits, the Agencies have modified the instructions to item 7b, concerning retired or separated participants receiving benefits, to clarify that former employees receiving continuation coverage benefits under a group health plan must be counted as participants.

e. *LM numbers (item 7b of proposed form/item 13b of final form).* Several commentators indicated that for multiemployer plans, particularly national plans which may have a large number of sponsoring labor organizations, obtaining LM numbers for sponsoring labor organizations would be time consuming, costly, and without any apparent use to the Agencies. The furnishing of the LM number on the annual return/report form provides the Agencies with the means to easily access information filed on Forms LM–2 and LM–3 (Labor Organization Annual Report) filed with the Department of Labor. The ability to access such information provides the Agencies with a valuable tool for reviewing the operations and activities of related multiemployer and union affiliated plans. While the Agencies recognize that there may be some burdens attributable to the furnishing of LM numbers, the Agencies believe that the burdens are essentially a one-time burden and, because the information should be readily available from the sponsor labor organizations, any burdens and costs attendant to gathering the information should be relatively small. Accordingly,

VOL 54 ISS 39 MR 1 1989 UMI

the Agencies have decided to retain this item on the final form.

f. *Summary plan description (SPD) (item 9c and d of proposed form/item 8d and e of final form).* The SPD item is required to be answered where there has been a plan amendment during the plan year. This item inquires whether the amendment changes the information contained in the SPD disclosures and, if so, whether disclosures reflecting the amendment have been furnished to participants and beneficiaries and filed with the Department of Labor. One commentator questioned the need for what appeared to be essentially a remainder question on SPDs. Two commentators recommended that the question be expanded to request the dates on which the SPD disclosures were furnished to participants and beneficiaries. Because of the importance of updated summary plan description information to participants and beneficiaries, the Department of Labor believes that the SPD item is important because, among other things, it does serve to remind plan administrators of their SPD disclosure obligations under ERISA, while imposing virtually no burden on filers. The Department does not believe, however, that expanding the question to include distribution dates is necessary to accomplish the objectives of the question and would result in imposing additional filer burdens. Accordingly, this item is being adopted as proposed.

g. *Number of Schedule A's (item 8 of proposed form/item 14 of final form).* This item requires the entry of the number of Schedule A's accompanying the filing. A number of commentators questioned the need for this item when the answer is easily obtained by counting the number of attachments. This item serves both to provide a means by which the filer can verify that all Schedule A's are being attached and, most importantly, a means by which the Agencies can ensure that all Schedule A's are received, processed and maintained with the appropriate annual return/report. Because such verification information is important, from a processing standpoint, where there is a great likelihood of multiple attachments, a similar question has been added to the final form with respect to Schedule C attachments (See: item 28g).

h. *PBGC coverage information (items 6e–g of proposed form/items 9g and 33a–b of final form).* Plans are required to report (1) whether they are covered under the PBGC termination insurance program, (2) if the plan has terminated and it is covered, whether it is continuing to file a PBGC Form 1 (Form 1–ES, if applicable) and pay premiums until the end of the plan year in which assets are distributed or brought under the control of PBGC, and (3) if the plan is covered or this is "not determined," the employer identification number and plan number used to identify the plan. One comment recommended that the item concerning filing of the PBGC Form 1 and payment of premiums by terminated, covered plans should be eliminated since it is only a reminder item. The Agencies have decided that this reminder is valuable in assuring that these premiums are paid and therefore the item is retained. Two comments recommended that the item requesting the employer identification number and plan number should be eliminated since it would be used infrequently. The Agencies have decided to retain this item, since it provides a valuable way to link Form 5500 and PBGC Form 1 information on covered plans and should not be a significant burden on plans.

2. Financial Statements and Related Items

a. *Statement of assets and liabilities (item 17 of proposed form/item 34 of final form).* A number of commentators questioned the need for the required detailed breakdowns of assets, and the corresponding components of income. One commentator suggested that the requested asset information is available to the Agencies in the schedule of assets held for investment accompanying the Form 5500. Other commentators questioned the absence or elimination of certain asset categories (e.g., options, futures, foreign investments, state and municipal securities). The Agencies have carefully reviewed their information needs with respect to the financial statements and that information necessary to adequately monitor the basic financial condition, investment activity, rates of return on certain investment categories, and diversification of assets of plans. In addition, the Agencies reviewed general accounting standards and practices with respect to the preparation of financial statements. On the basis of these reviews, the Agencies have decided to adopt the statement of assets and liabilities and the income and expense statements, essentially as proposed. As discussed below, however, modifications to certain items and instructional clarifications with respect to others have been adopted in response to public comment on the September 1986 proposed forms revisions.

The Department of Labor notes that the statement of assets held for investment, which is required to accompany the Form 5500, does provide information concerning certain assets held by a plan as of the end of the plan year, and acquisitions and dispositions of certain assets during the plan year; however, not all assets are required to be included as part of that schedule and the reported assets are not required to be aggregated by asset type on the schedule (*See:* 29 CFR 2520.103–11 and instructions to the Form 5500). Accordingly, while the schedule of assets held for investment provides valuable information concerning certain plan investments, it does not serve to provide a complete or consolidated composite of a plan's financial status or investment activity and, therefore, does not, in contrast to the required asset and income statements, lend itself to providing adequate information for analysis by the Agencies or disclosure to participants and beneficiaries.

One commentator indicated that it is not uncommon for a particular plan participating in a master trust to hold 100 percent participation in one particular master trust asset and suggested that a plan holding such an asset should be permitted to report that asset as a line-item asset on the Form 5500, rather than having to treat the asset as a separate master trust investment account. Because it appears that this suggestion would result in simplified reporting without affecting the integrity of the information required to be reported, the Agencies have modified the instructions relating to master trust reporting to permit the reporting of an asset(s) in a master trust which is held solely by a single plan to be reported either as a master trust investment account or as a line-item asset on the plan's Form 5500.

One commentator suggested, by reference to the limited reporting requirements for arrangements covered under sections 403(b)(1) and 403(b)(7) of the Internal Revenue Code and arrangements fully funded with allocated insurance contracts, that similar exemptions should be allowed for profit sharing and money purchase plans where assets are invested in individual, fully vested mutual fund accounts or insurance company contracts where the participant is allowed to select from a group of available investment choices. The commentator indicates that such exemption would reduce administrative burdens and that the confirmation statements provided by the mutual fund/insurance company would serve as adequate disclosure to plan participants. The Agencies have not adopted this suggestion. While the Agencies believe that individual account status statements do provide valuable information to participants and beneficiaries, the Agencies also believe that such disclosure in and of itself does not provide a sufficient basis for exempting individual participant directed-type arrangements from the general financial and other reporting requirements, which, among other things, serve to provide participants, beneficiaries and the Agencies with an overview of operations of such plans.

Other commentators suggested that the instructions be modified and/or clarified with respect to what constitutes an "allocated" insurance contract for annual reporting purposes. The clarification requested by the commentators relates to whether certain insurance contracts issued to individual participant account defined contribution plans, pursuant to which the insurance company guarantees with respect to each participant account amounts contributed, a credited interest rate and the payment of retirement benefits, are allocated or unallocated contracts for purposes of the limited exemption from annual reporting, promulgated by the Department of Labor, at 29 CFR § 2520.104–44. Section 2520.104–44 essentially permits pension plans the benefits of which are provided exclusively through allocated insurance contracts or policies, pursuant to the specific terms of which benefit payments are fully guaranteed, to be treated as fully insured plans for purposes of the annual reporting requirements (*See:* Paragraphs (b)(2) and (c) of § 2520.104–44). Plans meeting the requirements of § 2520.104–44 are, among other things, exempt from the requirements to report certain financial information on the annual report (e.g., assets, liabilities, income and expenses), the requirement to engage an independent qualified public accountant, and the requirement to include the report of such accountant as part of the annual report. It has long been the view of the Department of Labor, in interpreting the application of § 2520.104–44, that, for annual reporting purposes, "allocated" contracts include only those contracts under which an insurance company immediately assumes upon receipt of contributions or premiums fixed dollar obligations to provide the retirement benefit specified in the plan, which is payable without adjustment for fluctuations in the market value of the underlying assets (i.e., an unconditional guarantee by the insurer to provide a retirement benefit of a specified amount) and under which the participant or beneficiary obtains a legal right to such benefits which is enforceable directly against the insurance company. The reporting exemption provided by § 2520.104–44(b)(2) is premised on the fact that under such contracts the plan has effectively transferred the risk for the payment of benefits accrued to that date (i.e., the date of the contribution or premium payment) to the insurer and, accordingly, limited reporting is appropriate. The Department has not changed its views with regard to the term "allocated" contract for purposes of § 2520.104–44(b)(2). In this regard, the Department, in response to the issues raised by the commentators, has added a clarifying "note" to the general instructions (Section 2, Part B "What to File," Subpart 1 "Pension Benefit Plan"). In response to comments, the Agencies also have revised the instructions to the forms to clarify that the method for determining the value of unallocated contracts may be the same method utilized in determining the amount reported in item 6e of the Schedule A (*See:* instructions to item 34c(xiv)).

Also in response to comments, the Agencies have attempted to clarify, by example, investments which might be reported as "other" (*See:* instruction to item 34c(xiii)), and, under the liabilities portion of the statement, what constitutes a "benefit claims payable" (*See:* instruction to item 34g).

In an effort to simplify reporting, certain pooled investment arrangement line items appearing on the proposed Form 5500 (*See:* items 17c(v), re: shares of registered investment companies, and 17c(x)(A), (B), (C), and (D) re: values of interest in common/collective trusts, pooled separate accounts, master trusts and 103–12 investment entities, of the proposal) have been combined into a single line item "value of interest in certain investment arrangements" (*See* item 34c(xi) and instructions thereto of final form). A corresponding change was made to the income statement (*See:* item 35b(vi) "net investment gain (loss) from certain investment arrangements" and instructions thereto of final form). In this regard, the instructions to income item 35b(vi) are intended to clarify the reporting of income with respect to registered investment companies, i.e., registered under the Investment Company Act of 1940, as requested by one of the commentators. Finally, the Agencies have added an instruction to emphasize that the collectibility of receivables must be taken into account in valuing those assets (*See:* instruction to 34b). The value of employer contributions due to be received, for example, should also reflect appropriate allowances for collectibility. This would include such factors as the age of the receivable and the financial status of the employer, including the effect of any bankruptcy proceeding.

b. *Statement of income and expenses (item 18 of proposed form/item 35 of final form).* As explained above with respect to the statement of assets and liabilities, the Agencies have, with minor modifications and some clarifications, adopted the income and expense statements essentially as proposed. Those comments and changes relating to the income and expense statement which were not referenced in the above discussion are discussed below.

Some commentators suggested that, with regard to non-cash contributions, a disclosure be made on the form as to the nature of the contribution. The Agencies have not adopted this suggestion in view of the fact that such information is generally required to be disclosed in the accountant's opinion which is required to accompany the Form 5500 and which is required to be made available or furnished to participants and beneficiaries in response to a request to examine or receive a copy of the latest annual report of the plan (*See:* ERISA sections 104(b)(2) and (4)).

Other commentators suggested with respect to the expense statement that the "benefit payment" item be expanded to include a category for hardship withdrawals and transfers to individual retirement accounts. The Agencies have not adopted this recommendation. The Agencies believe that "benefit payment" expense item "other" (*See:* item 35e(iii)) is at this time sufficient for the reporting of benefit-related payments. However, in response to the suggestion of one commentator, reconciliation item (*See:* item 35j and related instruction) has been added to the form to account for the receipt and disbursement of those amounts which do lend themselves to being characterized as either contributions/investment income or administrative/benefit expenses (e.g., amounts received or disbursed as a result of a plan merger or spin-off, etc.). This item was added to minimize distortions in the benefit payment category and evaluating overall plan performance that might otherwise result from the receipt or disbursement of such amounts.

The majority of comments on the income/expense statement related to the detailed break out of administrative expenses (*See:* item 35g). Some commentators believed that the detailed break out of administrative expenses would be very useful. Other

VOL 54 ISS 39 MR 1 1989 UMI

commentators felt that such a break out was unnecessary and burdensome. A number of commentators suggested that the information was duplicative of the information required to be reported with respect to service providers on the Schedule C. The Agencies have adopted the administrative expense item (item 35g) as proposed. The Agencies believe that a specific break out of administrative expenses by the category of the expense (e.g., accounting fees, actuarial fees, legal fees, etc.) is critical to determining the overall reasonableness of the amounts paid for specific services. The information required to be reported with respect to service providers on the Schedule C relates only to service providers receiving $5,000 or more during the plan year; accordingly, not all administrative expenses relating to a particular category of expense would be available if the reporting of administrative expenses were limited to that information required to be reported on the Schedule C.

One commentator recommended that an item be added to determine the amount of administrative expenses paid by the plan sponsor, rather than the plan. The Agencies have adopted this suggestion in part by adding a new "yes/no" item (*See:* item 36) which asks whether any administrative expenses were paid by the employer sponsoring the plan. The Agencies believe that this item is sufficient to account for any distortions in administrative expenses that might otherwise result from a plan sponsor's payment of such expenses.

*c. Party-in-interest transactions (items 21 a and b of proposed form/ items 29 c, d and 30 e, f of final form).* As proposed, item 21a asked whether the notes to the financial statements accompanying the accountant's opinion disclose any transactions with parties-in-interest. If the answer to 21a is "yes," the amount involved in the transaction(s) was required to be reported in the appropriate category (e.g., securities other than qualifying employer securities, real estate other than qualifying employer real property, mortgages, etc.). Proposed item 21b asked whether the plan engaged in non-exempt transactions with parties-in-interest not reported in 21a, and if the answer is "yes" a schedule of such non-exempt transactions was required to be completed in accordance with the instructions. One commentator expressed concern that the proposed change resulted in requiring disclosure of only those party-in-interest transactions identified by the accountant. The commentator also indicated that moving the party-in-interest disclosures from the assets and liabilities section of the financial statements should be permitted only if all exempt and non-exempt transactions are required to be reported. Other commentators indicated that the proposed changes in the reporting of party-in-interest transactions might be more burdensome in view of the fact that only non-exempt transactions were required to be reported in prior years by Form 5500 filers and that, if the information was in the accountant's notes, it would be duplicative to also report the information on the forms.

The Agencies believe that the general apppproach proposed with respect to the reporting of party-in-interest transactions does provide for adequate disclosure of such transactions. For instance, as the reporting alternative to the information currently reported in the existing asset column, information about specific party-in-interest transactions is required to be reported on lines 29 and 30 (including addition of 29(d) seeking the amount involved in transactions reported in 29(c), specific reporting of employer related securities and real estate on line 34(d), and identification by asterisk of party-in-interest transactions on the schedules required by lines 30 a, b, c, d, e, and f). Accordingly, the Agencies have, with some modification, adopted the same approach for purposes of the final form. Items 29 c and d of the final form have replaced item 21a(f)–(vii) of the proposed form. Item 29c, which appeared on the 1987 Form 5500 as item 22d, specifically asks for a "yes"/"no" response to whether the financial statements or notes to the financial statements accompanying the report disclose, among other things, significant real estate or other transactions in which the plan and the sponsor, plan administrator, employers or employer organizations are jointly involved, and whether the plan has participated in any related party transactions. This item is intended to conform to those disclosures typically included by the accountant in the financial statements or notes to such statements.

Item 29c provides, through a simple "yes"/"no" question, for the identification of certain significant transactions on the form which have been identified by a source independent of the plan administrator (i.e., the independent qualified public accountant), without imposing any measurable burdens on either the administrator or accountant. In lieu of requiring the detailed break-out of the transactions identified in the accountant's financial statements or notes, as in item 21a(i)–(vii), item 30d of the final form merely requires the reporting of the total amount of the transactions. The Agencies believe that the reporting of the total amount of such transactions will be sufficient to identify potential problems in this area. Item 21b of the proposed form required a schedule of only those non-exempt transactions not reported in the accountant's financial statements and/ or notes. As pointed out by a couple of commentators, it is unlikely that the accountant's financial statements or notes would typically specify whether a party-in-interest transaction is subject to an exemption or not. Accordingly, the form has been modified to require that a schedule be completed by the plan administrator with respect to all non-exempt party-in-interest transactions during the plan year (including those involving publicly traded securities), whether or not such transactions have generally been identified in the accountant's financial statements or notes (*See:* items 30 e and f and related instructions).

The Agencies do not believe that a listing of all exempt transactions is necessarily useful as part of the annual report because the availability of each exemption is conditioned on the satisfaction of those conditions set forth in the exemption, as well as the accuracy of the representations made in connection with the granting of an individual exemption; accordingly, determining compliance with any given exemption would, in the absence of imposing significant reporting burdens on filer, be very difficult to determine through the annual reporting process. The Agencies have other means, which are more efficient and effective, by which to verify compliance with available exemptions.

3. Service Provider Information (Items 19 and 23 of Proposed Form/Item 28 of Final Form)

a. *Service providers receiving $5,000 or more in compensation.* Item 23 of the proposed form reflected the Agencies decision to increase the threshold amount for reporting service provider information from $600 in a plan year to $5,000 in a plan year. Many of the comments relating to the reporting of this information on the Schedule C supported the Agencies' proposed change. On the basis of these comments and the Agencies' continued belief that an increase in the compensation threshold will result in the reporting of more useful information to the Agencies, as well as participants and beneficiaries, the Agencies are adopting this item without change (*See:* item 28a of the final form). The listing of service providers is reported in Part I of the new Schedule C.

b. *General termination in appointment information.* Items 19a–c of the proposed form are identical to the questions which appeared on the Form 5500 in prior years with respect to providing information on the termination of certain service providers to the plan. Items 19a–c specifically ask: whether there has been a termination of a trustee, accountant, insurance carrier, enrolled actuary, administrator, investment manager or custodian; for the identification of the terminated party (i.e., name, address and telephone number); for an explanation of the termination; and whether there are any outstanding material disputes or matters of disagreement concerning the termination. A number of commentators suggested that changes in service providers generally are undertaken for a variety of legitimate reasons in the normal course of plan administration and, therefore, questioned the need for such information. Other commentators indicated there was insufficient space allotted on the form to provide the requested information concerning terminated service providers.

The Agencies have decided to retain these questions without change for Form 5500 filers (*See:* items 28c–e of the final form). First, the Agencies note that section 103(c)(4) specifically mandates that an administrator include as part of the annual report an explanation for the termination of the persons delineated in item 28d. Second, while the Agencies recognize that changes in service providers can take place for a variety of legitimate reasons, the Agencies believe that the requested information, particularly the explanation of the termination, does provide useful information concerning the general practices of a plan and does serve as a means by which to identify those practices which may not be in the best interest of the plan or its participants and beneficiaries. In response to a comment noting insufficient space on the form for the requested termination information, the Agencies, in an effort to provide more space for the requested information, have modified the new Schedule C to accommodate this information (*See:* Part III of Schedule C).

c. *Termination of Accountant/ Actuary (item 19d of proposed form/ item 28f of final form).* Item 19d (and the instructions thereto) of the proposed form required that the plan administrator include as part of the annual report a letter from any accountant or enrolled actuary who had been terminated, stating the reasons for the termination. A number of commentators indicated that the requested letter from the terminated accountant or actuary should not be required as part of the annual report in view of the fact that a terminated accountant or actuary may be uncooperative in providing such a letter or reluctant to state reasons for the termination. The commentators noted that having to obtain such a letter may be very difficult, if not impossible, and may, as a result of delays in receiving such letter, cause delays in the filing of the annual report. One commentator noted that, if a professional believes that a termination was without cause, the terminated professional should be able to notify the Department of Labor directly.

The Department of Labor believes that accountants and actuaries represent a valuable and independent source of information concerning the operations and activities of employee benefit plans. In this regard, it is noted that ERISA sections 103(a)(3)(A) and 103(a)(4)(A) specifically require that, with certain exceptions, the administrator of a plan is to engage an independent qualified public accountant and an enrolled actuary, respectively, on behalf of all plan participants and beneficiaries. Accordingly, the Department believes that the termination of an accountant and/or actuary is a significant event and that the views of the terminated accountant or actuary as to the reasons for their termination will be useful in identifying potential abuses. However, the Department also agrees with those commentators who indicated that requiring administrators to obtain, and include as part of a plan's annual report, a letter from a terminated accountant or actuary stating the reasons for the termination may result in significant burdens on the plan administrator. The Department, therefore, has modified the requirements of the final form (*See:* item 28f) to merely require that the administrator furnish the terminated accountant and/or actuary a copy of the administrator's explanation for the termination, as set forth on Schedule C, along with a notice advising the accountant/actuary of the opportunity to provide comments on the furnished explanation directly to the Department of Labor (*See:* model notice in instructions to item 28f). The Department believes that this change accommodates both the needs of the Department and the concerns expressed by the commentators in this area.

4. *Reportable transactions (item 26a(iv) of proposed form/item 30d of final form).* As proposed, item 26a(iv) required the reporting of any transaction or series of transactions involving in excess of 5 percent (rather than 3 percent) of the current value of plan assets. The Department of Labor has adopted this item as proposed (*See:* item 30d of final form). Comments concerning this item are discussed in connection with the adoption by the Department of Labor of amendments to 29 CFR § 2520.103–6 appearing in today's **Federal Register**.

*B. Form 5500–C/R*

1. Identification, Plan Characteristics, Participant, and Other General Information Items (*See:* Form 5500 Discussion Relating to These General Items)

2. *Financial statements and related items*

As proposed, the Form 5500–C required plans with 25 or fewer participants to report only summary financial information (i.e., total assets, liabilities, net assets, income, expenses, net income (loss) and contributions for the plan year) and plans with 26 to 99 participants to complete the more detailed financial statements (*See:* items 18, 19, 24 and 25 of the proposed form). The proposed Form 5500–R also included a requirement that all plans filing the form report summary financial information identical to that to be reported by plans with 25 or fewer participants on the proposed Form 5500–C.

A number of commentators indicated that the limited financial reporting provided for plans with 25 or fewer participants on the proposed Form 5500–C would result in a reduction of reporting burdens. However, many of the same commentators also indicated that the addition of financial information to Form 5500–R would increase reporting burdens for many small plans and offset any burden reductions that may have resulted from the simplified reporting on the proposed Form 5500–C. Some commentators felt that adding financial information to the Form 5500–R would defeat the intended purpose of the triennial filing scheme. A number of commentators recommended that the limited financial reporting provided on the proposed Form 5500–C for plans with 25 or fewer participants be extended to all plans with fewer than 100 participants. Other commentators indicated that the simplified financial reporting provided for plans with 25 or

VOL 54 ISS 39 MR 1 1989 UMI

fewer participants would not result in any reductions in burdens because completion of the summary financial information items required virtually the same steps as those that would be required to complete the detailed financial statements.

Taking into consideration the importance of the information contained in the detailed financial statements to assure tax compliance for small plans and what appears, from some comments received on the proposed forms revisions, to be little difference in those burdens attributable to completing the detailed financial statements and those attributable to completing the summary financial statements, the Agencies have decided not to adopt, for purposes of the Form 5500–C, the summary financial statement reporting requirement for plans with 25 or fewer participants.[8] The Agencies, however, have decided to adopt, essentially as proposed, the requirement for the reporting of summary financial information on the Form 5500–R (*See:* items 13 and 14 of the Form 5500–R). The only modification to the proposed summary financial information is the addition of a line item for "total benefits paid" (*See:* item 14e of final Form 5500–R). This modification was adopted to permit the Agencies, and participants and beneficiaries, to distinguish between benefit payment expenses and those expenses related to the actual administration of a plan.

While a number of commentators indicated that the reporting of the proposed summary financial information on the Form 5500–R would increase burdens for small plan filers and, in effect, negate the benefits of the triennial filing system, the Agencies do not agree. First, the absence of any financial information on the Form 5500–R has over the past several years effectively precluded the Agencies, as well as participants and beneficiaries, from undertaking any type of current analysis of the financial condition of those plans filing the Form 5500–R. The Agencies believe that the availability of financial information on the Form 5500–R, albeit summary in nature, will significantly enhance the ability of both the Agencies and the participants and beneficiaries in small plans, to monitor, on a current annual basis, the financial condition and activity of such plans, while imposing little, if any additional burden on small plan filers. Second, the Agencies continue to believe, as indicated in the supplementary information accompanying the September 19, 1988 proposed forms revisions, that the requested financial information is prepared and maintained in the normal course of prudent plan operations and, therefore, the entry of the information on the form should not result in any increase in burdens or costs to affected plans.[8] This conclusion is supported, in part, by the fact that at least 50 percent of small plan filers currently elect to file the Form 5500–C, which requires the completion of detailed financial information, every year, rather than only every third year as permitted under the triennial filing system. The Agencies also believe that, even with the addition to the Form 5500–R of summary financial information, the differences in the information required to be reported on the Form 5500–C and the Form 5500–R is such that reduced reporting burdens will result for many plans electing to take advantage of the Form 5500–C/R triennial reporting system, as opposed to the filing of the Form 5500–C on an annual basis.

Lastly, the Agencies note that the deletion of certain reporting items for 5500–C filers will also reduce reporting burdens. In this regard, the Department of Labor believes that the interests of both the Department and plan participants are protected by section 107 of the Act which requires plans to preserve and make accessible all information which would be reported absent an exemption or simplified reporting requirement.

3. Miscellaneous Items

a. *Service provider information.* Item 28 of the proposed Form 5500–C asked whether, since the end of the plan year covered by the last return/report Form 5500 or 5500–C (or during this plan year, if this is the initial return/report), any person who rendered services to the plan received directly or indirectly more than $2,500 in compensation during the plan year (except for employees of the plan who were paid less than $1,000 per month). This information was required to be reported in the service provider section of the Schedule C. However, upon reevaluating the information needs of the Agencies, as they relate to small plans, and taking into consideration the availability of such information upon examination of such plans, the Agencies have decided not to require Form 5500–C filers to report service provider information at this time.

b. *Service provider termination information.* Item 22 of the proposed Form 5500–C, like item 19 of the proposed Form 5500, asked for information concerning any trustee, administrator, accountant, investment manager, insurance carrier, custodian and enrolled actuary terminated during the plan year, an explanation of reasons for the termination and whether there have been any outstanding material disputes or disagreements concerning the termination, and, in the case of a terminated accountant or actuary, whether a signed letter from the terminated accountant or actuary is attached explaining the reasons for the termination. Taking into consideration the comments received concerning the service provider termination items and a review of the Agencies' informational needs for small plans, the Agencies have decided not to require Form 5500–C/R filers to file information concerning terminated service providers. The Agencies believe that the availability of such information upon examination of the books and records of small plans is adequate at this time.

c. *Party-in-interest transactions.* Item 26e of the proposed Form 5500–C asked whether, except for publicly traded securities, the plan engaged in non-exempt transactions with parties in interest. If the answer is "yes," a schedule of such transactions, prepared in accordance with the instructions, was required to be completed. In an effort to further simplify reporting for small plans, the Agencies have modified this question on the final forms by adding "yes"/"no" questions which ask whether, during the plan year, there has been any sale, exchange, or lease of any property or any loan or extension of credit between the plan and the employer, any fiduciary, any of the five most highly paid employees of the employer, any owner of a 10% or more interest in the employer or relatives of any such persons (*See:* item 29c and d of the final Form 5500–C); As adopted, item 29c and d does not require the administrator to distinguish between exempt and non-exempt party in interest transactions, nor is a schedule of the transactions required to accompany the Form 5500–C filing. However, if a "yes" response is required, the amount of such transaction(s) is also required to be provided.

[8] In addition to the solicitation of comments on the Agencies' forms revisions proposal published in the **Federal Register** and the receipt of testimony at the joint Agency public hearing on the proposed forms revisions, the Internal Revenue Service, with participation by the Office of Management and Budget, conducted a number of public symposia relating to, among other things, the Form 5500 Series. Public comments received at those symposia appeared to support the proposition that essentially the same information and process required to complete the detailed financial statements is necessary to the completion of the proposed summary financial statements. Therefore, it would appear that little, if any, increase in burdens would result from requiring all plans to complete the detailed, rather than the proposed summary, financial statement.

[8] The Department of Labor notes that ERISA section 107, relating to the retention of record, requires "every person subject to a requirement to file any description or report * * * *or who would be subject to such a requirement but for an exemption or simplified reporting reporting requirement under section 104(a)(2) or (3)* of this title [Title I], shall maintain records on matters of which disclosure is required which will provide in sufficient detail the necessary basic information and data from which the documents thus required may be verified, explained, clarified and checked for accuracy and completeness. * * *" (Emphasis supplied). The statutory basis for the prescription of simplified annual reporting for pension plans with fewer than 100 participants and small welfare plans in ERISA section 104(a)(2) and (3). Accordingly, whether or not the detailed financial information required to be included in an annual report pursuant to ERISA section 103 is required to be reported on the Form 5500 Series, records relating to these requirements are required to be maintained in accordance with the record-keeping requirements of section 107.

*C. Schedule A (Insurance Information)*

A number of commentators suggested elimination or modification of the Schedule A on the basis that the plan administrator is dependent on the insurance company to provide the information necessary to complete the Schedule and some insurance companies do not provide the required information in a timely manner and others do not provide it at all, thereby putting the administrator in the difficult position of having position of having to decide whether to file the annual report without the Schedule A information or delay their annual report filing. It is the view of the Agencies that compliance with annual reporting requirements requires the filing of a complete, accurate and timely annual return/report, which includes that information required to be reported on the Schedule A. Accordingly, plan administrators and fiduciaries are obliged to take any and all steps reasonably necessary to secure the Schedule A information. In this regard, it should be noted that, with respect to the obligation of insurance carriers to furnish the Schedule A information, ERISA section 103(a)(2) specifically provides that, if some or all of the information necessary to enable the administrator to comply with the requirements of Title I of ERISA is maintained by an insurance carrier or other organization which provides some or all of the benefits under a plan or holds assets of the plan in a separate account, such carrier is required to transmit and certify the accuracy of such information to the administrator within 120 days after the end of the plan year. Therefore, the failure or refusal by an insurance carrier to provide the required Schedule A information to the plan administrator in a timely manner would constitute a violation of the requirements of Title I of ERISA, with respect to which plan fiduciaries may pursue the statutory remedies provided in section 502(a)(3). Administrators are advised that in no event should annual return/report filings be delayed pending receipt of the Schedule A information beyond the date on which the report is due (including any extensions granted by the Internal Revenue Service). Rather, the administrator should complete the Schedule A, to the extent possible, and file a timely return/report noting any deficiencies in the Schedule A, the carrier and the steps being taken to secure the required information. Upon the receipt of the deficient Schedule A information by the plan administrator, the administrator should file an amended return/report in accordance with the instructions to the forms.

One commentator requested that the Department of Labor reconsider its position, as set forth in Advisory Opinion No. 86–17A, on the reporting of certain "excess commissions" on the Schedule A. Another commentator noted that, if Opinion No. 86–17A is the Department's position on the reporting of "excess commissions", the instructions to the Schedule A should be modified to clearly reflect that position. Opinion No. 86–17A addressed the issue as to whether certain compensation or fees (referred to as "excess commissions") received by insurance brokers, which might be calculated on a percentage of new business and/or renewal business obtained in one year, or on the increase in premiums earned by a broker in one year over a prior year, or on the total business managed by a broker, are required to be reported on the Schedule A, even though such commissions do not compensate the broker for the placement of a particular contract with an employee benefit plan. In Opinion No. 86–17A the Department concluded that, because the "excess commissions" described in the letter would be calculated taking into account contracts with employee benefit plans and such commissions are not paid for managing an agency or for performing other administrative functions (exceptions provided in the instructions to the Schedule A), the excess commissions are required to be reported on a proportionate basis on the Schedule A of a plan's annual return/report. In the course of its review of the annual reporting requirements and the public comments received on the proposed revisions to the Form 5500 Series, the Department did review the extent to which insurance fees and commissions should be required to be reported on the Schedule A. On the basis of this review, the Department has concluded that, consistent with its views expressed in Opinion No. 86–17A, all fees and commissions directly or indirectly attributable to a contract between a plan and an insurance company, insurance service or similar organization should be reported on the Schedule A. Therefore, the Department has retained the requirement that "excess commissions", as described in Opinion No. 86–17A, must be reported on the Schedule A. The instructions to the Schedule A have been revised to clarify the required reporting of such amounts.

*D. Schedule B (Actuarial Information)*

The proposed Schedule B required that certain values, previously reported by all plans as of the beginning of the plan year, would be reported by single employer plans as of the end of the plan year. Multiemployer plans would continue to report these values as of the beginning of the plan year. The items affected were the current value of assets accumulated in the plan (item 6c), the present value of vested benefits (item 6d), and the present value of nonvested accrued benefits (item 6e). Comments stated that end-of-year assets are reported on the main form and therefore requiring this on the Schedule B would be redundant. Comments further stated that requiring the actuary to enter this value on the Schedule B would result in delays and increased requests for filing extensions if the actuary had to wait to obtain this value from the plan administrator in order to complete the Schedule B. Comments indicated that requiring end-of-year valuations, in order to report vested benefits and nonvested accrued benefits as of the end of the year, would result in significant additional costs and burden for many plans, since most plans perform their valuations as of the beginning of the plan year. Several comments requested that projections of actuarial values to the end of the plan year be allowed, and one comment suggested that an end-of-year requirement that allowed projections would not represent a significant burden for many plans. In response to these comments, the Agencies have decided not to require end-of-year reporting of these values at this time. All plans will continue to report these values as of the beginning of the plan year.

Another change to the Schedule B requires plans to separate amortization charges to the funding standard account into those charges due to funding waivers (item 9c(i)) and those charges due to other than funding waivers (item 9c(ii)). Unamortized balances are similarly required to be separated. The response to this item was favorable; no

VOL
54

39
MR
1
1989
UMI

one indicated that it would be burdensome to the plans. The Agencies have accordingly decided to adopt this change.

A new instruction was added to item 9j to clarify that a funding waiver request(s) pending with the IRS is not to be reported in this item until the waiver(s) is granted. One comment indicated that the wording of the instruction suggested that only waived minimum funding amounts could be included in this item, and stated that actuaries use this item to report amounts due to other occurrences. The Agencies have changed the instruction to recognize that other credits are reported in this item.

Some comments were focused on the fact that the instructions for item 7 did not reflect the overview. The instructions have been revised to provide that only contributions that have actually been made are to be reported in item 7. The change is being made so that the Schedule B will properly reflect whether a funding deficiency exists. Oftentimes, the Agencies have found that the reported contributions (reported as "to be made by" a specified date) were, in fact, not made. However, by the time this fact is discovered, a significant period of time has elapsed. The revised instructions should enable the Agencies to address in a more timely manner the failure to make contributions to a plan.

Some comments focused on the addition of line 8(c) which asks for the unfunded liability for spread gain methods. This item has been added to test for compliance with the requirements of section 1.412(c)(3)–1(b)(1) of the Income Tax Regulations (relating to the basic funding formula). Prior to the change, the Schedule B did not contain sufficient information to test whether this requirement was met for a plan that was funded using a spread gain method that had an unfunded liability (e.g., the frozen initial liability method).

*E. Schedule C (Service Provider and Trustee Information)*

The Schedule C is essentially a Department of Labor schedule to be used for the reporting of certain service provider and trustee information. As proposed, Part I of the Schedule was, in the case of Form 5500 filers to be used for the reporting of service providers receiving $5,000 or more duiring the plan year and, in the case of Form 5500–C filers, service providers receiving more than $2,500 or more during the plan year. Part II of the proposed Schedule C was to be used for the reporting of the name and address of each plan trustee. In addition to other changes to the Schedule C, the Department of Labor, as indicated above, has, on the basis of a review of its informational needs, decided to limit the reporting of the information required on the Schedule C to only Form 5500 filers. Accordingly, plans with fewer than 100 participants filing the Form 5500–C will not be required to file a Schedule C as part of their return/report. The Department also has decided, with respect to that information required to be reported on the Schedule C, to adopt the proposed increase in the compensation reporting threshold for reporting service provider information from $800 to $5,000 during the plan year (*See:* above discussion of item 28a of the final Form 5500).

With respect to Part I of the proposed Schedule C, a few commentators suggested that the requirement to report service provider information was burdensome and should be eliminated. One commentator suggested that the information should be reported on the form, rather than on a new Schedule. Other commentators indicated that the service provider information provides a useful clarification of the elements comprising the operating costs of plans and should be retained as a reporting requirement.

With the exception of the increase in the threshold amount for reporting service provider information, the service provider information required to be reported on the Schedule C is identical to that information which has, since the inception of the Form 5500 Series, been required to be reported by Form 5500 filers (*See:* item 12 of 1987 Form 5500). Over the past several years, the Department of Labor has identified a number of abuses by employee benefit plan service providers (e.g., excessive and duplicative fees, payment of kickbacks to plan fiduciaries, etc.). As a result of the number of abusive practices identified in the service provider area, the Department of Labor has included service provider investigations as a major component of its ERISA Enforcement Strategy Implementation Plan (December 1988). The abuses in the service provider area and the importance of adequate service provider information as part of the Form 5500 Series was recognized in the report of the President's Commission on Organized Crime (*See:* Report to the President and the Attorney General, *The Edge: Organized Crime, Business, and Labor Unions*). Thus, it is the view of the Department that the service provider information required to be reported on the Schedule C is a valuable source of information to the Department, as well as other Federal agencies and participants and beneficiaries. Moreover, the Agencies continue to believe that utilizing a separate schedule for the reporting of service provider and trustee information will facilitate compliance by plans and data entry of reported information by the Agencies. For these reasons, the Agencies have decided to retain the service provider reporting requirements for Form 5500 filers, with the reporting of such information on the Schedule C (*See:* Part I of Schedule C).

However, in response to various comments suggesting the need for clarifications in the instructions relating to the reporting of service provider information, the Agencies have modified the instructions to Schedule C. Specifically, the instructions to Part I of the Schedule C have been modified to clarify that, in the case of service providers which are business entities (e.g., corporations, partnerships, etc.), information relating to the business entity is to be reported rather than the employees of the business entity who are servicing the plan on behalf of the entity. The instructions also have been modified to clarify that the $5,000 compensation threshold for reporting service provider information is to be determined on the basis of the total aggregate compensation paid to a service provider during the plan year and not on the basis of whether any one service provided by the individual or entity resulted in a payment or payments of $5,000 or more by the plan. The revised instructions further clarify the types of payments which are and are not required to be reported on the Schedule C. For example, the instructions clarify that amounts paid by an employer-plan sponsor to its employees for services provided to the plan are not required to be reported on the Schedule C to the extent that the payment of such amounts do not constitute a direct or indirect expense of the plan. The instructions also clarify that information relating to the payment of certain fees or commissions (such as a "finder" fee) paid by a service provider to an independent agent is required to be reported on the Schedule C, if the amount paid is $5,000 or more during the plan year.

With respect to the reporting of trustee information (i.e., the name and address of each plan trustee), a number of commentators indicated that such reporting was a duplication of that information already required to be reported in the summary plan description and Schedule P and, therefore, should be eliminated or modified. Other commentators felt that the reporting of current trustee information as part of the annual report would provide useful, up-to-date information, particularly, according to one commentator, in view of the turnover of trustees on some funds. The Agencies believe that current trustee information is important to both the Agencies and plan participants and beneficiaries. While the summary plan description is required to contain trustee information, the information included as part of the summary plan description, which principally serves to disclose, in narrative form, plan information to participants and beneficiaries, does not lend itself to computer-entry to the same degree as that information reported on the Form 5500 Series. Accordingly, the access to information through the summary plan description is limited, in addition to being complicated by the fact that summary plan descriptions are being amended on a regular basis and updated summary plan descriptions are not required to be furnished to participants and beneficiaries or filed with the Department of Labor except at five or ten year intervals. However, the reporting of trustee information as part of the annual report, in conjunction with the implementation by the Agencies of a new expanded data base system for the 1988 plan year Form 5500 Series filings, will provide the Agencies with the ability to easily access current trustee information. Other commentators suggested utilization of the Schedule P for trustee information. The Schedule P is an IRS form for the reporting of certain trustee/custodian information. However, because the Schedule P is an optional filing applicable only to trustees and custodians of organizations qualified under Code section 401(a) and exempt from tax under Code section 501(a), the Schedule P would not serve as a complete or reliable source of current trustee information. For these reasons, the Agencies are adopting Part II of the proposed Schedule C without modification. The Agencies, however, will in the future, be reviewing the feasibility of some form of exception reporting in this area (e.g., reporting only changes in the trustee information annually).

As noted earlier, a new Part III has been added to the Schedule C for inclusion of explanations of terminations of certain service providers to plans.

**IV. Regulations Relating to the Final Forms**

In the supplementary information accompanying the September 19, 1986 publication of the proposed forms revisions in the **Federal Register**, the Department of Labor noted (51 FR 33503) that the proposed forms contemplated adoption of a proposed regulation (§ 2520.103–12) providing a limited exemption from, and alternative method of compliance with, the reporting and disclosure requirements of Title I of ERISA for plans which invest in certain entities whose assets would be deemed "plan assets" under the Department's regulation defining "plan assets" (29 CFR 2510.3–101). Regulation § 2520.103–12 was adopted and published in the **Federal Register** on November 13, 1986 (51 FR 41285).

For purposes of Title I of ERISA, the filing of a completed Form 5500 (including the report of an independent qualified public accountant and any required statements and schedules) by plans with 100 or more participants constitutes compliance with the limited exemption and alternative method of compliance prescribed in paragraph (b) of 29 CFR 2520.103–1, promulgated in accordance with the authority granted the Secretary under sections 104(c)(3) and 110 of ERISA. The filing of a completed Form 5500–C or Form 5500–R, as appropriate, constitutes compliance with the simplified annual reporting requirements prescribed at 29 CFR 2520.104–41, adopted pursuant to the authority granted the Secretary under sections 104(a)(2)(A) and 104(a)(3) (*Also see:* 29 CFR 2520.103–1(c)). In the supplementary information accompanying the 1986 proposed forms revisions (51 FR 33503), the Department of Labor also noted that certain amendments to the annual reporting regulations would be necessary to accommodate certain proposed revisions to the forms. These amendments were published in the **Federal Register** for public comment on January 2, 1987 (52 FR 84). A document containing amendments to the annual reporting regulations adopted by the Department of Labor appears in this same separate part of today's **Federal Register**. These amendments are effective for reporting for plan years beginning on or after January 1, 1988.

**Paperwork Reduction Act**

These forms contain information collection requirements. They have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511). The Form 5500 Series Annual Report of Employee Benefit Plans has been assigned Control No. 1210–0016.

**Statutory Authority**

Accordingly, pursuant to the authority in sections 101, 103, 104, 109, 110 and 4065 of ERISA and sections 6039D and 6058 of the Code, the Form 5500 Series Annual Return/Report and the instructions thereto are adopted as set forth below.

Signed at Washington, DC, this 23rd day of February, 1989.

**David M. Walker,**

*Assistant Secretary for Pension and Welfare Benefits, U.S. Department of Labor.*

**Robert I. Brauer,**

*Assistant Commissioner, Employee Plans and Exempt Organizations, Internal Revenue Service.*

**Kathleen P. Utgoff,**

*Executive Director, Pension Benefit Guaranty Corporation.*

Pension Benefit Guaranty Corporation

# Annual Return/Report of Employee Benefit Plan (With 100 or more participants)

This form is required to be filed under sections 104 and 4065 of the Employee Retirement Income Security Act of 1974 and sections 6039D, 6057(b), and 6058(a) of the Internal Revenue Code, referred to as the Code.

▶ For Paperwork Reduction Act Notice, see page 1 of the instructions.

OMB No. 1210-0016

**1988**

This form is open to public inspection.

For the calendar plan year 1988 or fiscal plan year beginning , 1988, and ending , 19

If your plan year changed since the last return/report filed, check this box ▶ ☐

Type or print in ink all entries on the form, schedules, and attachments. If an item does not apply, enter "N/A." File the originals.

If *(i)* through *(iii)* do not apply to this year's return/report, leave the boxes unmarked. This return/report is:
*(i)* ☐ the first return/report filed for the plan; (ii) ☐ an amended return/report; or (iii) ☐ the final return/report filed for the plan.

▶ Welfare benefit plans and fringe benefit plans need only complete certain items—see the instructions "What To File."

▶ If you have been granted an extension of time to file this form, you must attach a copy of the approved extension to this form.

Use IRS label. Otherwise, please print or type.

1a Name of plan sponsor (employer if for a single-employer plan) | 1b Employer identification number

Address (number and street) | 1c Telephone number of sponsor ( )

City or town, state, and ZIP code | 1d Business code number

2a Name of plan administrator (if same as plan sponsor, enter "Same") | 1e CUSIP issuer number

Address (number and street) | 2b Administrator's employer identification no.

City or town, state, and ZIP code | 2c Telephone number of administrator ( )

3 Are the name, address, and employer identification number (EIN) of the plan sponsor and/or plan administrator the same as they appeared on the last return/report filed for this plan? ☐ Yes ☐ No. If "No," enter the information from the last return/report in a and/or b, and complete c.

a Sponsor ▶ EIN Plan number

b Administrator ▶ EIN

c If a indicates a change in the sponsor's name and EIN, is this a change in sponsorship only? (See specific instructions for definition of sponsorship.) ☐ Yes ☐ No

4 Check the appropriate box to indicate the type of plan entity (check only one box):

a ☐ Single-employer plan
b ☐ Plan of controlled group of corporations or common control employers
c ☐ Multiemployer plan
d ☐ Multiple-employer collectively-bargained plan
e ☐ Multiple-employer plan (other)
f ☐ Group insurance arrangement (of welfare plans)

5a *(i)* Name of plan ▶ | 5b Effective date of plan ▶

*(ii)* ☐ Check if name of plan changed since last return/report | 5c Enter three-digit plan number ▶

6a ☐ Welfare benefit plan (plan numbers 501 through 999) must check applicable items (A) through (P) and 6c.

*(i)* ☐ Type
(A) ☐ Health (other than dental or vision)
(B) ☐ Life insurance
(C) ☐ Supplemental unemployment
(D) ☐ Dental
(E) ☐ Vision
(F) ☐ Temporary disability (accident & sickness)
(G) ☐ Prepaid legal
(H) ☐ Long-term disability
(I) ☐ Severance pay
(J) ☐ Apprenticeship & training
(K) ☐ Scholarship (funded)
(L) ☐ Death benefits other than life insurance
(M) ☐ Code section 120 (group legal services plan)
(N) ☐ Code section 125 (cafeteria plan)
(O) ☐ Code section 127 (educational assistance program)
(P) ☐ Other (specify) ▶

*(ii)* If you checked (M), (N), or (O), check if plan is: ☐ funded or ☐ unfunded.

6b ☐ Pension benefit plan (plan numbers 001 through 500) must check applicable items in *(i)* through *(vii)* and answer 6c through 6f.

*(i)* ☐ Defined benefit plan
*(ii)* ☐ Defined contribution plan—(indicate type of defined contribution):
(A) ☐ Profit-sharing (B) ☐ Stock bonus
(C) ☐ Target benefit (D) ☐ Other money purchase (E) ☐ Other (specify) ▶
*(iii)* ☐ Defined benefit plan with benefits based partly on balance of separate account of participant (Code section 414(k))
*(iv)* ☐ Annuity arrangement of certain exempt organizations (Code section 403(b)(1))
*(v)* ☐ Custodial account for regulated investment company stock (Code section 403(b)(7))
*(vi)* ☐ Pension plan utilizing individual retirement accounts or annuities (described in Code section 408) as the sole funding vehicle for providing benefits
*(vii)* ☐ Other (specify) ▶

▶ Caution: A penalty for the late or incomplete filing of this return/report will be assessed unless reasonable cause is established.

Under penalties of perjury and other penalties set forth in the instructions, I declare that I have examined this return/report, including accompanying schedules and statements, and to the best of my knowledge and belief, it is true, correct, and complete.

Date ▶ Signature of employer/plan sponsor ▶

Date ▶ Signature of plan administrator ▶

6c Other plan features: *(i)* ☐ ESOP *(ii)* ☐ Leveraged ESOP *(iii)* ☐ Participant-directed account plan
*(iv)* ☐ Pension plan maintained outside the United States *(v)* ☐ Master trust (see instructions)
*(vi)* ☐ 103-12 investment entity (see instructions) *(vii)* ☐ Common/collective trust *(viii)* ☐ Pooled separate account

**WELFARE PLANS DO NOT COMPLETE ITEMS 15 THROUGH 27. GO TO ITEM 28**

| | | Yes | No |
|---|---|---|---|
| 15a | If this is a defined benefit plan, is it subject to the minimum funding standards for this plan year? If "Yes," attach Schedule B (Form 5500). | 15a | |
| b | If this is a defined contribution plan, i.e., money purchase or target benefit, is it subject to the minimum funding standards? (If a waiver was granted, see instructions.) | b | |
| | If "Yes," complete (i), (ii), and (iii) below: | | |
| | (i) Amount of employer contribution required for the plan year under Code section 412 — b(i) $ | | |
| | (ii) Amount of contribution paid by the employer for the plan year — b(ii) $ | | |
| | Enter date of last payment by employer ▶ Month ____ Day ____ Year ____ | | |
| | (iii) If (i) is greater than (ii), subtract (ii) from (i) and enter the funding deficiency here; otherwise, enter zero. (If you have a funding deficiency, file Form 5330.) — b(iii) $ | | |
| 16 | Has the plan been top-heavy at any time beginning with the 1984 plan year? | 16 | |
| 17 | Has the plan accepted any transfers or rollovers with respect to a participant who had attained age 70½? | 17 | |
| 18a | If the plan distributed any annuity contracts this year, did these contracts contain a requirement that the spouse consent before any distributions under the contract are made in a form other than a qualified joint and survivor annuity? | 18a | |
| b | Did the plan make distributions to participants or spouses in a form other than a qualified joint and survivor annuity (a life annuity if a single person) or qualified preretirement survivor annuity (exclude deferred annuity contracts)? | b | |
| c | Did the plan make distributions or loans to married participants and beneficiaries without the required consent of the participant's spouse? | c | |
| d | Upon plan amendment or termination, do the accrued benefits of every participant include the subsidized benefits that the participant may become entitled to receive subsequent to the plan amendment or termination? | d | |
| 19 | Were the spousal consent requirements for distributions under Code section 417(a) complied with? | 19 | |
| 20 | Have any contributions been made or benefits accrued in excess of the Code section 415 limits, as amended by the Tax Reform Act of 1986? | 20 | |
| 21 | Has the plan made the required distributions in 1988 under Code section 401(a)(9)? | 21 | |
| 22a | Does the plan satisfy the percentage test of Code section 410(b)(1)(A)? If a is "Yes," complete b through i. If "No," complete only b and c below and see specific instructions. | 22a | |

| | | Number |
|---|---|---|
| b | (i) Number of employees who are aggregated with employees of the employer as a result of the employer being aggregated with any employer covered by this plan under Code section 414(b), (c), or (m) — b(i) | |
| | (ii) Number of individuals who performed services as leased employees under Code section 414(n) including leased employees of employers in (i) — b(ii) | |
| c | Total number of employees (including any employees aggregated in b) | c |
| d | Number of employees excluded under the plan because of (i) minimum age or years of service, (ii) employees on whose behalf retirement benefits were the subject of collective bargaining, or (iii) nonresident aliens who receive no earned income from United States sources | d |
| e | Total number of employees not excluded (subtract d from c) | e |
| f | Employees ineligible (specify reason) ▶ | f |
| g | Employees eligible to participate (subtract f from e) | g |
| h | Employees eligible but not participating | h |
| i | Employees participating (subtract h from g) | i |

| | | Yes | No |
|---|---|---|---|
| 23a | Is it intended that this plan qualify under Code section 401(a)? If "Yes," complete b and c. | 23a | |
| b | Enter the date of the most recent IRS determination letter ____ Month ____ Year ____ | | |
| c | Is a determination letter request pending with IRS? | c | |
| 24a | If this is a plan with Employee Stock Ownership features, was a current appraisal of the value of the stock made immediately before any contribution of stock or the purchase of the stock by the trust for the plan year covered by this return/report? | 24a | |
| b | If a is "Yes," was the appraisal made by an unrelated third party? | b | |
| 25 | Is this plan integrated with social security or railroad retirement? | 25 | |
| 26 | Does the employer/sponsor listed in 1a of this form maintain other qualified pension benefit plans? If "Yes," enter the total number of plans, including this plan ▶ | 26 | |
| 27 | If this plan is an adoption of a master, prototype, or uniform plan, indicate which type by checking the appropriate box: a ☐ Master b ☐ Prototype c ☐ Uniform | | |

Form 5500 (1988) Page 4

| | | Yes | No |
|---|---|---|---|
| 28a | Did any person who rendered services to the plan receive directly or indirectly $5,000 or more in compensation from the plan during the plan year (except for employees of the plan who were paid less than $1,000 in each month)? If "Yes," complete Part I of Schedule C (Form 5500). | 28a | |
| b | Did the plan have any trustees who must be listed in Part II of Schedule C (Form 5500)? | b | |
| c | Has there been a termination in the appointment of any person listed in d below? | c | |
| d | If c is "Yes," check the appropriate box(es), answer e and f, and complete Part III of Schedule C (Form 5500): (i) ☐ Accountant (ii) ☐ Enrolled actuary (iii) ☐ Insurance carrier (iv) ☐ Custodian (v) ☐ Administrator (vi) ☐ Investment manager (vii) ☐ Trustee | | |
| e | Have there been any outstanding material disputes or matters of disagreement concerning the above termination? | e | |
| f | If an accountant or enrolled actuary has been terminated during the plan year, has the terminated accountant/actuary been provided a copy of the explanation required by Part III of Schedule C (Form 5500) with a notice advising them of their opportunity to submit comments on the explanation directly to DOL? | f | |
| g | Enter the number of Schedules C (Form 5500) that are attached. If none, enter -0- ▶ | | |
| 29a | Is this plan exempt from the requirement to engage an independent qualified public accountant? | 29a | |
| b | If a is "No," attach the accountant's opinion to this return/report and check the appropriate box. This opinion is: (i) ☐ Unqualified (ii) ☐ Qualified/disclaimer per Department of Labor Regulations 29 CFR 2520.103-8 and/or 2520.103-12(d) (iii) ☐ Qualified/disclaimer other (iv) ☐ Adverse (v) ☐ Other (explain) | | |
| c | If a is "No," do the financial statements or notes to the financial statements attached to this return/report disclose (i) a loss contingency indicating that assets are impaired or liability incurred; (ii) significant real estate or other transactions in which the plan and (A) the sponsor, (B) plan administrator, (C) the employer(s), or (D) the employee organization(s) are jointly involved; (iii) that the plan has participated in any related party transactions; or, (iv) any unusual or infrequent events or transactions occurring subsequent to the plan year-end that might significantly affect the usefulness of the financial statements in assessing the plan's present or future ability to pay benefits? | c | |
| d | If c is "Yes," provide the total amount involved in such disclosure ▶ | | |
| 30 | If 29a is "No," during the plan year: | | |
| a | Did the plan have assets held for investment? | 30a | |
| b | Were any loans by the plan or fixed income obligations due the plan in default as of the close of the plan year or classified during the year as uncollectible? | b | |
| c | Were any leases to which the plan was a party in default or classified during the year as uncollectible? | c | |
| d | Were any plan transactions or series of transactions in excess of 5% of the current value of plan assets? | d | |
| e | Do the notes to the financial statements accompanying the accountant's opinion disclose any nonexempt transactions with parties-in-interest? | e | |
| f | Did the plan engage in any nonexempt transactions with parties-in-interest not reported in e? | f | |
| g | Did the plan hold qualifying employer securities that are not publicly traded? | g | |
| h | Did the plan purchase or receive any nonpublicly traded securities that were not appraised in writing by an unrelated third party within 3 months prior to their receipt? | h | |
| i | Did any person manage plan assets who had a financial interest worth more than 10% in any party providing services to the plan or receive anything of value from any party providing services to the plan? If a, b, c, d, e, or f is checked "Yes," schedules of those items in the format set forth in the instructions are required to be attached to this return/report. | i | |
| 31 | Did the plan acquire individual whole life insurance contracts during the plan year? | 31 | |
| 32 | During the plan year: | | |
| a | (i) Was this plan covered by a fidelity bond? | 32a | |
| | (ii) If (i) is "Yes," enter amount of bond ▶ | | |
| b | (i) Was there any loss to the plan, whether or not reimbursed, caused by fraud or dishonesty? | b | |
| | (ii) If (i) is "Yes," enter amount of loss ▶ | | |

33a Is the plan covered under the Pension Benefit Guaranty Corporation termination insurance program?
☐ Yes ☐ No ☐ Not determined

b If a is "Yes" or "Not determined," enter the employer identification number and the plan number used to identify it.

Pension Benefit Guaranty Corporation

# 1988 Instructions for Form 5500

## Annual Return/Report of Employee Benefit Plan (With 100 or more participants)

*(Code references are to the Internal Revenue Code. ERISA refers to the Employee Retirement Income Security Act of 1974.)*

**Paperwork Reduction Act Notice.**—We ask for this information to carry out the law as specified in ERISA and Code section 6039D. We need it to determine whether the plan is operating according to the law. You are required to give us this information.

The time needed to complete and file the forms listed below reflect the combined requirements of the Internal Revenue Service, Department of Labor, Pension Benefit Guaranty Corporation, and the Social Security Administration. These times will vary depending on individual circumstances. The estimated average times are:

| | Recordkeeping | Learning about the law or the form | Preparing the form | Copying, assembling, and sending the form to IRS |
|---|---|---|---|---|
| Form 5500 | 82 hrs., 2 min. | 9 hrs., 3 min. | 13 hrs., 34 min. | 49 min. |
| Schedule A(Form 5500) | 17 hrs., 28 min. | 28 min. | 1 hr., 42 min. | 16 min. |
| Schedule B(Form 5500) | 25 hrs., 50 min. | 1 hr., | 1 hr., 27 min. | |
| Schedule C(Form 5500) | 8 hrs., 1 min. | 6 min. | 11 min. | |
| Schedule R(Form 5500) | 2hrs., 9 min. | 1 hr., 24 min. | 1 hr., 29 min. | |
| Schedule SSA(Form 5500) | 6 hrs., 42 min. | 12 min. | 19 min. | |

If you have comments concerning the accuracy of these time estimates or suggestions for making these forms more simple, we would be happy to hear from you. You can write to the **Internal Revenue Service,** Washington, DC 20224, Attention: IRS Reports Clearance Officer, TR FP; or the **Office of Management and Budget,** Paperwork Reduction Project, Washington, DC 20503.

File 1988 forms for plan years that started in 1988. If the plan year differs from the calendar year, fill in the fiscal year space just under the form title. For a short plan year, see Section 1, instruction B.

***Reminder:*** In addition to filing this form with IRS, plans covered by the Pension Benefit Guaranty Corporation termination insurance program must file their Annual Premium Payment, PBGC Form 1, directly with that agency.

**Penalties.**—ERISA and the Code provide for the assessment or imposition of penalties for not giving complete information and not filing statements and returns/reports. Certain penalties are administrative, that is, they may be imposed or assessed by one of the governmental agencies delegated to administer the collection of Form 5500 series data. Others require a legal conviction.

**A. Administrative Penalties.**—Listed below are various penalties for not meeting the Form 5500 series filing requirements. One or more of the following five penalties may be imposed or assessed in the event of incomplete filings or filings received after the date they are due unless it is determined that your explanation for failure to file properly is for reasonable cause:

1. A penalty of up to $1,000 a day for each day a plan administrator fails or refuses to file a complete return/report. See ERISA section 502(c)(2) and 29 CFR 2560.502c-2.
2. A penalty of $25 a day (up to $15,000) for not filing returns for certain plans of deferred compensation, certain trusts and annuities, and bond purchase plans by the due date(s). See Code section 6652(e). This penalty also applies to returns required to be filed under Code section 6039D.
3. A penalty of $1 a day (up to $5,000) for each participant for whom a registration statement (Schedule SSA (Form 5500)) is required but not filed. See Code section 6652(d)(1).
4. A penalty of $1 a day (up to $1,000) for not filing a notification of change of status of a plan. See Code section 6652(d)(2).
5. A penalty of $1,000 for not filing an actuarial statement. See Code section 6692.

**B. Other Penalties.**—

1. Any individual who willfully violates any provision of Part 1 of Title I of ERISA shall be fined not more than $5,000 or imprisoned not more than 1 year, or both. See ERISA section 501.
2. A penalty of up to $10,000, 5 years imprisonment, or both, for making any false statement or representation of fact, knowing it to be false, or for knowingly concealing or not disclosing any fact required by ERISA. See section 1027, Title 18, U.S. Code, as amended by section 111 of ERISA.

| Welfare benefit | 2 |
| Fringe benefit | 2 |
| B. Plans Excluded From Filing | 2 |
| C. Kinds of Filers | 2 |
| D. Investment Arrangements Filing Directly With DOL | 3 |
| E. What To File | 4 |
| Forms | 4 |
| Schedules | 5 |
| Other Filings | 5 |
| Section 3 | |
| General information—Final return/report; signature and date; reproductions; change in plan year; and amended return/report | 6 |
| Section 4 | |
| Specific Instructions for Form 5500 listed in numerical sequence | 6 |

### Section 1

**A. Who Must File.**—Any administrator or sponsor of an employee benefit plan subject to ERISA must file information about each such plan every year (Code section 6058 and ERISA sections 104 and 4065). Also required to file, for each year, is every employer maintaining a specified fringe benefit plan as described in Code section 6039D. The Internal Revenue Service (IRS), Department of Labor (DOL), and Pension Benefit Guaranty Corporation (PBGC) have consolidated their returns and report forms to minimize the filing burden for plan administrators and employers. The chart on page 7 gives a brief guide to the type of return/report to be filed.

**B. When To File.**—File all required forms and schedules by the last day of the 7th month after the plan year ends. For a short plan year, file the form and applicable schedules by the last day of the 7th month after the short plan year ends. For purposes of this return/report, the short plan year ends upon the date of the change in accounting period or upon the complete distribution of the assets of the plan. (Also see Section 3.) If the current year Form 5500 is not available before the due date of your short plan year return/report, use the latest year form available and change the date printed on the return/report to the current year. Also show the dates your short plan year began and ended.

***Request for Extension of Time To File.***—A one time extension of time up to 2½ months may be granted for filing returns/reports if **Form 5558,** Application for Extension of Time To File Certain Employee Plan Returns, is filed **before the normal due date of the return/report.**

***Exception:*** *Single-employer plans and plans of a controlled group of corporations which file consolidated Federal income tax returns are automatically granted an extension of time to file Form 5500, 5500-C, or 5500-R to the due date of the Federal income tax return of the single employer or controlled group of corporations if all the following conditions are met:*

*1. The plan year and the tax year coincide.*

*2. The single employer or the controlled group has been granted an extension of time to file its Federal income tax return to a date later than the normal due date for filing the Form 5500, 5500-C, or 5500-R.*

*3. A copy of the IRS extension of time to file the Federal income tax return is attached to each Form 5500, 5500-C, or 5500-R filed with IRS.*

***Note:*** *An extension of time to file the return/report does not operate as an extension of time to file the PBGC Form 1.*

**C. Where To File.**—Please file the return/report with the Internal Revenue Service Center indicated below. No street address is needed.

See page 5 for the filing address for investment arrangements filing directly with DOL.

| If the principal office of the plan sponsor or the plan administrator is located in ▼ | Use the following Internal Revenue Service Center address ▼ |
|---|---|
| Connecticut, Delaware, District of Columbia, Foreign Address, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virginia | Holtsville, NY 00501 |
| Alabama, Alaska, Arkansas, California, Florida, Georgia, Hawaii, Idaho, Louisiana, Mississippi, Nevada, North Carolina, Oregon, South Carolina, Tennessee, Washington | Atlanta, GA 39901 |
| Arizona, Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, Texas, Utah, West Virginia, Wisconsin, Wyoming | Memphis, TN 37501 |
| All Form 5500EZ filers | Andover, MA 05501 |

### Section 2

**A. Kinds of Plans.**—Employee benefit plans include pension benefit plans and welfare benefit plans. File the applicable return/report for any of the following plans.

*(a) Pension benefit plan.*—This is an employee pension benefit plan covered by ERISA. The return/report is due whether or not the plan is qualified and even if benefits no longer accrue, contributions were not made this plan year, or contributions are no longer made ("frozen plan" or "wasting trust"). See, Section 3 "Final Return/Report" on page 6.

Pension benefit plans required to file include defined benefit plans and defined contribution plans (e.g., profit-sharing, stock bonus, money purchase plans, etc.). The following are among the pension benefit plans for which a return/report must be filed:

(i) Annuity arrangements under Code section 403(b)(1).

(ii) Custodial account established under Code section 403(b)(7) for regulated investment company stock.

(iii) Individual retirement account established by an employer under Code section 408(c).

(iv) Pension benefit plan maintained outside the United States primarily for nonresident aliens if the employer who maintains the plan is:

(A) a domestic employer, or

(B) a foreign employer with income derived from sources within the U.S. (including foreign subsidieries of domestic employers) and deducts contributions to the plan on its U.S. income tax return. See "Plans Excluded From Filing" below.

(v) Church plans electing coverage under Code section 410(d).

(vi) A plan that covers residents of Puerto Rico, the Virgin Islands, Guam, Wake Island, or American Samoa. This includes a plan that elects to have the provisions of section 1022(i)(2) of ERISA apply.

See "Items To Be Completed on Form 5500" on page 4 for more information about what questions need to be completed by pension plans.

*(b) Welfare benefit plan.*—This is an employee welfare benefit plan covered by Part 1 of Title I of ERISA. Welfare plans would provide benefits such as medical, dental, life insurance, apprenticeship training, educational assistance, severance pay, disability, etc.

See "Items To Be Completed on Form 5500" on page 4 for more information about what questions need to be completed for welfare benefit plans.

*(c) Fringe benefit plan.*—Group legal services plans described in Code section 120, cafeteria plans described in Code section 125, and educational assistance programs described in Code section 127 are considered fringe benefit plans and generally are required to file the annual information specified by Code section 6039D. However, Code section 127 educational assistance programs which provide only job-related training which is deductible under Code section 162 do not need to file Form 5500.

See "Items To Be Completed on Form 5500" on page 4 for more information about how to complete this form for a fringe benefit plan.

**B. Plans Excluded From Filing (this does not apply if you are a fringe benefit plan required to file by Code section 6039D).**—Do not file a return/report for an employee benefit plan that is any of the following:

(a) A welfare benefit plan which covered fewer than 100 participants as of the beginning of the plan year and is: (i) fully insured, (ii) unfunded, or (iii) a combination of insured and unfunded.

(1) An unfunded welfare benefit plan has its benefits paid as needed directly from the general assets of the employer or the employee organization that sponsors the plan.

(2) A fully insured welfare benefit plan has its benefits provided exclusively through insurance contracts or policies, the premiums of which must be paid directly by the employer or employee organization from its general assets or partly from its general assets and partly from contributions by its employees or members (which the employer or organization forwards within 3 months of receipt).

(3) A combination unfunded/insured welfare plan has its benefits provided partially as an unfunded plan and partially as a fully insured plan. An example of such a plan is a plan which requires the employer to reimburse an employee for hospital expenses with the first $1,000 per year of benefits paid from the general assets of the employer and any benefits above $1,000 paid from a stop loss insurance contract.

The insurance contracts or policies discussed above must be issued by an insurance company or similar organization (such as Blue Cross, Blue Shield or a health maintenance organization) that can legally do business in any state. A plan meeting (1) cannot have any assets at any time during the plan year.

"Directly," as used in (1) above, means that the plan cannot use a trust or separately maintained fund (including a Code section 501(c)(9) trust) to hold plan assets or to act as a conduit for the transfer of plan assets.

See 29 CFR 2520.104-20.

***Note:*** *An "employees' association" as used in Code section 501(c)(9) should not be confused with the employee organization or employer which establishes and maintains (i.e., sponsors) the welfare benefit plan.*

(b) An unfunded pension benefit plan or an unfunded or combination unfunded and insured welfare benefit plan: (1) whose benefits go only to a select group of management or highly compensated employees, and (2) which meets the terms of Department of Labor Regulations 29 CFR 2520.104-23 (including the requirement that a notification statement be filed with DOL) or 29 CFR 2520.104-24.

(c) Plans maintained only to comply with workers' compensation, unemployment compensation, or disability insurance laws.

(d) An unfunded excess benefit plan.

(e) A welfare benefit plan maintained outside the United States primarily for persons substantially all of whom are nonresident aliens.

(f) A pension benefit plan maintained outside the United States if it is a qualified foreign plan within the meaning of Code section 404A(e) that does not qualify for the treatment provided in Code section 402(c).

(g) An annuity arrangement described in 29 CFR 2510.3-2(f).

(h) A simplified employee pension (SEP) described in Code section 408(k) which conforms to the alternative method of compliance described in 29 CFR 2520.104-48 or 29 CFR 104-49. A SEP is a pension plan which meets certain minimum qualifications regarding eligibility and employer contributions.

(i) A church plan not electing coverage under Code section 410(d) or a governmental plan.

(j) A welfare plan (other than a fringe benefit plan) that participates in a group insurance arrangement that files a return/report Form 5500 on behalf of the welfare plan. See 29 CFR 2520.104-43.

**C. Kinds of Filers.**—Item 4 on the Form 5500, 5500-C and 5500-R lists the different types of entities which file the forms. These entities are described below.

*(a) Single-employer plan.*—If one employer or one employee organization maintains a plan, file a separate return/report for the plan. If the employer

VOL 54 ISS 39 MR 1 1989 UMI

or employee organization maintains more than one such plan, file a separate return/report for each plan.

If a member of either a controlled group of corporations or a group of trades or businesses under common control maintains a plan that does not involve other group members, file a separate return/report as a single-employer plan.

If several employers participate in a program of benefits wherein the funds attributable to each employer are available only to pay benefits to that employer's employees, each employer must file a separate return/report.

*(b) Plan for controlled group of corporations or group of trades or businesses under common control.*—These groups are defined in Code sections 414(b) and (c), and are referred to as controlled groups.

If the benefits are payable to participants from the plan's total assets without regard to contributions by each participant's employer, file one return/report for the plan. On the return/report for the plan, complete item 22 only for the controlled group's employees.

**Exception:** Employers who participate in a plan of one of the groups listed above but who are not members of the group must file a separate return/report. The return/report should be filed on Form 5500-C or 5500-R, as applicable (see "What To File" on page 4). On Form 5500-C complete only items 1, 2, 3, 4f, 5, 6, 9, and 22. On Form 5500-R complete only items 1 through 3, 4f and 5 through 8b.

If several employers participate in a program of benefits wherein the funds attributable to each employer are available only to pay benefits to that employer's employees, each employer must file a separate return/report as a single employer plan.

*(c) Multiemployer plan.*—Multiemployer plans are plans: (1) to which more than one employer is required to contribute; (2) which are maintained pursuant to one or more collective bargaining agreements, and (3) have not made the election under Code section 414(f)(5) and ERISA section 3(37)(E). File one return/report for each such plan. Contributing employers do not file individually with respect to such plans. See Code section 414 for more information.

*(d) Multiple-employer-collectively-bargained plan.*—A multiple-employer-collectively-bargained plan involves more than one employer, is collectively bargained and collectively funded, and, if covered by PBGC termination insurance, has properly elected before 9-27-81 not to be treated as a multiemployer plan under Code section 414(f)(5) or ERISA sections 3(37)(E) and 4001(a)(3). File one return/report for each such plan. Participating employers do not file individually for these plans.

*(e) Multiple-employer plan (other).*—A multiple-employer plan (other) involves more than one employer and is not one of the plans already described. A multiple-employer plan (other) includes only plans whose contributions from individual employers are available to pay benefits to all participants. File one return/report for each such plan.

In addition, for pension benefit plans, each participating employer files either a Form 5500-C, regardless of the number of participants, or Form 5500-R. On Form 5500-C complete only items 1, 2, 3, 4f, 5, 6, 9, and 22. On Form 5500-R complete only items 1 through 3, 4f, and 5 through 8b.

**Note:** *If a participating employer is also the sponsor of the multiple-employer plan (other), the plan number on the return/report filed for the plan should be 333.*

The Form 5500-C or Form 5500-R filed by the participating employer should list his or her appropriate plan number.

If more than one employer participates in the plan and the plan provides that each employer's contributions are available to pay benefits only for that employer's employees who are covered by the plan, one annual return/report must be filed for each participating employer. These filers will be considered single employers and should complete the entire form.

*(f) Group insurance arrangement.*—A group insurance arrangement is an arrangement which provides benefits to the employees of two or more unaffiliated employers (not in connection with a multi-employer plan or a multiple-employer-collectively-bargained plan), fully insures one or more welfare plans of each participating employer, and uses a trust (or other entity such as a trade association) as the holder of the insurance contracts and the conduit for payment of premiums to the insurance company.

You do not need to file a separate return/report for a welfare benefit plan that is part of a group insurance arrangement if a consolidated return/report for all the plans in the arrangement was filed by the trust or other entity according to 29 CFR 2520.104-43. Form 5500 is required by 29 CFR 2520.103-2 to be part of the consolidated report.

**D. Investment Arrangements Filing Directly With DOL.**—Some plans invest in certain trusts, accounts, and other investment arrangements which may file information concerning itself and its relationship with employee benefit plans (as specified on page 5) directly with DOL. Plans participating in an investment arrangement as described in paragraphs a through c below are required to attach certain additional information to the return/report filed with IRS as specified below.

**a. Common/Collective Trust and Pooled Separate Account**

*(i) Definition.* For reporting purposes, a common/collective trust is a trust maintained by a bank, trust company, or similar institution which is regulated, supervised, and subject to periodic examination by a state or Federal agency for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer or controlled group of corporations, as the term is used in Code section 1563. For reporting purposes, a pooled separate account is an account maintained by an insurance carrier which is regulated, supervised, and subject to periodic examination by a state or Federal agency for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer or controlled group of corporations, as the term is used in Code section 1563. See 29 CFR sections 2520.103-3, 2520.103-4, 2520.103-5, and 2520.103-9.

**Note:** *For reporting purposes, a separate account which is not considered to be holding plan assets pursuant to 29 CFR 2510.3-101(h)(1)(iii), shall not constitute a pooled separate account.*

*(ii) Additional Information Required To Be Attached to the Form 5500 for Plans Participating in Common/Collective Trusts and Pooled Separate Accounts.* A plan participating in a common/collective trust or pooled separate account must complete the annual return/report and attach either (1) the most recent statement of the assets and liabilities of any common/ collective trust or pooled separate account, or (2) a certification that: (A) the statement of the assets and liabilities of the common/ collective trust or pooled separate account has been submitted directly to DOL by the financial institution or insurance carrier; (B) the plan has received a copy of the statement; and (C) includes the EIN and other numbers used by the financial institution or insurance carrier to identify the trusts or accounts in the direct filing made with DOL.

**b. Master Trust**

*(i) Definition.* For reporting purposes, a master trust is a trust for which a regulated financial institution (as defined below) serves as trustee or custodian (regardless of whether such institution exercises discretionary authority or control with respect to the management of assets held in the trust), and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held.

A "regulated financial institution" means a bank, trust company, or similar financial institution which is regulated, supervised, and subject to periodic examination by a state or Federal agency. Common control is determined on the basis of all relevant facts and circumstances (whether or not such employers are incorporated). See 29 CFR 2520.103-1(e).

For reporting purposes, the assets of a master trust are considered to be held in one or more "investment accounts." A master trust investment account may consist of a pool of assets or a single asset.

Each pool of assets held in a master trust must be treated as a separate master trust investment account if each plan which has an interest in the pool has the same fractional interest in each asset in the pool as its fractional interest in the pool, and if each such plan may not dispose of its interest in any asset in the pool without disposing of its interest in the pool. A master trust may also contain assets which are not held in such a pool. Each such asset must be treated as a separate master trust investment account.

Financial information must generally be provided with respect to each master trust investment account as specified on page 5.

*(ii) Additional Information Required To Be Attached to the Form 5500 for Plans Participating in Master Trusts.* A plan participating in a master trust must complete the annual return/report and attach a list of each master trust investment

Page 3

account in which the plan has an interest indicating the plan's name, EIN, and plan number and the name of the master trust used in the master trust information filed with DOL (see page 5). In tabular format, show the net value of the plan's interest in each investment account at the beginning and end of the plan year and the net investment gain (or loss) allocated to the plan for the plan year from the investment account (see instructions for item 34c(xi) on page 15).

**Note:** *If a master trust investment account consists solely of one plan's asset(s) during the reporting period, the plan may report the(se) asset(s) either as an investment account to be reported as part of the master trust report filed directly with DOL or as a plan asset(s) which is not part of the master trust (and therefore subject to all instructions pertaining to assets not held in a master trust).*

**c. 103-12 Investment Entities**

*Definition.* 29 CFR 2520.103-12 provides an alternative method of reporting for plans which invest in an entity (other than an investment arrangement filing with DOL described in a or b above), the underlying assets of which include "plan assets" (within the meaning of 29 CFR 2510.3-101) of two or more plans which are not members of a "related group" of employee benefit plans. For reporting purposes, a "related group" consists of each group of two or more employee benefit plans (1) each of which receives 10 percent or more of its aggregate contributions from the same employer or from a member of the same controlled group of corporations (as determined under Code section 1563(a), without regard to Code section 1563(a)(4) thereof); or (2) each of which is either maintained by, or maintained pursuant to a collective bargaining agreement negotiated by, the same employee organization or affiliated employee organizations. For purposes of this paragraph, an "affiliate" of an employee organization means any person controlling, controlled by, or under common control with such organization. See 29 CFR 2520.103-12.

For reporting purposes, the investment entities described above with respect to which the required information is filed directly with DOL constitute "103-12 investment entities" (103-12 IEs).

**E. What To File.**—This section describes the different categories of the 5500 series of forms and schedules. In addition, this section also lists items to be completed by different types of Form 5500 filers. This section also contains a description of the special filing requirements for plans that invest in certain investment arrangements. Finally, a brief guide illustrating which forms and schedules are required by different types of plans and filers may be found on page 7.

## Forms

***Form 5500.***—**File Form 5500,** Annual Return/Report of Employee Benefit Plan, annually for each plan with 100 or more participants at the beginning of the plan year.

***Form 5500-C.***—**File Form 5500-C,** Return/Report of Employee Benefit Plan, for each pension benefit plan, welfare benefit plan, and fringe benefit plan (unless otherwise exempted) with fewer than 100 participants (one-participant plans see "Form 5500EZ" below) at the beginning of the plan year. File Form 5500-C for the first plan year, the year for which the final return/report is due, and for plan years in which a Form 5500-R is not filed as explained below.

***Form 5500-R.***—**Form 5500-R,** Registration Statement of Employee Benefit Plan (with fewer than 100 participants), may be filed instead of a Form 5500-C for this plan year provided: (a) this is not the first plan year, (b) this is not a year for which the final return/report is due, and (c) a Form 5500-C has been filed for one of the prior 2 plan years. The Form 5500-R should not be filed if (a) this plan year is the first plan year, (b) this is the plan year for which a final return/report is due, or (c) the Form 5500-R has been filed for both of the prior 2 plan years.

Any plan may choose not to file the Form 5500-R if the plan files the Form 5500-C instead.

**Note:** *Generally, under the filing requirements explained above, if the number of plan participants increases from under 100 to 100 or more, or decreases from 100 or more to under 100, from one year to the next, you would have to file a different form from that filed the previous year. However, there is an exception to this rule. You may file the same form you filed last year, even if the number of participants changed, provided that at the beginning of this plan year the plan had at least 80 participants, but not more than 120.*

***Form 5500EZ.***—**Form 5500EZ,** Annual Return of One-Participant Pension Benefit Plan, should be filed by most one-participant plans.

A one-participant plan is: (1) a pension benefit plan that covers only an individual or an individual and his or her spouse who wholly own a trade or business, whether incorporated or unincorporated; or (2) a pension benefit plan for a partnership that covers only the partners or the partners and the partners' spouses.

See Form 5500EZ and its instructions to see if the plan meets the requirements for filing the form.

## Items To Be Completed on Form 5500

Certain kinds of plans and certain kinds of filers that are required to submit an annual Form 5500 are not required to complete the entire form. These are described below, by type of plan. Check the list of headings to see if your plan is affected.

**1. Welfare Benefit Plans.**—Welfare benefit plans generally must complete the following items on the Form 5500 : 1 through 6c; 7a(iv), b, c, and d; 8a, c, d, and e; 9a, b, c, and f; 10a through d; 11 through 14; 28 through 32; and 34 through 36.

**Note:** *If one Form 5500 is filed for both a welfare plan and a fringe benefit plan, items 22c, 22g, and 22i must be completed in addition to the items listed above for welfare plans.*

**Exception for unfunded, fully insured and unfunded /insured welfare plans.**—Welfare benefit plans that are unfunded, fully insured or combination unfunded/insured need not complete items 34 and 35 unless the Form 5500 also serves as a return/report under Code section 6039D (fringe benefit plan) in which case items 35g and 35h must be completed. See page 2, Section 2 B(a) for definition of (1) unfunded, (2) fully insured and (3) combination of unfunded/insured.

**2. Fringe Benefit Plans.**—A Form 5500 filed only because of Code section 6039D (i.e., for a fringe benefit plan) need complete only items 1 through 6a, 7a(iv), 7b, 9a, 9b, 22c, 22g, 22i, 35e, 35g, and 35h.

If the annual return/report is also for a welfare benefit plan (see "Who Must File" on page 1), complete the above items and those specified for welfare benefit plans in "1" above.

**3. Pension Plans.**—In general, most pension plans (defined benefit and defined contribution) are required to complete all items on the form. However, some items need not be completed by certain types of pension plans, as described below.

**a.** Plans exclusively using a tax deferred annuity arrangement under Code section 403(b)(1). These plans (see "Who Must File" on page 1), need only complete items 1 through 5, 6b(iv), and 9.

**b.** Plans exclusively using a custodial account for regulated investment company stock under Code section 403(b)(7).These plans need only complete items 1 through 5, 6b(v), and 9.

**c.** Individual Retirement Account Plan.—A pension plan utilizing individual retirement accounts or annuities (as described in Code section 408) as the sole funding vehicle for providing benefits need only complete items 1 through 5, 6b(vi), and 9.

**d.** Fully Insured Pension Plan.—A pension benefit plan providing benefits exclusively through an insurance contract, or contracts that are fully guaranteed, and which meets all of the conditions of 29 CFR 2520.104-44 need only complete items 1 through 29, 32, and 33.

A pension plan which includes both insurance contracts of the type described in 29 CFR 2520.104-44 as well as other assets should limit its reporting in items 34 and 35 to those other assets.

**Note:** *For purposes of the annual return/report and the alternative method of compliance set forth in 29 CFR 2520.104-44, a contract is considered to be "allocated" only if the insurance company or organization that issued the contract unconditionally guarantees, upon receipt of the required premium or consideration, to provide a retirement benefit of a specified amount, without adjustment for fluctuations in the market value of the underlying assets of the company or organization, to each participant, and each participant has a legal right to such benefits which is legally enforceable directly against the insurance company or organization.*

**e.** Nonqualified plans maintained outside the U.S.—Nonqualified pension benefit plans maintained outside the United States primarily for nonresident aliens required to file a return/report (see "Who Must File" on page 1) need only complete items 1 through 8c, 9 through 12, and 15 through 17.

**4. Plans of More Than One Employer.**—All plans of more than one employer (plans of a controlled group, multiemployer plans, multiple-employer-collectively-bargained plans, and multiple-employer-plan (other)) generally should complete all applicable (welfare or pension) items on the form except for item 6d. Only single-employer pension plans must complete this item. In

Page 4

BEST COPY AVAILABLE

VOL 54 ISS 39 MR 1 1989 UMI

addition, multiemployer and multiple-employer collectively-bargained plans need not complete item 22 on the Form 5500.

### Schedules

The various schedules to be attached to the return/report are listed below.

**Note:** *All attachments to the Forms 5500, 5500-C, and 5500-R must include the name of the plan and the EIN and plan number (PN) as found in items 5a, 1b, and 5c, respectively.*

***Attach Schedule A (Form 5500), Insurance Information,*** to Form 5500, 5500-C, or 5500-R if any benefits under the plan are provided by an insurance company, insurance service, or other similar organization (such as Blue Cross, Blue Shield, or a health maintenance organization).

**Exception:** *Schedule A (Form 5500) is not needed if the plan covers (1) only an individual, or an individual and his or her spouse, who wholly owns a trade or business, whether incorporated or unincorporated, or (2) a partner in a partnership, or a partner and his or her spouse.*

Do not file a Schedule A (Form 5500) with a Form 5500EZ.

***Attach Schedule B (Form 5500), Actuarial Information,*** to Forms 5500, 5500-C, 5500-R, or 5500EZ for most defined benefit pension plans. See the instructions for Schedule B.

***Attach Schedule C (Form 5500), Service Provider and Trustee Information,*** to Form 5500. See item 23 and the instructions to Schedule C.

***Schedule SSA (Form 5500), Annual Registration Statement Identifying Separated Participants With Deferred Vested Benefits,*** may be needed for separated participants. See "When To Report Separated Participants" in the instructions for Schedule SSA.

***Schedule P (Form 5500), Annual Return of Fiduciary of Employee Benefit Trust.***—Any fiduciary (trustee or custodian) of an organization that is qualified under Code section 401(a) and exempt from tax under Code section 501(a) who wants to protect the organization under the statute of limitations provided in Code section 6501(a) must file a Schedule P (Form 5500).

File the Schedule P (Form 5500) as an attachment to Form 5500, 5500-C, 5500-R, or 5500EZ for the plan year in which the trust year ends.

### Other Filings

#### Reporting Requirements for Investment Arrangements Filing Directly with DOL

Certain investment arrangements for employee benefit plans file financial information directly with DOL. These arrangements include common/collective trusts, pooled separate accounts, master trusts, and 103-12 IEs. Definitions of these investment arrangements may be found on pages 3 and 4. Their DOL filing requirements are described below.

**1. Common/Collective Trust and Pooled Separate Account Information To Be Filed Directly With DOL**

Financial institutions and insurance carriers filing the statement of the assets and liabilities of a common/collective trust or pooled separate account should identify the trust or account by providing the EIN of the trust or account, or (if more than one trust or account is covered by the same EIN) both the EIN and any additional number assigned by the financial institution or insurance carrier (such as 99-1234567 Trust No. 1); and a list of all plans participating in the trust or account, identified by the plan number, EIN, and name of the plan sponsor. The direct filing should be addressed to:

Common/Collective Trust (OR)
Pooled Separate Account
Pension and Welfare Benefits Administration
U.S. Department of Labor, Room N5644
200 Constitution Avenue, NW.
Washington, DC 20210

**2. Master Trust Information To Be Filed Directly With DOL**

The following information with respect to a master trust must be filed with DOL by the plan administrator or by a designee, such as the administrator of another plan participating in the master trust or the financial institution serving as trustee of the master trust, no later than the date on which the plan's return/report is due. While only one copy of the required information should be filed for all plans participating in the master trust, the information is an integral part of the return/report of each participating plan, and the plan's return/report will not be deemed complete unless all the information is filed within the prescribed time.

**Note:** *If a master trust investment account consists solely of one plan's asset(s) during the reporting period, the plan may report the(se) asset(s) either as an investment account to be reported as part of the master trust report filed directly with DOL or as a plan asset(s) which is not part of the master trust (and therefore subject to all instructions pertaining to assets not held in a master trust).*

Each of the following statements and schedules must indicate the name of the master trust and the name of the master trust investment account. The information shall be filed with DOL by mailing it to:

Master Trust
Pension and Welfare Benefits Administration
U.S. Department of Labor, Room N5644
200 Constitution Avenue, NW.
Washington, DC 20210

a. The name and fiscal year of the master trust and the name and address of the master trustee.

b. A list of all plans participating in the master trust, showing each plan's name, EIN, PN, and its percentage interest in each master trust investment account as of the beginning and end of the fiscal year of the master trust ending with or within the plan year.

c. A statement, in the same format as Part I of Schedule C (Form 5500), for each master trust investment account showing amounts of compensation paid during the fiscal year of the master trust ending with or within the plan year to persons providing services with respect to the investment account and subtracted from the gross income of the investment account in determining the net increase (decrease) in net assets of the investment account.

d. A statement for each master trust investment account showing the assets and liabilities of the investment account at the beginning and end of the fiscal year of the master trust ending with or within the plan year, grouped in the same categories as those specified in item 34 of Form 5500.

e. A statement for each master trust investment account showing the income and expenses, changes in net assets, and net increase (decrease) in net assets of each such investment account during the fiscal year of the master trust ending with or within the plan year, in the categories specified in item 35 of Form 5500. In place of item 35a, show the total of all transfers of assets into the investment account by participating plans. In place of item 35j, show the total of all transfers of assets out of the investment account by participating plans.

f. Schedules, in the format set forth in the instructions for item 30 of Form 5500, of the following items with respect to each master trust investment account for the fiscal year of the master trust ending with or within the plan year: assets held for investment, nonexempt party-in-interest transactions, defaulted or uncollectible loans and leases, and 5% transactions involving assets in the investment account. The 5% figure shall be determined by comparing the current value of the transaction at the transaction date with the current value of the investment account assets at the beginning of the applicable fiscal year of the master trust.

**3. 103-12 IE Information To Be Filed Directly With DOL**

The information described below must be filed with the DOL by the sponsor of the 103-12 IE no later than the date on which the plan's return/report is due before the plan administrator can elect the alternative method of reporting. While only one copy of the required information should be filed for the 103-12 IE, the information is an integral part of the return/report of each plan electing the alternative method of compliance.

The filing address is:

103-12 Investment Entity
Pension and Welfare Benefits Administration
U. S. Department of Labor, Room N5644
200 Constitution Avenue NW.
Washington, DC 20210

a. The name, fiscal year, and EIN of the 103-12 IE and the name and address of the sponsor of the 103-12 IE. If more than one 103-12 IE is covered by the same EIN, they shall be sequentially numbered as follows: 99-1234567 Entity No. 1.

b. A list of all plans participating in the 103-12 IE, showing each plan's name, EIN, PN, and its percentage interest in the 103-12 IE as of the beginning and end of the fiscal year of the 103-12 IE ending with or within the plan year.

c. A statement, in the same format as Part I of Schedule C (Form 5500), for the 103-12 IE showing amounts of compensation paid during the fiscal year of the 103-12 IE ending with or within the plan year to persons providing services to the 103-12 IE.

d. A statement showing the assets and liabilities at the beginning and end of the

Page 5

fiscal year of the 103-12 IE ending with or within the plan year, grouped in the same categories as those specified in item 34 of Form 5500.

e. A statement showing the income and expenses, changes in net assets, and net increase (decrease) in net assets during the fiscal year of the 103-12 IE ending with or within the plan year, grouped in the same categories as those specified in item 35 of Form 5500. In place of item 35a, show the total of all transfers of assets into the 103-12 IE by participating plans. In place of item 35j, show the total of all transfers of assets out of the 103-12 IE by participating plans.

f. Schedules, in the format set forth in the instructions for item 30 of Form 5500 (except item 30c) with respect to the 103-12 IE for the fiscal year of the 103-12 IE investment entity ending with or within the plan year. Substitute the term "103-12 IE" in place of the word "plan" when completing the schedules.

g. A report of an independent qualified public accountant regarding the above items and other books and records of the 103-12 IE that meets the requirements of 29 CFR 2520.103-1(b)(5).

### Section 3

### General Information

**Final Return/Report.**—If all assets under the plan (including insurance/annuity contracts) have been distributed to the participants and beneficiaries or distributed to another plan (and when all liabilities for which benefits may be paid under a welfare plan have been satisfied), check the "final return/report" box at the top of the form filed for such plan. The year of complete distribution is the last year a return/report must be filed for the plan. For purposes of this paragraph, a complete distribution will occur in the year in which the assets of a terminated plan are brought under the control of PBGC.

For a defined benefit plan covered by PBGC, a PBGC Form 1 must be filed and a premium must be paid until the end of the plan year in which the assets are distributed or brought under the control of PBGC.

Filing the return/report marked "final return" and indicating that the plan terminated satisfies the notification requirement of Code section 6057(b)(3).

**Signature and Date.**—The plan administrator must sign and date all returns/reports filed. In addition, the employer must sign a return/report filed for a single-employer plan or a plan required to file only because of Code section 6039D.

When a joint employer-union board of trustees or committee is the plan sponsor or plan administrator, at least one employer representative and one union representative must sign and date the return/report.

Participating employers in a multiple-employer plan (other), who are required to file Form 5500-C or 5500-R, are required to sign the return/report. The plan administrator need not sign the Form 5500-C or 5500-R filed by the participating employer.

**Reproductions.**—Original forms are preferable, but a clear reproduction of the completed form is acceptable. Sign the return/report after it is reproduced. All signatures must be original.

**Change In Plan Year.**—Generally only defined contribution pension benefit plans need to get prior approval for a change in plan year. (See Code section 412(c)(5).) Rev. Proc. 87-27, 1987-1 C.B. 769 explains the procedure for automatic approval of a change in plan year. A pension benefit plan that would ordinarily need to obtain approval for a change in plan year under Code section 412(c)(5) is granted an automatic approval for a change in plan year if all the following criteria are met:

1. No plan year is more than 12 months long.

2. The change will not delay the time when the plan would otherwise have been required to conform to the requirements of any statute, regulation, or published position of the IRS.

3. The trust, if any, retains its exempt status for the short period required to effect the change, as well as for the taxable year immediately preceding the short period.

4. All actions necessary to implement the change in plan year, including plan amendment and a resolution of the board of directors (if applicable), have been taken on or before the last day of the short period.

5. No change in plan year has been made for any of the preceding plan years.

6. In the case of a defined benefit plan, deductions are taken in accordance with section 5 of Rev. Proc. 87-27.

For the first return/report that is filed following the change in plan year, check the box indicated on the second line under the title at the top of the form (or item 1d if Form 5500R is being filed).

**Amended Return/Report.**—If you file an amended return/report, check the "(ii) an amended return/report" box at the top of the form. When filing an amended return, be sure to answer all questions and put a circle around the numbers of the items that have been amended.

**How The Annual Return/Report Information May Be Used.**—All Form 5500 series return/reports will be subjected to a computerized review. It is, therefore, in the filer's best interest that the responses accurately reflect the circumstances they were designed to report. Annual reports filed under Title I of ERISA must be made available by plan administrators to plan participants and by the Department of Labor to the public pursuant to ERISA section 104.

### Section 4

### Specific Instructions for Form 5500

**Important:** Answer all items on the Form 5500 with respect to the plan year, unless otherwise explicitly stated in the item-by-item instructions or on the form itself. Therefore, your responses usually apply to the year entered or printed at the top of the first page of the form. Yes and no questions are to be marked either "Yes" or "No" but not both. If neither "Yes" nor "No" applies, enter "NA."

#### Information To Be Completed at the Top of the Form

**First Line** at the top of the form—Complete the space for dates when: (1) the 12-month plan year is not a calendar year, or (2) the plan year is less than 12 months (a short plan year).

**Second Line**— Check the box if the plan year has been changed since the last return/report was filed.

**Fifth Line**—Check box (i) if this is the initial filing for this plan. Do not check this box if you have ever filed for this plan even if it was on a different form (Form 5500 vs. Form 5500-C or Form 5500-R).

Check box (ii) if you have already filed for the 1988 plan year and are now submitting an amended return/report to reflect errors and/or omissions on the previously filed return/report.

Check box (iii) if the plan no longer exists to provide benefits. See section 3 for instructions concerning the requirement to file a final return/report.

**The numbers of the following instructions are the same as the item numbers on the return/report.**

**1a.** If you did not receive a preaddressed mailing label, enter the name and address of the plan sponsor. If the plan covers only the employees of one employer, enter the employer's name.

If you received a Form 5500 with a preaddressed mailing label, please attach it in the name and address area of the form you file. If the name or address on the label is wrong, draw a line through the incorrect part and correct it.

The term "plan sponsor" means—

*(i)* the employer, for an employee benefit plan that a single employer established or maintains;

*(ii)* the employee organization in the case of a plan of an employee organization; or

*(iii)* the association, committee, joint board of trustees, or other similar group of representatives of the parties who establish or maintain the plan, if the plan is established or maintained jointly by one or more employers and one or more employee organizations, or by two or more employers.

Include enough information in 1(a) to describe the sponsor adequately. For example, "Joint Board of Trustees of Local 187 Machinists" rather than just "Joint Board of Trustees."

For group insurance arrangements, enter the name of the trust or other entity that holds the insurance contracts. In addition, attach a list of all participating employers and their EINs.

A group insurance arrangement is an arrangement which provides benefits to the employees of two or more unaffiliated employers (not in connection with a multiemployer plan or a multiple-employer-collectively-bargained plan), fully insures one or more welfare plans of each participating employer, and uses a trust (or other entity such as a trade association) as the holder of the insurance contracts and the conduit for payment of premiums to the insurance company.

**1b.** Enter the 9-digit employer identification number (EIN) assigned to the plan sponsor/employer. For example, 00-1234567.

Page 6

VOL 54 ISS 39 MR 1 1989 UMI

Employers and plan administrators who do not have an EIN should apply for one on Form SS-4, available from most IRS or Social Security Administration offices. Send Form SS-4 to the same Internal Revenue Service Center to which the form will be sent.

Plan sponsors are reminded that they should use the trust EIN when opening a bank account or conducting other transactions for a plan that requires an employer identification number. The trust may apply for an EIN as explained in the preceding paragraph.

A plan of a controlled group of corporations whose sponsor is more than one of the members of the controlled group should insert only the EIN of one of the sponsoring members. This EIN must be used in all subsequent filings of the annual returns/reports for the controlled group unless there is a change in the sponsor.

If the plan administrator is a group of individuals, get a single EIN for the group. When you apply for a number, enter on line 1 of Form SS-4 the name of the group, such as "Joint Board of Trustees of the Local 187 Machinists' Retirement Plan."

*Note: Although Employer Identification Numbers (EINs) for funds (trusts or custodial accounts) associated with plans are not required to be furnished on the Form 5500 series returns/reports, the IRS will issue EINs for such funds for other reporting purposes. EINs may be obtained by filing Form SS-4 as explained above.*

**1d.** From the list of business codes on pages 18 and 19, enter the one that best describes the nature of the employer's business. If more than one employer is involved, enter the business code for the main business activity.

**1e.** Plans checking Item 4a or 4b must enter the first six digits of the CUSIP (Committee on Uniform Securities Identification Procedures) number, "issuer number," if one has been assigned to the plan sponsor for purposes of issuing corporate securities. CUSIP issuer numbers are assigned to corporations and other entities which issue public securities listed on stock exchanges or traded over the counter. The CUSIP issuer number is the first six digits of the number assigned to the individual securities which are traded. If the plan sponsor has no CUSIP issuer number, enter "N/A."

**2a.** If the document constituting the plan appoints or designates a plan administrator other than the sponsor, enter the administrator's name and address. If the plan administrator is also the sponsor, enter "Same." If filing as a group insurance arrangement, enter "Same." If 2a is the "Same," then items 2b and 2c should be left blank.

The term "administrator" means—

*(i)* the person or group of persons specified as the administrator by the instrument under which the plan is operated;

*(ii)* the plan sponsor/employer if an administrator is not so designated; or

*(iii)* any other person prescribed by regulations of the Secretary of Labor if an administrator is not designated and a plan sponsor cannot be identified.

**2b.** A plan administrator must have an EIN for reporting purposes. Enter the plan administrator's 9-digit EIN here. If the plan administrator has no EIN, apply for one as explained in 1b above.

Employees of an employer are not plan administrators unless so designated in the plan document, even though they engage in administrative functions of the plan. If an employee of the employer is designated as the plan administrator, that employee must get an EIN.

**3.** If you answer "Yes," enter the name, address, and EIN of the plan sponsor and/or the plan administrator shown on the prior return/report.

**3c.** Indicate if the change in 3a is only a change in sponsorship. "Change in sponsorship" means the plan's sponsor has been changed but no assets or liabilities have been transferred to another plan(s), the plan has not terminated or merged with any other plan, and so forth.

**4a.** Check for a single-employer plan. See "Kinds of Filers" for what is considered a single-employer plan.

**4b.** Check for a plan in which more than one employer participates, and some of the employers are members of a controlled group of corporations (Code section 414(b)) or members of a group of employers under common control (Code section 414(c)).

**4c.** Check for a multiemployer plan as defined in Code section 414(f) and ERISA sections 3(37) and 4001(a)(3).

**4d.** Check for a multiple-employer collectively-bargained plan as described under "Kinds of Filers."

**5a.** Check for a multiple-employer plan (other) if the plan administrator is filing for the plan as a whole.

**5d.** Check for a consolidated filing (pursuant to 29 CFR 2520.104-43) that a trust or other entity makes on behalf of welfare benefit plans that participate in a group insurance arrangement.

**6a.** Enter the formal name of the plan, group insurance arrangement, or enough information to identify the plan.

**6b.** Enter the date the plan first became effective.

**6c.** Enter the 3-digit number the employer or plan administrator assigned to the plan. All welfare plan numbers and Code section 60390 plan numbers start at 501. All other plans start at 001.

Once you use a plan number, continue to use it for that plan on all future filings with IRS, DOL and PBGC. Do not use it for any other plan even if you terminated the first plan.

*Group Insurance Arrangement.*—For entities filing as a group insurance arrangement, enter the name of the arrangement and enter the next 3-digit plan number available to the plan sponsor in the 500 series (i.e., 501, 502 etc.).

**6a.** Check every box that describes the welfare benefit plan for which this return/report is being filed. Example: If your plan provides health insurance, dental insurance, eye examinations, and life insurance, four boxes should be checked—6a(i)(A), 6a(i)(B), 6a(i)(D), and 6a(i)(E).

If you checked box (M), (N), or (O), you must check one box in 6a(ii). Check unfunded if the plan is (1) unfunded, (2) fully insured, or (3) a combination of unfunded/insured as defined on page 2, Section 2B(a).

**6b(i).** For a defined benefit plan, check the box.

**6b(ii).** Check (C) for a money purchase plan if the contribution is determined by a target benefit calculation. Check (O) for all money purchase plans that do not have a target benefit calculation.

**6c(ii).** Check this box for an ESOP which acquires employer securities with borrowed money or other debt-financed techniques.

**6c(iii).** Check if the plan is a pension plan that provides for individual accounts and permits a participant or beneficiary to exercise independent control over the assets in his or her account (see ERISA section 404(c)).

**6c(iv).** Check this box for pension benefit plans maintained outside the United States primarily for nonresident aliens. See "Kinds of Filers" for more information.

**6c(v).** In the space provided following 6c(viii), enter name of the trust and bank or financial institution. Also enter city and state where the trust is maintained. (See page 3 for master trust instructions.)

**6c(vi).** In the space provided following 6c(viii), enter name and address of the 103-12 IE. (See page 4.)

**6d.** For single-employer plans enter the date the employer's tax year ends. For example, if the tax year is a calendar year, enter 12-31-88. For all plans with more than one employer, enter "N/A."

**6e. Definition of Affiliated Service Group.**—In general, Code section 414(m)(2) defines an affiliated service group as a first service organization (FSO) that has:

(1) a service organization (A-ORG) that is a shareholder or partner in the FSO and that regularly performs services for the FSO, or is regularly associated with the FSO in performing services for third persons, and/or

(2) any other organization (B-ORG) if:

(a) a significant portion of the business of that organization consists of performing services for the FSO or A-ORG of a type historically performed by employees in the service field of the FSO or A-ORG, and

(b) 10% or more of the interest of the B-ORG is held by persons who are highly compensated employees of the FSO or A-ORG.

An affiliated service group also includes a group consisting of an organization whose principal business is performing management functions for another organization (or one organization and other related organizations) on a regular and continuing basis, and the organization for which such functions are so performed by the organization. For a plan maintained by more than one employer, check "Yes" if any such employer is a member of an affiliated service group.

**6f.** A cash or deferred arrangement described in Code section 401(k) is a part of a qualified defined contribution plan which provides for an election by employees to defer part of their compensation or receive these amounts in cash.

**7.** The description of "participant" in the instructions below is only for purposes of item 7 of this form.

For welfare plans, dependents are considered to be neither participants nor beneficiaries. For pension benefit plans, "alternate payees" entitled to benefits under a qualified domestic relations order are not to be counted as participants for this item.

"Participant" means any individual who is included in one of the categories below.

**7a.** Active participants include any individuals who are currently in employment covered by a plan and who are earning or retaining credited service under a plan. This category includes any individuals who are: *(i)* currently below the integration level in a plan that is integrated with social security, and/or *(ii)* eligible to elect to have the employer make payments to a Code section 401(k) qualified cash or deferred arrangement. Active participants also include any nonvested individuals who are earning or retaining credited service under a plan. This category does not include nonvested former employees who have incurred the greater of 5 consecutive one year breaks in service or the break in service period specified in the plan.

For determining if active participants are fully vested, partially vested, or nonvested, consider vesting in employer contributions only.

For purposes of Code section 60390, "participant" means any individual who, for a plan year, has had at least one dollar excluded from income by reason of Code section 120, 125, or 127. If you are filing Form 5500 for a welfare plan that is required to file under Title I of ERISA and under Code section 60390, the preceding sentence does not apply.

**7b.** Inactive participants receiving benefits are any individuals who are retired or separated from employment covered by the plan and who are receiving benefits under the plan. This includes former employees who are receiving group health continuation coverage benefits pursuant to Part 6 of ERISA who are covered by the employee welfare benefit plan. This category does not include any individual to whom an insurance company has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

**7c.** Inactive participants entitled to future benefits are individuals who are retired or separated from employment covered by the plan and who are entitled to begin receiving benefits under the plan in the future. This category does not include any individual to whom an insurance company has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

**7e.** Deceased participants are any deceased individuals who have one or more beneficiaries who are receiving or are entitled to receive benefits under the plan. This category does not include an individual if an insurance company has made an irrevocable commitment to pay all the benefits to which the beneficiaries of that individual are entitled under the plan.

**7g(i).** If "Yes," file Schedule SSA (Form 5500) as an attachment to Form 5500. Plan administrators: Code section 6057(e) provides that the plan administrator must give each participant a statement showing the same information for that participant as is reported on Schedule SSA.

**8a.** Check "Yes" if an amendment to the plan was adopted in this plan year, regardless of the effective date of the amendment.

**8b.** Check "Yes" only if the accrued benefits were retroactively reduced. For example, a plan provides a benefit of 2% for each year of service, but the plan is amended to change the benefit to 1½% a year for all years of service under the plan.

**8c.** Enter the date the most recent amendment was adopted regardless of the date of the amendment or the effective date of the amendment.

**8d.** Check "Yes" only if an amendment changed the information previously provided to participants by the summary plan description or summary description of modifications.

**8e.** A revised summary plan description or summary description of modifications must be filed with DOL and distributed to all participants and pension plan beneficiaries no later than 210 days after the close of the plan year in which the amendment(s) was adopted. If the material was distributed and filed since the amendments were adopted (even if after the end of the plan year), check "Yes" to item 8e.

**9a.** Check "Yes" if the plan was terminated or if the plan was merged or consolidated into another plan. Enter year of termination if applicable. If you checked 6a(i)(M), (N), or (O) and indicated that this is an unfunded plan and you also answered 9a "Yes," you must also check 9b "Yes."

**9b.** If the plan was terminated and all plan assets were not distributed, file a return/report for each year the plan has assets. In that case, the return/report must be filed by the plan administrator, if designated, or by the person or persons who actually control the plan's property.

If all plan assets were used to buy individual annuity contracts and the contracts were distributed to the participants, check "Yes."

If all the trust assets were transferred to another plan, check "Yes."

Do not check "Yes" for a welfare plan which is still liable to pay benefits for claims which were incurred prior to the termination date, but not yet paid. See 29 CFR 2520.104b-2(g)(2)(ii).

**9h.** The Code provides for a nondeductible excise tax on a reversion of assets from a qualified plan. The tax is effective for reversions after December 31, 1985, unless the plan termination date is prior to January 1986.

**9i.** The employer must report the reversion by filing Form 5330 and pay any applicable tax. The tax will not be imposed upon employers who are tax-exempt entities under Code section 501(a). See instructions for Form 5330.

**10a.** If this plan was merged or consolidated into another plan(s), or plan assets or liabilities were transferred to another plan(s), indicate which other plan or plans were involved.

**10c.** Enter the EIN of the sponsor (employer, if for a single-employer plan) of the other plan.

**Summary of Filing Requirements for Employers and Plan Administrators**
**(File forms ONLY with IRS)**

| Type of plan | What to file | When to file |
|---|---|---|
| Most pension plans with only one participant or one participant and that participant's spouse | Form 5500EZ | File all required forms and schedules for each plan by the last day of the 7th month after the plan year ends. |
| Pension plan with fewer than 100 participants | Form 5500-C or 5500-R | |
| Pension plan with 100 or more participants | Form 5500 | |
| Annuity under Code section 403(b)(1) or trust under Code section 408(c) | Form 5500, 5500-C, or 5500-R | |
| Custodial account under Code section 403(b)(7) | Form 5500, 5500-C, or 5500-R | |
| Welfare benefit plan with 100 or more participants* | Form 5500 | |
| Welfare benefit plan with fewer than 100 participants (see exception on page 1 of these instructions)* | Form 5500-C or 5500-R | |
| Pension or welfare plan with 100 or more participants (see instructions for Item 29) | Financial statements, schedules, and accountant's opinion | |
| Pension or welfare plan with benefits provided by an insurance company | Schedule A (Form 5500) | |
| Pension plan that requires actuarial information | Schedule B (Form 5500) | |
| Plan with 100 or more participants | Schedule C (Form 5500) | |
| Pension plan filing a registration statement identifying separated participants with deferred vested benefits from a pension plan | Schedule SSA (Form 5500) | |

* This includes Code section 60390 filers.

VOL 54 ISS 39 MR 1 1989 UMI

**10a.** Pension benefit plans must file Form 5310 at least 30 days before any plan merger or consolidation or any transfer of plan assets or liabilities to another plan. **Caution:** *There is a penalty for not filing Form 5310 on time.*

**11.** Enter the code for the **funding arrangement** used by the plan from the list below.

The "funding arrangement" is the method used for the receipt, holding, investment, and transmittal of plan assets prior to the time the plan actually provides the benefits promised under the plan. For purposes of items 11 and 12, the term "trust" includes any fund or account which receives, holds, transmits, or invests plan assets other than an account or policy of an insurance company.

| | Funding Arrangement Codes |
|---|---|
| Trust | 1 |
| Trust and insurance | 2 |
| Insurance | 3 |
| Exclusively from general assets of sponsor (unfunded) | 4 |
| Partially insured and partially from general assets of sponsor | 5 |
| Other | 6 |

**12.** Enter the code for the **benefit arrangement** used by the plan from the list below.

The "benefit arrangement" is the method by which benefits are actually provided to participants by the plan. For example, when a participant retires, the plan might purchase an annuity from an insurance company for that individual to provide the actual benefits promised by the plan. In this example, the annuity would be the benefit arrangement.

Using the chart below, the plan in the above example would enter a "3" to indicate the benefit arrangement.

| | Benefit Arrangement Codes |
|---|---|
| Trust | 1 |
| Trust and insurance | 2 |
| Insurance | 3 |
| Exclusively from general assets of sponsor (unfunded) | 4 |
| Partially insured and partially from general assets of sponsor | 5 |
| Other | 6 |

**13a.** Enter "Yes," if either the contributions to the plan or the benefits paid by the plan are subject to the collective bargaining process, even if the plan is not established and administered by a joint board of trustees. Enter "Yes" even if only some of those covered by the plan are members of a collective bargaining unit which negotiates benefit levels on its own behalf. The benefit schedules need not be identical for all employees under the plan.

**13b.** All plans checking items 4c or 4d must enter the 6-digit LM number to identify each sponsoring labor organization which is a party to the collective bargaining agreement. Other plans which are maintained pursuant to collective bargaining agreements should enter the appropriate LM number, if available. The "LM number" is the six-digit Labor-Management disclosure number entered by the sponsoring labor organization in item 1 of the Form LM-2 or LM-3 (Labor Organization Annual Report) filed with the Department of Labor. Accordingly, the LM number(s) should be readily available from the sponsoring labor organization(s). If all sponsoring labor organizations' LM numbers cannot be entered in the spaces provided in item 13b on the form, enter the additional LM numbers on a supplemental sheet to accompany the Form 5500.

**14.** If the funding arrangement code (item 11) and/or the benefit arrangement code (item 12) is 2, 3, or 5, at least one Schedule A (Form 5500) must be attached to the Form 5500 filed for pension and welfare plans. The insurance company (or similar organization) which provides benefits is required to provide the plan administrator with the information needed to complete the return/report, pursuant to ERISA section 103 (a)(2). If you do not receive this information in a timely manner, contact the insurance company (or similar organization). If information is missing on Schedule A due to a refusal to provide this information, note this on the Schedule A. If there are no Schedule(s) A attached, enter "0."

**15b.** If a waived funding deficiency is being amortized in the current plan year, do not complete (i), (ii), and (iii), but complete 1, 2, 3, 7, and 9 of Schedule B (Form 5500). An enrolled actuary need not sign Schedule B under these circumstances.

**15b(iii).** File Form 5330 with IRS to pay the excise tax on any funding deficiency. **Caution:** *There is a penalty for not filing Form 5330 on time.*

**16.** A "top-heavy plan" is a plan which during any plan year is:

(1) any defined benefit plan if, as of the determination date, the present value of the cumulative accrued benefits under the plan for key employees exceeds 60% of the present value of the cumulative accrued benefits under the plan for all employees; and

(2) any defined contribution plan if, as of the determination date, the aggregate of the accounts of key employees under the plan exceeds 60% of the aggregate of the accounts of all employees under the plan.

Each plan of an employer included in a required aggregation group is to be treated as a top-heavy plan if such group is a top-heavy group. See definitions of required aggregation group and top-heavy group, below.

*Key Employee* —A key employee is any participant in an employer plan who at any time during the plan year, or any of the 4 preceding years, is:

(1) an officer of the employer having an annual compensation greater than 50% of the amount in effect under Code section 415(c)(1)(A) for any such plan year,

(2) one of the 10 employees having annual compensation from the employer of more than the limitation in effect under Code section 415(c)(1)(A) and owning (or considered as owning within the meaning of Code section 318) both more than ½% interest and the largest interests in the employer,

(3) a 5% owner of the employer, or

(4) a 1% owner of the employer having an annual compensation from the employer of more than $150,000.

In determining whether an individual is an officer of the employer, no more than 50 employees, or, if less, the greater of 3 employees or 10% of the employees, are to be treated as officers. See Code section 416(i) and T-12 of Regulations section 1.416. A key employee will not include any officer or employee of a governmental plan under Code section 414(d).

*Required Aggregation Group*—A required aggregation group consists of:

(1) each plan of the employer in which a key employee is or was a participant, and

(2) each other plan of the employer which enables a plan to meet the requirements for nondiscrimination in contributions or benefits under Code section 401(a)(4), or the participation requirements under Code section 410.

*Top-Heavy Group*—A top-heavy group is an aggregation group if, as of the determination date, the sum of the present value of the cumulative accrued benefits for key employees under all defined benefit plans included in such group and the aggregate of the accounts of key employees under all defined contribution plans in such group exceeds 60% of a similar sum determined for all employees. To determine if a plan is top-heavy, include distributions made in the 5-year period ending on the determination date. However, do not take into account accrued benefits for an individual who hasn't performed services for the employer during the 5-year period ending on the determination date.

**18a.** If the plan distributes an annuity contract, whether or not deferred and whether or not upon termination, that contract must provide that all distributions from it will meet the participant and spousal consent requirements of Code section 417. Consent is not needed for the distribution of the contract itself. Check "No" if the plan did not distribute any annuity contracts.

**18b.** In general, distributions must be made in the form of a qualified joint and survivor annuity for life or a qualified preretirement survivor annuity. An annuity distribution to a single individual is a qualified joint and survivor annuity. Check "Yes" if distributions in other forms were made, even if such distributions were permissible, e.g., because consent was obtained or was not needed.

**18c.** Generally, within the 90 days prior to the date of any benefit payment or the making of a loan to a participant, you must get the spouse's consent to the payment of the benefit or the use of the accrued benefit for the making of the loan. However, there are some circumstances where obtaining this spousal consent is not required. The following is a partial listing of circumstances where spousal consent is not required:

(1) The participant is not married and no spouse is required to be treated as a current spouse under a qualified domestic relations order issued by a court.

(2) The participant's accrued benefit in the plan never had a present value of more than $3,500.

(3) The benefit is paid in the form of a qualified joint and survivor annuity, i.e., an annuity for the life of the participant with a survivor annuity for the life of the spouse which is not less than 50% of (and is not greater than 100% of ) the amount of the

Page 9

annuity which is payable during the joint lives of the participant and the spouse. See Code section 417(b).

(4) The payout is from a profit-sharing or stock bonus plan that pays the spouse the participant's full account balance upon the participant's death, an annuity payment is not elected by the participant, and the profit-sharing or stock bonus plan is not a transferee plan with respect to the participant (i.e., had not received a transfer from a plan that was subject to the consent requirements with respect to the participant).

(5) The participant had no service under the plan after August 22, 1984.

**18d.** A plan may not eliminate a subsidized benefit or a retirement option by plan amendment or plan termination.

**19.** For purposes of determining the present value of a participant's accrued benefits and the amount of any distribution, a qualified plan must use a rate no higher than "the applicable interest rate." The "applicable interest rate" means the interest rate which would be used (as of the date of distributions) by the PBGC for determining the present value of a lump sum distribution on termination of the plan.

**a.** If the present value of the vested accrued benefit is no more than $25,000, the amount to be distributed is calculated using the PBGC rate.

**b.** If the present value of the vested accrued benefit exceeds $25,000 (using the PBGC rate), the total amount to be distributed is determined using an interest rate no greater than 120% of the applicable interest rate that would be used by the PBGC upon the plan's termination. In such a case the value will be no less than $25,000.

**20. The Tax Reform Act of 1986** amended Code section 415 to provide that the maximum annual benefit that may be provided under a defined benefit plan may not exceed the lesser of $90,000 or 100% of compensation. However, if benefits begin before the social security retirement age, the $90,000 limit must be reduced as described in Notice 87-21, 1987-1 C.B. 458.

In addition, the dollar limitations will be reduced for participants with fewer than 10 years of participation in a defined benefit plan, i.e., a 10% reduction for each year under 10 years of participation.

For defined contribution plans, Code section 415 now provides that the dollar limit on annual additions to a qualified plan may not exceed the greater of $30,000 or 25% of the defined benefit dollar limit for such limitation year. The defined contribution dollar limit will not be increased until the defined benefit dollar limit, as increased by cost of living adjustments, equals or exceeds $120,000. (For years beginning after December 31, 1987, the $90,000 defined benefit limit will be adjusted to reflect post-1986 cost of living increases.) The defined contribution dollar limit will then be increased to an amount equal to 25% of the defined benefit limit.

Annual additions to a defined contribution plan will, for years beginning after December 31, 1986, include 100% of all after-tax employee contributions. For participants participating in plans of tax-exempt organizations, the pre-Tax Reform Act limits remain in effect.

**The Tax Reform Act of 1986 also provides that a participant's previously accrued benefit won't be reduced merely because of the reduction in dollar limits or increases in required periods of participation.** The transitional rule applies to an individual who was a participant prior to January 1, 1987, in a plan in existence on May 5, 1986. If this participant's current accrued benefit exceeds the dollar limit under the Tax Reform Act of 1986, but complies with prior law, then the applicable dollar limit for the participant is equal to the current accrued benefit. The term "current accrued benefit" is defined as the participant's accrued benefit as of the close of the last limitation year beginning before January 1, 1987, and expressed as an annual benefit. To compute the defined benefit fraction, the current accrued benefit would replace the dollar limit otherwise used in the denominator of the fraction. The current accrued benefit is also reflected in the numerator of the defined benefit fraction.

**21.** In the calendar year in which the employee attains age 70 ½, the employee must begin to receive minimum distributions pursuant to Code section 401(a)(9) by April 1 of the following calendar year. Once begun, minimal distributions must continue each calendar year.

**22.** For purposes of filing required only because of Code section 6039D, complete only items 22c, 22g, and 22i.

**22a.** If you do not claim to meet the percentage tests of Code section 410(b)(1)(A), attach an explanation indicating how your plan meets the coverage requirements of Code section 410(b)(1)(B).

**22b. Provide information for all employers of a controlled group, a group under common control, or an affiliated service group even if they do not participate in the plan.** Also, leased employees (described in Code section 414(n)(2)) of any such employer(s) are to be included as employees unless the leasing organization maintains a "safe harbor" plan described in Code section 414(n)(5) for the leased employees. See below for more information regarding a "safe harbor" plan.

Generally, leased employees are individuals who are employees of a leasing organization, but who during the course of their employment perform services for a trade or business other than the leasing organization on a substantially full-time basis for a period of at least one year.

Service is to include any period during which the employee would have been a leased employee, but for the requirement that substantially full-time service be performed for at least one year. Such leased employees are to be considered employees of their recipient organization at certain times and for certain qualification requirements unless the leasing organization adopts and maintains the type of qualified plan specified in Code section 414(n)(5).

*A safe harbor plan* is a money purchase pension plan maintained by the leasing organization that provides with respect to a leased employee:

(A) a nonintegrated employer contribution rate of at least 10%, and

(B) immediate participation and full and immediate vesting.

The plan must cover all employees of the leasing organization other than those who are not "leased out" and cover those whose compensation from the leasing organization is less than $1,000 per year during a plan year and each of the prior 3 plan years. The safe harbor plan must provide the 10% of compensation allocation regardless of the number of hours of service during the year, age, or whether the employee is employed on a specific date.

In general, if leased employees make up more than 20% of the nonhighly compensated work force of the recipient, such employees must be covered by the recipient's pension plan regardless of the safe harbor plan. Recipient includes employers aggregated under Code section 414(b), (c), or (m). Under the 20% rule, "leased employees" include all persons who performed services as a "nonemployee."

Therefore, the total number of employees entered in 22c, the breakdown of excluded employees shown in 22d, and the ineligible employees shown in 22f should also include the employees of the controlled group, employees of employers under common control, or other employees in the affiliated service group or leased employees as described above.

Do not complete 22 for multiemployer plans described in Code section 414(f) or for multiple-employer-collectively-bargained plans.

**24a.** An independent appraiser must be used to ascertain the value of securities, acquired by a plan after December 31, 1986, if the securities aren't readily tradeable on an established securities market.

**28a.** Check "Yes" if any person (including, when applicable, a corporation or partnership) received, directly or indirectly, $5,000 or more during the plan year for providing services to the plan. For exceptions, see instructions to Part I of Schedule C (Form 5500). If you checked "Yes," complete Part I of Schedule C (Form 5500), which must then be attached to the Form 5500. Include payments from the plan sponsor which are reimbursable by the plan.

**28b.** Include all trustees in office during the plan year. List these trustees on Part II of Schedule C (Form 5500) and attach it to the Form 5500.

**28c.** Check "Yes," if there has been a termination in the appointment of any person for which a box must be checked in item 28d. In the case where the service provider is not an individual (i.e., when the service provider is a legal entity such as a corporation, partnership, etc.), check "Yes" when the service provider (not the individual) has been terminated. If item 28c is checked "Yes," complete Part III of Schedule C (Form 5500) and attach the Schedule C to the Form 5500. Otherwise, check "No" and skip to item 28g.

**28d.** Check all appropriate boxes and complete Part III of Schedule C (Form 5500). At least one box must be checked if 28c is answered "Yes."

**28e.** If item 28c is checked "Yes," check 28e "Yes" if, during the two most recent

Page 10

VOL 54 ISS 39 MR 1 1989 UMI

plan years preceding the termination and any subsequent interim period preceding such termination, resignation, or dismissal, there were any disagreements (whether or not the disagreements were a factor in the termination) on any matter of professional judgment that, if not resolved to the satisfaction of the former appointee, would have caused (or did cause) the former appointee to take some action, such as including the subject matter of the disagreement within a written report. For example, check "Yes," if the accountant was terminated as a result of a disagreement over the valuation of plan assets and the accountant would have required that the matter be disclosed in a note to the financial statements. Disagreements not involving a matter of professional judgement, such as the payment or nonpayment of fees, or the amount of the fee charged should not be included.

**28f.** If items 28d(i) or 28d(ii) has been checked, indicating that an independent qualified public accountant or enrolled actuary has been terminated, the plan administrator must provide the terminated accountant or enrolled actuary with a copy of the explanation of the reason for the termination provided in Part III of Schedule C (Form 5500), along with a completed copy of the notice which follows.

### Notice To Terminated Accountant or Enrolled Actuary

An explanation of the reasons for the termination of an accountant or enrolled actuary (terminated party) must be provided as part of the annual report (Part III of Schedule C). The plan administrator of the employee benefit plan is also required to provide the terminated party with a copy of this explanation and a notification that the terminated party has the opportunity to comment directly to the Department of Labor concerning any aspect of this explanation.

In accordance with this requirement, I, as plan administrator, verify that the explanation that is either reproduced below or attached to this notice is the explanation concerning your termination as reported on the Schedule C (Form 5500) attached to the 1988 Annual Return/Report Form 5500 for the (enter name of plan). This return/report is identified in item 1b by the nine-digit EIN – (enter Employer Identification Number) and in item 5c by the three-digit PN (enter plan number).

Signed

Dated

Any comments concerning this explanation should include the name, EIN, and PN of the plan and be submitted directly to:

Office of Enforcement
Pension and Welfare Benefits Administration
U. S. Department of Labor
200 Constitution Avenue, NW.
Washington, DC 20210

**28g.** A Schedule C (Form 5500) must be attached if item 28a, 28b, and/or 28c is checked "Yes." More than one Schedule C may be required if additional space is required to complete any part of the Schedule C. If no Schedule(s) C is required to be attached, enter "0".

**29.** Employee benefit plans filing the Annual Return/Report Form 5500 are generally required to engage an independent qualified public accountant pursuant to ERISA section 103(a)(3)(A). An independent qualified public accountant's opinion must be attached to Form 5500 unless: (i) the plan is an employee welfare benefit plan which is unfunded, fully insured, or a combination of unfunded and insured as described in 29 CFR 2520. 104-44(b)(1); (ii) the plan is an employee pension benefit plan whose sole asset(s) consists of insurance contracts which provide that, upon receipt of the premium payment, the insurance carrier fully guarantees the amount of benefit payments attributable to plan participants for that plan year as specified in 29 CFR 2520.104-44(b)(2); or (iii) the plan has elected to defer attaching the accountant's opinion for the first of two plan years, one of which is a short plan year of 7 months or less as allowed by 29 CFR 2520.104-50. (Also see the instructions for item 29e below.)

Single employer welfare plans using a 501(c)(9) trust are generally not exempt from the requirement of engaging an independent qualified public accountant.

**29a.** Plans meeting (i) or (ii) above should check "Yes" for item 29a and skip to item 31. Plans meeting (iii) must attach the required explanation and statements in lieu of the opinion and should check "No" to item 29a and "Other" to item 29b, and specify, in the space provided, that "the opinion is to be attached to the next Form 5500 pursuant to 29 CFR 2520.104-50." All other plans should check "No." "N/A" is NOT an acceptable response to this item. If the required accountant's opinion is not attached to the Form 5500, the filing is subject to rejection as incomplete and penalties may be imposed (see page 1).

**29b(i).** Generally, an unqualified opinion is issued when the auditor concludes that the plan's financial statements present fairly, in all material respects, the financial status of the plan as of the end of the period audited, and the changes in its financial status for the period under audit in conformity with generally accepted accounting principles. Check this box if the plan received an unqualified opinion.

**29b(ii).** Department of Labor regulations 29 CFR 2520.103-8 and 2520.103-12(d) generally state that the examination and report of an independent qualified public accountant need not extend to: (1) information prepared and certified to by a bank or similar institution or by an insurance carrier which is regulated and supervised and subject to periodic examination by a state or Federal agency, or (2) information concerning a 103-12 IE which is reported directly to the Department of Labor. Check this box if the plan received an accountant's opinion as discussed in 29b(i) above except for the information not audited pursuant to the above regulations.

**29b(iii).** Generally a qualified opinion is issued by an independent qualified public accountant when the plan's financial statements present fairly, in all material respects, the financial position of the plan as of the end of the audit period and the results of its operations for the audit period in conformity with generally accepted accounting principles except for the effects of one or more matters which are described in the opinion. A disclaimer of opinion is issued when the independent qualified public accountant does not express an opinion on the financial statements because he has not performed an audit sufficient in scope to enable him to form an opinion of the financial statements. Check this block if the plan received a qualified opinion or if a disclaimer of opinion was issued. If the audit was of limited scope pursuant to 29 CFR 2520.103-8 and/or 2520.103-12(d), and no other limitations as to scope or procedures were in effect, then check the box in item 29b(ii).

**29b(iv).** Generally an adverse opinion is issued by an independent qualified public accountant when the plan's financial statements do not present fairly, in all material respects, the financial position of the plan as of the end of the audit period and the results of its operations for the audit period in conformity with generally accepted accounting principles. Check this box if the plan received an adverse accountant's opinion.

**29b(v).** Generally, an independent qualified public accountant's opinion will be described by one of the categories in 29b(i)–(iv). Check the box if the accountant's opinion received by the plan is not described by one of the categories in 29b(i)–(iv). Explain the nature of the opinion in the space next to the box. In the event the explanation requires more space, enter "See attached" and on a separate sheet of paper explain in detail the nature of the accountant's opinion. Any attachments should identify the item number and include the plan's name, EIN and PN.

**29c and d.** These items must be answered by all plans required to engage an independent qualified public accountant (item 29a is "No"). The disclosure of the transactions and financial conditions listed in 29c are some of the disclosures required to be made when a plan's financial statements are presented in accordance with generally accepted accounting principles. (Usually these disclosures are contained in the notes to the financial statements.) If you are unsure as to whether the disclosures presented in or accompanying the plans' financial statements fall within one of the disclosures described in 29c, you should consult with the plan's independent qualified public accountant.

Check "Yes" to 29c and provide the amount involved in 29d if the financial statements or the notes to the statements contain any of the disclosures listed in 29c. The amount should be determined by adding the amounts of all of the applicable disclosures. For example, if two significant transactions are disclosed between the plan and the sponsor, the amounts, if any, disclosed in the notes should be added together and the total reported.

If you confirm, through consultation with the accountant, if necessary, that the accountant's report, including any applicable financial statements or notes, does not contain any of the disclosures noted in 29c, check "No" to item 29c and enter "0" in 29d.

**30.** Plans with assets held in a master trust and/or 103-12 IE (see pages 3 and 4 for the definition of these terms) should complete items 30a, b, c, and d to report information relating to assets held and transactions occurring outside the master trust and/or 103-12 IE. In determining the 5% figure for item 30d, subtract the value of plan assets held in the master trust or 103-12 IE from the current value of the plan's total assets at the beginning of the plan year.

Do not complete sub-items 30a through 30f if all plan funds are held in a master trust.

If "Yes" is checked for item(s) 30a, b, c, d, e, and/or f, schedules must be completed and attached to the Form 5500. If the required schedule is not attached to the Form 5500, the filing is subject to rejection as incomplete and penalties may be imposed (see page 1). Any attachments should identify the item number and include the plan's name, EIN, and PN.

**30a–30d.** If the assets or investment interests of two or more plans are maintained in one trust (except investment arrangements reported in 34c(xi) (see page 15)), all entries in the schedules included under items 30a, b, and c which relate to the trust shall be completed by including the plan's allocable portion of the trust. For purposes of item 30d, the plan's allocable portion of the transactions of the trust shall be combined with the other transactions of the plan, if any, to determine which transactions (or series of transactions) are reportable. Do not include individual transactions of investment arrangements reported in 34c(xi).

For purposes of this form, party-in-interest is deemed to include a disqualified person—see Code section 4975(e)(2). The term "party-in-interest" means, as to an employee benefit plan—

(A) any fiduciary (including, but not limited to, any administrator, officer, trustee or custodian), counsel, or employee of the plan;

(B) a person providing services to the plan;

(C) an employer, any of whose employees are covered by the plan;

(D) an employee organization, any of whose members are covered by the plan;

(E) an owner, direct or indirect, of 50% or more of—(i) the combined voting power of all classes of stock entitled to vote, or the total value of shares of all classes of stock of a corporation, (ii) the capital interest or the profits interest of a partnership, or (iii) the beneficial interest of a trust or unincorporated enterprise that is an employer or an employee organization described in (C) or (D);

(F) a relative of any individual described in (A), (B), (C), or (E);

(G) a corporation, partnership, or trust or estate of which (or in which) 50% or more of: (i) the combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of such corporation, (ii) the capital interest or profits interest of such partnership, or (iii) the beneficial interest of such trust or estate is owned directly or indirectly, or held by, persons described in (A), (B), (C), (D) or (E);

(H) an employee, officer, director (or an individual having powers or responsibilities similar to those of officers or directors), or a 10% or more shareholder, directly or indirectly, of a person described in (B), (C), (D), (E), or (G), or of the employee benefit plan; or

(I) a 10% or more (directly or indirectly in capital or profits) partner or joint venturer of a person described in (B), (C), (D), (E), or (G).

**30a.** Check "Yes" and attach one or both of the following two schedules to the Form 5500 if the plan had any assets held for investment purposes at any time during the plan year. Assets held for investment purposes shall include:

1 Any investment asset held by the plan on the last day of the plan year; and

2 Any investment asset purchased during the plan year and sold before the end of the plan year except:

(i) Debt obligations of the U.S. or any U.S. agency.

(ii) Interests issued by a company registered under the Investment Company Act of 1940 (e. g., a mutual fund).

(iii) Bank certificates of deposit with a maturity of one year or less.

(iv) Commercial paper with a maturity of 9 months, or less, if it is valued in the highest rating category by at least two nationally recognized statistical rating services and is issued by a company required to file reports with the Securities and Exchange Commission under section 13 of the Securities Exchange Act of 1934.

(v) Participations in a bank common or collective trust.

(vi) Participations in an insurance company pooled separate account.

(vii) Securities purchased from a broker-dealer registered under the Securities Exchange Act of 1934 and either:

(A) listed on a national securities exchange registered under section 6 of the Securities Exchange Act of 1934, or (B) quoted on NASDAQ.

Assets held for investment purposes shall not include any investment which was not held by the plan on the last day of the plan year if that investment is reported in the annual report for that plan year in any of the following:

1 The schedule of loans or fixed income obligations in default required by item 30b;

2 The schedule of leases in default or classified as uncollectible required by item 30c;

3 The schedule of reportable transactions required by item 30d; and

4 The schedule of party-in-interest transactions required by items 30e and f.

The first schedule required to be attached to the Form 5500 is a schedule of all assets held for investment purposes at the end of the plan year, aggregated and identified by issue, maturity date, rate of interest, collateral, par or maturity value, cost and current value, and, in the case of a loan, the payment schedule. The schedule should use the following or a similar format and the same size paper as the Form 5500.

**Note:** *In column (a), place an asterisk (*) on the line of each identified person known to be a party-in-interest to the plan. In column (c), include any restriction on transferability of corporate securities. (include lending of securities permitted under Prohibited Transactions Exemption 81-6.)*

| (a) | (b) Identity of issue, borrower, lessor, or similar party | (c) Description of investment including maturity date, rate of interest, collateral, par or maturity value | (d) Cost | (e) Current value |
|---|---|---|---|---|
| | | | | |
| | | | | |
| | | | | |

The second schedule required to be attached to the Form 5500 is a schedule of investment assets which were both acquired and disposed of within the plan year (see 29 CFR 2520.103-11). The schedule should use the following or a similar format and the same size paper as the Form 5500.

| (a) Identity of issue, borrower, lessor, or similar party | (b) Description of investment including maturity date, rate of interest, collateral, par or maturity value | (c) Costs of acquisitions | (d) Proceeds of dispositions |
|---|---|---|---|
| | | | |
| | | | |
| | | | |

VOL 54 ISS 39 MR 1 1989 UMI

**30b.** Check "Yes," and attach the following schedule to the Form 5500 if the plan had any loans or fixed income obligations in default or determined to be uncollectible as of the end of the plan year. Include obligations where the required payments have not been made by the due date. With respect to notes and loans, the due date, payment amount and conditions for default are usually contained in the note or loan documents. Defaults can occur at any time for those obligations which require periodic repayment. Generally loans and fixed income obligations are considered uncollectible when payment has not been made and there is little probability that payment will be made. A loan by the plan is in default when the borrower is unable to pay the obligation upon maturity. A fixed income obligation has a fixed maturity date at a specified interest rate. List any loans by the plan which are in default and any fixed income obligations which have matured, but have not been paid, for which it has been determined that payment will not be made. The schedule should be in the following or similar format, use the same size paper as the Form 5500.

*Note: In column (a), place an asterisk (*) on the line of each identified person known to be a party-in-interest to the plan. Include all loans that were renegotiated during the plan year. Also, explain what steps have been taken or will be taken to collect overdue amounts for each loan listed.*

| (a) | (b) Identity and address of obligor | (c) Original amount of loan | Amount received during reporting year | | (f) Unpaid balance at end of year | (g) Detailed description of loan including dates of making and maturity, interest rate, the type and value of collateral, any renegotiation of the loan and the terms of the renegotiation and other material terms | Amount overdue | |
|---|---|---|---|---|---|---|---|---|
| | | | (d) Principal | (e) Interest | | | (h) Principal | (i) Interest |
| | | | | | | | | |

**30c.** Check "Yes," and attach to the Form 5500 the following schedule if the plan had any leases in default or classified as uncollectible. The schedule should use the following or a similar format and the same size paper as the Form 5500.

A lease is an agreement conveying the right to use property, plant or equipment for a stated period. A lease is in default when the required payment(s) has not been made. An uncollectible lease is one where the required payments have not been made and for which there is little probability that payment will be made. *Also, explain what steps have been taken or will be taken to collect overdue amounts for each lease listed.*

| (a) | (b) Identity of lessor/lessee | (c) Relationship to plan, employer, employee organization or other party-in-interest | (d) Terms and description (type of property, location and date if was purchased, terms regarding rent, taxes, insurance, repairs, expenses, renewal options, date property was leased) | (e) Original cost | (f) Current value at time of lease | (g) Gross rental receipts during the plan year | (h) Expenses paid during the plan year | (i) Net receipts | (j) Amount in arrears |
|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | | |

**30d.** Check "Yes" and attach to the Form 5500 the following schedule if the plan had any reportable transactions (see 29 CFR 2520.103-6). The schedule should use the following or a similar format and the same size paper as the Form 5500. A reportable transaction includes:

1. A single transaction within the plan year in excess of 5% of the current value of the plan assets;

2. Any series of transactions with, or in conjunction with, the same person, involving property other than securities, which amount in the aggregate within the plan year (regardless of the category of asset and the gain or loss on any transaction) to more than 5% of the current value of plan assets;

3. Any transaction within the plan year involving securities of the same issue if within the plan year any series of transactions with respect to such securities amount in the aggregate to more than 5% of the current value of the plan assets; and

4. Any transaction within the plan year with respect to securities with, or in conjunction with, a person if any prior or subsequent single transaction within the plan year with such person, with respect to securities, exceeds 5% of the current value of plan assets.

The 5% figure is determined by comparing the current value of the transaction at the transaction date with the current value of the plan assets at the beginning of the plan year.

If the assets of two or more plans are maintained in one trust, the plan's allocable portion of the transactions of the trust shall be combined with the other transactions of the plan, if any, to determine which transactions (or series of transactions) are reportable (5%) transactions. This does not apply to investment arrangements whose current value is reported in 34c(xi). Instead, for investments in common/collective trusts, pooled separate accounts, 103-12 IEs and registered investment companies, determine the 5% figure by comparing the transaction date value of the acquisition and/or disposition of units of participation or shares in the entity with the current value of the plan assets at the beginning of the plan year. Do not complete item 30d if all plan funds are held in a master trust. Plans with assets in a master trust which have other transactions should determine the 5% figure by subtracting the current value of plan assets held in the master trust from the current value of all plan assets at the beginning of the plan year. Do not include individual transactions of investment arrangements reported in 34c(xi).

In the case of a purchase or sale of a security on the market, do not identify the person from whom purchased or to whom sold.

| (a) Identity of party involved | (b) Description of asset (include interest rate and maturity in case of a loan) | (c) Purchase price | (d) Selling price | (e) Lease rental | (f) Expense incurred with transaction | (g) Cost of asset | (h) Current value of asset on transaction date | (i) Net gain or (loss) |
|---|---|---|---|---|---|---|---|---|
| | | | | | | | | |

**30e and f.** Check "Yes," and attach the following schedule to the Form 5500 if the plan had any non-exempt transactions with a party-in-interest. For purposes of this form, party-in-interest is deemed to include a disqualified person (see Code section 4975(e)(2)). The term "party-in-interest" is defined on page 12. Non-exempt transactions with a party-in-interest include any direct or indirect:

1. Sale or exchange, or leasing, of any property between the plan and a party-in-interest.
2. Lending of money or other extension of credit between the plan and party-in-interest.
3. Furnishing of goods, services, or facilities between the plan and a party-in-interest.
4. Transfer to, or use by or for the benefit of, a party-in-interest, of any income or assets of the plan.
5. Acquisition, on behalf of the plan, of any employer security or employer real property in violation of Code section 407(a).
6. Dealing with the assets of the plan for a fiduciary's own interest or own account.
7. Acting in a fiduciary's individual or in any other capacity in any transaction involving the plan on behalf of a party (or represent a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries.

8. Receipt of any consideration for his or her own personal account by a party-in-interest who is a fiduciary for any party dealing with the plan in connection with a transaction involving the income or assets of the plan.

Do not check "Yes" for items 30e or 30f, or list transactions that are statutorily exempt under Part 4 of Title I of ERISA, or administratively exempt under ERISA section 408(a), or exempt under Code sections 4975(c) and 4975(d), or include transactions of a 103-12 IE with parties other than the plan. You may indicate that an application for an administrative exemption is pending.

If you are unsure as to whether a transaction is exempt or not, you should consult with either the plan's independent qualified public accountant or legal counsel or both.

Set out each transaction with the information set forth below in the following or similar format using the same size paper as the Form 5500.

If a nonexempt prohibited transaction occurred with respect to a disqualified person, file Form 5330 with IRS to pay the excise tax on the transaction.

| (a) Identity of party involved | (b) Relationship to plan, employer or other party-in-interest | (c) Description of transactions including maturity date, rate of interest, collateral, par or maturity value | (d) Purchase price | (e) Selling price | (f) Lease rental | (g) Expenses incurred in connection with transaction | (h) Cost of asset | (i) Current value of asset | (j) Net gain or (loss) on each transaction |
|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | | |

**30g. Employer Security.**—An employer security is any security issued by an employer (including affiliates) of employees covered by the plan. These may include common stocks, preferred stocks, bonds, zero coupon bonds, debentures, convertible debentures, notes, and commercial paper. Generally, a publicly traded security is a security which is bought and sold on a recognized market (e.g., NYSE, AMEX, over the counter, etc.) for which there is a pool of willing buyers and sellers. Securities which are listed on a market but for which there does not exist a pool of willing buyers and sellers are not publicly traded.

**Qualifying Employer Security.**—An employer security which is a stock or a "marketable obligation" is considered a qualifying employer security. For purposes of this definition, the term "marketable obligation" means a bond, debenture, note, certificate, or other evidence of indebtedness (obligation) if:

*(i)* such obligation is acquired —

(A) on the market, either: (1) at the price of the obligation prevailing on a national securities exchange which is registered with the Securities and Exchange Commission, or (2) if the obligation is not traded on such a national securities exchange, at a price not less favorable to the plan than the offering price for the obligation as established by current bid and asked prices quoted by persons independent of the issuer;

(B) from an underwriter, at a price: (1) not in excess of the public offering price for the obligation as set forth in a prospectus or offering circular filed with the Securities and Exchange Commission, and (2) at which a substantial portion of the same issue is acquired by persons independent of the issuer; or

(C) directly from the issuer, at a price not less favorable to the plan than the price paid currently for a substantial portion of the same issue by persons independent of the issuer;

*(ii)* immediately following the acquisition of such obligation—

(A) not more than 25% of the aggregate amount of obligations issued in such issue and outstanding at the time of acquisition is held by the plan, and

(B) at least 50% of the aggregate amount referred to in subparagraph (A) is held by persons independent of the issuer; and

*(iii)* immediately following the acquisition of the obligation, not more than 25% of the assets of the plan is invested in obligations of the employer or an affiliate of the employer.

For purposes of the qualifying employer security definition, the term "stock" must meet the following conditions:

1. No more than 25% of the aggregate amount of stock of the same class issued and outstanding at the time of acquisition is held by the plan, and

2. At least 50% of the aggregate amount of stock described in the preceding paragraph is held by persons independent of the issuer.

For exceptions to the above, see ERISA section 407(f).

**30h.** Generally, as it relates to this question, an appraisal by an unrelated third party is an evaluation of the value of a security prepared by an individual or firm who knows how to judge the value of securities and does not have an ongoing relationship with the plan or plan fiduciaries except for preparing the appraisal. Non-publicly traded securities are generally held by few people and not traded on a stock exchange.

**32a(i).** Generally, every plan official of an employee benefit plan who handles funds or other property of such plan must be bonded. A plan administrator, officer, or employee shall be deemed to be handling funds or other property of a plan, so as to require bonding, whenever his or her duties or activities with respect to given funds are such that there is a risk that such funds could be lost in the event of fraud or dishonesty on the part of such person, acting either alone or in collusion with others. Section 412 of ERISA and the regulations found at 29 CFR 2580 provide the bonding requirements, including the definition of "handling" (29 CFR 2580.412-6), the permissible forms of bonds (29 CFR 2580.412-10), and certain exemptions such as the exemption for unfunded plans, certain banks and insurance companies (ERISA section 412), and the exemption allowing plan officials to purchase bonds from surety companies authorized by the Secretary of the Treasury as acceptable reinsurers on Federal bonds (29 CFR 2580.412-23).

Check "Yes" only if the plan itself (as opposed to the plan sponsor) is a named insured under a fidelity bond covering plan officials.

Plans are permitted under certain conditions to purchase fiduciary liability insurance. These policies do not protect the plan from dishonest acts and are not bonds which should be reported in question 32.

**32a(ii).** Indicate the aggregate amount of coverage available for all claims.

**32b(i).** Check "Yes" if the plan has suffered or discovered any loss as the result of a dishonest or fraudulent act(s).

**32b(ii).** If item 32b(i) has been answered "Yes," enter the full amount of the loss. If the full amount of the loss has not yet been determined, provide and disclose that the figure is an estimate, such as "Approximately $1,000."

**Note:** *Willful failure to report is a criminal offense. See ERISA section 501.*

**33a.** If you are uncertain as to whether the plan is covered under the PBGC termination insurance program check the box "Not determined" and contact the PBGC and request a coverage determination. Welfare and fringe benefit plans do not complete this item.

**34 and 35.** You can use either the cash, modified accrual, or accrual basis for recognition of transactions in items 34 and 35, as long as you use one method consistently.

Round off all amounts in items 34 and 35 to the nearest dollar. Be sure to check all sub-totals and totals carefully.

**Caution:** *Do not mark through the printed line descriptions and insert your own description as this may cause additional correspondence due to a new computerized review of the Form 5500.*

"Current value" means fair market value, where available. Otherwise, it means the fair value as determined in good faith under the terms of the plan by a trustee or a named fiduciary, assuming an orderly liquidation at the time of the determination.

If the assets of two or more plans are maintained in one trust, such as when an employer has two plans which are funded through a single trust (except investment arrangements reported in 34c(xi)), complete items 34 and 35 by entering the plan's allocable part of each line item.

If assets of one plan are maintained in two or more trust funds, report the combined financial information in items 34 and 35.

Fully insured, unfunded, and unfunded/insured welfare plans, and fully insured pension plans meeting the conditions of 29 CFR 2520.104-44, need not complete

VOL 54 ISS 39 MR 1 1989 UMI

items 34 and 35. To determine if your welfare plan is fully insured, unfunded, or unfunded/insured, see page 2.

To determine if your pension plan is fully insured, see page 4.

Exception: *Plans which are both welfare and fringe benefit plans must complete items 35a, 35g and 35h.*

**34.** Column (a) should be used to enter the current value of plan assets and liabilities as of the beginning of the plan year. Column (b) should be used to enter the current value of plan assets and liabilities as of the end of the plan year.

Amounts reported in column (a) must be the same as reported for corresponding line items in column (b) of the return/report for the preceding plan year.

**34a.** Total noninterest-bearing cash includes, among other things, cash on hand or cash in a noninterest-bearing checking account.

**34b.** Subtract any allowance for doubtful accounts from each receivable to obtain the net receivable for that line item.

**34b(i).** Noncash basis filers should include contributions due the plan by the employer but not yet paid. Do not include other amounts due from the employer such as the reimbursement of an expense or the repayment of a loan.

**34b(ii).** Noncash basis filers should include contributions withheld by the employer from participants and amounts due directly from participants which have not yet been received by the plan. Do not include the repayment of participant loans.

**34b(iii).** Noncash basis filers should include income from investment income earned but not yet received by the plan.

**34b(iv).** Noncash basis filers should include amounts due to the plan which are not includable in items 34b(i)–(iii) above. These may include amounts due from the employer or another plan for expense reimbursement or from a participant for the repayment of an overpayment of benefits.

**34b(v).** Add 34b(i), 34b(ii), 34b(iii) and 34b(iv) and enter the total.

**34c(i).** Include all assets which earn interest in a financial institution account or in a money market fund, including, interest bearing checking accounts, passbook savings accounts, et al.

**34c(ii).** Include securities issued or guaranteed by the U.S. Government or its designated agencies such as U.S. Savings Bonds, Treasury bonds, Treasury bills, FNMA, and GNMA.

**34c(iv).** Include investment securities issued by a corporate entity at a stated interest rate repayable on a particular future date such as most bonds, debentures, convertible debentures, commercial paper and zero coupon bonds. Do not include debt securities of Governmental units or municipalities reported under 34c(iii) or 34c(viii).

**34c(v)(A).** Include stock issued by corporations which is accompanied by preferential rights such as the right to share in distributions of earnings at a higher rate or has general priority over the common stock of the same entity. Include the value of warrants convertible into preferred stock.

**34c(v)(B).** Include any stock which represents regular ownership of the corporation and is not accompanied by preferential rights plus the value of warrants convertible into common stock.

**34c(vi).** Include the value of the plan's participation in a partnership or joint venture if the underlying assets of the partnership or joint venture are not considered to be plan assets under 29 CFR 2510.3-101. Do not include the value of a plan's interest in a partnership or joint venture which is a 103-12 IE (see 34c(xi), below).

**34c(vii)(A).** Include the current value of real property owned by the plan which produces income from rentals, etc. This property is not to be included in item 34e, buildings and other property used in plan operations.

**34c(vii)(B).** Include the current value of real property owned by the plan which is not producing income or used in plan operations.

**34c(viii)(A).** Include the current value of all loans made by the plan to provide mortgage financing to purchasers (other than plan participants) of residential dwelling units, either by making or participating in loans directly or by purchasing mortgage loans originated by a third party. (For participant loans, see 34c(ix), below.)

**34c(viii)(B).** Include the current value of all loans made by the plan to provide mortgage financing to purchasers (other than participants) of commercial real estate, either by making or participating in the loans directly or by purchasing mortgage loans originated by a third party. (For participant loans, see 34c(ix), below)

**34c(ix)(A).** Include the current value of all loans to participants which are made by the plan to provide mortgage financing to participants who were purchasers of real property, irrespective of whether the mortgage was for residential, commercial or farm property.

**34c(ix)(B).** Include the balance of any loans made to participants which were not reported in 34c(ix)(A).

**34c(x).** Include all loans made by the plan which are not to be reported elsewhere in item 34 such as loans for construction, securities loans, and other miscellaneous loans.

**34c(xi).** Enter the current value of the sum of the plan's interest in common/collective trusts, pooled separate accounts, master trusts, 103-12 IEs and registered investment companies (registered under the Investment Company Act of 1940) at the beginning and end of the plan year. If some plan funds are held in these investment arrangements, and other plan funds are held in other funding media, complete all applicable sub-items of item 34 with regard to assets held in other funding media.

A plan investing in common/collective trusts or pooled separate accounts should attach to the return/report either the statement of assets and liabilities of the common/collective trust or pooled separate account or the certification discussed on page 3 of these instructions.

The value of the plan's interest in a master trust is the sum of the net values of the plan's interest in master trust investment accounts. The net values of such interests are obtained by multiplying the plan's percentage interest in each master trust investment account by the net assets of the investment account (total assets minus total liabilities) at the beginning and end of the plan year.

**34c(xii).** You can use the same method for determining the value of the insurance contracts reported in 34c(xii) that you used for line 6e of the Schedule A (Form 5500) as long as the contract values are stated as of the beginning and end of the plan year.

**34c(xiii).** Other investments include options, index futures, repurchase agreements, and state and municipal securities among other things.

**34c(xiv).** Add items 34c(i) through 34c(xiii) and enter the total.

**34d.** See 30g on page 14 for the definition of employer security.

**34e.** Include the current (not book) value of the buildings and other property used in the operation of the plan. Buildings or other property held as plan investments should be reported in item 34c(vii)(A) or (B), or 34d(ii).

**34f.** Add items 34a, 34b(v), 34c(xiv), 34d(i), 34d(ii) and 34e and enter the total.

*Do not include the value of future pension payments in 34g, 34h, 34i, 34j or 34k.*

**34g.** Noncash basis plans should include the total amount of benefit claims which have been processed and approved for payment by the plan.

**34h.** Noncash basis plans should include the total amount of obligations owed by the plan which were incurred in the normal operations of the plan and have been approved for payment by the plan but have not been paid.

**34i. Acquisition indebtedness.**—"Acquisition indebtedness," for debt-financed property other than real property, means the outstanding amount of the principal debt incurred:

(1) by the organization in acquiring or improving the property;

(2) before the acquisition or improvement of the property if the debt was incurred only to acquire or improve the property; or

(3) after the acquisition or improvement of the property if the debt was incurred only to acquire or improve the property and was reasonably foreseeable at the time of such acquisition or improvement.

For further explanation, see Code section 514(c).

**34j.** Noncash basis plans should include amounts owed for any liabilities which would not be classified as benefit claims payable, operating payables, or acquisition indebtedness.

**35a(i).** Include the total cash contributions received and/or (for accrual basis plans) due to be received.

**35a(ii).** Use the current value, at date contributed, of securities or other noncash property.

**35b(i)(A).** Include the interest earned on interest bearing cash. This is derived from investments which are includible in 34c(i), including earnings from sweep accounts, STIF accounts, etc.

**35b(i)(B).** Include the interest earned on certificates of deposit. This is the interest earned on the investments which are reported on line 34c(ii).

**35b(i)(C).** Include the interest earned on U.S. Government securities. This is the interest earned on the investments which are reported on line 34c(iii).

**35b(i)(D).** Generally, this is the interest earned on securities which are reported on line(s) 34c(iv) and 34d(i).

**35b(i)(E).** Include the interest earned on the investments which are reported on line(s) 34c(viii)(A) and (B) and 34c(ix)(A).

**35b(i)(F).** Include the interest earned on the investments which are reported on lines(s) 34c(ix)(B) and 34c(x).

**35b(i)(G).** Include any interest not reported in 35b(i)(A)–(F).

**35b(ii) (A) and (B).** Generally, these dividends are from the investments which are reported in items 34c(v)(A) and (B) and 34d(i).

For accrual basis plans, include any dividends declared for stock held on the date of record, but not yet received as of the end of the plan year.

**35b(iii).** Generally, rents represent the income earned on the real property which is reported in items 34c(vii)(A) and 34d(ii). Rents should be entered as a "Net" figure. Net rents are determined by taking the total rent received and subtracting all expenses directly associated with the property. If the real property is jointly used as income producing property and for the operation of the plan, that portion of the expenses attributable to the income producing portion of the property should be netted against the total rents received.

**35b(iv).** Column (b), total of net gain (loss) on sale of assets, should reflect the sum of the net realized gain (or loss) on each asset held at the beginning of the plan year which was sold or exchanged during the plan year and each asset which was both acquired and disposed of within the plan year.

**Note:** *As current value reporting is required for the Form 5500, assets are revalued to current value at the end of the plan year. For the purposes of this form, the increase or decrease in the value of assets since the beginning of the plan year (if held on the first day of the plan year) or their acquisition date (if purchased during the plan year) is reported in item 35b(v) below, with two exceptions: (1) the realized gain (or loss) on each asset which was disposed of during the plan year is reported in 35b(iv) (NOT in 35b(v)), and (2) the net investment gain (or loss) from certain investment arrangements is reported in item 35b(vi).*

The sum of the realized gain (or loss) of all assets sold or exchanged during the plan year is to be calculated by—

(1) entering the sum of the amount received for these former assets in 35b(iv), column (a), line (A),

(2) entering in 35b(iv), column (a), line (B), the sum of the current value of these former assets as of the beginning of the plan year, for those assets on hand at the beginning of the plan year, or the purchase price for those assets acquired during the plan year, and

(3) subtracting (B) from (A) and entering this result in column (b).

A negative figure should be placed in parentheses.

**35b(v).** Subtract the current value of assets at the beginning of the year plus the cost of any assets acquired during the plan year from the current value of assets at the end of the year to obtain this figure. A negative figure should be placed in parentheses. Do not include assets which were disposed of within the plan year (reportable in 35b(iv) above) or certain investment arrangements (reportable in 35b(vi) below).

**35b(vi).** For purposes of this item, investment arrangements include investments includable in 34c(xi). Report all earnings, expenses, gains or losses, and unrealized appreciation or depreciation which were included in computing the net investment gain (or loss) from any such investment arrangement here. If some plan funds are held in any of these investment arrangements and other plan funds are held in other funding media, complete all applicable sub-items of item 35 to report plan earnings, and expenses, relating to the other funding media.

The net investment gain (or loss) allocated to the plan for the plan year from the plan's investment in these investment arrangements is equal to:

(A) the sum of the current value of the plan's interest in each investment arrangement at the end of the plan year,

(B) minus the current value of the plan's interest in each investment arrangement at the beginning of the plan year,

(C) plus any amounts transferred out of each investment arrangement by the plan during the plan year, and

(D) minus any amounts transferred into each investment arrangement by the plan during the plan year.

Enter the net gain as a positive number or the net loss in parentheses on line 35b(vi).

**35c.** Include any other plan income earned that is not included in 35a or 35b. Do not include transfers from other plans which should be reported in item 35j.

**35d.** Add items 35a, 35b, and 35c and enter the total income.

**35e.** If distributions include securities or other property, use the current value at date distributed for this item. See page 14 for the definition of current value. If this return/report is being filed only for a fringe benefit plan (or for both a fringe benefit plan and a welfare benefit plan which is exempt from completing item 35), you must complete items 35g and 35h (reasonable estimates will be acceptable for these figures).

**35e(i).** Include the current value of all cash, securities or other property at the date of distribution.

**35e(ii).** Include payments to insurance companies and similar organizations such as Blue Cross, Blue Shield and health maintenance organizations for the provision of plan benefits, e.g., paid-up annuities, accident insurance, health insurance, vision care, dental coverage, etc.

**35e(iii).** Include payments made to other organizations or individuals providing benefits. Generally, these are individual providers of welfare benefits such as legal services, day care services, training and apprenticeship services.

**35f.** Interest expense is a monetary charge for the use of money borrowed by the plan. This amount should include the total of interest paid or to be paid (for accrual basis plans) during the plan year.

**35g.** Expenses incurred in the general operations of the plan are classified as administrative expenses. Report all administrative expenses (by specified category) paid by or charged to the plan, including those which were not subtracted from the gross income of common/collective trusts, pooled separate accounts, master trust investment accounts, and 103-12 IEs in determining their net investment gain(s) or loss(es). If this return/report is filed only for a fringe benefit plan and NOT for a welfare benefit plan, do not include overhead expenses such as utilities and photocopying expenses. Also, if you are filing for an educational assistance program described in Code section 127, do not include expenses for job-related training which are deductible under Code section 162.

**35g(i).** Include all of the plan's expenditures such as salaries and the payment of premiums to provide benefits to plan employees (e.g., health insurance, life insurance, etc.).

**35g(ii).** Include the total fees paid (or in the case of accrual basis plans, costs incurred during the plan year but not paid as of the end of the plan year) by the plan for outside accounting services. These may include the fee(s) for the annual audit of the plan by an independent qualified public accountant, for payroll audits, and for accounting/bookkeeping services. These do not include amounts paid to plan employees to perform accounting functions.

**35g(iii).** Include the total fees paid (or in the case of accrual basis plans, costs incurred during the plan year but not paid as of the end of the plan year) to an actuary for services rendered to the plan.

**35g(iv).** Include the total fees paid (or in the case of accrual basis plans, costs incurred during the plan year but not paid as of the end of the plan year) to a contract administrator for performing administrative services for the plan. For purposes of the return/report, a contract administrator is any individual, partnership, or corporation, responsible for managing the clerical operations (e.g., handling membership rosters, claims payments, maintaining books and records) of the plan on a contractual basis. Do not include salaried staff or employees of the plan or banks, or insurance carriers.

**35g(v).** Include the total fees paid (or in the case of accrual basis plans, costs incurred during the plan year but not paid as of the end of the plan year) to an individual, partnership or corporation (or other person) for advice to the plan relating to its investment portfolio. These may include fees paid to manage the plan's investments, fees for specific advice on a particular investment, and fees for the evaluation of the plan's investment performance.

VOL 54 ISS 39 MR 1 1989 UMI

**35g(vi).** Include total fees paid (or in the case of accrual basis plans, costs incurred during the plan year but not paid as of the end of the plan year) to a lawyer for services rendered to the plan. Include fees paid for rendering legal opinions, litigation, and advice but not for providing legal services as a benefit to plan participants.

**35g(vii).** Include the total fees paid (or in the case of accrual basis plans, costs incurred during the plan year but not paid as of the end of the plan year) for valuations or appraisals to determine the cost, quality, or value of an item. These may include the fee(s) paid for appraisals of real property (real estate, gemstones, coins, etc.), and a valuation of closely held securities for which there is no ready market.

**35g(viii).** Include the total fees and expenses paid to or on behalf of plan trustees (or in the case of accrual basis plans, costs incurred during the plan year but not paid as of the end of the plan year). These may include reimbursement of expenses associated with trustees such as lost time, seminars, travel, meetings, etc.

**35g(ix).** Other expenses are those that cannot be associated definitely with items 35g(i) through 35g(viii). All miscellaneous expenses are also included in this figure. These may include expenses for office supplies and equipment, cars, telephone, postage, rent, and expenses associated with the ownership of a building used in the operation of the plan.

**35h.** Add column (b) of items 35e, 35f, and 35g.

**35i.** Subtract item 35h from item 35d.

**35j.** Include in this reconciliation figure any transfers of assets into or out of the plan resulting from mergers and consolidations of plans or associated with benefit liabilities which are also being transferred. A transfer is not a shifting of assets or liabilities from one investment medium to another used for a single plan (e.g., between a trust and an annuity contract). Transfers out should be shown in parentheses.

**35k.** Include amount of net assets at the beginning of the year. This amount must equal item 34i, column (a).

**35l.** Include the amount of net assets at the end of the year. This amount must equal item 34i, column (b).

## Codes for Principal Business Activity and Principal Product or Service

These industry titles and definitions are based, in general, on the Enterprise Standard Industrial Classification System authorized by the Regulatory and Statistical Analysis Division, Office of Information and Regulatory Affairs, Office of Management and Budget, to classify enterprises by type of activity in which they are engaged.

| Code | |
|---|---|
| **AGRICULTURE, FORESTRY, AND FISHING** | |
| 0120 | Field crop. |
| 0150 | Fruit, tree nut, and vegetable |
| 0180 | Horticultural specialty. |
| 0230 | Livestock. |
| 0270 | Animal specialty. |
| **Agricultural services and forestry:** | |
| 0740 | Veterinary services. |
| 0750 | Animal services, except veterinary |
| 0780 | Landscape and horticultural services. |
| 0790 | Other agricultural services. |
| 0800 | Forestry. |
| **Farms:** | |
| **Fishing, hunting, and trapping:** | |
| 0930 | Commercial fishing, hatcheries, and preserves. |
| 0970 | Hunting, trapping, and game propagation. |
| **MINING** | |
| **Metal mining:** | |
| 1010 | Iron ores. |
| 1070 | Copper, lead and zinc, gold and silver ores |
| 1098 | Other metal mining |
| 1150 | Coal mining. |
| **Oil and gas extraction:** | |
| 1330 | Crude petroleum, natural gas, and natural gas liquids. |
| 1380 | Oil and gas field services. |
| **Nonmetallic minerals (except fuels) mining:** | |
| 1430 | Dimension, crushed and broken stone, sand and gravel. |
| 1498 | Other nonmetallic minerals, except fuels. |
| **CONSTRUCTION** | |
| **General building contractors and operative builders:** | |
| 1510 | General building contractors |
| 1531 | Operative builders. |
| **Heavy construction contractors:** | |
| 1611 | Highway and street construction. |
| 1620 | Heavy construction, except highway |
| **Special trade contractors:** | |
| 1711 | Plumbing, heating, and air conditioning |
| 1721 | Painting, paperhanging, and decorating |
| 1731 | Electrical work. |
| 1740 | Masonry, stonework, and plastering. |
| 1750 | Carpentering and flooring. |
| 1761 | Roofing and sheet metal work |
| 1771 | Concrete work. |
| 1781 | Water well drilling. |
| 1790 | Miscellaneous special trade contractors. |
| **MANUFACTURING** | |
| **Food and kindred products:** | |
| 2010 | Meat products. |
| 2020 | Dairy products. |
| 2030 | Preserved fruits and vegetables |
| 2040 | Grain mill products. |
| 2050 | Bakery products. |
| 2060 | Sugar and confectionery products |
| 2081 | Malt liquors and malt. |
| 2088 | Alcoholic beverages, except malt liquors and malt. |
| 2089 | Bottled soft drinks and flavorings. |
| 2096 | Other food and kindred products |
| 2100 | Tobacco manufacturers. |
| **Textile mill products:** | |
| 2228 | Weaving mills and textile finishing |
| 2250 | Knitting mills. |
| 2298 | Other textile mill products. |
| **Apparel and other textile products:** | |
| 2315 | Men's and boys' clothing. |
| 2345 | Women's and children's clothing. |
| 2388 | Hats, caps, millinery, fur goods, and other apparel and accessories |
| 2390 | Misc. fabricated textile products. |
| **Lumber and wood products:** | |
| 2415 | Logging camps and logging contractors, sawmills, and planing mills. |
| 2430 | Millwork, plywood, and related products |
| 2498 | Other wood products, including wood buildings and mobile homes |
| 2500 | Furniture and fixtures. |
| **Paper and allied products:** | |
| 2625 | Pulp, paper, and board mills. |
| 2699 | Other paper products. |
| **Printing, publishing, and allied industries:** | |
| 2710 | Newspapers |
| 2720 | Periodicals. |
| 2735 | Books, greeting cards, and miscellaneous publishing |
| 2799 | Commercial and other printing, and printing trade services |
| **Chemical and allied products:** | |
| 2815 | Industrial chemicals, plastics materials, and synthetics. |
| 2830 | Drugs. |
| 2840 | Soap, cleaners, and toilet goods |
| 2850 | Paints and allied products. |
| 2898 | Agricultural and other chemical products |
| **Petroleum refining and related industries (including those integrated with extraction):** | |
| 2910 | Petroleum refining (including those integrated with extraction). |
| 2998 | Other petroleum and coal products |
| **Rubber and misc. plastics products:** | |
| 3050 | Rubber products, plastics footwear, hose, and belting |
| 3070 | Misc. plastics products |
| **Leather and leather products:** | |
| 3140 | Footwear, except rubber. |
| 3198 | Other leather and leather products. |
| **Stone, clay, glass, and concrete products:** | |
| 3225 | Glass products. |
| 3240 | Cement, hydraulic. |
| 3270 | Concrete, gypsum, and plaster products. |
| 3298 | Other nonmetallic mineral products. |
| **Primary metal industries:** | |
| 3370 | Ferrous metal industries; miscellaneous primary metal products. |
| 3380 | Nonferrous metal industries. |
| **Fabricated metal products, except machinery and transportation equipment:** | |
| 3410 | Metal cans and shipping containers. |
| 3428 | Cutlery, hand tools, and hardware; screw machine products, bolts, and similar products. |
| 3430 | Plumbing and heating, except electric and warm air. |
| 3440 | Fabricated structural metal products. |
| 3460 | Metal forgings and stampings. |
| 3470 | Coating, engraving, and allied services |
| 3480 | Ordnance and accessories, except vehicles and guided missiles. |
| 3490 | Misc. fabricated metal products |
| **Machinery, except electrical:** | |
| 3520 | Farm machinery. |
| 3530 | Construction, mining and materials handling machinery, and equipment. |
| 3540 | Metalworking machinery. |
| 3550 | Special industry machinery, except metalworking machinery. |
| 3560 | General industrial machinery. |
| 3570 | Office, computing, and accounting machines. |
| 3598 | Engines and turbines, service industry machinery, and other machinery, except electrical. |
| **Electrical and electronic machinery, equipment, and supplies:** | |
| 3630 | Household appliances. |
| 3665 | Radio, television, and communication equipment. |
| 3670 | Electronic components and accessories. |
| 3698 | Other electric equipment. |
| **Transportation equipment:** | |
| 3710 | Motor vehicles and equipment. |
| 3725 | Aircraft, guided missiles, and parts |
| 3730 | Ship and boat building and repairing |
| 3798 | Other transportation equipment. |
| **Measuring and controlling instruments; photographic and medical goods, watches and clocks:** | |
| 3815 | Scientific instruments and measuring devices; watches, and clocks. |
| 3845 | Optical, medical, and ophthalmic goods |
| 3860 | Photographic equipment and supplies. |
| 3998 | Other manufacturing products. |
| **TRANSPORTATION, COMMUNICATION, ELECTRIC, GAS, SANITARY SERVICES** | |
| **Transportation:** | |
| 4000 | Railroad transportation |
| **Local and interurban passenger transit:** | |
| 4121 | Taxicabs. |
| 4189 | Other passenger transportation |
| **Trucking and warehousing:** | |
| 4210 | Trucking, local and long distance |
| 4289 | Public warehousing and trucking terminals. |
| **Other transportation including transportation services:** | |
| 4400 | Water transportation. |
| 4500 | Transportation by air |
| 4600 | Pipelines, except natural gas |
| 4722 | Passenger transportation arrangement |
| 4723 | Freight transportation arrangement. |
| 4799 | Other transportation services |
| **Communication:** | |
| 4825 | Telephone, telegraph, and other communication services. |
| 4830 | Radio and television broadcasting |
| **Electric, gas, and sanitary services:** | |
| 4910 | Electric services. |
| 4920 | Gas production and distribution |
| 4930 | Combination utility services |
| 4990 | Water supply and other sanitary services. |
| **WHOLESALE TRADE** | |
| **Durable:** | |
| 5010 | Motor vehicles and automotive equipment. |
| 5020 | Furniture and home furnishings. |
| 5030 | Lumber and construction materials. |
| 5040 | Sporting, recreational, photographic, and hobby goods, toys, and supplies. |
| 5050 | Metals and minerals, except petroleum and scrap. |
| 5060 | Electrical goods. |
| 5070 | Hardware, plumbing, and heating equipment. |
| 5083 | Farm machinery and equipment. |
| 5089 | Other machinery, equipment, and supplies. |
| 5098 | Other durable goods. |
| **Nondurable:** | |
| 5110 | Paper and paper products. |
| 5129 | Drugs, drug proprietaries, and druggists' sundries. |
| 5130 | Apparel, piece goods, and notions. |
| 5140 | Groceries and related products, except meats and meat products. |
| 5147 | Meats and meat products. |
| 5150 | Farm product raw materials. |
| 5160 | Chemicals and allied products. |
| 5170 | Petroleum and petroleum products. |
| 5180 | Alcoholic beverages. |
| 5190 | Miscellaneous nondurable goods. |

Department of Labor
Pension and Welfare Benefits Administration
Pension Benefit Guaranty Corporation

# Return/Report of Employee Benefit Plan

**(With fewer than 100 participants)**

**This form is required to be filed under sections 104 and 4065 of the Employee Retirement Income Security Act of 1974 and sections 6039D, 6057(b), and 6058(a) of the Internal Revenue Code, referred to as the Code.**

OMB No. 1210-0016

**1988**

**This Form is Open to Public Inspection.**

For the calendar plan year 1988 or fiscal plan year beginning , 1988, and ending , 19

If your plan year changed since the last return/report filed, check this box ▶ ☐

**Type or print in ink all entries on the form, schedules, and attachments. If an item does not apply, enter "N/A." File the originals.**

If *(i)* through *(iii)* do not apply to this year's return/report, leave the boxes unmarked. This return/report is:

*(i)* ☐ the first return/report filed for the plan; *(ii)* ☐ an amended return/report; or *(iii)* ☐ the final return/report filed for the plan.

▶ Welfare benefit plans and fringe benefit plans need only complete certain items or may not be required to file—see instructions "What to File."

▶ One-participant plans file Form 5500EZ for 1988.

▶ If you have been granted an extension of time to file this form, you must attach a copy of the approved extension to this form.

| | | |
|---|---|---|
| Use IRS label. Otherwise, please print or type. | 1a Name of plan sponsor (employer, if for a single-employer plan) | 1b Employer identification number |
| | Address (number and street) | 1c Telephone number of sponsor ( ) |
| | City or town, state, and ZIP code | 1d Business code number |
| 2a Name of plan administrator (if same as plan sponsor, enter "Same") | | 1e CUSIP issuer number |
| Address (number and street) | | 2b Administrator's employer identification no. |
| City or town, state, and ZIP code | | 2c Telephone number of administrator ( ) |

3 Are the name, address, and employer identification number (EIN) of the plan sponsor and/or plan administrator the same as they appeared on the last return/report filed for this plan? ☐ Yes ☐ No If "No," enter the information from the last return/report in a and/or b, and complete c.

a Sponsor ▶ ..... EIN ..... Plan number .....

b Administrator ▶ ..... EIN .....

c If 1a indicates a change in the sponsor's name and EIN, is this a change in sponsorship only? (See specific instructions for definition of sponsorship.) ☐ Yes ☐ No

4 Check box to indicate the type of plan entity (check only one box):

a ☐ Single-employer plan
b ☐ Plan of controlled group of corporations or common control employers
c ☐ Multiemployer plan
d ☐ Multiple-employer-collectively-bargained plan
e ☐ Multiple-employer plan (other)
f ☐ Exceptions to (b) and (e). (See instructions for line 4f.)

5a *(i)* Name of plan ▶ .....

*(ii)* ☐ Check if name of plan changed since the last return/report

*(iii)* ☐ Check this box if this plan covers self-employed participants

5b Effective date of plan

5c Enter three-digit plan number ▶

6a ☐ Welfare benefit plan (plan numbers 501 through 999) must check applicable items A through P and 6c

*(i)* ☐ Type

A ☐ Health (other than dental or vision)
B ☐ Life insurance
C ☐ Supplemental unemployment
D ☐ Dental
E ☐ Vision
F ☐ Temporary disability (accident and sickness)
G ☐ Prepaid legal
H ☐ Long-term disability
I ☐ Severance pay
J ☐ Apprenticeship and training
K ☐ Scholarship (funded)
L ☐ Death benefits other than life insurance
M ☐ Code section 120 (group legal services plan)
N ☐ Code section 125 (cafeteria plan)
O ☐ Code section 127 (educational assistance plan)
P ☐ Other (specify) .....

*(ii)* If you checked M, N, or O, check if plan is: ☐ funded or ☐ unfunded

6b ☐ Pension benefit plan (plan numbers 001 through 500) must check applicable items in (i) through (vii) and answer 6c through 6f.

*(i)* ☐ Defined benefit plan

*(ii)* ☐ Defined contribution plan—(indicate type of defined contribution): (A) ☐ Profit-sharing (B) ☐ Stock bonus (C) ☐ Target benefit (D) ☐ Other money purchase (E) ☐ Other (specify) ▶ .....

*(iii)* ☐ Defined benefit plan with benefits based partly on balance of separate account of participant (Code section 414(k))

*(iv)* ☐ Annuity arrangement of certain exempt organizations (Code section 403(b)(1))

*(v)* ☐ Custodial account for regulated investment company stock (Code section 403(b)(7))

*(vi)* ☐ Pension plan utilizing individual retirement accounts or annuities (described in Code section 408) as the sole funding vehicle for providing benefits

*(vii)* ☐ Other (specify) ▶

Under penalties of perjury and other penalties set forth in the instructions, I declare that I have examined this return/report, including accompanying schedules and statements, and to the best of my knowledge and belief it is true, correct, and complete.

Date ▶ ..... Signature of employer/plan sponsor ▶ .....

Date ▶ Signature of plan administrator ▶

**For Paperwork Reduction Act Notice, see page 1 of the instructions.** Form **5500-C** (1988)

Form 5500-C (1988) Page 2

6c Other plan features: (i) ☐ ESOP (ii) ☐ Leveraged ESOP (iii) ☐ Participant-directed account plan
(iv) ☐ Pension plan maintained outside the United States (v) ☐ Master trust (see instructions)
(vi) ☐ 103-12 investment entity (see instructions) (vii) ☐ Common/Collective trust (viii) ☐ Pooled separate account

d Single-employer plans enter the tax year end of the employer in which this plan year ends ▶ Month ____ Day ____ Year ____

| | | Yes | No |
|---|---|---|---|
| e | Is the employer a member of an affiliated service group? | | |
| f | Does this plan contain a cash or deferred arrangement described in Code section 401(k)? | | |
| 7a | Total participants: (i) Beginning of plan year ____ (ii) End of plan year ____ | | |
| b | (i) Were any participants in the pension benefit plan separated from service with a deferred vested benefit for which a Schedule SSA (Form 5500) is required to be attached? | | |
| | (ii) If "Yes," enter the number of separated participants required to be reported ▶ | | |
| 8a | Were any plan amendments adopted during the plan year? | | |
| b | Did any amendment result in the retroactive reduction of accrued benefits for any participant? | | |
| c | Enter the date the most recent amendment was adopted ▶ Month ____ Day ____ Year ____ | | |
| d | If a is "Yes," did any amendment change the information contained in the latest summary plan descriptions or summary description of modifications available at the time of the amendment? | | |
| e | Has a summary plan description or summary description of modifications that reflects the plan amendments referred to in d been furnished to participants and filed with the Department of Labor? | | |
| 9a | Was this plan terminated during this plan year or any prior plan year? If "Yes," enter year ▶ ____ | | |
| b | Were all plan assets either distributed to participants or beneficiaries, transferred to another plan, or brought under the control of PBGC? | | |
| c | Was a resolution to terminate this plan adopted during this plan year or any prior plan year? | | |
| d | If a or c is "Yes," have you received a favorable determination letter from IRS for the termination? | | |
| e | If d is "No," has a determination letter been requested from IRS? | | |
| f | If a or c is "Yes," have participants and beneficiaries been notified of the termination or the proposed termination? | | |
| g | If a is "Yes" and the plan is covered by PBGC, is the plan continuing to file a PBGC Form 1 and pay premiums until the end of the plan year in which assets are distributed or brought under the control of PBGC? | | |
| h | During this plan year, did any trust assets revert to the employer for which the Code section 4980 excise tax is due? | | |
| i | If h is "Yes," enter the amount of tax paid with your Form 5330 ▶ | | |
| 10a | Was this plan merged or consolidated into another plan(s), or were assets or liabilities transferred to another plan(s) since the end of the plan year covered by the last return/report Form 5500 or 5500-C which was filed for this plan (or during this plan year if this is the initial return/report)? | | |

If "Yes," identify the other plan(s):

| b Name of plan(s) ▶ | c Employer identification number(s) | d Plan number(s) |
|---|---|---|
| | | |

e Has Form 5310 been filed? ☐ Yes ☐ No

| | | Yes | No |
|---|---|---|---|
| 11 | Enter the plan funding arrangement code (see instructions) ▶ | 12 Enter the plan benefit arrangement code (see instructions) ▶ | |
| 13 | Is this a plan established or maintained pursuant to one or more collective bargaining agreements? | | |
| 14 | If any benefits are provided by an insurance company, insurance service, or similar organization, enter the number of Schedules A (Form 5500), Insurance Information, that are attached. If none, enter "-0-" ▶ | | |

**Welfare Plans Do Not Complete Items 15 Through 28. Skip to Item 29.**

| | | Yes | No |
|---|---|---|---|
| 15a | If this is a defined benefit plan, is it subject to the minimum funding standards for this plan year? If "Yes," attach Schedule B (Form 5500). | | |
| b | If this is a defined contribution plan, i.e., money purchase or target benefit, is it subject to the minimum funding standards (If a waiver was granted, see instructions)? | | |

If "Yes," complete (i), (ii), and (iii) below:

| | | |
|---|---|---|
| (i) | Amount of employer contribution required for the plan year under Code section 412 | (i) $ |
| (ii) | Amount of contribution paid by the employer for the plan year | (ii) $ |
| | Enter date of last payment by employer ▶ Month ____ Day ____ Year ____ | |
| (iii) | If (i) is greater than (ii), subtract (ii) from (i) and enter the funding deficiency here. Otherwise, enter zero. (If you have a funding deficiency, file Form 5330.) | (iii) $ |

| | | | |
|---|---|---|---|
| 16 | Has the plan been top-heavy at any time beginning with the 1984 plan year? | 16 | |
| 17 | Has the plan accepted any transfers or rollovers with respect to a participant who has attained age 70½? | 17 | |

Form 5500-C (1988) Page 3

| | | Yes | No |
|---|---|---|---|
| 18a | If the plan distributed any annuity contracts this year, did these contracts contain a requirement that the spouse consent before any distributions under the contract are made in a form other than a qualified joint and survivor annuity? | 18a | |
| b | Did the plan make distributions to participants or beneficiaries in a form other than a qualified joint and survivor annuity (a life annuity if a single person) or qualified preretirement survivor annuity (exclude deferred annuity contracts)? | b | |
| c | Did the plan make distributions or loans to married participants and beneficiaries without the required consent of the participant's spouse? | c | |
| d | Upon plan amendment or termination, do the accrued benefits of every participant include the subsidized benefits that the participant may become entitled to receive subsequent to the plan amendment or termination? | d | |
| 19 | Were distributions made in accordance with the requirements of Code section 417(e)? (See instructions.) | 19 | |
| 20 | Have any contributions been made or benefits accrued in excess of the Code section 415 limits, as amended by the Tax Reform Act of 1986? | 20 | |
| 21 | Has the plan made the required distributions in 1988 under Code section 401(a)(9)? | 21 | |
| 22a | Does the plan satisfy the percentage test of Code section 410(b)(1)(A)? If a is "Yes," complete b through i. If "No," complete only b and c below and see Specific Instructions. | 22a | |

| | | Number |
|---|---|---|
| b | (i) Number of employees who are aggregated with employees of the employer as a result of being an affiliated service group under Code section 414(b), (c), or (m) | (i) |
| | (ii) Number of individuals who performed services as leased employees under Code section 414(n) including leased employees of employers in (i) | (ii) |
| c | Total number of employees (including any employees aggregated in b) | c |
| d | Number of employees excluded under the plan because of (i) minimum age or years of service, (ii) employees on whose behalf retirement benefits were the subject of collective bargaining, or (iii) nonresident aliens who received no earned income from United States sources | d |
| e | Total number of employees not excluded (subtract d from c) | e |
| f | Employees ineligible (specify reason) | f |
| g | Employees eligible to participate (subtract f from e) | g |
| h | Employees eligible but not participating | h |
| i | Employees participating (subtract h from g) | i |

| | | Yes | No |
|---|---|---|---|
| 23a | Is it intended that this plan qualify under Code section 401(a)? If "Yes," complete b and c. | 23a | |
| b | Enter the date of the most recent IRS determination letter—Month ____ Year ____ | | |
| c | Is a determination letter request pending with IRS? | c | |
| 24a | If this is a plan with Employee Stock Ownership features, was a current appraisal of the value of the stock made immediately before any contribution of stock or the purchase of the stock by the trust for the plan year covered by this return/report? | 24a | |
| b | If a is "Yes," was the appraisal made by an unrelated third party? | b | |
| 25 | Is this plan integrated with social security or railroad retirement? | 25 | |
| 26 | Does the employer/sponsor listed in 1a of this form maintain other qualified pension benefit plans? If "Yes," enter the total number of plans including this plan ▶ | 26 | |

27 Is this plan an adoption of a master, prototype or uniform plan? Indicate which type by checking the appropriate box:
a ☐ Master b ☐ Prototype plan c ☐ Uniform plan

28a Is the plan covered under the Pension Benefit Guaranty Corporation termination insurance program? ☐ Yes ☐ No ☐ Not determined

b If a is "Yes" or "Not determined," enter the employer identification number and the plan number used to identify it.
Employer identification number ▶ Plan number ▶

| | | | | |
|---|---|---|---|---|
| 29 | During the plan year: | Yes | No | Amount |
| a | Was this plan covered by a fidelity bond? | 29a | | |
| b | Was there any loss to the plan, whether or not reimbursed, caused by fraud or dishonesty? | b | | |
| c | Was there any sale, exchange, or lease of any property between the plan and the employer, any fiduciary, any of the five most highly paid employees of the employer, any owner of a 10% or more interest in the employer, or relatives of any such persons? | c | | |
| d | Was there any loan or extension of credit by the plan to the employer, any fiduciary, any of the five most highly paid employees of the employer, any owner of a 10% or more interest in the employer, or relatives of any such persons? | d | | |
| e | Did the plan acquire or hold any employer security or employer real property? | e | | |
| f | Has the plan granted an extension on any delinquent loan owed to the plan? | f | | |
| g | Has the employer owed contributions to the plan which are more than 3 months overdue? | g | | |
| h | Were any loans by the plan or fixed income obligations due the plan classified as uncollectible or in default as of the close of the plan year? | h | | |

Pension Benefit Guaranty Corporation

# 1988 Instructions for Form 5500-C

## Return/Report of Employee Benefit Plan (With fewer than 100 participants)

*(Code references are to the Internal Revenue Code. ERISA refers to the Employee Retirement Income Security Act of 1974.)*

**Paperwork Reduction Act Notice.**—We ask for this information to carry out the law as specified in ERISA and Code section 6039D. We need it to determine whether the plan is operating according to the law. You are required to give us this information.

The time needed to complete and file the forms listed below reflect the combined requirements of the Internal Revenue Service, Department of Labor, Pension Benefit Guaranty Corporation and the Social Security Administration. These times will vary depending on individual circumstances. The estimated average times are:

| | Recordkeeping | Learning about the law or the form | Preparing the form | Copying, assembling, and sending the form to IRS |
|---|---|---|---|---|
| Form 5500-C | 52 hrs., 37 min. | 7 hrs., 12 min. | 10 hrs., 13 min. | 32 min. |
| Schedule A (Form 5500) | 17 hrs., 28 min. | 28 min. | 1 hr., 42 min. | 16 min. |
| Schedule B (Form 5500) | 25 hrs., 50 min. | 1 hr. | 1 hr., 27 min. | ----- |
| Schedule P (Form 5500) | 2 hrs., 9 min. | 1 hr., 24 min. | 1 hr., 29 min. | ----- |
| Schedule SSA (Form 5500) | 6 hrs., 42 min. | 12 min. | 19 min. | ----- |

If you have comments concerning the accuracy of these time estimates or suggestions for making these forms more simple, we would be happy to hear from you. You can write to the **Internal Revenue Service, Washington, DC 20224, Attention: IRS Reports Clearance Officer, TR:FP;** or the **Office of Management and Budget,** Paperwork Reduction Project, Washington, DC 20503.

File 1988 forms for plan years that started in 1988. If the plan year differs from the calendar year, fill in the fiscal year space just under the form title. For a short plan year, see Section 1, instruction **B**.

***Reminder:*** In addition to filing this form with IRS, plans covered by the Pension Benefit Guaranty Corporation termination insurance program must file their Annual Premium Payment, PBGC Form 1, directly with that agency.

**Penalties.**—ERISA and the Code provide for the assessment or imposition of penalties for not giving complete information and not filing statements and returns/reports. Certain penalties are administrative; that is, they may be imposed or assessed by one of the governmental agencies delegated to administer the collection of Form 5500 series data. Others require a legal conviction.

**A. Administrative Penalties.**—Listed below are various penalties for not meeting the Form 5500 series filing requirements. One or more of the following five penalties may be imposed or assessed in the event of incomplete filings and /or filings received after the date they are due unless it is determined that your explanation for failure to file properly is for reasonable cause:

1. A penalty of up to $1,000 a day for each day a plan administrator fails or refuses to file a complete return/report. See ERISA section 502(c)(2) and 29 CFR 2560.502c-2.
2. A penalty of $25 a day (up to $15,000) for not filing returns for certain plans of deferred compensation, certain trusts and annuities, and bond purchase plans by the due date(s). See Code section 6652(e). This penalty also applies to returns required to be filed under Code section 6039D.
3. A penalty of $1 a day (up to $5,000) for each participant for whom a registration statement (Schedule SSA (Form 5500)) is required but not filed. See Code section 6652(d)(1).
4. A penalty of $1 a day (up to $1,000) for not filing a notification of change of status of a plan. See Code section 6652(d)(2).
5. A penalty of $1,000 for not filing an actuarial statement. See Code section 6692.

**B. Other Penalties.**—

1. Any individual who willfully violates any provision of Part 1 of Title I of ERISA shall be fined not more than $5,000 or imprisoned not more than 1 year, or both. See ERISA section 501.
2. A penalty of up to $10,000, 5 years imprisonment, or both, for making any false statement or representation of fact, knowing it to be false, or for knowingly concealing or not disclosing any fact required by ERISA. See section 1027, Title 18, U.S. Code, as amended by section 111 of ERISA.

### How To Use This Instruction Booklet

The instructions are divided into four main sections.

| **Section 4** | |
| Specific Instructions for Form 5500-C listed in numerical sequence | 6 |

## Section 1

**A. Who Must File.**—Any administrator or sponsor of an employee benefit plan subject to ERISA must file information about each such plan every year (Code section 6058 and ERISA sections 104 and 4065). Also required to file, for each year, is every employer maintaining a specified fringe benefit plan as described in Code section 6039D. The Internal Revenue Service (IRS), Department of Labor (DOL), and Pension Benefit Guaranty Corporation (PBGC) have consolidated their returns and report forms to minimize the filing burden for plan administrators and employers. The chart on page 7 gives a brief guide to the type of return/report to be filed.

**B. When To File.**—File all required forms and schedules by the last day of the 7th month after the plan year ends. For a short plan year, file the form and applicable schedules by the last day of the 7th month after the short plan year ends. For purposes of this return/report, the short plan year ends upon the date of the change in accounting period or upon the complete distribution of the assets of the plan. (Also see Section 3.) If the current year Form 5500-C is not available before the due date of your short plan year return/report, use the latest year form available and change the date printed on the return/report to the current year. Also show the dates your short plan year began and ended.

***Request for Extension of Time To File.***—A one time extension of time up to 2½ months may be granted for filing returns/reports if **Form 5558,** Application for Extension of Time to File Certain Employee Plan Returns, is filed **before the normal due date of the return/report.**

**Exception:** *Single-employer plans and plans of a controlled group of corporations which file consolidated Federal income tax returns are automatically granted an extension of time to file Form 5500, 5500-C, or 5500-R to the due date of the Federal income tax return of the single employer or controlled group of corporations if all the following conditions are met:*

*1. The plan year and the tax year coincide.*

*2. The single employer or the controlled group has been granted an extension of time to file its Federal income tax return to a date later than the normal due date for filing the Form 5500, 5500-C, or 5500-R.*

BEST COPY AVAILABLE

VOL 54 ISS 39 MR 1 1989 UMI

*3. A copy of the IRS extension of time to file the Federal income tax return is attached to each Form 5500, 5500-C, or 5500-R filed with IRS.*

**Note:** *An extension of time to file the return/report does not operate as an extension of time to file the PBGC Form 1.*

**C. Where To File.**—Please file the return/report with the Internal Revenue Service Center indicated below. No street address is needed.

See page 5 for the filing address for investment arrangements filing directly with DOL.

| If the principal office of the plan sponsor or the plan administrator is located in | Use the following Internal Revenue Service Center address |
|---|---|
| Connecticut, Delaware, District of Columbia, Foreign Address, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virginia | Holtsville, NY 00501 |
| Alabama, Alaska, Arkansas, California, Florida, Georgia, Hawaii, Idaho, Louisiana, Mississippi, Nevada, North Carolina, Oregon, South Carolina, Tennessee, Washington | Atlanta, GA 39901 |
| Arizona, Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, Texas, Utah, West Virginia, Wisconsin, Wyoming | Memphis, TN 37501 |
| All Form 5500EZ filers | Andover, MA 05501 |

## Section 2

**A. Kinds of Plans.**—Employee benefit plans include pension benefit plans and welfare benefit plans. File the applicable return/report for any of the following plans.

*(a) Pension benefit plan.*—This is an employee pension benefit plan covered by ERISA. The return/report is due whether or not the plan is qualified and even if benefits no longer accrue, contributions were not made this plan year, or contributions are no longer made ("frozen plan" or "wasting trust"). See Section 3, "Final Return/Report" on page 6.

Pension benefit plans required to file include defined benefit plans and defined contribution plans (e.g., profit-sharing, stock bonus, money purchase plans, etc.). The following are among the pension benefit plans for which a return/report must be filed:

(i) Annuity arrangements under Code section 403(b)(1).

(ii) Custodial account established under Code section 403(b)(7) for regulated investment company stock.

(iii) Individual retirement account established by an employer under Code section 408(c).

(iv) Pension benefit plan maintained outside the United States primarily for nonresident aliens if the employer who maintains the plan is:

(A) a domestic employer, or

(B) a foreign employer with income derived from sources within the U.S. (including foreign subsidiaries of domestic employers) and deducts contributions to the plan on its U.S. income tax return. See "Plans Excluded From Filing" below.

(v) Church plans electing coverage under Code section 410(d).

(vi) A plan that covers residents of Puerto Rico, the Virgin Islands, Guam, Wake Island, or American Samoa. This includes a plan that elects to have the provisions of section 1022(i)(2) of ERISA apply.

See "Items To Be Completed on Form 5500-C" on page 4 for more information about what questions need to be completed by pension plans.

*(b) Welfare benefit plan.*—This is an employee welfare benefit plan covered by Part 1 of Title I of ERISA. Welfare plans would provide benefits such as medical, dental, life insurance, apprenticeship training, educational assistance, severance pay, disability, etc.

See "Items To Be Completed on Form 5500-C" on page 4 for more information about what questions need to be completed for welfare benefit plans.

*(c) Fringe benefit plan.*—Group legal services plans described in Code section 120, cafeteria plans described in Code section 125, and educational assistance programs described in Code section 127 are considered fringe benefit plans and generally are required to file the annual information specified by Code section 6039D. However, Code section 127 educational assistance programs which provide only job-related training which is deductible under Code section 162 do not need to file Form 5500-C.

See "Items To Be Completed on Form 5500-C" on page 4 for more information about how to complete this form for a fringe benefit plan.

**B. Plans Excluded From Filing (this does not apply to a fringe benefit plan required to file by Code section 6039D).**—Do not file a return/report for an employee benefit plan that is any of the following:

(a) A welfare benefit plan which covers fewer than 100 participants as of the beginning of the plan year and is: (i) fully insured, (ii) unfunded, or (iii) a combination of insured and unfunded.

(1) An unfunded welfare benefit plan has its benefits paid as needed directly from the general assets of the employer or the employee organization that sponsors the plan.

(2) A fully insured welfare benefit plan has its benefits provided exclusively through insurance contracts or policies, the premiums of which must be paid directly by the employer or employee organization from its general assets or partly from its general assets and partly from contributions by its employees or members (which the employer or organization forwards within 3 months of receipt).

(3) A combination unfunded/insured welfare plan has its benefits provided partially as an unfunded plan and partially as a fully insured plan. An example of such a plan is a plan which requires the employer to reimburse an employee for hospital expenses with the first $1,000 per year of benefits paid from the general assets of the employer and any benefits above $1,000 paid from a stop loss insurance contract.

The insurance contracts or policies discussed above must be issued by an insurance company or similar organization (such as Blue Cross, Blue Shield or a health maintenance organization) that can legally do business in any state. A plan meeting (1) cannot have any assets at any time during the plan year.

"Directly," as used in (1) above, means that the plan cannot use a trust or separately maintained fund (including a Code section 501(c)(9) trust) to hold plan assets or to act as a conduit for the transfer of plan assets.

See 29 CFR 2520.104-20.

**Note:** *An "employees' association" as used in Code section 501(c)(9) should not be confused with the employee organization or employer which establishes and maintains (i.e., sponsors) the welfare benefit plan.*

(b) An unfunded pension benefit plan or an unfunded or combination unfunded and insured welfare benefit plan: (1) whose benefits go only to a select group of management or highly compensated employees, and (2) which meets the terms of Department of Labor Regulations 29 CFR 2520.104-23 (including the requirement that a notification statement be filed with DOL) or 29 CFR 2520.104-24.

(c) Plans maintained only to comply with workers' compensation, unemployment compensation, or disability insurance laws.

(d) An unfunded excess benefit plan.

(e) A welfare benefit plan maintained outside the United States primarily for persons substantially all of whom are nonresident aliens.

(f) A pension benefit plan maintained outside the United States if it is a qualified foreign plan within the meaning of Code section 404A(e) that does not qualify for the treatment provided in Code section 402(c).

(g) An annuity arrangement described in 29 CFR 2510.3-2(f).

(h) A simplified employee pension (SEP) described in Code section 408(k) which conforms to the alternative method of compliance described in 29 CFR 2520.104-48 or 29 CFR 104-49. A SEP is a pension plan which meets certain minimum qualifications regarding eligibility and employer contributions.

(i) A church plan not electing coverage under Code section 410(d) or a governmental plan.

(j) A welfare plan (other than a fringe benefit plan) that participates in a group insurance arrangement that files a return/report Form 5500 on its behalf. A group insurance arrangement is an arrangement which provides benefits to the employees of two or more unaffiliated employers (not in connection with a multi-employer plan or a multiple-employer-collectively-bargained plan), fully insures one or more welfare plans of each participating employer, and uses a trust (or other entity such as a trade association) as the holder of the insurance contracts and the conduit for payment of premiums to the insurance company. For further details, see 29 CFR 2520.104-43.

**C. Kinds of Filers.**—Item 4 on the Form 5500, 5500-C, and 5500-R lists the different types of entities which file the forms. These entities are described below.

*(a) Single-employer plan.*—If one employer or one employee organization maintains a plan, file a separate return/report for the plan. If the employer or employee organization maintains more than one such plan, file a separate return/report for each plan.

If a member of either a controlled group of corporations or a group of trades or businesses under common control maintains a plan that does not involve other group members, file a separate return/report as a single-employer plan.

If several employers participate in a program of benefits wherein the funds attributable to each employer are available only to pay benefits to that employer's employees, each employer must file a separate return/report.

*(b) Plan for controlled group of corporations or group of trades or businesses under common control.*—These groups are defined in Code sections 414(b) and (c), and are referred to as controlled groups.

If the benefits are payable to participants from the plan's total assets without regard to contributions by each participant's employer, file one return/report for the plan. On the return/report for the plan, complete item 22 only for the controlled group's employees.

**Exception:** Employers who participate in a plan of one of the groups listed above but who are not members of the group must file a separate return/report. The return/report should be filed on Form 5500-C or 5500-R, as applicable (see **"What To File"** on page 4). On the Form 5500-C, complete only items 1, 2, 3, 4f, 5, 6, 9, and 22. On Form 5500-R, complete only items 1 through 3, 4f, and 5 through 8b.

If several employers participate in a program of benefits wherein the funds attributable to each employer are available only to pay benefits to that employer's employees, each employer must file a separate return/report as a single employer plan.

*(c) Multiemployer plan.*— Multiemployer plans are plans: (1) to which more than one employer is required to contribute; (2) which are maintained pursuant to one or more collective bargaining agreements, and (3) have not made the election under Code section 414(f)(5) and ERISA section 3(37)(E). File one return/ report for each such plan. Contributing employers do not file individually with respect to such plans. See Code section 414 for more information.

*(d) Multiple-employer-collectively-bargained plan.*—A multiple-employer-collectively-bargained plan involves more than one employer, is collectively bargained and collectively funded, and, if covered by PBGC termination insurance, has properly elected before 9-27-81 not to be treated as a multiemployer plan under Code section 414(f)(5) or ERISA sections 3(37)(E) and 4001(a)(3). File one return/report for each such plan. Participating employers do not file individually for these plans.

*(e) Multiple-employer plan (other).*—A multiple-employer plan (other) involves more than one employer and is not one of the plans already described. A multiple-employer plan (other) includes only plans whose contributions from individual employers are available to pay benefits to all participants. File one return/report for each such plan.

In addition, for pension benefit plans, each participating employer files either a Form 5500-C, regardless of the number of participants, or Form 5500-R. On Form 5500-C, complete only items 1, 2, 3, 4f, 5, 6, 9, and 22. On Form 5500-R, complete only items 1 through 3, 4f, and 5 through 8b.

**Note:** *If a participating employer is also the sponsor of the multiple-employer plan (other), the plan number on the return/report filed for the plan should be 333. The Form 5500-C or Form 5500-R filed by the participating employer should list his or her appropriate plan number.*

If more than one employer participates in the plan and the plan provides that each employer's contributions are available to pay benefits only for that employer's employees who are covered by the plan, one annual return/report must be filed for each participating employer. These filers will be considered single employers and should complete the entire form.

**D. Investment Arrangements Filing Directly With DOL.**—Some plans invest in certain trusts, accounts, and other investment arrangements which may file information concerning itself and its relationship with employee benefit plans (as specified on page 5) directly with DOL. Plans participating in an investment arrangement as described in paragraphs a through c below are required to attach certain additional information to the return/report filed with IRS as specified below.

**a. Common/Collective Trust and Pooled Separate Account**

*(i) Definition.* For reporting purposes, a common/collective trust is a trust maintained by a bank, trust company, or similar institution which is regulated, supervised, and subject to periodic examination by a state or Federal agency for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer or controlled group of corporations, as the term is used in Code section 1563. For reporting purposes, a pooled separate account is an account maintained by an insurance carrier which is regulated, supervised, and subject to periodic examination by a state or Federal agency for the collective investment and reinvestment of assets contributed thereto from employee benefit plans maintained by more than one employer or controlled group of corporations, as the term is used in Code section 1563. See 29 CFR sections 2520.103-3, 2520.103-4, 2520.103-5, and 2520.103-9.

**Note:** *For reporting purposes, a separate account which is not considered to be holding plan assets pursuant to 29 CFR 2510.3-101(h)(1)(iii), shall not constitute a pooled separate account.*

*(ii) Additional Information Required To Be Attached to the Form 5500-C for Plans Participating in Common/Collective Trusts and Pooled Separate Accounts.* A plan participating in a common/collective trust or pooled separate account must complete the annual return/report in accordance with the specific instructions and attach either (1) the most recent statement of the assets and liabilities of any common/collective trust or pooled separate account, or (2) a certification that: (A) the statement of the assets and liabilities of the common/collective trust or pooled separate account has been submitted directly to DOL by the financial institution or insurance carrier; (B) the plan has received a copy of the statement; and (C) includes the EIN and other numbers used by the financial institution or insurance carrier to identify the trusts or accounts in the direct filing made with DOL.

**b. Master Trust**

*(i) Definition.* For reporting purposes, a master trust is a trust for which a regulated financial institution (as defined below) serves as trustee or custodian (regardless of whether such institution exercises discretionary authority or control with respect to the management of assets held in the trust), and in which assets of more than one plan sponsored by a single employer or by a group of employers under common control are held.

A "regulated financial institution" means a bank, trust company, or similar financial institution which is regulated, supervised, and subject to periodic examination by a state or Federal agency. Common control is determined on the basis of all relevant facts and circumstances (whether or not such employers are incorporated). See 29 CFR 2520.103-1(e).

For reporting purposes, the assets of a master trust are considered to be held in one or more "investment accounts." A master trust investment account may consist of a pool of assets or a single asset.

Each pool of assets held in a master trust must be treated as a separate master trust investment account if each plan which has an interest in the pool has the same fractional interest in each asset in the pool as its fractional interest in the pool, and if each such plan may not dispose of its interest in any asset in the pool without disposing of its interest in the pool. A master trust may also contain assets which are not held in such a pool. Each such asset must be treated as a separate master trust investment account.

Financial information must generally be provided with respect to each master trust investment account as specified on page 5.

*(ii) Additional Information Required To Be Attached to the Form 5500-C for Plans Participating in Master Trusts.* A plan participating in a master trust must complete the annual return/report and attach to it a schedule listing each master trust investment account in which the plan has an interest indicating the plan's name, EIN, and plan number and the name of the master trust used in the master trust information filed with DOL (see page 5). For each investment account you must show, in tabular format, the net value of the plan's interest in each investment account at the beginning and end of the plan year, and the net investment gain (or loss) allocated to the plan for the plan year from the investment account.

**Note:** *If a master trust investment account consists solely of one plan's asset(s) during the reporting period, the plan may report*

VOL 54 ISS 39 MR 1 1989 UMI

*the(se) asset(s) either as an investment account to be reported as part of the master trust report filed directly with DOL or as a plan asset(s) which is not part of the master trust (and therefore subject to all instructions pertaining to assets not held in a master trust).*

**c. 103-12 Investment Entities**

*Definition.* 29 CFR 2520.103-12 provides an alternative method of reporting for plans which invest in an entity (other than an investment arrangement filing with DOL described in a or b above), the underlying assets of which include "plan assets" (within the meaning of 29 CFR 2510.3-101) of two or more plans which are not members of a "related group" of employee benefit plans. For reporting purposes, a "related group" consists of each group of two or more employee benefit plans (1) each of which receives 10 percent or more of its aggregate contributions from the same employer or from a member of the same controlled group of corporations (as determined under Code section 1563(a), without regard to Code section 1563(a)(4) thereof); or (2) each of which is either maintained by, or maintained pursuant to a collective bargaining agreement negotiated by, the same employee organization or affiliated employee organizations. For purposes of this paragraph, an "affiliate" of an employee organization means any person controlling, controlled by, or under common control with such organization. See 29 CFR 2520.103-12.

For reporting purposes, the investment entities described above with respect to which the required information is filed directly with DOL constitute "103-12 investment entities" (103-12 IEs).

**E. What To File.**—The circumstances that dictate which form should be filed are described below. In addition, there are schedules that may need to be attached to the return/report. These are also described below. Finally, this section also contains a description of special filing requirements for plans that invest in certain investment arrangements. A brief guide illustrating which forms and schedules are required by different types of plans and filers may be found on page 7.

**Forms**

***Form 5500.*—File Form 5500,** Annual Return/Report of Employee Benefit Plan, annually for each plan with 100 or more participants at the beginning of the plan year.

***Form 5500-C.*—File Form 5500-C,** Return/Report of Employee Benefit Plan, for each pension benefit plan, welfare benefit plan, and fringe benefit plan (unless otherwise exempted) with fewer than 100 participants (one-participant plans see "Form 5500EZ" below) at the beginning of the plan year. File Form 5500-C for the first plan year, the year for which the final return/report is due, and for plan years in which a Form 5500-R is not filed as explained below.

***Form 5500-R.*—Form 5500-R,** Registration Statement of Employee Benefit Plan (with fewer than 100 participants), may be filed instead of a Form 5500-C for this plan year provided (a) this is not the first plan year, (b) this is not a year for which the final return/report is due, and (c) a Form 5500-C has been filed for one of the

Page 4

prior 2 plan years. The Form 5500-R should not be filed if (a) this plan year is the first plan year, (b) this is the plan year for which a final return/report is due, or (c) the Form 5500-R has been filed for both of the prior 2 plan years.

Any plan may choose not to file the Form 5500-R if the plan files the Form 5500-C instead.

**Note:** *Generally, under the filing requirements explained above, if the number of plan participants increases from under 100 to 100 or more, or decreases from 100 or more to under 100, from one year to the next, you would have to file a different form from that filed the previous year. However, there is an exception to this rule. You may file the same form you filed last year, even if the number of participants changed, provided that at the beginning of this plan year the plan had at least 80 participants, but not more than 120.*

***Form 5500EZ.*—Form 5500EZ,** Annual Return of One-Participant Pension Benefit Plan, should be filed by most one-participant plans.

A one-participant plan is: (1) a pension benefit plan that covers only an individual or an individual and his or her spouse who wholly own a trade or business, whether incorporated or unincorporated, or (2) a pension benefit plan for a partnership that covers only the partners or the partners and the partners' spouses.

See Form 5500EZ and its instructions to see if the plan meets the requirements for filing the form.

**Items To Be Completed on Form 5500-C**

Certain kinds of plans and certain kinds of filers that are required to submit Form 5500-C are not required to complete the entire form. These are described below, by type of plan. Check the list of headings to see if your plan is affected.

**1. Welfare Benefit Plans.—Welfare** benefit plans generally must complete the following items on the Form 5500-C: 1 through 6c; 7a, 8a, c, d, and e; 9a, b, c, and f; 10a through d; 11 through 14; and 29 through 31.

**Note:** *If one Form 5500-C is filed for both a welfare plan and a fringe benefit plan, items 22c, 22g, and 22i must be completed in addition to the items listed above for welfare plans.*

**2. Fringe Benefit Plans.**—A Form 5500-C filed only because of Code section 6039D (i.e., for a fringe benefit plan) need complete only items 1 through 6a, 7a, 9a, 9b, 22c, 22g, 22i, 31h, and 31j.

If the annual return/report is also for a welfare benefit plan (see "Who Must File" on page 1), complete the above items and those specified for welfare benefit plans in "1" above.

**3. Pension Plans.**—In general, most pension plans (defined benefit and defined contribution) are required to complete all items on the form. However, some items need not be completed by certain types of pension plans, as described below.

a. Plans exclusively using a tax deferred annuity arrangement under Code section 403(b)(1). These plans need only complete items 1 through 5, 6b(iv), and 9.

b. Plans exclusively using a custodial account for regulated investment company stock under Code section 403(b)(7). These plans need only complete items 1 through 5, 6b(v), and 9.

c. Individual Retirement Account Plan.—A pension plan utilizing individual retirement accounts or annuities (as described in Code section 408) as the sole funding vehicle for providing benefits need only complete items 1 through 5, 6b(vi), and 9.

d. Fully Insured Pension Plan.—A pension benefit plan providing benefits exclusively through an insurance contract, or contracts that are fully guaranteed, and which meets all of the conditions of 29 CFR 2520.104-44 need only complete items 1 through 29b. A pension plan which includes both insurance contracts of the type described in 29 CFR 2520.104-44 as well as other assets should limit its reporting in items 30 and 31 to those other assets.

**Note:** *For purposes of the annual return/report and the alternative method of compliance set forth in 29 CFR 2520.104-44, a contract is considered to be "allocated" only if the insurance company or organization that issued the contract unconditionally guarantees, upon receipt of the required premium or consideration, to provide a retirement benefit of a specified amount, without adjustment for fluctuations in the market value of the underlying assets of the company or organization, to each participant, and each participant has a legal right to such benefits which is legally enforceable directly against the insurance company or organization.*

e. Nonqualified Plans Maintained Outside the U.S.—Nonqualified pension benefit plans maintained outside the United States primarily for nonresident aliens required to file a return/report (see "Who Must File" on page 1) need only complete items 1 through 8c, 9 through 12, and 15 through 17.

**4. Plans of More Than One Employer.**—All plans of more than one employer (plans of a controlled group, multiemployer plans, multiple-employer-collectively-bargained plans, and multiple-employer-plan (other)) generally should complete all applicable (welfare or pension) items on the form except for item 6d. Only single-employer pension plans must complete this item. In addition, multiemployer and multiple-employer-collectively-bargained plans need not complete item 22 on the Form 5500-C.

**Schedules**

The various schedules to be attached to the return/report are listed below.

**Note:** *All attachments to the Forms 5500, 5500-C, and 5500-R must include the name of the plan and the EIN and plan number (PN) as found in items 5a, 1b, and 5c, respectively.*

***Attach Schedule A (Form 5500), Insurance Information,*** to Form 5500, 5500-C, or 5500-R if any benefits under the plan are provided by an insurance company, insurance service, or other similar organization (such as Blue Cross, Blue Shield, or a health maintenance organization).

**Exception:** *Schedule A (Form 5500) is not needed if the plan covers. (1) only an individual, or an individual and his or her spouse, who wholly owns a trade or business, whether incorporated or unincorporated; or (2) a partner in a partnership, or a partner and his or her spouse.*

Do not file a Schedule A (Form 5500) with a Form 5500EZ.

***Attach Schedule B (Form 5500), Actuarial Information,*** to Forms 5500, 5500-C, 5500-R, or 5500EZ for most defined benefit pension plans. See instructions for Schedule B.

***Schedule SSA (Form 5500), Annual Registration Statement Identifying Separated Participants With Deferred Vested Benefits,*** may be needed for separated participants. See "When To Report Separated Participants" in the instructions for Schedule SSA.

***Schedule P (Form 5500), Annual Return of Fiduciary of Employee Benefit Trust.*—**Any fiduciary (trustee or custodian) of an organization that is qualified under Code section 401(a) and exempt from tax under Code section 501(a) who wants to protect the organization under the statute of limitations provided in Code section 6501(a) must file a Schedule P (Form 5500).

File the Schedule P (Form 5500) as an attachment to Form 5500, 5500-C, 5500-R, or 5500EZ for the plan year in which the trust year ends.

## Other Filings

### Reporting Requirements for Investment Arrangements Filing Directly With DOL

Certain investment arrangements for employee benefit plans file financial information directly with DOL. These arrangements include common/collective trusts, pooled separate accounts, master trusts, and 103-12 IEs. Definitions of these investment arrangements may be found on page 3. Their DOL filing requirements are described below.

**A. Common/Collective Trust and Pooled Separate Account Information To Be Filed Directly With DOL**

Financial institutions and insurance carriers filing the statement of the assets and liabilities of a common/collective trust or pooled separate account should identify the trust or account by providing the EIN of the trust or account, or (if more than one trust or account is covered by the same EIN) both the EIN and any additional number assigned by the financial institution or insurance carrier (such as: 99-1234567 Trust No. 1); and a list of all plans participating in the trust or account, identified by the plan number, EIN, and name of the plan sponsor. The direct filing should be addressed to:

Common/Collective Trust (OR)
Pooled Separate Account
Pension and Welfare Benefits Administration
U.S. Department of Labor, Room N5644
200 Constitution Avenue, NW
Washington, DC 20210

**B. Master Trust Information To Be Filed Directly With DOL**

The following information with respect to a master trust must be filed with DOL by the plan administrator or by a designee, such as the administrator of another plan participating in the master trust or the financial institution serving as trustee of the master trust, no later than the date on which the plan's return/report is due. While only one copy of the required information should be filed for all plans participating in the master trust, the information is an integral part of the return/report of each participating plan, and the plan's return/report will not be deemed complete unless all the information is filed within the prescribed time.

**Note:** *If a master trust investment account consists solely of one plan's asset(s) during the reporting period, the plan may report the(se) asset(s) either as an investment account to be reported as part of the master trust report filed directly with DOL or as a plan asset(s) which is not part of the master trust (and therefore subject to all instructions pertaining to assets not held in a master trust).*

Each of the following statements and schedules must indicate the name of the master trust and the name of the master trust investment account. The information shall be filed with DOL by mailing it to:

Master Trust
Pension and Welfare Benefits Administration
U.S. Department of Labor, Room N5644
200 Constitution Avenue, NW
Washington, DC 20210

1. The name and fiscal year of the master trust and the name and address of the master trustee.

2. A list of all plans participating in the master trust, showing each plan's name, EIN, PN, and its percentage interest in each master trust investment account as of the beginning and end of the fiscal year of the master trust ending with or within the plan year.

3. A statement, in the same format as Part I of Schedule C (Form 5500), for each master trust investment account showing amounts of compensation paid during the fiscal year of the master trust ending with or within the plan year to persons providing services with respect to the investment account and subtracted from the gross income of the investment account in determining the net increase (decrease) in net assets of the investment account.

4. A statement for each master trust investment account showing the assets and liabilities of the investment account at the beginning and end of the fiscal year of the master trust ending with or within the plan year, grouped in the same categories as those specified in item 34 of Form 5500.

5. A statement for each master trust investment account showing the income and expenses, changes in net assets, and net increase (decrease) in net assets of each such investment account during the fiscal year of the master trust ending with or within the plan year, in the categories specified in item 35 of Form 5500. In place of item 35a, show the total of all transfers of assets into the investment account by participating plans. In place of item 35j, show the total of all transfers of assets out of the investment account by participating plans.

6. Schedules, in the format set forth in the instructions for item 30 of Form 5500, of the following items with respect to each master trust investment account for the fiscal year of the master trust ending with or within the plan year: assets held for investment, nonexempt party-in-interest transactions, defaulted or uncollectible loans and leases, and 5% transactions involving assets in the investment account. The 5% figure shall be determined by comparing the current value of the transaction at the transaction date with the current value of the investment account assets at the beginning of the applicable fiscal year of the master trust.

**C. 103-12 IE Information To Be Filed Directly With DOL**

The information described below must be filed with the DOL by the sponsor of the 103-12 IE no later than the date on which the plan's return/report is due before the plan administrator can elect the alternative method of reporting. While only one copy of the required information should be filed for the 103-12 IE, the information is an integral part of the return/report of each plan electing the alternative method of compliance.

The filing address is:
103-12 Investment Entity
Pension and Welfare Benefits Administration
U.S. Department of Labor, Room N5644
200 Constitution Avenue NW
Washington, DC 20210

1. The name, fiscal year, and EIN of the 103-12 IE and the name and address of the sponsor of the 103-12 IE. If more than one 103-12 IE is covered by the same EIN, they shall be sequentially numbered as follows: 99-1234567 Entity No. 1.

2. A list of all plans participating in the 103-12 IE, showing each plan's name, EIN, PN, and its percentage interest in the 103-12 IE as of the beginning and end of the fiscal year of the 103-12 IE ending with or within the plan year.

3. A statement, in the same format as Part I of Schedule C (Form 5500), for the 103-12 IE showing amounts of compensation paid during the fiscal year of the 103-12 IE ending with or within the plan year to persons providing services to the 103-12 IE.

4. A statement showing the assets and liabilities at the beginning and end of the fiscal year of the 103-12 IE ending with or within the plan year, grouped in the same categories as those specified in item 34 of Form 5500.

5. A statement showing the income and expenses, changes in net assets, and net increase (decrease) in net assets during the fiscal year of the 103-12 IE ending with or within the plan year, grouped in the same categories specified in item 35 of Form 5500. In place of item 35a, show the total of all transfers of assets into the 103-12 IE by participating plans. In place of item 35j, show the total of all transfers of assets out of the 103-12 IE by participating plans.

6. Schedules, in the format set forth in the instructions for item 30 of Form 5500 (except item 30c) with respect to the 103-12 IE for the fiscal year of the 103-12 IE investment entity ending with or within the plan year. Substitute the term "103-12 IE" in place of the word "plan" when completing the schedules.

7. A report of an independent qualified public accountant regarding the above items and other books and records of the 103-12 IE which meets the requirements of 29 CFR 2520.103-1(b)(5).

Page 5

VOL 54 ISS 39 MR 1 1989 UMI

## Section 3
## General Information

**Final Return/Report.**—If all assets under the plan (including insurance/annuity contracts) have been distributed to the participants and beneficiaries or distributed to another plan (and when all liabilities for which benefits may be paid under a welfare plan have been satisfied), check the "final return/report" box at the top of the form filed for such plan. The year of complete distribution is the last year a return/report must be filed for the plan. For purposes of this paragraph, a complete distribution will occur in the year in which the assets of a terminated plan are brought under the control of PBGC.

For a defined benefit plan covered by PBGC, a PBGC Form 1 must be filed and a premium must be paid until the end of the plan year in which the assets are distributed or brought under the control of PBGC.

Filing the return/report marked "final return" and indicating that the plan terminated satisfies the notification requirement of Code section 6057(b)(3).

**Signature and Date.**—The plan administrator must sign and date all returns/reports filed. In addition the employer must sign a return/report filed for a single-employer plan or a plan required to file only because of Code section 6039D.

When a joint employer-union board of trustees or committee is the plan sponsor or plan administrator, at least one employer representative and one union representative must sign and date the return/report.

Participating employers in a multiple-employer plan (other), who are required to file Form 5500-C or 5500-R, are required to sign the return/report. The plan administrator need not sign the Form 5500-C or 5500-R filed by the participating employer.

**Reproductions.**—Original forms are preferable, but a clear reproduction of the completed form is acceptable. Sign the return/report after it is reproduced. All signatures must be original.

**Change in Plan Year.**—Generally only defined contribution pension benefit plans need to get prior approval for a change in plan year. (See Code section 412(c)(5).) Rev. Proc. 87-27, 1987-1 C.B. 769 explains the procedure for automatic approval of a change in plan year. A pension benefit plan that would ordinarily need to obtain approval for a change in plan year under Code section 412(c)(5) is granted an automatic approval for a change in plan year if all the following criteria are met:

1. No plan year is more than 12 months long.

2. The change will not delay the time when the plan otherwise would have been required to conform to the requirements of any statute, regulation, or published position of the IRS.

3. The trust, if any, retains its exempt status for the short period required to effect the change, as well as for the taxable year immediately preceding the short period.

4. All actions necessary to implement the change in plan year, including plan amendment and a resolution of the board of directors (if applicable), have been taken on or before the last day of the short period.

5. No change in plan year has been made for any of the preceding plan years.

6. In the case of a defined benefit plan, deductions are taken in accordance with section 5 of Rev. Proc. 87-27.

For the first return/report that is filed following the change in plan year, check the box indicated on the second line under the title at the top of the form (or item 1d if Form 5500-R is being filed).

**Amended Return/Report.**—If you file an amended return/report, check the "(ii) and amended return/report" box at the top of the form. When filing an amended return, be sure to answer all questions and put a circle around the numbers of the items that have been amended.

**How the Annual Return/Report Information May Be Used.**—All Form 5500 series return/reports will be subjected to a computerized review. It is, therefore, in the filer's best interest that the responses accurately reflect the circumstances they were designed to report. Annual reports filed under Title I of ERISA must be made available by plan administrators to plan participants and by the Department of Labor to the public pursuant to ERISA section 104.

## Section 4
## Specific Instructions for Form 5500-C

**Important:** Answer all items on the Form 5500-C with respect to the plan year, unless otherwise explicitly stated in the item-by-item instructions or on the form itself. Therefore, your responses usually apply to the year entered or printed at the top of the first page of the form. Yes and no questions are to be marked either "yes" or "no" but not both. If neither "yes" nor "no" apply, enter "N/A."

**Information To Be Completed at the Top of the Form**

**First Line** at the top of the form—Complete the space for dates when: (1) the 12-month plan year is not a calendar year, or (2) the plan year is less than 12 months (a short plan year).

**Second Line**—Check the box if the plan year has been changed since the last return/report was filed.

**Fourth Line**—Check box (i) if this is the initial filing for this plan. Do not check this box if you have ever filed for this plan even if it was on a different form (Form 5500 vs. Form 5500-C or Form 5500-R).

Check box (ii) if you have already filed for the 1988 plan year and are now submitting an amended return/report to reflect errors and/or omissions on the previously filed return/report.

Check box (iii) if the plan no longer exists to provide benefits. See Section 3 for instructions concerning the requirement to file a final return/report.

**The numbers of the following instructions are the same as the item numbers on the return/report.**

**1a.** If you did not receive a preaddressed mailing label, enter the name and address of the plan sponsor. If the plan covers only the employees of one employer, enter the employer's name.

If you received a Form 5500-C with a preaddressed mailing label, please attach it in the name and address area of the form you file. If the name or address on the label is wrong, draw a line through the incorrect part and correct it.

The term "plan sponsor" means—

*(i)* the employer, for an employee benefit plan that a single employer established or maintains;

*(ii)* the employee organization in the case of a plan of an employee organization; or

*(iii)* the association, committee, joint board of trustees, or other similar group of representatives of the parties who establish or maintain the plan, if the plan is established or maintained jointly by one or more employers and one or more employee organizations, or by two or more employers.

Include enough information in 1(a) to describe the sponsor adequately, for example, "Joint Board of Trustees of Local 187 Machinists" rather than just "Joint Board of Trustees."

**1b.** Enter the 9-digit employer identification number (EIN) assigned to the plan sponsor/employer, i.e., 00-1234567.

Employers and plan administrators who do not have an EIN should apply for one on Form SS-4, available from most IRS or Social Security Administration offices. Send Form SS-4 to the same Internal Revenue Service Center to which this form will be sent.

Plan sponsors are reminded that they should use the trust EIN when opening a bank account or conducting other transactions for a plan that requires an employer identification number. The trust may apply for an EIN as explained in the preceding paragraph.

A plan of a controlled group of corporations whose sponsor is more than one of the members of the controlled group should insert only the EIN of one of the sponsoring members. This EIN must be used in all subsequent filings of the annual returns/reports for the controlled group unless there is a change in the sponsor.

If the plan administrator is a group of individuals, get a single EIN for the group. When you apply for a number, enter on line 1 of Form SS-4 the name of the group, such as "Joint Board of Trustees of the Local 187 Machinists' Retirement Plan."

**Note:** *Although Employer Identification Numbers (EINs) for funds (trusts or custodial accounts) associated with plans are not required to be furnished on the Form 5500 series returns/reports, the IRS will issue EINs for such funds for other reporting purposes. EINs may be obtained by filing Form SS-4 as explained above.*

**1d.** From the list of business codes on pages 13 and 14, enter the one that best describes the nature of the employer's business. If more than one employer is involved, enter the business code for the main business activity.

**1e.** Plans checking item 4a or 4b must enter the first six digits of the CUSIP (Committee on Uniform Securities Identification Procedures) number, "issuer number," if one has been assigned to the plan sponsor for purposes of issuing corporate securities. CUSIP issuer numbers are assigned to corporations and other entities which issue public securities listed on stock exchanges or traded over the counter. The CUSIP issuer number is the first six digits of the number assigned to the

individual securities which are traded. If the plan sponsor has no CUSIP issuer number, enter "N/A."

**2a.** If the document constituting the plan appoints or designates a plan administrator other than the sponsor, enter the administrator's name and address. If the plan administrator is also the sponsor, enter "Same." If 2a is the "Same," then items 2b and 2c should be left blank.

The term "administrator" means—

*(i)* the person or group of persons specified as the administrator by the instrument under which the plan is operated;

*(ii)* the plan sponsor/employer if an administrator is not so designated; or

*(iii)* any other person prescribed by regulations of the Secretary of Labor if an administrator is not designated and a plan sponsor cannot be identified.

**2b.** A plan administrator must have an EIN for reporting purposes. Enter the plan administrator's 9-digit EIN here. If the plan administrator has no EIN, apply for one as explained in 1b above.

Employees of an employer are not plan administrators unless so designated in the plan document, even though they engage in administrative functions of the plan. If an employee of the employer is designated as the plan administrator, that employee must get an EIN.

**3.** If you answer "No," enter the name, address, and EIN of the plan sponsor and/or the plan administrator shown on the prior return/report.

**3c.** Indicate if the change in 3a is only a change in sponsorship. "Change in sponsorship" means the plan's sponsor has been changed but no assets or liabilities have been transferred to another plan(s), the plan has not terminated or merged with any other plan, and so forth.

**4a.** Check for a single-employer plan. See "Kinds of Filers" for what is considered a single-employer plan.

**4b.** Check for a plan in which more than one employer participates, and some of the employers are members of a controlled group of corporations (Code section 414(b)) or a member of a group of employers under common control (Code section 414(c)).

**4c.** Check for a multiemployer plan as defined in Code section 414(f) and ERISA sections 3(37) and 4001(a)(3).

**4d.** Check for a multiple-employer-collectively-bargained plan as described under "Kinds of Filers."

**4e.** Check for a multiple-employer plan (other) if the plan administrator is filing for the plan as a whole.

**4f.** Exceptions to **b** and **e.** Each participating employer in a multiple-employer plan (other) pension benefit plan and nonmember employers participating in a plan of a controlled group of corporations or businesses need to file either the Form 5500-C or Form 5500-R, regardless of the number of participants. Complete items 1, 2, 3, 4f, 5, 6, 9, and 22 on the Form 5500-C, and items 1, 2, 3, 4f, 5, 6, 7, 8a, and 8b on the Form 5500-R.

**5a.** Enter the formal name of the plan or enough information to identify the plan.

**5b.** Enter the date the plan first became effective.

**5c.** Enter the 3-digit number the employer or plan administrator assigned to the plan. All welfare plan numbers and Code section 6039D plan numbers start at 501. All other plans start at 001.

Once you use a plan number, continue to use it for that plan on all future filings with IRS, DOL and PBGC reports. Do not use it for any other plan even if you terminated the first plan.

**6a.** Check every box that describes the welfare benefit plan for which this return/report is being filed. Example: If your plan provides health insurance, dental insurance, eye examinations, and life insurance, four boxes should be checked: 6a(i)(A), 6a(i)(B), 6a(i)(D), and 6a(i)(E).

If you checked box (M), (N), or (O), you must check one box in 6a(ii). Check "unfunded" if the plan is (1) unfunded, (2) fully insured, or (3) a combination of unfunded/insured as defined on page 2, Section 2B(a).

**6b(i).** For a defined benefit plan, check the box.

**6b(ii).** Check (C) for a money purchase plan if the contribution is determined by a target benefit calculation. Check (D) for all money purchase plans that do not have a target benefit calculation.

**6c(ii).** Check for an ESOP which acquires employer securities with borrowed money or other debt-financed techniques.

**6c(iii).** Check if the plan is a pension plan that provides for individual accounts and permits a participant or beneficiary to exercise independent control over the assets in his or her account (see ERISA section 404(c)).

**6c(iv).** Check this box for pension benefit plans maintained outside the United States primarily for nonresident aliens. See "Kinds of Filers" for more information.

**6c(v).** In the space provided following 6c(viii), enter name of the trust and bank or financial institution. Also enter city and state where the trust is maintained. (See page 3 for master trust instructions.)

**6c(vi).** In the space provided following 6c(viii), enter name and address of the 103-12 IE. (See page 5.)

**6d.** For single-employer plans enter the date the employer's tax year ends. For example, if the tax year is a calendar year, enter 12-31-88. For all plans with more than one employer, enter "N/A."

**6e. Definition of Affiliated Service Group.**—In general, Code section 414(m)(2) defines an affiliated service group as a first service organization (FSO) that has:

(1) a service organization (A-ORG) that is a shareholder or partner in the FSO and that regularly performs services for the FSO, or is regularly associated with the FSO in performing services for third persons, and/or

(2) any other organization (B-ORG) if:

(a) a significant portion of the business of that organization consists of performing services for the FSO or A-ORG of a type historically performed by employees in the service field of the FSO or A-ORG, and

(b) 10% or more of the interest of the B-ORG is held by persons who are highly compensated employees of the FSO or A-ORG.

An affiliated service group also includes a group consisting of an organization whose principal business is performing management functions for another organization (or one organization and other related organizations) on a regular and

**Summary of Filing Requirements for Employers and Plan Administrators (File forms ONLY with IRS)**

| Type of plan | What to file | When to file |
|---|---|---|
| Most pension plans with only one participant or one participant and that participant's spouse | Form 5500EZ | File all required forms and schedules for each plan by the last day of the 7th month after the plan year ends. |
| Pension plan with fewer than 100 participants | Form 5500-C or 5500-R | |
| Pension plan with 100 or more participants | Form 5500 | |
| Annuity under Code section 403(b)(1) or trust under Code section 408(c) | Form 5500, 5500-C, or 5500-R | |
| Custodial account under Code section 403(b)(7) | Form 5500, 5500-C, or 5500-R | |
| Welfare benefit plan with 100 or more participants* | Form 5500 | |
| Welfare benefit plan with fewer than 100 participants (see exception on page 1 of these instructions)* | Form 5500-C or 5500-R | |
| Pension or welfare plan with 100 or more participants (see Form 5500 instructions) | Financial statements, schedules, and accountant's opinion | |
| Pension or welfare plan with benefits provided by an insurance company | Schedule A (Form 5500) | |
| Pension plan that requires actuarial information | Schedule B (Form 5500) | |
| Plan with 100 or more participants | Schedule C (Form 5500) | |
| Pension plan filing a registration statement identifying separated participants with deferred vested benefits from a pension plan | Schedule SSA (Form 5500) | |

*This includes Code section 6039D filers.

VOL 54 ISS 39 MR 1 1989 UMI

continuing basis, and the organization for which such functions are so performed by the organization. For a plan maintained by more than one employer, check "Yes" if any such employer is a member of an affiliated service group.

**6f.** A cash or deferred arrangement described under Code section 401(k) is a part of a qualified defined contribution plan which provides for an election by employees to defer part of their compensation or receive these amounts in cash.

**7.** The description of "participant" in the instructions below is only for purposes of item 7 of this form.

For welfare plans, dependents are considered to be neither participants nor beneficiaries. For pension benefit plans, "alternate payees" entitled to benefits under a qualified domestic relations order are not to be counted as participants for this item.

"Participant" means any individual who is included in one of the categories below.

Active participants include any individuals who are currently in employment covered by a plan and who are earning or retaining credited service under a plan. This category includes any individuals who are: (i) currently below the integration level in a plan that is integrated with social security, and/or (ii) eligible to elect to have the employer make payments to a code section 401(k) qualified cash or deferred arrangement. Active participants also include any nonvested individuals who are earning or retaining credited service under a plan. This category **does not** include nonvested former employees who have incurred the greater of 5 consecutive one year breaks in service or the break in service period specified in the plan.

For determining if active participants are fully vested, partially vested, or nonvested, consider vesting in employer contributions only.

For purposes of Code section 6039D, "participant" means any individual who, for a plan year, has had at least one dollar excluded from income by reason of Code section 120, 125, or 127. If you are filing Form 5500-C for a welfare plan that is required to file under Title I of ERISA and under Code section 6039D, the preceding sentence does not apply.

Inactive participants receiving benefits are any individuals who are retired or separated from employment covered by the plan and who are receiving benefits under the plan. This includes former employees who are receiving group health continuation coverage benefits pursuant to Part 6 of ERISA and who are covered by the employee welfare benefit plan. This category does not include any individual to whom an insurance company has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

Inactive participants entitled to future benefits are individuals who are retired or separated from employment covered by the plan and who are entitled to begin receiving benefits under the plan in the future. This category does not include any individual to whom an insurance company has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

Deceased participants are any deceased individuals who have one or more beneficiaries who are receiving or are entitled to receive benefits under the plan. This category does not include an individual if an insurance company has made an irrevocable commitment to pay all the benefits to which the beneficiaries of that individual are entitled under the plan.

**7b(f).** If "Yes," file Schedule SSA (Form 5500) as an attachment to the Form 5500-C. **Plan administrators:** Code section 6057(e) provides that the plan administrator must give each participant a statement showing the same information for that participant as is reported on Schedule SSA.

**8a.** Check "Yes" if an amendment to the plan was adopted in this plan year, regardless of the effective date of the amendment.

**8b.** Check "Yes" only if the accrued benefits were retroactively reduced. For example, a plan provides a benefit of 2% for each year of service, but the plan is amended to change the benefit to 1½% a year for all years of service under the plan.

**8c.** Enter the date the most recent amendment was adopted regardless of the date of the amendent or the effective date of the amendment.

**8d.** Check "Yes" only if an amendment changed the information previously provided to participants by the summary plan description or summary description of modifications.

**8e.** A revised summary plan description or summary description of modifications must be filed with DOL and distributed to all participants and pension plan beneficiaries no later than 210 days after the close of the plan year, in which the amendment(s) was adopted. If the material was distributed and filed since the amendments were adopted (even if after the end of the plan year), check "Yes" to item 8e.

**9a.** Check "Yes" if the plan was terminated or if the plan was merged or consolidated into another plan. Enter year of termination if applicable. If you checked 6e(i)(M), (N), or (O) and indicated that this is an unfunded plan and you also answered 9a "Yes," you must also check 9b "Yes."

**9b.** If the plan was terminated and all plan assets were not distributed, file a return/report for each year the plan has assets. In that case, the return/report must be filed by the plan administrator, if designated, or by the person or persons who actually control the plan's property.

If all assets were used to buy individual annuity contracts and the contracts were distributed to the participants, check "Yes."

If all the trust assets were transferred to another plan, check "Yes."

Do not check "Yes" for a welfare plan which is still liable to pay benefits for claims which were incurred prior to the termination date but not yet paid. See 29 CFR 2520.104b-2(g)(2)(ii).

**9c.** The Code provides for a nondeductible excise tax on a reversion of assets from a qualified plan.

**9d.** The employer must report the reversion by filing Form 5330 and pay any applicable tax. The tax will not be imposed upon employers who are tax-exempt entities under Code section 501(a). See instructions for Form 5330.

**10a.** If this plan was **merged** or **consolidated** into another plan(s), or plan assets or liabilities were transferred to another plan(s), indicate which other plan or plans were involved.

**10c.** Enter the **EIN** of the **sponsor** (employer, if for a **single-employer plan**) of the other plan.

**10a.** Pension benefit plans must file Form 5310 at least 30 days before any plan merger or consolidation or any transfer of plan assets or liabilities to another plan.

**Caution:** *There is a penalty for not filing Form 5310 on time.*

**11.** Enter the code for the **funding arrangement** used by the plan from the list below.

The "funding arrangement" is the method used for the receipt, holding, investment, and transmittal of plan assets prior to the time the plan actually provides the benefits promised under the plan. For purposes of items 11 and 12, the term "trust" includes any fund or account which receives, holds, transmits, or invests plan assets other than an account or policy of an insurance company.

| | Funding Arrangement Codes |
|---|---|
| Trust | 1 |
| Trust and insurance | 2 |
| Insurance | 3 |
| Exclusively from general assets of sponsor (unfunded) | 4 |
| Partially insured and partially from general assets of sponsor | 5 |
| Other | 6 |

**12.** Enter the code for the **benefit arrangement** used by the plan from the list below.

The "benefit arrangement" is the method by which benefits are actually provided to participants by the plan. For example, when a participant retires, the plan might purchase an annuity from an insurance company for that individual to provide the actual benefits promised by the plan. In this example, the annuity would be the benefit arrangement.

Using the chart below, the plan in the above example would enter a "3" to indicate the benefit arrangement.

| | Benefit Arrangement Codes |
|---|---|
| Trust | 1 |
| Trust and insurance | 2 |
| Insurance | 3 |
| Exclusively from general assets of sponsor (unfunded) | 4 |
| Partially insured and partially from general assets of sponsor | 5 |
| Other | 6 |

**13.** Check "Yes" if either the contributions to the plan or the benefits paid by the plan are subject to the collective bargaining process, even if the plan is not established and administered by a joint board of trustees. Check "Yes" even if only some of those covered by the plan are members of a collective bargaining unit which negotiates benefit levels on its own behalf. The benefit schedules need not be identical for all employees under the plan.

**14.** If either the funding arrangement code (item 11) and/or the benefit arrangement code (item 12) is 2, 3, or 5, at least one Schedule A (Form 5500) must be attached to the Form 5500-C filed for pension and welfare plans. The insurance company (or similar organization) which provides benefits is required to provide the plan administrator with the information needed to complete the return/report, pursuant to ERISA section 103 (a)(2). If you do not receive this information in a timely manner, contact the insurance company (or similar organization). If information is missing on Schedule A (Form 5500) due to a refusal to provide this information, note this on the Schedule A. If there are no Schedule(s) A attached, enter "0."

**15b.** If a waived funding deficiency is being amortized in the current plan year, do not complete (i), (ii), and (iii), but complete 1, 2, 3, 7, and 9 of Schedule B (Form 5500). An enrolled actuary need not sign Schedule B under these circumstances.

**15b(iii).** File Form 5330 with IRS to pay the excise tax on the funding deficiency. **Caution:** *There is a penalty for not filing Form 5330 on time.*

**16.** A "top-heavy plan" is a plan which during any plan year is:

(1) any defined benefit plan if, as of the determination date, the present value of the cumulative accrued benefits under the plan for key employees exceeds 60% of the present value of the cumulative accrued benefits under the plan for all employees; and

(2) any defined contribution plan if, as of the determination date, the aggregate of the accounts of key employees under the plan exceeds 60% of the aggregate of the accounts of all employees under the plan.

Each plan of an employer included in a required aggregation group is to be treated as a top-heavy plan if such group is a top-heavy group. See definitions of required aggregation and top-heavy groups below.

*Key Employee* —A key employee is any participant in an employer plan who at any time during the plan year, or any of the 2 preceding years, is:

(1) an officer of the employer having an annual compensation greater than 50% of the amount in effect under Code section 415(c)(1)(A) for any such plan year,

(2) one of the 10 employees having annual compensation from the employer of more than the limitation in effect under Code section 415(c)(1)(A) and owning (or considered as owning within the meaning of Code section 318) both more than ½% interest and the largest interests in the employer,

(3) a 5% owner of the employer, or

(4) a 1% owner of the employer having an annual compensation from the employer of more than $150,000.

In determining whether an individual is an officer of the employer, no more than 50 employees, or, if less, the greater of 3 employees or 10% of the employees, are to be treated as officers. See Code section 416(i) and T-12 of Regulations section 1.416. A key employee will not include any officer or employee of a governmental plan under Code section 414(d).

*Required Aggregation Group*—A required aggregation group consists of:

(1) each plan of the employer in which a key employee is or was a participant, and

(2) each other plan of the employer which enables a plan to meet the requirements for nondiscrimination in contributions or benefits under Code section 401(a)(4), or the participation requirements under Code section 410.

*Top-Heavy Group*—A top-heavy group is an aggregation group if, as of the determination date, the sum of the present value of the cumulative accrued benefits for key employees under all defined benefit plans included in such group and the aggregate of the accounts of key employees under all defined contribution plans in such group exceeds 60% of a similar sum determined for all employees. To determine if a plan is top-heavy, include distributions made in the 5-year period ending on the determination date. However, do not take into account accrued benefits for an individual who hasn't performed services for the employer during the 5-year period ending on the determination date.

**18a.** If the plan distributes an annuity contract, whether or not deferred and whether or not upon termination, that contract must provide that all distributions from it will meet the participant and spousal consent requirements of Code section 417. Consent is not needed for the distribution of the contract itself. Check "No" if the plan did not distribute any annuity contracts.

**18b.** In general, distributions must be made in the form of a qualified joint and survivor annuity for life or a qualified preretirement survivor annuity. An annuity distribution to a single individual is a qualified joint and survivor annuity. Check "Yes" if distributions in other forms were made, even if such distributions were permissible, e.g., because consent was obtained or was not needed.

**18c.** Generally, within the 90 days prior to the date of any benefit payment or the making of a loan to a participant, you must get the spouse's consent to the payment of the benefit or the use of the accrued benefit for the making of the loan. However, there are some circumstances where obtaining this spousal consent is not required. The following is a partial listing of circumstances where spousal consent is not required:

(1) The participant is not married and no spouse is required to be treated as a current spouse under a qualified domestic relations order issued by a court.

(2) The participant's accrued benefit in the plan never had a present value of more than $3,500.

(3) The benefit is paid in the form of a qualified joint and survivor annuity, i.e., an annuity for the life of the participant with a survivor annuity for the life of the spouse which is not less than 50% of (and is not greater than 100% of ) the amount of the annuity which is payable during the joint lives of the participant and the spouse. See Code section 417(b).

(4) The payout is from a profit-sharing or stock bonus plan that pays the spouse the participant's full account balance upon the participant's death, an annuity payment is not elected by the participant, and the profit-sharing or stock bonus plan is not a transferee plan with respect to the participant (i.e., had not received a transfer from a plan that was subject to the consent requirements with respect to the participant).

(5) The participant had no service under the plan after August 22, 1984.

**18d.** A plan may not eliminate a subsidized benefit or a retirement option by plan amendment or plan termination.

**19.** For purposes of determining the present value of a participant's accrued benefits and the amount of any distribution, a qualified plan must use a rate no higher than "the applicable interest rate." The "applicable interest rate" means the interest rate which would be used (as of the date of distributions) by the PBGC for determining the present value of a lump sum distribution on termination of the plan.

**a.** If the present value of the vested accrued benefit is no more than $25,000, the amount to be distributed is calculated using the PBGC rate.

**b.** If the present value of the vested accrued benefit exceeds $25,000 (using the PBGC rate), the total amount to be distributed is determined using an interest rate no greater than 120% of the applicable interest rate that would be used by the PBGC upon the plan's termination. In such a case the value will be no less than $25,000.

**20.** The Tax Reform Act of 1986 amended Code section 415 to provide that the maximum annual benefit that may be provided under a defined benefit plan may not exceed the lesser of $90,000 or 100% of compensation. However, if benefits begin before the social security retirement age, the $90,000 limit must be reduced as described in Notice 87-21, 1987-1 C.B. 458.

In addition, the dollar limitations will be reduced for participants with fewer than 10 years of participation in a defined benefit plan, i.e., a 10% reduction for each year under 10 years of participation.

For defined contribution plans, Code section 415 now provides that the dollar limit on annual additions to a qualified plan may not exceed the greater of $30,000 or 25% of the defined benefit dollar limit for such limitation year. The defined contribution dollar limit will not be increased until the defined benefit dollar limit, as increased by cost of living adjustments, equals or exceeds $120,000. (For years beginning after December 31, 1987, the $90,000 defined benefit limit will be adjusted to reflect post-1986 cost of living increases.) The defined contribution dollar limit will then be increased to an amount equal to 25% of the defined benefit limit.

Annual additions to a defined contribution plan will, for years beginning after December 31, 1986, include 100% of all after-tax employee contributions. For participants in plans of tax-exempt organizations, the pre-Tax Reform Act limits remain in effect.

The Tax Reform Act of 1986 also provides that a participant's previously accrued benefit won't be reduced merely because of the reduction in dollar limits or increases in required periods of participation. The transitional rule applies to an individual who was a participant prior to January 1, 1987, in a plan in existence

VOL 54 ISS 39 MR 1 1989 UMI

on May 5, 1986. If this participant's current accrued benefit exceeds the dollar limit under the Tax Reform Act of 1986, but complies with prior law, then the applicable dollar limit for the participant is equal to the current accrued benefit. The term "current accrued benefit" is defined as the participant's accrued benefit as of the close of the last limitation year beginning before January 1, 1987, and expressed as an annual benefit. To compute the defined benefit fraction, the current accrued benefit would replace the dollar limit otherwise used in the denominator of the fraction. The current accrued benefit is also reflected in the numerator of the defined benefit fraction.

**21.** In the calendar year in which the employee attains age 70 ½, the employee must begin to receive minimum distributions pursuant to Code section 401(a)(9) by April 1 of the following calendar year. Once begun, minimal distributions must continue each calendar year.

**22.** For purposes of filing required only because of Code section 6039D, complete only items 22c, 22g, and 22i.

**22a.** If you do not claim to meet the percentage tests of Code section 410(b)(1)(A), attach an explanation indicating how your plan meets the coverage requirements of Code section 410(b)(1)(B).

**22b.** Provide information for all employers of a controlled group, a group under common control, or an affiliated service group even if they do not participate in the plan. Also, leased employees (described in Code section 414(n)(2)) of any such employer(s) are to be included as employees unless the leasing organization maintains a "safe harbor" plan described in Code section 414(n)(5) for the leased employees. See below for more information regarding a "safe harbor" plan.

Generally, leased employees are individuals who are employees of a leasing organization, but who during the course of their employment perform services for a trade or business other than the leasing organization on a substantially full-time basis for a period of at least one year.

Service is to include any period during which the employee would have been a leased employee, but for the requirement that substantially full-time service be performed for at least one year. Such leased employees are to be considered employees of their recipient organization at certain times and for certain qualification requirements unless the leasing organization adopts and maintains the type of qualified plan specified in Code section 414(n)(5).

A *safe harbor* plan is a money purchase pension plan maintained by the leasing organization which provides with respect to a leased employee:

(A) a nonintegrated employer contribution rate of at least 10%, and

(B) immediate participation and full and immediate vesting.

The plan must cover all employees of the leasing organization other than those who are not "leased out" and cover those whose compensation from the leasing organization is less than $1,000 per year during a plan year and each of the prior 3 plan years. The safe harbor plan must provide the 10% of compensation allocation regardless of the number of hours of service during the year, age, or whether the employee is employed on a specific date.

In general, if leased employees make up more than 20% of the nonhighly compensated work force of the recipient, such employees must be covered by the recipient's pension plan regardless of the safe harbor plan. Recipient includes employers aggregated under Code section 414(b), (c), or (m). Under the 20% rule, "leased employees" include all persons who performed services as a "nonemployee."

Therefore, the total number of employees entered in 22c, the breakdown of excluded employees shown in 22d, and the ineligible employees shown in 22f should also include the employees of the controlled group, employees of employers under common control, or other employees in the affiliated service group or leased employees as described above.

Do not complete 22 for multiemployer plans described in Code section 414(f) or for multiple-employer-collectively-bargained plans.

**24b.** An independent appraiser must be used to ascertain the value of securities acquired by a plan after December 31, 1986, if the securities aren't readily tradable on an established securities market.

**28a.** If you are uncertain as to whether the plan is covered under the PBGC termination insurance program, check the box "Not determined" and contact the PBGC and request a coverage determination.

**29.** Check "Yes" or "No" and enter the total amount (except 29k) for all "Yes" responses. Round off all amounts to the nearest dollar.

**29a.** Check "Yes" and indicate the aggregate amount of coverage available for all claims if every plan official who handles plan funds is covered by a bond. Otherwise, check "No." Generally, every plan official of an employee benefit plan who "handles" funds or other property of such plan must be bonded. A plan administrator, officer, or employee shall be deemed to be "handling" funds or other property of a plan, so as to require bonding, whenever his or her duties or activities with respect to given funds are such that there is a risk that such funds could be lost in the event of fraud or dishonesty on the part of such person, acting either alone or in collusion with others. Section 412 of ERISA and the regulations found at 29 CFR 2580 provide the bonding requirements including the definition of "handling" (29 CFR 2580.412-6), the permissible forms of bonds (29 CFR 2580.412-10), and certain exemptions such as the exemption for unfunded plans, banks and insurance companies (ERISA section 412) and the exemption allowing plan officials to purchase bonds from surety companies authorized by the Secretary of the Treasury as acceptable reinsurers on Federal bonds (29 CFR 2580.412-23).

Check "Yes" only if the plan itself (as opposed to the plan sponsor) is a named insured under a fidelity bond covering plan officials.

Plans are permitted under certain conditions to purchase fiduciary liability insurance. These policies do not protect the plan from dishonest acts and are not bonds which should be reported in item 29.

**29b.** If item 29a is answered "Yes," this must be answered. Check "Yes" to item 29b if the plan has suffered or discovered any loss as the result of a dishonest or fraudulent act(s). If "Yes," enter the full amount of the loss. If the full amount of the loss has not yet been determined, provide and disclose that the figure is an estimate, such as "approximately $1,000."

**Note:** *Wilful failure to report is a criminal offense. See ERISA section 501.*

**29c.** For purposes of item 29, the term "employer" includes affiliates of the employer. In determining the five most highly paid employees, use all compensation paid including cash, bonuses, and noncash payments (e.g., l. use of a car). A fiduciary is a person with respect to a plan to the extent: (1) he or she exercises any discretionary authority or discretionary control with respect to the management of such plan or exercises any authority or control with respect to the management or disposition of its assets, (2) he or she renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of such plan, or has any authority or responsibility to do so, or (3) he or she has any discretionary authority or discretionary responsibility in the administration of such plan.

**29d.** Relatives include spouses, siblings, ancestors, lineal descendents (e.g., children, grandchildren, etc.) and spouses of lineal descendents. If 29c is answered "Yes," enter the total amount of these transactions.

**29e.** An "employer security" is a security issued by an employer (including affiliates) of employees covered by the plan. These may include common stocks, preferred stocks, bonds, zero coupon bonds, debentures, convertible debentures, notes, and commercial paper.

Employer real property is any real property (and related personal property) owned by the plan and leased to the employer of employees covered by the plan. This may include land, warehouses, office buildings, etc. If item 29e is "Yes," enter the total amount of employer securities and/or employer real property held or acquired.

**29f.** Generally, a loan requires that both the principal and interest be paid according to a pre-established repayment schedule. If the principal and/or interest has not been paid in accordance with the original repayment schedule and the period for repayment of the principal and/or interest has been extended, or the loan has been renegotiated after it has not met the original repayment schedule, a "Yes" must be checked and the total amount of the delinquent loan must be entered. Otherwise check "No."

**29h.** Check "Yes," for obligations where the required payments have not been made by the due date. With respect to notes and loans, the due date, payment amount and conditions for default are usually contained in the note or loan document. Defaults can occur at any time for those obligations that require periodic repayment. Generally, loans and fixed income obligations are considered uncollectible when payment has not been made and there is little probability that payment will be made. A loan by the plan is in default when the borrower is unable to pay the obligation upon maturity. A fixed income obligation has a fixed maturity date at a specified interest rate. If item 29h is "Yes," enter the total amount of loans by the plan or fixed income obligations that are uncollectible or in default as of the plan year end.

**29i.** Consider all fiduciaries and parties providing services to the plan, including: (1) persons who are fiduciaries by reason of their relationship to a master trust investment account or 103-12 IE in which the plan has an interest or the assets in such an investment account or 103-12 IE; and (2) parties providing services rendered with respect to assets held in master trusts and 103-12 IEs.

See item 29c above for the definition of fiduciary.

**29j.** Include as a single security all securities of the same issue. For the purposes of item 29j, do not check "Yes" for securities issued by the U.S. Government or its agencies. If item 29j is "Yes," enter the total.

**29k.** In determining the 20% figure, subtract the current value of plan assets held in any master trust or 103-12 IE from the current value of the plan's total assets at the beginning of the plan year. Check "Yes" if the plan had:

1. A single transaction within the plan year in excess of 20% of the current value of the plan assets;

2. Any series of transactions with, or in conjunction with, the same person, involving property other than securities, which amount in the aggregate within the plan year (regardless of the category of asset and the gain or loss on any transaction) to more than 20% of the current value of plan assets;

3. Any transaction within the plan year involving securities of the same issue if within the plan year any series of transactions with respect to such securities amount in the aggregate to more than 20% of the current value of the plan assets; or

4. Any transaction within the plan year with respect to securities with, or in conjunction with, a person if any prior or subsequent single transaction within the plan year with such person, with respect to securities, exceeds 20% of the current value of plan assets. The 20% figure is determined by comparing the current value of the transaction at the transaction date with the current value of the plan assets at the beginning of the plan year.

If the assets of two or more plans are maintained in one trust, the plan's allocable portion of the transactions of the trust shall be combined with the other transactions of the plan, if any, to determine which transactions (or series of transactions) are reportable (20%) transactions.

**Exception:** For investments in common/collective trusts, pooled separate accounts, 103-12 IEs, and registered investment companies, determine the 20% figure by comparing the transaction date value of the acquisition and/or disposition of units of participation or shares in the entity with the current value of the plan assets at the beginning of the plan year. Check "No" if all plan funds are held in a master trust. Do not include individual transactions of common/collective trusts, pooled separate accounts, 103-12 IEs and registered investment companies.

If item 29k is answered "Yes," enter the amount.

**29l.** Check "No" if the plan received all of its contributions in cash. Generally, as it relates to this question, an appraisal by an unrelated third party is an evaluation of the value of the asset contributed prepared by an individual or firm who knows how to judge the value of the asset and does not have an ongoing relationship with the plan or plan fiduciaries except for preparing the appraisal. If item 29l is checked "Yes," enter the value of the asset as established by the plan.

**29m.** Nonpublicly traded securities are generally held by few people and not traded on a stock exchange. Generally, as it relates to this question, an appraisal by an unrelated third party is an evaluation of the value of the security prepared by an individual or firm who knows how to judge the value of the security and does not have an ongoing relationship with the plan or plan fiduciaries except for preparing the appraisal. If item 29m is answered "Yes," enter the value of the security as established by the plan.

**30 and 31.** You can use either the cash, modified accrual, or accrual basis for recognition of transactions in items 30 and 31, as long as you use one method consistently.

"Current value" means fair market value where available. Otherwise, it means the fair value as determined in good faith under the terms of the plan by a trustee or a named fiduciary, assuming an orderly liquidation at the time of the determination.

If the assets of two or more plans are maintained in one trust, such as when an employer has two plans which are funded through a single trust (except investment arrangements filing with DOL as specified below), complete items 30 and 31 by entering the plan's allocable part of each line item.

If assets of one plan are maintained in two or more trust funds, report the combined financial information in 30 and 31.

A fully insured pension plan meeting the conditions of 29 CFR 2520.104-44 need not complete items 30 and 31. For more details, see page 4 of the instructions under "Items To Be Completed on Form 5500-C."

Plan assets may include, among other things:

(1) Cash both interest and noninterest bearing. This includes all cash on hand or in a financial institution including money market funds.

(2) All contributions due to the plan from the employer and participants, income earned, but not yet received by the plan and receivables from any other source.

(3) Investments securities (stocks, bonds, U. S. Government obligations, municipal obligations, etc.); real property (land, buildings, gold, furniture, equipment, etc.); loans (mortgages, promissory notes, etc.) and all other investments (certificates of deposit, repurchase agreements, land contracts, units of participation in common/collective trusts and pooled separate accounts, shares of registered investment companies (mutual funds), interests in master trusts and 103-12 IE's, etc.).

Plans holding units of participation in common/collective trusts and/or pooled separate accounts must attach to the return/report either the statement of assets and liabilities of the common/collective trust and/or pooled separate account or the certification discussed on page 3 of these instructions. For details, see 29 CFR sections 2520.103-3, 2520.103-4, 2520.103-5, and 2520.103-9.

Plans in a master trust must include the value of the plan's interest in the master trust which is the sum of the net values of the plan's interest in all of the master trust investment accounts (see page 3 for the definition of master trust investment account). The net values of such interests are obtained by multiplying the plan's percentage interest in each master trust investment account by the net assets of the investment account (total assets minus total liabilities) at the beginning and end of the plan year.

**30c.** Investments in securities of the U.S. Government should be included in c(i).

You can use the same method for determining the value of the insurance contracts reported in 30 that you used for line 6e of the Schedule A (Form 5500) as long as the contract values are stated as of the beginning and end of the plan year.

VOL 54 ISS 39 MR 1 1989

Liabilities include among other things:

(1) Benefit claims payable—claims that have been processed and approved for payment but have not been paid.

(2) Accounts payable—obligations owed by the plan that were incurred in the normal operations of the plan and have been approved for payment but not been paid.

(3) Other liabilities—such as acquisition indebtedness and any other amount owed by the plan.

*Liabilities.* Do not include the value of future pension payments.

**30g.** Enter total amount of claims which have been processed and approved for payment directly from the trust but have not been paid. Do not include the value of future pension payments.

**30h. Acquisition indebtedness.**—Acquisition indebtedness, for debt-financed property other than real property, means the outstanding amount of the principal debt incurred:

(1) by the organization in acquiring or improving the property;

(2) before the acquisition or improvement of the property if the debt was incurred only to acquire or improve the property; or

(3) after the acquisition or improvement of the property if the debt was incurred only to acquire or improve the property and was reasonably foreseeable at the time of such acquisition or improvement.

For further explanation, see Code section 514(c).

**31a(i).** If the plan is on the accrual basis, enter the amount of contributions received or accrued.

**31b.** Show current value, at date contributed, of securities or other noncash property contributed to the plan.

**31g.** If distributions include securities or other property, show the current value at date distributed in this figure.

**31h.** Report all administrative expenses paid by or charged to the plan, including those which were not subtracted from the gross income of master trust investment accounts and 103-12 IEs in determining their net investment gain(s) or loss(es).

For purposes of a filing required only because of Code section 6039D, do not include overhead expenses such as utilities and photocopying expenses. Also, if filing for an educational assistance program described in Code section 127, do not include expenses for job-related training which are deductible under Code section 162.

## Codes for Principal Business Activity and Principal Product or Service

These industry titles and definitions are based, in general, on the Enterprise Standard Industrial Classification System authorized by the Regulatory and Statistical Analysis Division, Office of Information and Regulatory Affairs, Office of Management and Budget, to classify enterprises by type of activity in which they are engaged.

| Code | |
|---|---|
| | **AGRICULTURE, FORESTRY, AND FISHING** |
| 0120 | Field crop. |
| 0150 | Fruit, tree nut, and vegetable |
| 0180 | Horticultural specialty |
| 0230 | Livestock |
| 0270 | Animal specialty |
| | **Agricultural services and forestry:** |
| 0740 | Veterinary services. |
| 0750 | Animal services, except veterinary |
| 0780 | Landscape and horticultural services |
| 0790 | Other agricultural services. |
| 0800 | Forestry. |
| | **Farms:** |
| | **Fishing, hunting, and trapping:** |
| 0930 | Commercial fishing, hatcheries, and preserves |
| 0970 | Hunting, trapping, and game propagation |
| | **MINING** |
| | **Metal mining:** |
| 1010 | Iron ores. |
| 1070 | Copper, lead and zinc, gold and silver ores. |
| 1098 | Other metal mining. |
| 1150 | Coal mining. |
| | **Oil and gas extraction:** |
| 1330 | Crude petroleum, natural gas, and natural gas liquids |
| 1380 | Oil and gas field services. |
| | **Nonmetallic minerals (except fuels) mining:** |
| 1430 | Dimension, crushed and broken stone; sand and gravel |
| 1498 | Other nonmetallic minerals, except fuels. |
| | **CONSTRUCTION** |
| | **General building contractors and operative builders:** |
| 1510 | General building contractors. |
| 1531 | Operative builders |
| | **Heavy construction contractors:** |
| 1611 | Highway and street construction. |
| 1620 | Heavy construction, except highway |
| | **Special trade contractors:** |
| 1711 | Plumbing, heating, and air conditioning |
| 1721 | Painting, paperhanging, and decorating |
| 1731 | Electrical work |
| 1740 | Masonry, stonework, and plastering |
| 1750 | Carpentering and flooring |
| 1761 | Roofing and sheet metal work. |
| 1771 | Concrete work |
| 1781 | Water well drilling. |
| 1790 | Miscellaneous special trade contractors. |
| | **MANUFACTURING** |
| | **Food and kindred products:** |
| 2010 | Meat products. |
| 2020 | Dairy products. |
| 2030 | Preserved fruits and vegetables. |
| 2040 | Grain mill products. |
| 2050 | Bakery products. |
| 2060 | Sugar and confectionery products. |
| 2081 | Malt liquors and malt |
| 2088 | Alcoholic beverages, except malt liquors and malt |
| 2089 | Bottled soft drinks and flavorings. |
| 2096 | Other food and kindred products. |
| 2100 | Tobacco manufacturers |
| | **Textile mill products:** |
| 2228 | Weaving mills and textile finishing |
| 2250 | Knitting mills. |
| 2298 | Other textile mill products. |
| | **Apparel and other textile products:** |
| 2315 | Men's and boys' clothing. |
| 2345 | Women's and children's clothing. |
| 2388 | Hats, caps, millinery, fur goods, and other apparel and accessories. |
| 2390 | Misc. fabricated textile products. |
| | **Lumber and wood products:** |
| 2415 | Logging camps and logging contractors, sawmills, and planing mills |
| 2430 | Millwork, plywood, and related products. |
| 2498 | Other wood products, including wood buildings and mobile homes |
| 2500 | Furniture and fixtures. |
| | **Paper and allied products:** |
| 2625 | Pulp, paper, and board mills |
| 2699 | Other paper products |
| | **Printing, publishing, and allied industries:** |
| 2710 | Newspapers. |
| 2720 | Periodicals |
| 2735 | Books, greeting cards, and miscellaneous publishing |
| 2799 | Commercial and other printing, and printing trade services. |
| | **Chemical and allied products:** |
| 2815 | Industrial chemicals, plastics materials, and synthetics |
| 2830 | Drugs |
| 2840 | Soap, cleaners, and toilet goods |
| 2850 | Paints and allied products |
| 2898 | Agricultural and other chemical products. |
| | **Petroleum refining and related industries (including those integrated with extraction):** |
| 2910 | Petroleum refining (including those integrated with extraction) |
| 2998 | Other petroleum and coal products. |
| | **Rubber and misc. plastics products:** |
| 3050 | Rubber products, plastics footwear, hose, and belting |
| 3070 | Misc. plastics products. |
| | **Leather and leather products:** |
| 3140 | Footwear, except rubber |
| 3198 | Other leather and leather products |
| | **Stone, clay, glass, and concrete products:** |
| 3225 | Glass products. |
| 3240 | Cement, hydraulic. |
| 3270 | Concrete, gypsum, and plaster products. |
| 3298 | Other nonmetallic mineral products. |
| | **Primary metal industries:** |
| 3370 | Ferrous metal industries, miscellaneous primary metal products. |
| 3380 | Nonferrous metal industries. |
| | **Fabricated metal products, except machinery and transportation equipment:** |
| 3410 | Metal cans and shipping containers. |
| 3428 | Cutlery, hand tools, and hardware; screw machine products, bolts, and similar products. |
| 3430 | Plumbing and heating, except electric and warm air |
| 3440 | Fabricated structural metal products. |
| 3460 | Metal forgings and stampings |
| 3470 | Coating, engraving, and allied services |
| 3480 | Ordnance and accessories, except vehicles and guided missiles. |
| 3490 | Misc. fabricated metal products. |
| | **Machinery, except electrical:** |
| 3520 | Farm machinery |
| 3530 | Construction, mining and materials handling machinery, and equipment. |
| 3540 | Metalworking machinery |
| 3550 | Special industry machinery, except metalworking machinery |
| 3560 | General industrial machinery |
| 3570 | Office, computing, and accounting machines |
| 3598 | Engines and turbines, service industry machinery, and other machinery, except electrical |
| | **Electrical and electronic machinery, equipment, and supplies:** |
| 3630 | Household appliances. |
| 3665 | Radio, television, and communication equipment |
| 3670 | Electronic components and accessories |
| 3698 | Other electric equipment |
| | **Transportation equipment:** |
| 3710 | Motor vehicles and equipment |
| 3725 | Aircraft, guided missiles, and parts. |
| 3730 | Ship and boat building and repairing |
| 3798 | Other transportation equipment |
| | **Measuring and controlling instruments; photographic and medical goods, watches and clocks:** |
| 3815 | Scientific instruments and measuring devices, watches, and clocks |
| 3845 | Optical, medical, and ophthalmic goods |
| 3860 | Photographic equipment and supplies |
| 3998 | Other manufacturing products. |
| | **TRANSPORTATION, COMMUNICATION, ELECTRIC, GAS, SANITARY SERVICES** |
| | **Transportation:** |
| 4000 | Railroad transportation |
| | **Local and interurban passenger transit:** |
| 4121 | Taxicabs |
| 4189 | Other passenger transportation |
| | **Trucking and warehousing:** |
| 4210 | Trucking, local and long distance |
| 4289 | Public warehousing and trucking terminals |
| | **Other transportation including transportation services:** |
| 4400 | Water transportation |
| 4500 | Transportation by air |
| 4600 | Pipelines, except natural gas |
| 4722 | Passenger transportation arrangement. |
| 4723 | Freight transportation arrangement. |
| 4799 | Other transportation services |
| | **Communication:** |
| 4825 | Telephone, telegraph, and other communication services |
| 4830 | Radio and television broadcasting. |
| | **Electric, gas, and sanitary services:** |
| 4910 | Electric services. |
| 4920 | Gas production and distribution |
| 4930 | Combination utility services |
| 4990 | Water supply and other sanitary services. |
| | **WHOLESALE TRADE** |
| | **Durable:** |
| 5010 | Motor vehicles and automotive equipment. |
| 5020 | Furniture and home furnishings |
| 5030 | Lumber and construction materials. |
| 5040 | Sporting, recreational, photographic, and hobby goods, toys, and supplies |
| 5050 | Metals and minerals, except petroleum and scrap |
| 5060 | Electrical goods. |
| 5070 | Hardware, plumbing, and heating equipment |
| 5083 | Farm machinery and equipment. |
| 5089 | Other machinery, equipment, and supplies |
| 5098 | Other durable goods. |
| | **Nondurable:** |
| 5110 | Paper and paper products |
| 5129 | Drugs, drug proprietaries, and druggists' sundries. |
| 5130 | Apparel, piece goods, and notions. |
| 5140 | Groceries and related products, except meats and meat products. |
| 5147 | Meats and meat products. |
| 5150 | Farm product raw materials |
| 5160 | Chemicals and allied products. |
| 5170 | Petroleum and petroleum products. |
| 5180 | Alcoholic beverages. |
| 5190 | Miscellaneous nondurable goods. |

Department of Labor
Pension and Welfare Benefits Administration
Pension Benefit Guaranty Corporation

# Registration Statement of Employee Benefit Plan

(With fewer than 100 participants)

**This form is required to be filed under sections 104 and 4065 of the Employee Retirement Income Security Act of 1974 and sections 6039D and 6058 of the Internal Revenue Code.**

OMB No. 1210-0016

**1988**

Amended ☐

**This Form is Open to Public Inspection**

For the calendar plan year 1988 or fiscal plan year beginning , 1988, and ending , 19

One-participant plans file Form 5500EZ (see the instructions).
Plans described in Code section 6039D, complete the applicable box 6d, 6e, or 6f, and see the instructions.
Do NOT file this form for the plan's first year or for the plan's final return/report. Instead file Form 5500-C.
Check this box if an extension of time to file this return is attached . . . . . ▶ ☐

▶ **If you have been granted an extension of time to file this form, you must attach a copy of the approved extension to this form.**
▶ **Type or complete in ink and file the original. If any item does not apply, enter "N/A."**

**Use IRS label. Otherwise, please print or type.**

1a Name of plan sponsor (employer, if for a single employer plan) — 1b Employer identification number

Address (number and street) — 1c Sponsor's telephone number ( )

City or town, state, and ZIP code — 1d If plan year changed since last return/report, check here . . ▶ ☐

2a Name of plan administrator (if same as plan sponsor, enter "Same") — 2b Administrator's employer identification number

Address (number and street) — 2c Administrator's telephone number ( )

City or town, state, and ZIP code

3 Are the name, address, and identification number of the plan sponsor and/or plan administrator the same as they appeared on the last return/report filed for this plan? . . . . . ☐ Yes ☐ No
If "No," enter the information from the last return/report in a and/or b, and complete c.
a Sponsor ▶ _____ EIN _____ Plan number _____
b Administrator ▶ _____ EIN _____
c If a is completed, is this a change in sponsorship only? (See specific instructions for definition of sponsorship.) ☐ Yes ☐ No

4 Check appropriate box to indicate the type of plan entity (check only one box):
a ☐ Single-employer plan
b ☐ Plan of controlled group of corporations or common control employers
c ☐ Multiemployer plan
d ☐ Multiple-employer-collectively-bargained plan
e ☐ Multiple-employer plan (other)
f ☐ Exceptions to (b) and (e). (See instructions for line 4f.)

5a(i) Name of plan ▶ _____ — 5b Effective date of plan ▶
(ii) ☐ Check if name of plan changed since last return/report
(iii) ☐ Check this box if this plan covers self-employed participants — 5c Enter three-digit plan number . . . ▶

6 Type of plan (check applicable boxes):
a ☐ Defined benefit
b ☐ Defined contribution (money purchase or profit-sharing)
c ☐ Welfare benefit
d ☐ Code section 120 (group legal services plan)
e ☐ Code section 125 (cafeteria plan)
f ☐ Code section 127 (educational assistance program)
g ☐ Master trust
h ☐ Common/collective trust
i ☐ Pooled separate account
j ☐ Other (specify) ▶ _____
k If you checked d, e, or f, check if plan is: ☐ funded or ☐ unfunded

| | | Yes | No |
|---|---|---|---|
| 7a | Total participants: (i) Beginning of plan year _____ (ii) End of plan year _____ | | |
| b | (i) Was any pension benefit plan participant(s) separated from service with deferred vested benefits for which a Schedule SSA (Form 5500) is required to be attached to this form? . . . . . | 7b(i) | |
| | (ii) If "Yes," enter the number of separated participants required to be reported ▶ | | |

Under penalties of perjury and other penalties set forth in the instructions, I declare that I have examined this return/report, including accompanying schedules and statements, and to the best of my knowledge and belief, it is true, correct and complete.

Date ▶ _____ Signature of employer/plan sponsor ▶ _____

Date ▶ _____ Signature of plan administrator ▶ _____

# 1988 Instructions for Form 5500-R

## Registration Statement of Employee Benefit Plan (With fewer than 100 participants)

*(Code references are to the Internal Revenue Code. ERISA refers to the Employee Retirement Income Security Act of 1974.)*

**Paperwork Reduction Act Notice.**—We ask for this information to carry out the law as specified in ERISA and Code section 6039D. We need it to determine whether the plan is operating according to the law. You are required to give us this information.

The time needed to complete and file the forms listed below reflect the combined requirements of the Internal Revenue Service, Department of Labor, Pension Benefit Guaranty Corporation and the Social Security Administration. These times will vary depending on individual circumstances. The estimated average times are:

| | Recordkeeping | Learning about the law or the form | Preparing the form | Copying, assembling, and sending the form to IRS |
|---|---|---|---|---|
| Form 5500-R | 13 hrs., 26 min. | 3 hrs., 37 min. | 5 hrs., 50 min. | 32 min. |
| Schedule A (Form 5500) | 17 hrs., 28 min. | 28 min. | 1 hr., 42 min. | 16 min. |
| Schedule B (Form 5500) | 25 hrs., 50 min. | 1 hr. | 1 hr., 27 min. | ----- |
| Schedule P (Form 5500) | 2 hrs., 9 min. | 1 hr., 24 min. | 1 hr., 29 min. | ----- |
| Schedule SSA (Form 5500) | 6 hrs., 42 min. | 12 min. | 19 min. | ----- |

If you have comments concerning the accuracy of these time estimates or suggestions for making these forms more simple, we would be happy to hear from you. You can write to the **Internal Revenue Service,** Washington, DC 20224, Attention: IRS Reports Clearance Officer, TR:FP; or the **Office of Management and Budget,** Paperwork Reduction Project, Washington, DC 20503.

File 1988 forms for plan years that started in 1988. If the plan year differs from the calendar year, fill in the fiscal year space just under the form title. For a short plan year, see instruction B, Section 1.

***Reminder:*** In addition to filing this form with IRS, plans covered by the Pension Benefit Guaranty Corporation termination insurance must file their Annual Premium Payment, PBGC Form 1, directly with that agency.

**Penalties.**—ERISA and the Code provide for the assessment and imposition of penalties for not giving complete information and not filing statements and returns/reports. Certain penalties are administrative; that is, they may be imposed or assessed by one of the governmental agencies delegated to administer the collection of Form 5500 series data. Others require a legal conviction.

**A. Administrative Penalties.**—Listed below are various penalties for not meeting the Form 5500 series filing requirements. One or more of the following five penalties may be imposed or assessed in the event of incomplete filings and/or filings received after the date they are due unless it is determined that your explanation for failure to file properly is for reasonable cause:

1. A penalty of up to $1,000 a day for each day a plan administrator fails or refuses to file a complete return/report. See ERISA section 502(c)(2) and 29 CFR 2560.502c-2.
2. A penalty of $25 a day (up to $15,000) for not filing returns for certain plans of deferred compensation, certain trusts and annuities, and bond purchase plans by the due date(s). See Code section 6652(e). This penalty also applies to returns required to be filed under Code section 6039D.
3. A penalty of $1 a day (up to $5,000) for each participant for whom a registration statement (Schedule SSA (Form 5500)) is required but not filed. See Code section 6652(d)(1).
4. A penalty of $1 a day (up to $1,000) for not filing a notification of change of status of a plan. See Code section 6652(d)(2).
5. A penalty of $1,000 for not filing an actuarial statement. See Code section 6692.

**B. Other Penalties.**

1. Any individual who willfully violates any provision of Part 1 of Title I of ERISA shall be fined not more than $5,000 or imprisoned not more than 1 year, or both. See ERISA section 501.
2. A penalty up to $10,000, 5 years imprisonment, or both, for making any false statement or representation of fact, knowing it to be false, or for knowingly concealing or not disclosing any fact required by ERISA. See section 1027, Title 18, U.S. Code, as amended by section 111 of ERISA.

### How To Use This Instruction Booklet

The instructions are divided into four main sections.

| Section 1 | Page |
|---|---|
| A. Who Must File | 1 |
| B. When To File | 1 |
| Due date | 1 |
| Extension of Time to file | 1 |
| C. Where To File | 2 |
| **Section 2** | |
| What To File | 2 |
| Forms | 2 |
| Schedules | 2 |
| Other Filings | 3 |
| **Section 3** | |
| General Information—Final return/report; signature and date; reproductions; change in plan year; and amended return/report | 3 |
| **Section 4** | |
| Specific Instructions for Form 5500-R listed in numerical sequence | 3 |

## Section 1

**A. Who Must File.**—Any administrator or sponsor of an employee benefit plan subject to ERISA must file information about each such plan **every year** (Code section 6058 and ERISA sections 104 and 4065). Also required to file, for each year, is every employer maintaining a specified fringe benefit plan as described in Code section 6039D. The Internal Revenue Service (IRS), Department of Labor (DOL), and Pension Benefit Guaranty Corporation (PBGC) have consolidated their returns and report forms to minimize the filing burden for plan administrators and employers. The chart on page 4 gives a brief guide to the type of return/report to be filed.

**Reminder.** Form 5500-R cannot be filed unless the plan has filed a Form 5500-C for at least one of the two immediately preceding plan years. The exclusions from the filing requirements for Form 5500-R and Form 5500-C are identical. See Form 5500-C instructions.

**B. When To File.**—File all required forms and schedules by the last day of the 7th month after the plan year ends. For a short plan year, file the form and applicable schedules by the last day of the 7th month after the short plan year ends. For purposes of this return/report, the short plan year ends upon the date of the change in accounting period or upon the complete distribution of the assets of the plan. (Also see Section 3.) If the current year Form 5500-R is not available before the due date of your short plan year return/report, use the latest year form available and change the date printed on the return/report to the current year. Also show the dates your short plan year began and ended.

***Request for Extension of Time To File.***—An extension of time up to 2½ months may be granted for filing returns/reports if **Form 5558,** Application for Extension of Time To File Certain Employee Plan Returns, is filed before the normal due date of the return/report.

**Exception.** *Single-employer plans and plans of a controlled group of corporations that file consolidated Federal income tax returns are automatically granted an extension of time to file Form 5500, 5500-C, or 5500-R to the due date of the Federal income tax return of the single employer or controlled group of corporations if all the following conditions are met:*

*1. The plan year and the tax year coincide.*

*2. The single employer or the controlled group has been granted an extension of time to file its Federal income tax return to a date later than the normal due date for filing the Form 5500, 5500-C, or 5500-R.*

*3. A copy of the IRS extension of time to file the Federal income tax return is attached to each Form 5500, 5500-C, or 5500-R filed with IRS.*

**Note:** *An extension of time to file the return/report does not operate as an extension of time to file the PBGC Form 1.*

VOL 54 ISS 39 MR 1 1989 UMI

**C. Where To File.**—Please file the return/report with the Internal Revenue Service Center indicated below. No street address is needed.

| If the principal office of the plan sponsor or the plan administrator is located in ▼ | Use the following Internal Revenue Service Center address ▼ |
|---|---|
| Connecticut, Delaware, District of Columbia, Foreign Address, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, Virginia | Holtsville, NY 00501 |
| Alabama, Alaska, Arkansas, California, Florida, Georgia, Hawaii, Idaho, Louisiana, Mississippi, Nevada, North Carolina, Oregon, South Carolina, Tennessee, Washington | Atlanta, GA 39901 |
| Arizona, Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, Texas, Utah, West Virginia, Wisconsin, Wyoming | Memphis, TN 37501 |
| All Form 5500EZ filers | Andover, MA 05501 |

Investment arrangements filing directly with DOL should file using the applicable address:

(1) Common/Collective Trust (OR)
Pooled Separate Account
Pension and Welfare Benefits Administration
U. S. Department of Labor
Room N5644
200 Constitution Avenue, NW.
Washington, DC 20210

(2) Master Trust
Pension and Welfare Benefits Administration
U. S. Department of Labor
Room N5644
200 Constitution Avenue, NW.
Washington, DC 20210

(3) 103-12 Investment Entity
Pension and Welfare Benefits Administration
U. S. Department of Labor
Room N5644
200 Constitution Avenue NW.
Washington, DC 20210

## Section 2
## What To File

The circumstances that dictate which form should be filed are described below. In addition, there are schedules that may need to be attached to the return/report. These are also described below. A brief guide illustrating which forms and schedules are required by different types of plans and filers may be found on page 4. Finally, this section also contains a description of special filing requirements for plans that invest in certain investment arrangements.

### Forms

***Form 5500.***—File **Form 5500**, Annual Return/Report of Employee Benefit Plan, annually for each plan with 100 or more participants at the beginning of the plan year.

***Form 5500-C.***—File **Form 5500-C**, Return/Report of Employee Benefit Plan, for each pension benefit plan, welfare benefit plan, and fringe benefit plan (unless otherwise exempted) with fewer than 100 participants (one-participant plans see "Form 5500EZ", below) at the beginning of the plan year. File Form 5500-C for the first plan year, the year for which the final return/report is due, and for plan years in which a Form 5500-R is not filed as explained below.

***Form 5500EZ.***—**Form 5500EZ**, Annual Return of One-Participant Pension Benefit Plan, should be filed by most one-participant plans.

A one-participant plan is: (1) a pension benefit plan that covers only an individual or an individual and his or her spouse who wholly own a trade or business, whether incorporated or unincorporated, or (2) a pension benefit plan for a partnership that covers only the partners or the partners and the partners' spouses.

See Form 5500EZ and its instructions to see if the plan meets the requirements for filing the form.

***Form 5500-R.***—**Form 5500-R**, Registration Statement of Employee Benefit Plan (with fewer than 100 participants), may be filed instead of a Form 5500-C for this plan year provided: (a) this is not the first plan year, (b) this is not a year for which the final return/report is due, and (c) a Form 5500-C has been filed for one of the prior 2 plan years. The Form 5500-R should not be filed if: (a) this plan year is the first plan year, (b) this is the plan year for which a final return/report is due, or (c) the Form 5500-R has been filed for both of the prior 2 plan years.

Any plan may choose not to file Form 5500-R if the plan files the Form 5500-C instead.

**Note:** *Generally, under the filing requirements explained above, if the number of plan participants increases from under 100 to 100 or more, or decreases from 100 or more to under 100, from one year to the next, you would have to file a different form from that filed the previous year. However, there is an exception to this rule. You may file the same form you filed last year, even if the number of participants changed, provided that at the beginning of this plan year the plan had at least 80 participants, but not more than 120.*

### Items To Be Completed on Form 5500-R

Certain kinds of plans and certain kinds of filers that are required to submit Form 5500-R are not required to complete the entire form. These are described below, by type of plan. Check the list of headings to see if your plan is affected.

**1. Welfare Benefit Plans.**—Welfare benefit plans must complete the following items on the Form 5500-R: 1 through 6c; 7a, 8a and b; 9; 10; 11; and 13 through 15.

**2. Fringe Benefit Plans.**—A Form 5500-R filed only because of Code section 6039D (i.e., for a fringe benefit plan) need complete only items 1 through 6, 7a, and 14b.

If the plan is also a welfare benefit plan required to file a Form 5500-R (see "Who Must File" on page 1), complete the above items and those specified for welfare benefit plans in "1" above.

**3. Pension Plans.**—In general, most pension plans (defined benefit and defined contribution) are required to complete all items on the form. However, some items need not be completed by certain types of pension plans, as described below.

a. Plans exclusively using a tax deferred annuity arrangement under Code section 403(b)(1). These plans need only complete items 1 through 5, 6b, and 8.

b. Plans exclusively using a custodial account for regulated investment company stock under Code section 403(b)(7). These plans need only complete items 1 through 5, 6b, and 8.

c. Individual retirement account plan. A pension plan utilizing individual retirement accounts or annuities (as described in Code section 408) as the sole funding vehicle for providing benefits need only complete items 1 through 5, 6b, and 8.

d. Fully insured pension plan. A pension benefit plan providing benefits exclusively through an insurance contract, or contracts that are fully guaranteed, and that meets all of the conditions of 29 CFR 2520.104-44 need only complete items 1 through 12, 14, and 15a and b. A pension plan that includes both insurance contracts of the type described in 29 CFR 2520.104-44 as well as other assets should limit its reporting in item 13 to those other assets.

For purposes of the annual return/report and the alternative method of compliance set forth in 29 CFR 2520.104-44, a contract is considered to be "allocated" only if the insurance company or organization that issued the contract unconditionally guarantees, upon receipt of the required premium or consideration, to provide a retirement benefit of a specified amount, without adjustment for fluctuations in the market value of the underlying assets of the company or organization, to each participant, and each participant has a legal right to such benefits that is legally enforceable directly against the insurance company or organization.

e. Nonqualified plans maintained outside the U.S. — Nonqualified pension benefit plans maintained outside the United States primarily for nonresident aliens required to file a return/report need only complete items 1 through 8 and 11 through 15.

### Schedules

The various schedules to be attached to the return/report are listed below.

**Note:** *All attachments to the Forms 5500, 5500-C, and 5500-R must include the name of the plan and the EIN and plan number as found in items 5a, 1b, and 5c, respectively.*

***Attach Schedule A (Form 5500), Insurance Information,*** to Form 5500, 5500-C, or 5500-R if any benefits under the plan are provided by an insurance company, insurance service, or other similar organization (such as Blue Cross, Blue Shield, or a health maintenance organization).

**Exception.** *Schedule A (Form 5500) is not needed if the plan covers: (1) only an individual, or an individual and his or her spouse, who wholly owns a trade or business, whether incorporated or unincorporated; or (2) a partner in a partnership, or a partner and his or her spouse.*

Do not file a Schedule A (Form 5500) with a Form 5500EZ.

***Attach Schedule B (Form 5500), Actuarial Information,*** to Forms 5500, 5500-C, 5500-R, or 5500EZ for most defined benefit pension plans. See instructions for Schedule B.

***Schedule SSA (Form 5500), Annual Registration Statement Identifying Separated Participants With Deferred Vested Benefits,*** may be needed for separated participants. See "When To Report Separated Participants" in the instructions for Schedule SSA.

***Schedule P (Form 5500), Annual Return of Fiduciary of Employee Benefit Trust,*** Any fiduciary (trustee or custodian) of an organization that is qualified under Code section 401(a) and exempt from tax under Code section 501(a) who wants to protect the organization under the statute of limitations provided in Code section 6501(a) must file a Schedule P (Form 5500).

File the Schedule P (Form 5500) as an attachment to Form 5500, 5500-C, 5500-R, or 5500EZ for the plan year in which the trust year ends.

### Other Filings

Reporting requirements for investment arrangements filing with the Department of Labor (master trusts, common/collective trusts, pooled separate accounts, etc.) are printed in the Form 5500-C instructions under "Other Filings."

## Section 3
## General Information

**Final Return/Report.**—If all assets under the plan (including insurance/annuity contracts) have been distributed to the participants and beneficiaries or distributed to another plan (and when all liabilities for which benefits may be paid under a welfare plan have been satisfied), check the "final return" box at the top of the Form 5500 or Form 5500-C filed for such plan. The year of complete distribution is the last year a return/report must be filed for the plan. For purposes of this paragraph, a complete distribution will occur in the year in which the assets of a terminated plan are brought under the control of PBGC.

For a defined benefit plan covered by PBGC, a PBGC Form 1 must be filed and a premium must be paid until the end of the plan year in which the assets are distributed or brought under the control of PBGC.

Filing the return/report marked "final return" and indicating that the plan terminated satisfies the notification requirement of Code section 6057(b)(3).

**Signature and Date.**—The plan administrator must sign and date all returns/reports filed. In addition the sponsoring employer must sign a return/report filed for a single-employer plan or a plan required to file only because of Code section 6039D.

When a joint employer-union board or committee is the plan sponsor or plan administrator, at least one employer representative and one union representative must sign and date the return/report.

Participating employers in a multiple-employer plan (other), who are required to file Form 5500-C or 5500-R, are required to sign the return/report. The plan administrator need not sign the Form 5500-C or 5500-R filed by the participating employer.

**Reproductions.**—Original forms are preferable, but a clear reproduction of the completed form is acceptable. Sign the return after it is reproduced. All signatures must be original.

**Change in Plan Year.**—Generally only defined benefit pension plans need to get prior approval for a change in plan year. (See Code section 412(c)(5).) Rev. Proc. 87-27, 1987 CB-1 769 explains the procedure for automatic approval of a change in plan year. A pension benefit plan that would ordinarily need to obtain approval for a change in plan year under Code section 412(c)(5) is granted an automatic approval for a change in plan year if all the following criteria are met:

1. No plan year is more than 12 months long.

2. The change will not delay the time when the plan would otherwise have been required to conform to the requirements of any statute, regulation, or published position of the IRS.

3. The trust, if any, retains its exempt status for the short period required to effect the change, as well as for the taxable year immediately preceding the short period.

4. All actions necessary to implement the change in plan year, including plan amendment and a resolution of the board of directors (if applicable), have been taken on or before the last day of the short period.

5. No change in plan year has been made for any of the preceding plan years.

6. In the case of a defined benefit plan, deductions are taken in accordance with section 5 of Rev. Proc. 87-27.

For the first return/report that is filed following the change in plan year, check item 1d if Form 5500-R is being filed.

**Amended Return/Report.**—If you file an amended return/report, check the "amended" box at the top of the form. When filing an amended return, be sure to answer all questions and put a circle around the numbers of the items that have been amended.

**How the Annual Return/Report Information May Be Used.**—All Form 5500 series returns/reports will be subjected to a computerized review. It is, therefore, in the filer's best interest that the responses accurately reflect the circumstances they were designed to report. Annual reports filed under Title I of ERISA must be made available by plan administrators to plan participants and by the Department of Labor to the public pursuant to ERISA section 104.

## Section 4
## Specific Instructions for Form 5500-R

**Important:** Complete all items on the Form 5500-R with respect to the plan year, unless otherwise explicitly stated in these item-by-item instructions or on the form itself. Therefore, your responses usually apply to the year entered or printed at the top of the first page of the form.

**First Item at the Top of the Form.**—Complete the space for dates when:

(1) the 12-month plan year is not a calendar year, or (2) the plan year is less than 12 months (short plan year).

**1a.** If you did not receive a preaddressed mailing label, enter the name and address of the plan sponsor. If the plan covers only the employees of one employer, enter the employer's name.

If you received a Form 5500-R with a preaddressed mailing label, please attach it in the name and address area of the form you file. If the name or address on the label is wrong, draw a line through the incorrect part and correct it.

The term "plan sponsor" means—

*(i)* the employer, for an employee benefit plan that a single employer established or maintains;

*(ii)* the employee organization in the case of a plan of an employee organization; or

*(iii)* the association, committee, joint board of trustees, or other similar group of representatives of the parties who establish or maintain the plan, if the plan is established or maintained jointly by one or more employers and one or more employee organizations, or by two or more employers.

Include enough information in 1(a) to describe the sponsor adequately. For example, "Joint Board of Trustees of Local 187 Machinists" rather than just "Joint Board of Trustees."

**1b.** Enter the 9-digit employer identification number (EIN) assigned to the plan sponsor/employer. For example, 00-1234567.

Employers and plan administrators who do not have an EIN should apply for one on Form SS-4, available from most IRS or Social Security Administration offices. Send Form SS-4 to the same Internal Revenue Service Center to which this form will be sent.

Plan sponsors are reminded that they should use the trust EIN when opening a bank account or conducting other transactions for a plan that requires an employer identification number. The trust may apply for an EIN as explained in the preceding paragraph.

A plan of a controlled group of corporations whose sponsor is more than one of the members of the controlled group should insert only the EIN of one of the sponsoring members. This EIN must be used in all subsequent filings.

If the plan administrator is a group of individuals, get a single EIN for the group. When you apply for a number, enter on line 1 of Form SS-4 the name of the group, such as "Joint Board of Trustees of the Local 187 Machinists' Retirement Plan."

**Note:** *Although Employer Identification Numbers (EINs) for funds (trusts or custodial accounts) associated with plans are not required to be furnished on the Form 5500 series returns/reports, the IRS will issue EINs for such funds for other reporting purposes. EINs may be obtained by filing Form SS-4 as explained in 1b above.*

VOL 54 ISS 39 MR 1 1989 UMI

**2a.** If the document constituting the plan appoints or designates a plan administrator other than the sponsor, enter the administrator's name and address. If the plan administrator is also the sponsor, enter "Same." If filing as a group insurance arrangement, enter "Same." If 2a is the "Same," then items 2b and 2c should be left blank.

The term "administrator" means—

*(i)* the person or group of persons specified as the administrator by the instrument under which the plan is operated;

*(ii)* the plan sponsor/employer if an administrator is not so designated; or

*(iii)* any other person prescribed by regulations of the Secretary of Labor if an administrator is not designated and a plan sponsor cannot be identified.

**2b.** A plan administrator must have an EIN for reporting purposes. Enter the plan administrator's 9-digit EIN here. If the plan administrator has no EIN, apply for one as explained in 1b above.

Employees of an employer are not plan administrators unless so designated in the plan document, even though they engage in administrative functions of the plan. If an employee of the employer is designated as the plan administrator, that employee must get an EIN.

**3.** If you answer "No," enter the name, address, and EIN of the plan sponsor and/or the plan administrator shown on the prior return/report.

**3c.** Indicate if the change in 3a is only a change in sponsorship. "Change in sponsorship" means the plan's sponsor has been changed but no assets or liabilities have been transferred to another plan(s), the plan has not terminated or merged with any other plan, and so forth.

**4a.** Check for a plan in which more than one employer participates, and some of the employees are members of a controlled group of corporations (Code section 414(b)) or members of a group of employers under common control (Code section 414(c)).

**4c.** Check for a multiemployer plan as defined in Code section 414(f) and ERISA sections 3(37) and 4001(a)(3).

**4e.** Check for a multiple-employer plan (other) filed by the plan administrator for the plan as a whole.

**4f. Exceptions to b and e.** Each participating employer in a multiple-employer plan (other) pension benefit plan and nonmember employers participating in a plan of a controlled group of corporations or businesses need to file either Form 5500-C or Form 5500-R, regardless of the number of participants. Complete items 1, 2, 3, 4f, 5, 6, 9, and 22 on Form 5500-C, and items 1, 2, 3, 4f, 5, 6, 7, 8a, and 8b on Form 5500-R.

**5a.** Enter the formal name of the plan, or enough information to identify the plan.

**5b.** Enter the date the plan first became effective.

**5c.** Enter the 3-digit number the employer or plan administrator assigned to the plan. All welfare plan numbers and Code section 6039D plan numbers start at 501. All other plans start at 001.

Once you use a plan number, continue to use it for that plan on all future returns/reports. Do not use it for any other plan even if you terminated the first plan.

**6a.** Defined benefit plan means a pension benefit plan other than a defined contribution plan.

**6b.** Defined contribution plan means a plan which provides for an individual account for each participant and for benefits based solely on the amount contributed to the participant's account, and any income, expenses, gains and losses, and any forfeitures of accounts of other participants that may be allocated to such participant's account. Examples of defined contribution plans are profit-sharing, stock bonus, and money purchase plans.

**6d, e, and f.** Plans described in Code section 120 (group legal services plans), check box 6d. Plans described in Code section 125 (cafeteria plans), check box 6e. Programs described in Code section 127 (educational assistance programs), check box 6f.

**6j.** If your pension plan is not included in 6a or b, check j and specify the applicable Code section. For example, Code section 403(b)(1) annuity arrangements and Code section 408(c) individual retirement account trusts of employers, would check j and enter the applicable Code section 403(b)(1) or 408(c).

**6k.** Check "unfunded" if the plan is (1) unfunded, (2) fully insured, or (3) a combination of unfunded/insured. For further information, see page 2, section 2B(a) of the Form 5500-C instructions.

**7.** The definition of "participant" in the instructions below is only for purposes of item 7 of this form.

For welfare plans, dependents are considered to be neither participants nor beneficiaries. For pension benefit plans, "alternate payees" entitled to benefits under a qualified domestic relations order are not to be counted as participants for this item.

"Participant" means any individual who is included in one of the categories below.

(i) Active participants include any individuals who are currently in employment covered by a plan and who are earning or retaining credited service under a plan. This category includes any individuals who are: (A) currently below the integration level in a plan that is integrated with social security, and/or (B) eligible to elect to have the employer make payments to a Code section 401(k) qualified cash or deferred arrangement. Active participants also include any nonvested individuals who are earning or retaining credited service under a plan. This category does not include nonvested former employees who have incurred the greater of 5 consecutive 1 year breaks in service or the break in service period specified in the plan.

For determining if active participants are fully vested, partially vested, or nonvested, consider vesting in employer contributions only.

For purposes of Code section 6039D, "participant" means any individual who, for a plan year, has had at least one dollar excluded from income by reason of Code section 120, 125, or 127. If you are filing Form 5500-R for a plan that is required to file under Title I of ERISA and under Code section 6039D, the preceding sentence does not apply.

**Summary of Filing Requirements for Employers and Plan Administrators**
**(File forms ONLY with IRS)**

| Type of plan | What to file | When to file |
|---|---|---|
| Most pension plans with only one participant or one participant and that participant's spouse | Form 5500EZ | File all required forms and schedules for each plan by the last day of the 7th month after the plan year ends. |
| Pension plan with fewer than 100 participants | Form 5500-C or 5500-R | |
| Pension plan with 100 or more participants | Form 5500 | |
| Annuity under Code section 403(b)(1) or trust under Code section 408(c) | Form 5500, 5500-C, or 5500-R | |
| Custodial account under Code section 403(b)(7) | Form 5500, 5500-C, or 5500-R | |
| Welfare benefit plan with 100 or more participants* | Form 5500 | |
| Welfare benefit plan with fewer than 100 participants* (see exception on page 1 of these instructions)* | Form 5500-C or 5500-R | |
| Pension or welfare plan with 100 or more participants (see Form 5500 instructions) | Financial statements, schedules, and accountant's opinion | |
| Pension or welfare plan with benefits provided by an insurance company | Schedule A (Form 5500) | |
| Pension plan that requires actuarial information | Schedule B (Form 5500) | |
| Plans with 100 or more participants | Schedule C (Form 5500) | |
| Pension plan filing a registration statement identifying separated participants with deferred vested benefits from a pension plan | Schedule SSA (Form 5500) | |

*This includes Code section 6039D filers.

(ii) Inactive participants receiving benefits are any individuals who are retired or separated from employment covered by the plan and who are receiving benefits under the plan. This includes former employees who are receiving group health continuation coverage benefits pursuant to Part 6 of ERISA who are covered by the employee welfare benefit plan. This category does not include any individual to whom an insurance company has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

(iii) Inactive participants entitled to future benefits are individuals who are retired or separated from employment covered by the plan and who are entitled to begin receiving benefits under the plan in the future. This category does not include any individual to whom an insurance company has made an irrevocable commitment to pay all the benefits to which the individual is entitled under the plan.

(iv) Deceased participants are any deceased individuals who have one or more beneficiaries who are receiving or are entitled to receive benefits under the plan. This category does not include an individual if an insurance company has made an irrevocable commitment to pay all the benefits to which the beneficiaries of that individual are entitled under the plan.

**7b(i).** If "Yes," file Schedule SSA (Form 5500) as an attachment to Form 5500-R.

Plan administrators: Code section 6057(e) provides that the plan administrator must give each participant a statement showing the same information for that participant as is reported on Schedule SSA.

**8a.** Check "Yes" if the plan was terminated or if the plan was merged or consolidated into another plan. Enter year of termination if applicable.

**8b.** If the plan was terminated and all trust assets were not distributed, file a return/report for each year the trust has assets. In that case, the return/report must be filed by the plan administrator, if designated, or by the person or persons who actually control the plan's property.

If all assets were used to buy individual annuity contracts and the contracts were distributed to the participants, check "Yes."

If all the trust assets were transferred to another plan, check "Yes."

**9.** Check "Yes" if either the contributions to the plan or the benefits paid by the plan are subject to the collective bargaining process, even if the plan is not established and administered by a joint board of trustees. Check "Yes" even if only some of those covered by the plan are members of a collective bargaining unit which negotiates benefit levels on its own behalf. The benefit schedules need not be identical for all employees under the plan.

**10.** The insurance company (or similar organization) which provides benefits is required to provide the plan administrator with the information needed to complete the return/report, pursuant to ERISA section 103(a)(2). If you do not receive this information in a timely manner, contact the insurance company (or similar organization). If information is missing on Schedule A due to a refusal to provide this information, note this on Schedule A. If there are no Schedule(s) A attached, enter "0."

**11a.** Check "Yes" if an amendment to the plan was adopted in this plan year, regardless of the effective date of the amendment.

**11b.** Check "Yes" only if the accrued benefits were retroactively reduced. For example, a plan provides a benefit of 2% for each year of service, but the plan is amended to change the benefit to 1½% a year for all years of service under the plan.

**11c.** Check "Yes" only if an amendment changed the information previously provided to participants by the summary plan description or summary description of modifications.

**11d.** A revised summary plan description or summary description of modifications must be filed with DOL and distributed to all plan participants and pension plan beneficiaries no later than 210 days after the close of the plan year in which the amendment(s) was adopted. If the material was distributed and filed since the amendments were adopted (even if after the end of the plan year), check "Yes" to item 11d.

**12a.** Check "Yes" if this is a pension plan subject to minimum funding standards that has experienced a funding deficiency. If item 12a is answered "Yes," and item 6a indicates this is a defined benefit pension plan, complete and attach Schedule B (Form 5500) to this registration statement. All defined benefit plans are subject to minimum funding standards except fully insured plans, church plans, governmental plans, and certain other plans covered by Code section 412(h). Code section 412 describes the minimum funding standards applicable to defined contribution plans qualified under Code section 401(a) or 403(a). A funding deficiency occurs if the amount of required employer contribution for the plan year exceeds the actual contribution paid by the employer for the plan year.

**12b.** If item 12a is answered "Yes," this item must be answered. If a funding deficiency occurs, Form 5330 must be filed with the IRS to pay the excise tax on the amount of the deficiency.

**13 and 14.** Use either the cash, modified accrual, or accrual basis for recognition of transactions in items 13 and 14, as long as one method is used consistently. Round off all amounts in items 13 and 14 to the nearest dollar. Where it is used in these instructions, "current value" means fair market value where available. Otherwise, it means the fair value as determined in good faith under the terms of the plan by a trustee or a named fiduciary, assuming an orderly liquidation at the time of the determination.

If the assets of two or more plans are maintained in one trust, such as when an employer has two plans that are funded through a single trust (except investment arrangements filing directly with DOL), complete items 13 and 14 by entering the plan's allocable part of each line item.

If assets of one plan are maintained in two or more trust funds, report the combined financial information in 13 and 14. Fully insured defined benefit or defined contribution pension plans meeting the conditions of 29 CFR 2520.104-44 need not complete items 13 and 14.

For purposes of the annual return/report and the alternative method of compliance set forth in 29 CFR 2520.104-44, a contract is considered to be "allocated" only if the insurance company or organization that issued the contract unconditionally guarantees, upon receipt of the required premium or consideration, to provide a retirement benefit of a specified amount, without adjustment for fluctuations in the market value of the underlying assets of the company or organization, to each participant, and each participant has a legal right to such benefits which is legally enforceable directly against the insurance company or organization.

**13a.** Enter the total plan assets at the beginning and end of the plan year. Plan assets may include, among other things:

(1) Cash including both interest and noninterest bearing. This includes all cash on hand or in a financial institution including money market funds.

(2) Receivables including all contributions due to the plan from the employer and participants, income earned, but not yet received by the plan and receivables from any other source.

(3) Investments including securities (stocks, bonds, U.S. Government obligations, municipal obligations, etc.); real property (land, buildings, gold, furniture, equipment, etc.); loans (mortgages, promissory notes, etc.); and all other investments (certificates of deposit, repurchase agreements, land contracts, units of participation in common/collective trusts and pooled separate accounts, shares of registered investment companies (mutual funds), interests in master trusts and 103-12 IEs, etc.).

Plans holding units of participation in common/collective trusts and/or pooled separate accounts must attach to the Form 5500-R either the statement of assets and liabilities of the common/collective trust and/or pooled separate account or the required certification. For details, see 29 CFR sections 2520.103-3, 2520.103-4, 2520.103-5, and 2520.103-9.

Plans in a master trust must include the value of the plan's interest in the master trust which is the sum of the net values of the plan's interest in all of the master trust investment accounts. The net values of such interests are obtained by multiplying the plan's percentage interest in each master trust investment account by the net assets of the investment account (total assets minus total liabilities) at the beginning and end of the plan year.

**13b.** Enter the total liabilities at the beginning and end of the plan year. Liabilities to be entered here do not include the value of future pension payments to plan participants; however, the amount to be entered in item 13b for accrual basis filers includes, among other things:

(1) Benefit claims that have been processed but have not been paid,

(2) Accounts payable obligations owed by the plan that were incurred in the normal operations of the plan but have not been paid,

BEST COPY AVAILABLE

VOL
54
ISS
39
MR
1
1989
UMI

(3) Other liabilities such as acquisition indebtedness and any other amount owed by the plan.

**13c.** Enter the net assets as of the beginning and end of the plan year. Subtract item 13b from item 13a.

**14a.** Enter all plan income during the year. Plan income received and/or receivable may include, among other things:

(1) Interest on investments (including money market funds, sweep accounts, STIF accounts, etc.)

(2) Dividends. (Accrual basis plans should include dividends declared for all stock held by the plan even if the dividends have not been received as of the end of the plan year.)

(3) Rents from income producing property owned by the plan.

(4) Royalties.

(5) Contributions including securities or other noncash property contributed to the plan.

(6) Net gains or loss from the sale of assets.

(7) Other income such as unrealized appreciation (depreciation) in plan assets. To compute this amount subtract the current value of all assets at the beginning of the year plus the cost of any assets acquired during the plan year from the current value of all assets at the end of the year minus assets disposed of during the plan year. A negative figure should be placed in parentheses.

**14b.** Enter all the expenses of the plan during the year. Expenses (paid and/or payable) may include, among others:

(1) Direct payments made to participants or beneficiaries in cash, securities or other property. If the securities or other property are distributed to plan participants or beneficiaries, include the fair market value (or a good faith estimate if fair market value is not available) on the date the property was distributed.

(2) Payments to insurance carriers and similar organizations (including Blue Cross, Blue Shield and health maintenance organizations).

(3) Payments to provide benefits for such things as legal services, day care services, training and apprenticeship services.

(4) Administrative expenses including:

(A) Salaries to employees of the plan.

(B) Expenses for accounting, actuarial, legal, and investment services.

(C) Fees and expenses for trustees including reimbursement for travel, seminars and meeting expenses.

(D) Fees paid for valuations and appraisals.

If this Form 5500-R is filed only for purposes of fulfilling the requirements of Code section 6039D, i.e., for a fringe benefit plan but not for a welfare benefit plan, do not include overhead expenses such as utilities and photocopying expenses. If this filing is only for an educational assistance program described in Code section 127, do not include expenses for job-related training that are deductible under Code section 162.

**Page 6**

**14c.** Enter the net income (loss). Subtract item 14b from item 14a. If the result is a negative number, enter it in parentheses.

**14d.** Enter the total cash contributions received and (for accrual basis plans) due to be received from the employer, participants and/or any other source.

**14e.** Include payments made (and for accrual basis filers payments due) to participants or beneficiaries in cash, securities or other property and to insurance carriers (or similar organizations such as Blue Cross, Blue Shield, and health maintenance organizations, etc.). If securities or other property are distributed to plan participants or beneficiaries, include the fair market value (or a good faith estimate if fair market value is not available) on the date of distribution.

**15.** Check "Yes" or "No" and enter the total amount (except 15i) for all "Yes" responses. Round off all amounts to the nearest dollar.

**15a.** Check "Yes" and indicate the aggregate amount of coverage available for all claims if every plan official who handles plan funds is covered by a bond. Otherwise, check "No." Generally, every plan official of an employee benefit plan who "handles" funds or other property of such plan must be bonded. A plan administrator, officer, or employee shall be deemed to be "handling" funds or other property of a plan, so as to require bonding, whenever his or her duties or activities with respect to given funds are such that there is a risk that such funds could be lost in the event of fraud or dishonesty on the part of such person, acting either alone or in collusion with others. Section 412 of ERISA and the regulations found at 29 CFR 2580 provide the bonding requirements including the definition of "handling" (29 CFR 2580.412-6), the permissible forms of bonds (29 CFR 2580.412-10), and certain exemptions such as the exemption for unfunded plans, banks and insurance companies (ERISA section 412) and the exemption allowing plan officials to purchase bonds from surety companies authorized by the Secretary of the Treasury as acceptable reinsurers on Federal bonds (29 CFR 2580.412-23).

Check "Yes" only if the plan itself (as opposed to the plan sponsor) is a named insured under a fidelity bond covering plan officials.

Plans are permitted under certain conditions to purchase fiduciary liability insurance. These policies do not protect the plan from dishonest acts and are not bonds which should be reported in item 15.

**15b.** If item 15a is answered "Yes," this must be answered. Check "Yes" to item 15b if the plan has suffered or discovered any loss as the result of a dishonest or fraudulent act(s). If "Yes," enter the full amount of the loss. If the full amount of the loss has not yet been determined, provide and disclose that the figure is an estimate, such as "approximately $1,000."

**Note:** *Willful failure to report is a criminal offense. See ERISA section 501.*

**15c.** For purposes of item 15, the term "employer" includes affiliates of the employer. In determining the five most highly paid employees, use all compensation paid including cash, bonuses, and noncash payments (e.g., the use of a car). A fiduciary is a person with respect to a plan to the extent: (1) he or she exercises any discretionary authority or discretionary control with respect to the management of such plan or exercises any authority or control with respect to the management or disposition of its assets, (2) he or she renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of such plan, or has any authority or responsibility to do so, or (3) he or she has any discretionary authority or discretionary responsibility in the administration of such plan.

**15d.** Relatives include spouses, siblings, ancestors, lineal descendents (e.g., children, grandchildren, etc.) and spouses of lineal descendents. If 15c is answered "Yes," enter the total amount of these transactions.

**15e.** An "employer security" is a security issued by an employer (including affiliates) of employees covered by the plan. These may include common stocks, preferred stocks, bonds, zero coupon bonds, debentures, convertible debentures, notes, and commercial paper.

Employer real property is any real property (and related personal property) owned by the plan and leased to the employer of employees covered by the plan. This may include land, warehouses, office buildings, etc. If item 15e is "Yes," enter the total amount of employer securities and/or employer real property held or acquired.

**15f.** Generally, a loan requires that both the principal and interest be paid according to a pre-established repayment schedule. If the principal and/or interest has not been paid in accordance with the original repayment schedule and the period for repayment of the principal and/or interest has been extended, or the loan has been renegotiated after the original repayment schedule has not been met, a "Yes" must be checked and the total amount of the delinquent loan must be entered. Otherwise check "No."

**15h.** Check "Yes" for obligations where the required payments have not been made by the due date. With respect to notes and loans, the due date, payment amount and conditions for default are usually contained in the note or loan document. Defaults can occur at any time for those obligations that require periodic repayment. Generally, loans and fixed income obligations are considered uncollectible when payment has not been made and there is little probability that payment will be made. A loan by the plan is in default when the borrower is unable to pay the obligation upon maturity. A fixed income obligation has a fixed maturity date at a specified interest rate. If item 15h is "Yes," enter the total amount of loans by the plan or fixed income obligations that are uncollectible or in default as of the plan year end.

**15i.** Consider all fiduciaries and parties providing services to the plan, including (1) persons who are fiduciaries by reason of their relationship to a master trust investment account or 103-12 IE in which the plan has an interest or the assets in such an investment account or 103-12 IE; and (2) parties providing services rendered with respect to assets held in master trusts and 103-12 IEs.

See item 15c above for the definition of fiduciary.

**15j.** Include as a single security all securities of the same issue. For the purposes of item 15j, do not check "Yes" for securities issued by the U.S. Government or its agencies. If item 15j is "Yes," enter the total.

**15k.** In determining the 20% figure, subtract the current value of plan assets held in any master trust or 103-12 IE from the current value of the plan's total assets at the beginning of the plan year. Check "Yes" if the plan had:

1. A single transaction within the plan year in excess of 20% of the current value of the plan assets;

2. Any series of transactions with, or in conjunction with, the same person, involving property other than securities, which amount in the aggregate within the plan year (regardless of the category of asset and the gain or loss on any transaction) to more than 20% of the current value of plan assets;

3. Any transaction within the plan year involving securities of the same issue if within the plan year any series of transactions with respect to such securities amount in the aggregate to more than 20% of the current value of the plan assets; or

4. Any transaction within the plan year with respect to securities with, or in conjunction with, a person if any prior or subsequent single transaction within the plan year with such person, with respect to securities, exceeds 20% of the current value of plan assets. The 20% figure is determined by comparing the current value of the transaction at the transaction date with the current value of the plan assets at the beginning of the plan year.

If the assets of two or more plans are maintained in one trust, the plan's allocable portion of the transactions of the trust shall be combined with the other transactions of the plan, if any, to determine which transactions (or series of transactions) are reportable (20%) transactions.

**Exception.** For investments in common/collective trusts, pooled separate accounts, 103-12 IEs, and registered investment companies, determine the 20% figure by comparing the transaction date value of the acquisition and/or disposition of units of participation or shares in the entity with the current value of the plan assets at the beginning of the plan year. Check "No" if all plan funds are held in a master trust. Do not include individual transactions of common/collective trusts, pooled separate accounts, 103-12 IEs, and registered investment companies.

If item 15k is answered "Yes," enter the amount.

**15l.** Check "No" if the plan received all of its contributions in cash. Generally, as it relates to this question, an appraisal by an unrelated third party is an evaluation of the value of the asset contributed prepared by an individual or firm who knows how to judge the value of the asset and does not have an ongoing relationship with the plan or plan fiduciaries except for preparing the appraisal. If item 15l is checked "Yes," enter the value of the asset as established by the plan.

**15m.** Non-publicly traded securities are generally held by few people and not traded on a stock exchange. Generally, as it relates to this question, an appraisal by an unrelated third party is an evaluation of the value of the security prepared by an individual or firm who knows how to judge the value of the security and does not have an ongoing relationship with the plan or plan fiduciaries except for preparing the appraisal. If item 15m is answered "Yes," enter the value of the security as established by the plan.

**16a.** If you are uncertain as to whether the plan is covered under the PBGC termination insurance program, check the box "Not determined" and contact the PBGC and request a coverage determination. Welfare and fringe benefit plans do not complete this item.

*U.S. GOVERNMENT PRINTING OFFICE : 1989 265-497*

VOL 54 ISS 39 MR 1 1989 UMI

**SCHEDULE A (Form 5500)**
Department of the Treasury
Internal Revenue Service
Department of Labor
Pension and Welfare Benefits Administration
Pension Benefit Guaranty Corporation

## Insurance Information

This schedule is required to be filed under section 104 of the Employee Retirement Income Security Act of 1974.
▶ File as an Attachment to Forms 5500, 5500-C, or 5500-R.
▶ Insurance companies are required to provide this information as per ERISA section 103(a)(2).

OMB No. 1210-0016
**1988**
This Form Is Open to Public Inspection

For calendar year 1988 or fiscal plan year beginning . 1988 and ending . 19

▶ Part I must be completed for all plans required to file this schedule.
▶ Part II must be completed for all insured pension plans.
▶ Part III must be completed for all insured welfare plans.
▶ Enter master trust or 103-12 IE name in place of "sponsor" and specify investment account or 103-12 IE in place of "plan" in filing with DOL for a master trust or 103-12 IE.

Name of plan sponsor as shown on line 1a of Form 5500, 5500-C, or 5500-R | Employer identification number

Name of plan | Enter three-digit plan number ▶

### Part I Summary of All Insurance Contracts Included in Parts II and III

Group all contracts in the same manner as in Parts II and III.

1 Check appropriate box: a ☐ Welfare plan b ☐ Pension plan c ☐ Combination pension and welfare plan

2 Coverage:

| (a) Name of insurance carrier | (b) Contract or identification number | (c) Approximate number of persons covered at end of policy or contract year | Policy or contract year (d) From | (e) To |
|---|---|---|---|---|
| | | | | |

3 Insurance fees and commissions paid to agents and brokers:

| (a) Contract or identification number | (b) Name and address of the agents or brokers to whom commissions or fees were paid | (c) Amount of commissions paid | (d) Fees paid: Amount | Purpose |
|---|---|---|---|---|
| | | | | |
| Total | | | | |

4 Premiums due and unpaid at end of the plan year ▶ $ : Contract or identification number ▶

### Part II Insured Pension Plans

Provide information for each contract on a separate Part II. Where individual contracts are provided, the entire group of such individual contracts with each carrier may be treated as a unit for purposes of this report.

▶ Contract or identification number ▶

5 Contracts with allocated funds, for example, individual policies or group deferred annuity contracts:
- a State the basis of premium rates ▶
- b Total premiums paid to carrier
- c If the carrier, service, or other organization incurred any specific costs in connection with the acquisition or retention of the contract or policy, other than reported in 3 above, enter amount. Specify nature of costs ▶

6 Contracts with unallocated funds, for example, deposit administration or immediate participation guarantee contracts. Do not include portions of these contracts maintained in separate accounts:
- a Balance at the end of the previous policy year
- b Additions: (i) Contributions deposited during year
  - (ii) Dividends and credits
  - (iii) Interest credited during the year
  - (iv) Transferred from separate account
  - (v) Other (specify) ▶
  - (vi) Total additions
- c Total of balance and additions, add a and b(vi)
- d Deductions:
  - (i) Disbursed from fund to pay benefits or purchase annuities during year
  - (ii) Administration charge made by carrier
  - (iii) Transferred to separate account
  - (iv) Other (specify) ▶
  - (v) Total deductions
- e Balance at end of current policy year, subtract d(v) from c

7 Separate accounts: Current value of plan's interest in separate accounts at year end

### Part III Insured Welfare Plans

Provide information for each contract on a separate Part III. If more than one contract covers the same group of employees of the same employer(s) or members of the same employee organization(s), the information may be combined for reporting purposes if such contracts are experience-rated as a unit. Where individual contracts are provided, the entire group of such individual contracts with each carrier may be treated as a unit for purposes of this report.

| 8 (a) Contract or identification number | (b) Type of benefit | (c) List gross premium for each contract | (d) Premium rate or subscription charge |
|---|---|---|---|
| | | | |

9 Experience-rated contracts: a Premiums: (i) Amount received
- (ii) Increase (decrease) in amount due but unpaid
- (iii) Increase (decrease) in unearned premium reserve
- (iv) Premiums earned, add (i) and (ii), and subtract (iii)

b Benefit charges: (i) Claims paid
- (ii) Increase (decrease) in claim reserves
- (iii) Incurred claims, add (i) and (ii)
- (iv) Claims charged

c Remainder of premium: (i) Retention charges (on an accrual basis)—(A) Commissions
- (B) Administrative service or other fees
- (C) Other specific acquisition costs
- (D) Other expenses
- (E) Taxes
- (F) Charges for risks or contingencies
- (G) Other retention charges
- (H) Total retention

(ii) Dividends or retroactive rate refunds. (These amounts were ☐ paid in cash, or ☐ credited.)

d Status of policyholder reserves at end of year: (i) Amount held to provide benefits after retirement
- (ii) Claim reserves
- (iii) Other reserves

e Dividends or retroactive rate refunds due (do not include amount entered in c(ii))

10 Nonexperience-rated contracts: a Total premiums or subscription charges paid to carrier

b If the carrier, service, or other organization incurred any specific costs in connection with the acquisition or retention of the contract or policy, other than reported in 3 above, report amount. Specify nature of costs ▶

If additional space is required for any item, attach additional sheets the same size as this form.

## General Instructions

This schedule must be attached to Form 5500, 5500-C, or 5500-R for every defined benefit, defined contribution, and welfare benefit plan where any benefits under the plan are provided by an insurance company, insurance service, or other similar organization.

## Specific Instructions

*(References are to the line items on the form.)*

Include only contracts with policy or contract years ending with or within the plan year (for reporting purposes a year cannot exceed 12 months). Data on Schedule A (Form 5500) should be reported only for such policy or contract years. **Exception:** *If the insurance company maintains records on the basis of a plan year rather than policy or contract year, data on Schedule A (Form 5500) may be reported for the plan year.*

Include only the contracts issued to the plan for which this return/report is being filed.

**Plans Participating in Master Trust(s) and 103-12 IEs**—See the Form 5500 or Form 5500-C instructions for "Reporting Requirements for Investment Arrangements Filing With DOL."

**2(c).**—Since the plan coverage may fluctuate during the year, the number of persons entered should be that which the administrator determines will most reasonably reflect the number covered by the plan at the end of the policy or contract year.

Where contracts covering individual employees are grouped, entries should be determined as of the end of the plan year.

**2(d) and (e).**—Enter the beginning and ending dates of the policy year for each contract listed under column (b). Where separate contracts covering individual employees are grouped, enter "N/A" in column (d).

**3.**—All sales commissions are to be reported in column (c) regardless of the identity of the recipient. Override commissions, salaries, bonuses, etc., paid to a general agent or manager for managing an agency, or for performing other administrative functions, are not to be reported.

Fees to be reported in column (d) represent payments by insurance carriers to agents and brokers for items other than commissions (e.g., service fees, consulting fees, and finders fees).

**Note:** *For purposes of this item, commissions and fees include amounts paid by an insurance company on the basis of the aggregate value (e.g., policy amounts, premiums) of contracts or policies (or classes thereof) placed or retained. The amount (or pro rata share of the total) of such commissions or fees attributable to the contract or policy placed with or retained by the plan must be reported in column (c) or (d), as appropriate.*

Fees paid by insurance carriers to persons other than agents and brokers should be reported in Parts II and III on Schedule A (Form 5500) as acquisition costs, administrative charges, etc., as appropriate. For plans with 100 or more participants, fees paid by employee benefit plans to agents, brokers, and other persons are to be reported on Schedule C (Form 5500).

**5a.**—The rate information called for here may be furnished by attachment of appropriate schedules of current rates filed with appropriate state insurance departments or by a statement as to the basis of the rates.

**6.**—Show deposit fund amounts rather than experience credit records when both are maintained.

**8(d).**—The rate information called for here may be furnished by attachment of appropriate schedules of current rates or by a statement as to the basis of the rates.

**SCHEDULE B (Form 5500)**
Department of the Treasury
Internal Revenue Service
Department of Labor
Pension and Welfare Benefits Administration
Pension Benefit Guaranty Corporation

## Actuarial Information

This schedule is required to be filed under section 104 of the Employee Retirement Income Security Act of 1974, referred to as ERISA, and section 6059(a) of the Internal Revenue Code, referred to as the Code.

▶ **Attach to Forms 5500, 5500-C, 5500-R, or 5500EZ if applicable.**

OMB No. 1210-0016

**1988**

**This Form is Open to Public Inspection**

For calendar plan year 1988 or fiscal plan year beginning , 1988, and ending 19

▶ **Please complete every item on this form. If an item does not apply, enter "N/A."** ▶ **Round off amounts to nearest dollar.**

▶ **Caution:** A penalty of $1,000 will be assessed for late filing of this report unless reasonable cause is established.

Name of plan sponsor as shown on line 1a of Form 5500, 5500-C, 5500-R, or 5500EZ | **Employer identification number**

Name of plan | Enter three-digit plan number ▶ | Yes | No

1 Has a waiver of a funding deficiency for this plan been approved by the IRS?
If "Yes," attach a copy of the IRS approval letter.
2 Is a waived funding deficiency of a prior plan year being amortized in this plan year?
3 Have any of the periods of amortization for charges described in Code section 412(b)(2)(B) been extended by IRS?
If "Yes," attach a copy of the IRS approval letter.
4a Was the shortfall funding method the basis for this plan year's funding standard account computations?
b Is this plan a multiemployer plan which is, for this plan year, in reorganization as described in Code section 418 or ERISA section 4241?
If "Yes," you are required to attach the information described in the instructions.
5 Has a change in funding method for this plan year been made?
If "Yes," attach either a copy of the letter showing IRS approval or state applicable Revenue Procedure authorizing approval if used.

6 Operational information:
a Enter most recent actuarial valuation date ▶
b Enter date(s) and amount of contributions received this plan year for prior plan years and not previously reported:
Date(s) ▶ Amount ▶
c Current value of the assets accumulated in the plan as of the beginning of the plan year
d Present value of vested benefits as of the beginning of the plan year:
(i) For retired participants and beneficiaries receiving payments
(ii) For other participants
(iii) Total
e Present value of nonvested accrued benefits as of the beginning of the plan year
f Number of persons covered (included in the most recent actuarial valuation):
(i) Active participants
(ii) Terminated participants with vested benefits
(iii) Retired participants and beneficiaries of deceased participants

7 Contributions made to the plan for the plan year by employer(s) and employees:

| (a) Month Year | (b) Amount paid by employer | (c) Amount paid by employees | (a) Month Year | (b) Amount paid by employer | (c) Amount paid by employees |
|---|---|---|---|---|---|
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | Total | | |

**Statement by Enrolled Actuary (see instructions before signing):**
To the best of my knowledge, the information supplied in this schedule and on the accompanying statement, if any, is complete and accurate, and in my opinion the assumptions used in the aggregate (a) are reasonably related to the experience of the plan and to reasonable expectations, and (b) represent my best estimate of anticipated experience under the plan.

Signature of actuary — Date
Print or type name of actuary — Enrollment number
Name and address — Telephone number (including area code)

8 Funding standard account and other information:
a Accrued liabilities as determined for funding standard account as of (enter date) ▶
b Value of assets as determined for funding standard account as of (enter date) ▶
c Unfunded liability for spread-gain methods with bases as of (enter date) ▶
d (i) Actuarial gains or (losses) for period ending ▶
(ii) Shortfall gains or (losses) for period ending ▶
e Amount of contribution certified by the actuary as necessary to reduce the funding deficiency to zero, from 9m or 10h (or the attachment for 4b if required)

9 Funding standard account statement for this plan year ending ▶
**Charges to funding standard account:** a Prior year funding deficiency, if any
b Employer's normal cost for plan year as of mo. ____ day ____ yr. ____
c Amortization charges
(i) Funding waivers (outstanding balance as of mo. ____ day ____ yr. ____ ▶ $ ____)
(ii) Other than waivers (outstanding balance as of mo. ____ day ____ yr. ____ ▶ $ ____)
d Interest as applicable to the end of the plan year on a, b, and c
e Total charges (add a through d)
**Credits to funding standard account:**
f Prior year credit balance, if any
g Employer contributions (total from column (b) of item 7)
h Amortization credits (outstanding balance as of mo. ____ day ____ yr. ____ ▶ $ ____)
i Interest as applicable to end of plan year on f, g, and h
j Other (specify) ▶
k Total credits (add f through j)
**Balance:**
l Credit balance: if k is greater than e, enter the difference
m Funding deficiency: if e is greater than k, enter the difference

10 Alternative minimum funding standard account (omit if not used):
a Was the entry age normal cost method used to determine entries in item 9 above? ☐ Yes ☐ No
If "No," do not complete b through h.
b Prior year alternate funding deficiency, if any
c Normal cost
d Excess, if any, of value of accrued benefits over market value of assets
e Interest on b, c, and d
f Employer contributions (total from column (b) of item 7)
g Interest on f
h Funding deficiency: if the sum of b through e is greater than the sum of f and g, enter difference

11 Actuarial cost method used as the basis for this plan year's funding standard account computation:
a ☐ Attained age normal
b ☐ Entry age normal
c ☐ Accrued benefit (unit credit)
d ☐ Aggregate
e ☐ Frozen initial liability
f ☐ Individual level premium
g ☐ Other (specify) ▶

12 Checklist of certain actuarial assumptions:

| | A Used for items 6d and e — value of accrued benefits | | | | B Used for items 8, 9, or 10 — funding standard account | | | |
|---|---|---|---|---|---|---|---|---|
| | Pre-retirement | | Post-retirement | | Pre-retirement | | Post-retirement | |
| | ☐ Yes | ☐ No | ☐ Yes | ☐ No | ☐ Yes | ☐ No | ☐ Yes | ☐ No |
| a Rates specified in insurance or annuity contracts | | | | | | | | |
| b Mortality table code: | | | | | | | | |
| (i) Males | | | | | | | | |
| (ii) Females | | | | | | | | |
| c Interest rate | % | | % | | % | | % | |
| d Retirement age | | | | | | | | |
| e Expense loading | % | | % | | % | | % | |
| f Annual withdrawal rate: | Male | Female | | | Male | Female | | |
| (i) Age 25 | % | % | | | % | % | | |
| (ii) Age 40 | % | % | | | % | % | | |
| (iii) Age 55 | % | % | | | % | % | | |
| g Ratio of salary at normal retirement to salary at: | | | | | | | | |
| (i) Age 25 | | | | | % | % | | |
| (ii) Age 40 | | | | | % | % | | |
| (iii) Age 55 | | | | | % | % | | |

h Investment return on actuarial value of plan assets for the year ending on the valuation date %

# 1988 Instructions for Schedule B (Form 5500)

## Actuarial Information

*(Code references are to the Internal Revenue Code. ERISA refers to the Employee Retirement Income Security Act of 1974.)*

## General Instructions

**Who Must File.**—The employer or plan administrator of a defined benefit plan that is subject to the minimum funding standards (see Code section 412 and Part 3 of Title I of ERISA) must file this schedule as an attachment to the return/report filed for this plan year.

For split-funded plans, the costs and contributions reported on Schedule B should include those relating to both trust funds and insurance carriers.

**Statement by Enrolled Actuary.**—An enrolled actuary must sign the Schedule B. The signature of the enrolled actuary may be qualified to state that it is subject to attached qualifications. See Code section 301.6059-1(d) for permitted qualifications. A stamped or machine produced signature is not acceptable. In addition, the actuary may offer any other comments related to the information contained in Schedule B.

## Specific Instructions

*(References are to line items on the form.)*

**4a.** Only certain collectively bargained plans may elect the shortfall funding method (see regulations under Code section 412). Advance approval from the IRS of the election of the shortfall method of funding is NOT required if it is first adopted for the first plan year to which Code section 412 applies. However, advance approval from IRS is required if the shortfall funding method is adopted at a later time, if a specific computation method is changed, or if the shortfall method is discontinued.

**4b.** Attach an explanation of the basis for the determination that the plan is in reorganization for this plan year. Also attach a worksheet showing for this plan year (i) the amounts considered contributed by employers, (ii) any amount waived by IRS, (iii) the development of the minimum contribution requirement (taking into account the applicable overburden credit, cash-flow amount, contribution bases and limitation on required increases on the rate of employer contributions), and (iv) the resulting accumulated funding deficiency, if any, which is to be reported on line 8e in lieu of an amount from line 9m.

**5.** Changes in funding methods include changes in actuarial cost method, changes in asset valuation method, and changes in the valuation date of plan costs and liabilities or of plan assets. Generally, these changes require IRS approval. If approval was granted by an individual ruling letter for this plan, attach a copy of the letter. If approval was granted pursuant to a regulation, class ruling, or revenue procedure, attach a copy of the items required by the applicable regulation, ruling, or procedure.

**6a.** The valuation for a plan year may be as of any date in the year, including the first and last. Valuations must be performed within the period specified by ERISA section 103(d) and Code section 412(c)(9).

**6b.** This item does not apply to the first plan year to which the minimum funding standards apply.

**6c.** Enter the current value of total assets as of the beginning of the plan year, as shown on Form 5500 or Form 5500-C.

**6d and e.** All plans regardless of the number of participants must provide the information indicated in accordance with these instructions. The term "accrued benefit" means the individual's accrued benefit determined under the plan as required by ERISA section 204.

With the exception of the interest rate, each actuarial assumption used in calculating the present value of accrued benefits reported in item 12 should reflect the best estimate of the plan's future experience solely with respect to that assumption applicable to the plan on an ongoing (rather than a terminating) basis. The actuary shall take into account rates of early retirement and the plan's early retirement provisions as they relate to the accrued benefits, where these would significantly affect the results. No salary scale projections should be used in computing the present values. See instructions for item 12 for further requirements concerning actuarial assumptions.

The interest rate used to compute the present values must be within 10 percent of the weighted average of the 30-year Treasury bond rate as published by the IRS.

**Note:** *The above values do not necessarily represent the current liability of the plan as that term is defined in Code section 412(l)(7). Published guidance will specify what benefits are taken into account in determining current liability.*

The present value of accrued benefits for both d and e shall be increased by the present value of any subsidized early retirement benefits, disability benefits, and death benefits which are related to the accrued benefit. The present value of accrued benefits should also be increased by the present value of a cost-of-living clause if such a clause is currently part of the benefit formula. The present value should not include the value of unpredictable contingent event benefits (e.g., plant shutdown benefits) unless the event has occurred.

Omit from items 6d and e liabilities fully funded by annuity and insurance contracts other than any contract funds not allocated to individuals.

**6d.** Include the present value of all vested accrued benefits that are vested as of the beginning of the plan year. Item 6d(i) should include the present value of vested benefits for all retired participants; 6d(ii) should include the present value of vested benefits for other participants; and 6d(iii) is the sum of 6d(i) and (ii). Normally, withdrawal rates would not be used in these calculations.

**6e.** Include the present value of the excess of the accrued benefits over the vested benefits included in 6d.

**7.** Show all employer and employee contributions for the plan year, and employer contributions made not later than 2½ months (or such later date allowed under Code section 412(c)(10) and ERISA section 302(c)(10)) after the end of the plan year. Show only contributions actually made to the plan by the date Schedule B is signed.

**8a.** If the attained age normal, aggregate, or frozen initial liability or other method that does not develop an accrued liability is used, enter "N/A."

**8b.** Enter the value of assets determined in accordance with Code section 412(c)(2) or ERISA section 302(c)(2).

**8d(ii).** For the methods to be used to determine the shortfall gain (loss) see the regulations under Code section 412.

**8e.** Insert amount from item 9m. However, if the alternative method is elected and item 10h is smaller than item 9m, enter the amount from item 10h. Multiemployer plans in reorganization, see instruction 4b. File Form 5330 with the IRS to pay 5% excise tax on the funding deficiency.

**9.** Under the shortfall method of funding, the *normal cost* in the funding standard account is the charge per unit of production (or per unit of service) multiplied by the actual number of units of production (or units of service) which occurred during the plan year. Each amortization installment in the funding standard account is similarly calculated.

**9b.** If no valuation was made for the current year, enter the normal cost calculated in the most recent actuarial valuation or the estimated cost for the current year based on such valuation. If amounts are not as of the date of the most recent actuarial valuation, indicate in the Statement of Actuarial Assumptions how the amounts shown were determined.

**9c and h.** The outstanding balance may be as of any day in this plan year.

**9j.** Report a credit for a waived funding deficiency (Code section 412(d)(3)(C)) or a full funding credit (Code section 412(c)(6)) as a credit to the funding standard account. If a waiver of a funding deficiency is pending, it is not to be reported as a credit but as a funding deficiency. If the waiver is granted, an amended Schedule B (Form 5500) should be filed to report it.

**10a.** If the entry age normal cost method was not used to determine the entries in item 9, the alternative minimum funding standard account may not be used.

**10d.** The value of accrued benefits should exclude benefits accrued for the current plan year. The market value of assets should be reduced by the amount of any contributions for the current plan year.

**11.** Enter only the primary method used. If the plan uses one actuarial cost method in one year as the basis of establishing an accrued liability for use under the frozen initial liability method in subsequent years, answer as if the frozen initial liability method were used in all years.

For a modified individual level premium method for which actuarial gains and losses are spread as a part of future normal cost, check box g and describe the cost method. For the shortfall funding method, check the appropriate box for the underlying actuarial cost method used to determine the annual computation charge.

**12.** If gender-based statistics are used in developing plan costs, enter such rates where appropriate in item 12. Note that requests for gender-based cost information do not suggest that gender-based benefits are legal. Complete all blanks. Enter "N/A" if not applicable. If the assumptions listed under columns A and B differ, explain, in an attached Statement of Actuarial Assumptions, the reasons for the differences.

If unisex tables are used, enter the values in both the male and female columns.

Attach a statement of actuarial assumptions used (if not fully described by item 12), actuarial methods used to calculate (i) the figures shown in items 6, 8, 9, 10 (if not fully described by item 11), and (ii) the value of assets shown on line 8b. The statement is to include a summary of the principal eligibility and benefit provisions upon which the valuation was based, an identification of benefits not included in the calculation, and other facts, such as any change in actuarial assumptions or cost methods and justifications for any such change. Include also such other information, if any, needed to fully and fairly disclose the actuarial position of the plan.

**12a.** Check "Yes" if the rates in the contract were used (e.g., purchase rates at retirement).

**12b.** Enter code as follows:

| Table | Code |
|---|---|
| 1937 Standard Annuity | 1 |
| a-1949 Table | 2 |
| Progressive Annuity Table | 3 |
| 1951 Group Annuity | 4 |
| 1971 Group Annuity Mortality | 5 |
| 1971 Individual Annuity Mortality | 6 |
| UP-1984 | 7 |
| 1983 I.A.M. | 8 |
| 1983 G.A.M. | 9 |
| Other | 10 |
| None | 11 |

Where an indicated table consists of separate tables for males and females, add F to the female table (e.g., 4F). When a projection is used with a table, follow the code with "P" and the year of projection (omit year if the projection is unrelated to a single calendar year); the identity of the projection scale should be omitted. When an age setback or setforward is used, indicate with "–" or "+" and the years. For example, if for females the 1951 Group Annuity Table with Projection C to 1971 is used with a 5-year setback, enter "4P71-5." If the table is not one of those listed, enter "10" with no further notation. If the valuation assumes a maturity value to provide the post-retirement income without separately identifying the mortality, interest and expense elements under "post-retirement," enter on 12b the value of $1.00 of monthly pension beginning at the age shown on 12d, assuming the normal form of annuity for an unmarried person; in this case enter "N/A" on 12c and 12e.

**12c.** For column A enter the interest rate that is within ten percent of the weighted average of the 30-year Treasury Bond rate used to determine the present value in item 6d. For column B enter assumption as to expected interest rate (investment return). If the assumed rate varies with the year, enter the weighted average of the assumed rate for 20 years following the valuation date.

**12d.** If each participant is assumed to retire at his/her normal retirement age, enter the age specified in the plan as normal retirement age; do not enter "NRA." Otherwise, enter the assumed retirement age. If the valuation uses rates of retirement at various ages, enter the estimated average whole age at which participants are assumed to retire.

**12e.** If there is no expense loading, enter "-0-". If there is a single expense loading not separately identified as pre-retirement or post-retirement, enter it under pre-retirement and enter "N/A" under post-retirement. Where expenses are assumed other than as a percent of plan costs or liabilities, enter the assumed expense as a percent of the calculated normal cost.

**12f.** Enter rates to nearest 0.1%. If select and ultimate rates which vary with both age and years of service are used, enter rates for a new participant at the age shown and enter "S" before the rate.

**12g.** Enter salary ratio for the age indicated to the nearest 1%.

**12h.** Enter the rate of return on the actuarial value of plan assets for the one year period ending on the valuation date. For this purpose, the rate of return should be the dollar rate of return using the formula 2I/(A+B–i), where i is the investment return under this asset valuation method used for the plan, A is the actuarial value of the assets one year ago, and B is the actuarial value of the assets on the current valuation date.

## Part I Instructions—Service Provider Information

### A. General Instructions

Form 5500 filers complete Part I to report all persons receiving, directly or indirectly, $5,000 or more in compensation for all services rendered to the plan during the plan year except:

(1) employees of the plan who were paid less than $1,000 for each month of employment during the plan year,

(2) employees of the plan sponsor who received no direct or indirect compensation from the plan,

(3) employees of a business entity (e.g., corporation, partnership, etc.), other than the plan sponsor, which provided service to the plan, or

(4) persons whose only compensation in relation to the plan consists of insurance fees and commissions listed in Schedule A (Form 5500).

Generally, indirect compensation would not include compensation which would have been received had the service not been rendered and which cannot be reasonably allocated to the services performed. Indirect compensation includes, among other things, the payment of "finders' fees" or other fees and commissions by a service provider to an independent agent or employee for a transaction or service involving the plan.

### B. Specific Instructions

On line (1), include any individual, trade or business, whether incorporated or unincorporated, responsible for managing the clerical operations (e.g., handling membership rosters, claims payments, maintaining books and records) of the plan on a contractual basis that is required to be reported in Part I except for salaried staff or employees of the plan or banks or insurance carriers.

On the remaining lines (2 through 40) and additional Schedules C (Form 5500) if needed, list all other persons required to be reported in Part I who provided services to the plan in the order of compensation received, starting with the most highly compensated and ending with the lowest compensated.

**Column (b).** An EIN must be entered in column (b). If an individual is listed in column (a), the EIN to be entered in column (b) should be the EIN of the individual's employer.

**Column (c).** For example, employee, trustee account, attorney, etc.

**Column (d).** For example, employee, vice-president, union president, etc.

**Columns (e) and (f).**

Include the plan's share of amounts of compensation for services paid during the year to a master trust or 103-12 IE trustee, and to persons providing services to the master trust or 103-12 IE, if such compensation is not subtracted from the gross income of the master trust or 103-12 IE in determining the net investment gain (or loss). Amounts of compensation subtracted from gross income in determining the net investment gain (or loss) of the master trust or 103-12 IE must be reported as part of the report of the master trust or 103-12 IE filed with DOL.

Include brokerage commissions or fees only if the broker is granted some discretion (see 29 CFR 2510.3-21, paragraph (d), regarding "discretion"). Include all other commissions and fees on investments, whether or not they are capitalized as investment costs.

**Column (g).** From the list below, select the code that best describes the nature of services provided to the plan, and enter the number. If more than one service was provided, enter only the code of the primary service.

| Code | Service |
|---|---|
| 10 | Accounting (including auditing) |
| 11 | Actuarial |
| 13 | Administration |
| 14 | Brokerage (real estate) |
| 15 | Brokerage (stocks, bonds, commodities) |
| 16 | Computing, tabulating, ADP, etc. |
| 17 | Consulting (general) |
| 18 | Custodial (securities) |
| 19 | Insurance agents and brokers |
| 20 | Investment advisory |
| 21 | Investment management |
| 22 | Legal |
| 23 | Printing and duplicating |
| 24 | Recordkeeping |
| 25 | Trustee (individual) |
| 26 | Trustee (corporate) |
| 27 | Pension insurance adviser |
| 28 | Valuation services (appraisals, asset valuations, etc.) |
| 29 | Investment evaluations |
| 99 | Other (specify) |

## Part III Instructions.—Termination Information

Explain the reason for the change in appointment and provide the name, EIN, position, address, and telephone number of the person(s) listed in item 28d of Form 5500 whose appointment has been terminated. List them in the order of the boxes which are checked in item 28d, i.e., accountants first, enrolled actuaries next, etc. Include in this explanation a description of any disagreement for which item 28e of the Form 5500 is marked "Yes," even if the disagreement was resolved prior to the termination. If an individual is listed, the EIN to be entered should be the EIN of the individual's employer.

Additional Schedules C (Form 5500) may be used, if needed, to list additional persons.

Date ▶ Signature of fiduciary ▶

## Instructions

*(Section references are to the Internal Revenue Code.)*

### A. Purpose of Form

You may use this schedule to satisfy the requirements under section 6033(a) for an annual information return from every section 401(a) organization exempt from tax under section 501(a).

The filing of this form will also start the running of the statute of limitations under section 6501(a) for any trust described in section 401(a) which is exempt from tax under section 501(a).

### B. Who May File

(1) Every trustee of a trust described in section 401(a) which was created as part of an employee benefit plan.

(2) Every custodian of a custodial account described in section 401(f).

### C. How To File

File Schedule P (Form 5500) for the trust year ending with or within any participating plan's plan year as an attachment to the Form 5500, 5500-C, 5500-R, or 5500-EZ filed by the plan for that plan year.

Schedule P (Form 5500) may be filed only as an attachment to a Form 5500, 5500-C, 5500-R, or 5500-EZ. A separately filed Schedule P (Form 5500) will not be accepted.

If the trust or custodial account is used by more than one plan, file only one Schedule P (Form 5500). It must be filed as an attachment to one of the participating plan's returns/reports. If a plan uses more than one trust or custodial account for its funds, file one Schedule P (Form 5500) for each trust or custodial account.

### D. Signature

The fiduciary (trustee or custodian) must sign this schedule. If there is more than one fiduciary, one of them, authorized by the others, may sign.

### E. Other Returns and Forms That May Be Required

**(1) Form 990-T.**—For trusts described in section 401(a), a tax is imposed on income derived from business that is unrelated to the purpose for which the trust received a tax exemption. Report such income and tax on **Form 990-T,** Exempt Organization Business Income Tax Return. (See sections 511 through 514 and related regulations.)

**(2) Forms W-2P and 1099-R.**—If you made payments or distributions to individual beneficiaries of a plan, report these payments on Forms W-2P or 1099-R. (See sections 6041 and 6047 and related regulations.)

**(3) Forms 941 or 941E.**—If you made payments of distributions to individual beneficiaries of a plan, you are required to withhold income tax from those payments unless the payee elects not to have the tax withheld. Report this withholding on Form 941 or 941E. (See Forms 941 or 941E and Circular E, Publication 15.)

## General Instructions

**Note:** *Please type or print all information and submit original copy only.*

**Who Must File.**—The plan administrator must file this form for any plan year for which a separated plan participant is reported under "When To Report a Separated Participant" below.

**What To File.**—File this schedule and complete all items. If you need more space, use additional copies of Schedule SSA, completing only items 1, 3, 5, and 6 of the additional copies.

A machine-generated computer listing showing the information required in items 5 and 6 may be submitted in lieu of completing items 5 and 6 on the schedule. Complete items 1 through 4 on Schedule SSA and enter in items 5 and 6 a statement that a list is attached. On each page of the computer list, enter the name of the sponsor, the EIN, the plan name, and the plan number. The list must be in the same format as items 5 and 6.

**How To File.**—File as an attachment to Form 5500, 5500-C, or 5500-R.

**When To Report a Separated Participant.**—

In general, *for a plan to which only one employer contributes*, a participant must be reported on Schedule SSA if:

(1) The participant separates from service covered by the plan in a plan year, and

(2) The participant is entitled to a deferred vested benefit under the plan.

The separated part - pant must be reported no later than on the Schedule SSA filed for the plan year following the plan year in which separation occurred. The participant may be reported earlier (i.e., on the Schedule SSA filed for the plan year in which separation occurred). Once separated participants have been reported on a Schedule SSA they should not be reported on a subsequent year's Schedule SSA.

However, a participant is not required to be reported on Schedule SSA if, before the date the Schedule SSA is required to be filed (including any extension of time for filing), the participant:

(1) Is paid some or all of the deferred vested retirement benefit,

(2) Returns to service covered by the plan, or

(3) Forfeits all of the deferred vested retirement benefit.

In general, *for a plan to which more than one employer contributes*, a participant must be reported on Schedule SSA if:

(1) The participant incurs two successive one-year breaks in service (as defined in the plan for vesting purposes) in service computation periods, and

(2) The participant is (or may be) entitled to a deferred vested benefit under the plan.

The participant must be reported no later than on the Schedule SSA filed for the plan year in which the participant completed the second of the two consecutive one-year breaks in service. The participant may be reported earlier (i.e., on the Schedule SSA filed for the plan year in which he or she separated from service or completed the first one-year break in service).

However, a participant is not required to be reported on Schedule SSA if, before the date the Schedule SSA is required to be filed (including any extension of time for filing), the participant:

(1) Is paid some or all of the deferred vested retirement benefit,

(2) Accrues additional retirement benefits under the plan, or

(3) Forfeits all of the deferred vested retirement benefit.

**Cessation of Payment of Benefits.**—As described above in "When To Report a Separated Participant," a participant is not required to be reported on Schedule SSA if, before the date the Schedule SSA is required to be filed, some of the deferred vested benefit to which the participant is entitled is paid to the participant. If payment of the deferred vested benefit ceases before all of the benefit is paid to the participant, the benefit to which the participant remains entitled must be reported on the Schedule SSA filed for the plan year following the last plan year within which any of the benefit was paid to the participant. However, a participant is not required to be reported on Schedule SSA on account of a cessation of payment of benefits if, before the date the schedule is required to be filed (including any extension of time for filing), the participant:

(1) Returns to service covered by the plan,

(2) Accrues additional retirement benefits under the plan, or

(3) Forfeits the remaining benefit.

**Separation of a Re-employed Employee.**—The deferred vested benefit reported on the current Schedule SSA for a re-employed employee who is again separated from service must include only the benefit not previously reported in or for prior years. Generally, the benefit to be shown on the current filing will be the benefit earned during the re-employment period.

**Caution:** *A penalty may be assessed if Schedule SSA (Form 5500) is not timely filed.*

## Specific Instructions

4. Check "Yes" if you have complied with the requirements of Code section 6057(e). The notification to each participant must include the information set forth on this schedule and the information with respect to any contributions made by the participant and not withdrawn by the end of the plan year. Any benefits that are forfeitable if the participant dies before a certain date must be shown on the statement.

5(a). Please be careful to enter the exact social security number of each participant listed.

If the participant is a foreign national employed outside of the United States who does not have a social security number, enter the participant's nationality.

5(b). Enter each participant's name exactly as it appears on the participant's social security card or the employer's payroll records for purposes of reporting to the Social Security Administration.

5(c). From the following list, select the code that describes the type of annuity that will be provided for the participant. The type of annuity to be entered is the type that normally accrues under the plan at the time of the participant's separation from service covered by the plan (or for a plan to which more than one employer contributes at the time the participant incurs the second consecutive one-year break in service under the plan).

A A single sum
B Annuity payable over fixed number of years
C Life annuity
D Life annuity with period certain
E Cash refund life annuity
F Modified cash refund life annuity
G Joint and last survivor life annuity
M Other

5(d). From the following list, select the code that describes the benefit payment frequency during a 12-month period.

A Lump sum
B Annually
C Semiannually
D Quarterly
E Monthly
M Other

5(e). For a defined benefit plan, enter the amount of the periodic payment that a participant would normally be entitled to receive under 5(c), commencing at normal retirement age. However, if it is more expedient to show the amount of periodic payment the participant would be entitled to receive at early retirement date, enter that amount.

*For a plan to which more than one employer contributes*, if the amount of the periodic payment cannot be accurately determined because the plan administrator does not maintain complete records of covered service, enter an estimated amount and add the letter "X" in column 5(c) in addition to the annuity code to indicate that it is an estimate. If, from records maintained by the plan administrator, it cannot be determined whether the participant is entitled to any deferred vested benefit, but there is reason to believe he or she may be entitled, leave column 5(e) blank and enter "Y" in column 5(c) in addition to the annuity code.

5(f). For a defined contribution plan, if the plan states that a participant's share of the fund will be determined on the basis of units, enter the number of units credited to the participant.

If, under the plan, participation is determined on the basis of shares of stock of the employer, enter the number of shares and add the letter "S" to indicate shares. A number without the "S" will be interpreted to mean units.

5(g). For defined contribution plans, enter the value of the participant's account at the time of separation.

6. If, after a participant has been reported on Schedule SSA, the part - pant:

(1) Is paid some or all of the deferred vested retirement benefit, or

(2) forfeits all of the deferred vested retirement benefit,

the plan administrator may, at its option, request that the participant's deferred vested benefit be deleted from Social Security Administration's records. Information reported in item 6, columns (a) through (g), is to be the exact information previously reported on Schedule SSA for the participant.

If this option is chosen because the participant is paid some of the deferred vested benefit, the reporting requirements described in "Cessation of Payment of Benefits" above apply if payment of the benefit ceases before all of the benefit is paid to the participant.

Also, if a person was erroneously reported on a prior Schedule SSA, use item 6 to delete this information from Social Security Administration's records.

**Signature.**—This form must be signed by the plan administrator. If more than one Schedule SSA is filed for one plan, only page one should be signed.

Office of Elementary and Secondary Education

34 CFR Parts 76, 77, and 298

Federal, State, and Local Partnership for Educational Improvement; Notice of Proposed Rulemaking

VOL 54 ISS 39 MR 1 1989 UMI

**DEPARTMENT OF EDUCATION**

**Office of Elementary and Secondary Education**

**34 CFR Parts 76, 77, and 298**

**Federal, State, and Local Partnership for Educational Improvement**

**AGENCY:** Department of Education.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Secretary proposes to issue regulations in Part 298 to implement the program entitled "Federal, State, and Local Partnership for Educational Improvement" in Chapter 2 of Title I of the Elementary and Secondary Education Act of 1965, as amended. This program replaces Chapter 2 of the Education Consolidation and Improvement Act of 1981. The Secretary also proposes to make certain provisions of the Education Department General Administrative Regulations (EDGAR) applicable to these proposed regulations. Accordingly, the Secretary proposes to make conforming changes to several sections in Parts 76 and 77.

**DATES:** Comments must be received on or before May 1, 1989.

**ADDRESSES:** All comments concerning these proposed regulations should be addressed to Alicia Coro, Director, School Improvement Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue SW., Mail Stop 6329, Washington, DC 20202.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

**FOR FURTHER INFORMATION CONTACT:** Zulla Toney, Division of Formula Grants, School Improvement Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue SW. (Room 2040), Washington, DC 20202, (202) 732-4156.

**SUPPLEMENTARY INFORMATION:** On April 28, 1988, the President signed into law the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988, Pub. L. 100-297. Title I of that act amends the Elementary and Secondary Education Act of 1965 (ESEA) to include a number of new and reauthorized Federal education programs. Chapter 2 of Title I of the ESEA, entitled "Federal, State, and Local Partnership for Educational Improvement," reauthorizes Chapter 2 of the Education Consolidation and Improvement Act of 1981 (ECIA).

Chapter 2 of the ECIA consolidated over forty Federal education programs into a single authorization of grants to States for the same purposes as the antecedent programs but to be used in accordance with the educational needs and priorities of State and local educational agencies as determined by those agencies. State educational agencies (SEAs) have the basic responsibility for the administration of Chapter 2 funds. Responsibility for the design and implementation of Chapter 2 programs, however, rests mainly with local educational agencies (LEAs), school superintendents and principals, and classroom teachers and supporting personnel.

In reauthorizing Chapter 2, Congress recognized that the program "has been successful in achieving the goals of increasing local flexibility, reducing administrative burden, providing services for private school students, encouraging innovation, and contributing to the improvement of elementary and secondary education programs." 20 U.S.C. 2911(a). As a result, Congress retained the basic framework of Chapter 2, which places decisionmaking at the State and local levels. At the same time, however, Congress responded to criticism that Chapter 2 was unfocused, provided insufficient accountability, and sometimes resulted in funds being used for general education purposes. Accordingly, Congress sought to make Chapter 2 "a better vehicle for school improvement by recasting the uses of funds in general terms, but with an identifiable theme of improving quality and promoting innovation." H.R. Rept. 95, 100th Cong., 1st Sess. 50 (1987). Specifically, Congress identified six broad purposes for which Chapter 2 funds must now be targeted: programs for at-risk students; programs to acquire and use instructional materials to improve the quality of instruction; innovative programs for schoolwide improvements, including effective schools programs; programs of training and professional development; programs to enhance personal excellence of students and student achievement; and other innovative projects to enhance the educational program and climate of the school. Among these areas, however, State and local educational agencies retain the flexibility to decide how to use their Chapter 2 funds.

**Summary of Significant Changes Resulting from Reauthorization Allocation of Chapter 2 Funds to LEAs**

Section 298.7 of the proposed regulations implements a number of changes contained in section 1512 of Chapter 2 concerning how Chapter 2 funds are to be allocated to LEAs. First, an SEA must calculate relative enrollments on the basis of the total number of children enrolled (for the fiscal year preceding the fiscal year in which the calculation is made) in public schools and in private, nonprofit schools that desire that their students participate in Chapter 2 programs. Second, an SEA may provide adjusted allocations for high-cost children only to those LEAs that serve the greatest numbers or prcentages of those children. The SEA may determine, however, which LEAs qualify for adjusted allocations. Third, an SEA may only use the three criteria specified in section 1512(b)(2)(A) to adjust its allocations: children living in areas with high concentrations of low-income families; children from low-income families; and children living in sparsely populated areas. The SEA may decide, however, how these criteria are defined and which criteria to use. The SEA may select one or more of the criteria. In addition, the SEA may continue to determine what percentage of funds is to be allocated on an adjusted basis. In its application to the Secretary, the SEA must include a description of how it adjusted its formula. The Secretary approves the SEA's criteria if the criteria are reasonably calculated to produce an adjusted allocation that reflects the relative needs within the LEAs in the State.

**Targeted Assistance Programs**

Section 298.12 of the proposed regulations implements section 1531 of Chapter 2, which describes six broad categories of programs for which Chapter 2 funds may be used. In reauthorizing Chapter 2, Congress was concerned that Chapter 2 funds not be considered part of the general revenue of an LEA or SEA but, rather, be used to address specific needs that are unmet by State and local expenditures. As a result, Congress sought to enhance the effectiveness of Chapter 2 funds by targeting the use of those funds. As the Senate Report states, "a more targeted definition of permissible use of funds under Chapter 2 will make clear that the goals of Chapter 2 should be consistent with the traditional federal role in education: that of protecting underserved populations and addressing

national priorities, including reform and improvement." S. Rept. 222, 100th Cong., 1st Sess. 25 (1987). Within the broad categories specified in section 1531, however, SEAs and LEAs still have considerable flexibility in deciding what programs would best address their specific educational needs and priorities.

Consistent with section 1531 of the Act, § 298.12(a) requires that Chapter 2 funds be used for targeted assistance *programs*. At both the State and local levels, these programs must be planned in advance. At the State level, for example, a State's applications must contain the planned allocation of funds reserved for the State's use among the targeted assistance programs and must describe the "programs, projects, and activities which are designed to carry out such targeted assistance, together with the reasons for the selection of such programs, projects, and activities." The State advisory committee must review the State's proposed use of funds. An LEA must include similar information in its Chapter 2 application to the SEA, including a description of how its proposed use of Chapter 2 funds will contribute to improving student achievement or improving the quality of education for students. Moreover, the effectiveness of the targeted assistance programs must be measured in accordance with § 298.15.

Section 298.12(b) of the proposed regulations makes clear that, with the exception of using Chapter 2 funds to purchase computer hardware to be used for instructional purposes, the use of Chapter 2 funds to purchase equipment as a program in and of itself is no longer authorized by the Act. Chapter 2 funds, however, may be used to purchase equipment that is used as a part of a targeted assistance program.

**Use of Funds by SEAs**

Section 298.13 of the proposed regulations implements the provisions in section 1521 of Chapter 2 concerning how Chapter 2 funds reserved for State use may be used by SEAs. As indicated in § 298.13(a), section 1521 authorizes three broad categories for using Chapter 2 funds: State administration of Chapter 2 programs; assistance to LEAs with respect to targeted assistance under section 1531; and assistance to LEAs and statewide activities to carry out effective schools programs under sections 1541-1542. Chapter 2 activities at the SEA level must fit into one of these three categories. No longer are "State strengthening" activities allowable merely because they were previously authorized under Part B of Title V of the Elementary and Secondary Education Act of 1965 or section 577(5) of Chapter 2 of the ECIA.

Section 298.13(b) contains two limitations on an SEA's use of Chapter 2 funds. First, an SEA may use no more than 25 percent of the Chapter 2 funds reserved for State use for administration of Chapter 2 programs. Second, an SEA must use at least 20 percent of the Chapter 2 funds reserved for State use in any fiscal year for assistance to LEAs and statewide activities to carry out effective schools programs, unless a waiver is granted.

Section 298.14 of the proposed regulations implements the provisions in sections 1531-1532 of Chapter 2 concerning how Chapter 2 funds may be used by LEAs. In general, § 298.14 provides an LEA broad flexibility in using Chapter 2 funds to support one or more of the targeted assistance programs under § 298.12.

In the case of an LEA that receives additional Chapter 2 funds based on an adjusted allocation under § 298.7(b)(2)(ii), § 298.14(b) describes two options available to the LEA regarding the use of those funds. The LEA may use those funds to provide services to children in public and private, nonprofit schools in accordance with the practice under Chapter 2 of the ECIA—that is, to provide services from the LEA's total allocation that are commensurate with the respective numbers of children within the school district of the LEA, whether in public or private, nonprofit schools, without regard to whether those children generated the additional funds. Under this option, an LEA may not take into account the extent to which children in private schools generated a portion of the LEA's allocation under § 298.7(b)(2)(ii). Rather, the LEA must generally expend equal per pupil amounts for services for public and private school children. However, in accordance with § 298.34(a)(2)(ii), the LEA may take into account differences in the costs per child of meeting the needs of the children to be served and other factors that relate to those expenditures. For example, an LEA may decide to use Chapter 2 funds to meet the remedial reading needs of educationally deprived public school children through small group instruction. If the per pupil costs of providing remedial reading instruction are greater than the per pupil costs of meeting the needs of private school children, established through consultation with private school officials, then the LEA may expend un-equal amounts. Of course, the converse is also allowable. In either case, the services provided to public and private school children must be equitable.

Alternatively, the LEA may use the additional funds it receives to provide services only to children enrolled in schools—both public and private—in which children counted in the adjusted allocation are enrolled. If an LEA elects this second option, the LEA must use all funds received under its adjusted allocation in that manner and must use in each school the amount generated by children counted in the adjusted allocation who are enrolled in that school. However, an LEA is not required to use the additional Chapter 2 funds received under its adjusted allocation to provide services to the children who generated those funds.

**Evaluations and Reports**

Section 298.15 of the proposed regulations implements sections 1522(a)(6) and 1573 of Chapter 2 concerning evaluations and reports. Congress identified the lack of descriptive and evaluative information on how funds were used as one of the shortcomings of Chapter 2 of the ECIA. To remedy this problem and to obtain more uniform accountability, Congress has added several specific evaluation and reporting requirements. As indicated in § 298.15(a), an LEA must report annually to the SEA on the LEA's use of Chapter 2 funds. Further, an SEA is required to submit annually to the Secretary a report covering the use of Chapter 2 funds by the SEA and its LEAs including the types of services provided and the children to whom the services were provided. In addition, in fiscal year 1992, the SEA must evaluate the effectiveness of State and local programs conducted with Chapter 2 funds. The Secretary will work with SEAs to develop nonbinding guidelines for implementing these requirements.

**Participation of Children in Private Schools**

Most provisions to ensure the equitable participation of private school children in programs conducted under Chapter 2 remain the same. Section 298.32(a) of the proposed regulations, however, implements a new provision in section 1512(b)(1) of Chapter 2. This provision makes explicit the practice under Chapter 2 of the ECIA that an LEA must annually contact appropriate officials from private schools within the area served by the LEA to determine whether those officials desire that their students participate in Chapter 2 programs. In addition, the procedures for implementing a bypass have been deleted from these regulations. Instead,

VOL
54
ISS
39
MR
1
1989
UMI

the Secretary has proposed in another document (53 FR 41466, 41491–92 (Oct. 21, 1988)) that bypass procedures be added to 34 CFR Part 76.

### Applicability of EDGAR

In order to provide additional guidance and to ensure that Chapter 2 funds are spent only for authorized program purposes, the Secretary proposes to make certain provisions of the Education Department General Administrative Regulations (EDGAR) applicable to programs under this part. In determining which of those provisions to apply, the Secretary has carefully balanced the need for basic program accountability with the important principle of minimal Federal interference in State and local affairs.

The Secretary does not propose to make Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments) applicable to programs under this part. Rather, the proposed regulations would require States to adopt their own written fiscal and administrative requirements for expending and accounting for all funds received by SEAs and LEAs under this part. These requirements would have to meet three general criteria, set forth in § 298.2(b)(1)(i)–(iii), that are designed to ensure the minimal standards necessary for proper management of Chapter 2 funds. A State may adopt new procedures, or may adopt accountability procedures applicable to the use of its own funds. In the alternative, as indicated in § 298.2(b)(2), a State may adopt the provisions in Part 80 and certain provisions in Part 75 to satisfy this requirement. A State has complete discretion to choose among these alternatives. A State's procedures would not have to be approved by the Department, but would be available for Federal inspection. In the event a State's requirements are determined to be insufficient, the enforcement provisions in Part E of GEPA would apply, including the due process provisions in that part.

In addition, the Secretary proposes to apply only a limited number of provisions from Part 76 (State-Administered Programs). For the most part, the Secretary proposes to apply sections in Part 76 that are statutorily required. For example, because Chapter 2 contains a supplement-not-supplant requirement, the Secretary proposes to apply § 76.563, which requires an SEA or LEA to use a restricted indirect cost rate, computed in accordance with 34 CFR 75.564–75.566, if the SEA or LEA charges indirect costs to Chapter 2. The Secretary believes that a restricted indirect cost rate is necessary to avoid a violation of the supplement-not-supplant requirement and that there are no alternative ways that a State which chooses to use an indirect cost rate could meet the requirement. The Secretary also proposes to apply § 76.707, which defines when an obligation is made under a number of circumstances. This regulation is needed to determine compliance with the carryover provision in section 412(b) of the General Education Provisions Act. The Secretary believes this provision is neither restrictive nor burdensome.

In addition, the Secretary proposes to apply a few sections that are not required by statute but that provide important rights to SEAs and LEAs that would not be available without the regulations. For example, the Secretary proposes to apply §§ 76.703–76.704, which would permit States and subgrantees, respectively, to begin to obligate Chapter 2 funds on the date their applications are submitted in substantially approvable form.

To facilitate review of this proposal regarding the applicability of Part 76 of EDGAR, the Secretary will provide to SEAs, and make available to other interested parties upon request, a mark-up of Part 76 illustrating those sections he proposes to apply. The Secretary also proposes to apply selected definitions in Part 77 (Definitions That Apply to Department Regulations) and the due process procedures in Part 78 (Education Appeal Board). Regulations implementing the new enforcement provisions in Part E of the General Education Provisions Act (GEPA) would also apply when those regulations are promulgated in final. (See the notice of proposed rulemaking published in the Federal Register on December 2, 1988, 53 FR 48886.)

This proposal to make selected provisions of EDGAR applicable to Chapter 2 responds to a need for additional guidance. During the seven years that EDGAR has not been applicable to Chapter 2 of the ECIA, a number of States have incurred audit exceptions concerning fiscal control and fund accountability. Further, SEAs and LEAs have asked the Department numerous questions that are answered by the provisions of EDGAR. Congress identified lack of accountability as one of the primary deficiencies under Chapter 2 of the ECIA. S. Rept. 222, 100th Cong., 1st Sess. 25 (1987)

The Secretary believes that making selected provisions of EDGAR applicable to programs under this part will address the need for better guidance and accountability. Moreover, the Secretary does not believe this action will create additional burden for SEAs and LEAs. The provisions of EDGAR referenced apply to other State-administered education programs. The EDGAR provisions have been recently reviewed with respect to federalism issues and burden reduction, and unduly burdensome requirements have been revised or removed. The Secretary specifically invites comments on § 298.2(a), including comments on whether any specific sections in EDGAR should or should not be applied to Chapter 2.

### Enforcement Procedures

Section 3501 of the Hawkins-Stafford Act amended Part E of GEPA to provide for new enforcement procedures. The amended Part E requires the Secretary to establish an Office of Administrative Law Judges (OALJ) to replace the existing Education Appeal Board and sets out new hearing procedures. 20 U.S.C. 1234–1234i. With the exception of provisions regarding withholding actions and judicial review of those actions, which are superseded by section 1433 and 1434 of the Act (made applicable to Chapter 2 by section 1574(d) of the Act), Part E applies to the Chapter 2 program. As a result, appeals from cost disallowance decisions, received by an SEA on or after October 25, 1988, as well as most other enforcement proceedings under the Chapter 2 program, will be heard by the OALJ. Future proposed regulations implementing Part E will address whether withholding actions under the Chapter 2 program will also be heard by the OALJ. The Education Appeal Board will continue to hear appeals from determinations under the Chapter 2 program received by an SEA before October 25, 1988.

### Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

### Executive Order 12606

The Secretary certifies that these proposed regulations have been reviewed in accordance with Executive Order 12606 and that they do not have a significant negative impact on family formation, maintenance, and general well-being. To the contrary, the program governed by these regulations supports and strengthens the family by providing for systematic consultation with the parents of children attending elementary and secondary schools in the design, planning, and implementation of the program. Moreover, funds under this program may be used to foster parental involvement through such activities as conducting parent workshops, training parents to work with their children at home, and facilitating parent participation in school activities.

### Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. The small entities that would be affected by these proposed regulations are small LEAs receiving Federal funds under this program. However, the regulations would not have a significant economic impact on the small LEAs affected because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

### Paperwork Reduction Act of 1980

Sections 298.5, 298.6, 298.7, 287.15, and 298.22 contain information collection requirements. As required by the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these sections to the Office of Management and Budget (OMB) for its review. (44 U.S.C. 3504(h))

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: James D. Houser.

### Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 2040, 400 Maryland Avenue SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

### List of Subjects in 34 CFR Part 298

Administrative practice and procedure, education, Elementary and secondary Education, Grant programs—education, Private schools, Reporting and recordkeeping requirements, State-administered programs.

Dated: February 24, 1989.

**Lauro F. Cavazos,**

*Secretary of Education.*

(Catalog of Federal Domestic Assistance Number 84.151, Federal, State, and Local Partnership of Educational Improvement)

The Secretary proposes to amend Parts 76 and 77 and revise 298 of Title 34 of the Code of Federal Regulations as follows:

1. Part 298 is revised to read as follows:

## PART 298—FEDERAL, STATE, AND LOCAL PARTNERSHIP FOR EDUCATIONAL IMPROVEMENT

### Subpart A—How a State or Local Educational Agency Obtains Funds

Sec.
298.1 Purpose.
298.2 Applicable regulations.
298.3 Definitions.
298.4 State advisory committee.
298.5 State applications.
298.6 LEA applications.
298.7 Allocation of Chapter 2 funds to LEAs.
298.8 Reallocation.
298.9–298.10 [Reserved]

### Subpart B—Project Requirements that a State or Local Educational Agency Must Meet

298.11 General responsibilities of State and local educational agencies.
298.12 Targeted assistance programs.
298.13 Use of funds by SEAs.
298.14 Use of funds by LEAs.
298.15 Evaluations and reports.
298.16–298.20 [Reserved]

### Subpart C—Fiscal Requirements that a State or Local Educational Agency Must Meet

298.21 Maintenance of effort.
298.22 Waiver of the maintenance of effort requirement.
298.23 Supplement-not-supplant.
298.24–298.30 [Reserved]

### Subpart D—How Children Enrolled in Private Schools Participate

298.31 Responsibility of SEAs and LEAs.
298.32 Consultation with private school officials.
298.33 Needs, number of children, and types of services.
298.34 Factors used in determining equitable participation.
298.35 Funds not to benefit a private school.
298.36 Equipment and supplies.
298.37 Construction.
298.38 Bypass.
298.39–298.40 [Reserved]

(Authority: 20 U.S.C. 2911–2952, 2971–2976, unless otherwise noted)

### Subpart A—How a State or Local Educational Agency Obtains Funds

#### § 298.1 Purpose.

Under the Federal, State, or Local Partnership for Educational Improvement program (referred to in this part as the Chapter 2 program), the Secretary provides Federal financial assistance to State and local educational agencies to—

(a) Provide the initial funding to implement promising educational programs that can be supported with State and local funds after those programs have been demonstrated to be effective;

(b) Provide a continuing source of innovation, educational improvement, and support for library and instructional materials;

(c) Meet the special educational needs of at-risk and high-cost students;

(d) Enhance the quality of teaching and learning through initiating and expanding effective schools programs; and

(e) Meet their educational needs and priorities for targeted assistance.

(Authority: 20 U.S.C. 2911(b))

#### § 298.2 Applicable regulations.

(a) The following regulations apply to the Chapter 2 program:

(1) The Education Department General Administrative Regulations (EDGAR) as follows:

(i) 34 CFR Part 76 (State-Administered Programs) as follows:

(A) Subpart A (General).

(B) Sections 76.125–76.137 (Consolidated Grant Applications for Insular Areas).

(C) Section 76.401 (Disapproval of an application—opportunity for a hearing).

(D) Subpart F (What Conditions Must Be Met by the State and Its Subgrantees?) as follows:

(*1*) Section 76.500 (Federal statutes and regulations on nondiscrimination).

(*2*) Section 76.532 (Use of funds for religion prohibited).

(*3*) Section 76.533 (Acquisition of real property; construction).

(*4*) Section 76.534 (Use of tuition and fees restricted).

(*5*) Section 76.563 (Restricted indirect cost rate—programs covered).

(*6*) Section 76.592 (Federal evaluation—satisfying requirement for State or subgrantee evaluation).

(*7*) 34 CFR 75.601–75.602, 75.609–75.611, 75.613, and 75.616–75.617 concerning construction, incorporated by reference in § 76.600 (Where to find construction regulations).

BEST COPY AVAILABLE

VOL 54 ISS 39 MR 1 1989 UMI

(d) Section 76.662 (Treatment of animals).

(E) Subpart G (What Are the Administrative Responsibilities of the State and Its Subgrantees?) as follows:

(1) Section 76.703 (When a State may begin to obligate funds).

(2) Section 76.704 (When certain subgrantees may begin to obligate funds).

(3) Section 76.705 (Funds may be obligated during a "carryover period").

(4) Section 76.706 (Obligations made during a carryover period are subject to current statutes, regulations, and applications).

(5) Section 76.707 (When obligations are made).

(6) Section 76.730 (Records related to grant funds).

(7) Section 76.734 (Record retention period).

(8) Section 76.740 (Protection of and accessibility to student records).

(9) Section 76.760 (More than one program may assist a single activity).

(10) Section 76.783 (State educational agency action—subgrantee's opportunity for a hearing).

(F) Section 76.901 (Education Appeal Board).

(ii) 34 CFR Part 77 (Definitions that Apply to Department Regulations).

(iii) 34 CFR Part 78 (Education Appeal Board).

(2) The regulations in this Part 298.

(b)(1) A State shall formally adopt fiscal and administrative requirements for expending and accounting for all funds received by SEAs and LEAs under this part. These requirements must be available for Federal inspection and must—

(i) Be sufficiently specific to ensure that funds received under this part are used in compliance with all applicable statutory and regulatory provisions;

(ii) Ensure that funds received under this part are only spent for reasonable and necessary costs of operating programs under this part; and

(iii) Ensure that funds received under this part are not used for general expenses required to carry out other responsibilities of State or local governments.

(2) A State may satisfy this requirement by adopting the provisions in 34 CFR Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments) and in 34 CFR 75.603–75.606, 75.612, and 75.614–75.615 (concerning construction).

(Authority: 20 U.S.C. 2911–2962, 2971–2976)

**§ 298.3 Definitions.**

(a) *Definitions in the Elementary and Secondary Education Act of 1965.* The following terms used in this part are defined in section 1471 of the Act: Construction, Elementary school, Equipment, Free public education, Local educational agency (LEA), Parent, Pupil services, Pupil services personnel, School facilities, Secondary school, Secretary, State, State educational agency (SEA).

(b) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1: Application, EDGAR, Fiscal year, Grant, Minor remodeling, Nonprofit, Private, Public.

(c) *Other definitions.* The following definitions also apply to this part:

"Act" means the Elementary and Secondary Education Act of 1965, as amended (ESEA).

"Chapter 2" means Chapter 2 of Title I of the Act. "Educational personnel" includes, but is not limited to, teachers, librarians, school counselors and other pupil services personnel, and administrators and school board members.

(Authority: 20 U.S.C. 2891, 2911–2962, 2971–2976)

**§ 298.4 State advisory committee.**

(a) Any State that desires to receive a grant under this part shall establish an advisory committee that meets the requirements in section 1522(a)(2) of the Act.

(b) An existing organization, including a State board of education, may be the advisory committee for the purpose of paragraph (a) of this section if the organization—

(1) Is not the SEA under State law;

(2) Is appointed by the Governor to be the advisory committee; and

(3) Meets the representation requirements of section 1522(a)(2) of the Act.

(c) The State advisory committee advises the SEA on—

(1) The allocation among targeted programs under § 298.12 of funds reserved for State use under section 1512(a) of the Act;

(2) The formula for the allocation of funds to LEAs; and

(3) The planning, development, support, implementation, and evaluation of State programs assisted under this part.

(Authority: 20 U.S.C. 2932(a)(2))

**§ 298.5 State applications.**

(a)(1) Any State that desires to receive a grant under this part shall submit an application to the Secretary that meets the requirements in section 1522 of the Act.

(2) The application may be submitted in any form that the State determines is appropriate.

(b)(1) A State shall file its Chapter 2 application for a period not to exceed three years.

(2) If the State that submits an application covering more than one year makes any substantial changes in its application, the State shall—

(i) File a new application; or

(ii) Annually amend its current application to reflect those changes.

(Authority: 20 U.S.C. 2932)

**§ 298.6 LEA applications.**

(a) An LEA may receive its allocation of funds under this part of any year for which—

(1) The LEA has an application on file with the SEA; and

(2) The SEA has certified that the application meets the requirements in section 1533(a) of the Act.

(b)(1) An LEA shall file its application for a period not to exceed three years.

(2) If an LEA that submits an application covering more than one year makes any substantial changes in its application, the LEA shall—

(i) File a new application; or

(ii) Annually amend its current application to reflect those changes.

(c) In addition to the other requirements in section 1533(a) of the Act, an LEA's application must provide for systematic consultation, in the allocation of funds for programs authorized by Chapter 2 and in the design, planning, and implementation of those programs, with—

(1) Parents of children attending elementary and secondary schools in the area served by the LEA;

(2) Teachers and administrative personnel in those schools; and

(3) Other groups involved in the implementation of Chapter 2 (such as librarians, school counselors, and other pupil services personnel) as the LEA deems appropriate.

(d) An LEA may apply for Chapter 2 funds by itself or with a consortium of LEAs.

(Authority: 20 U.S.C. 2943)

**§ 298.7 Allocation of Chapter 2 funds to LEAs.**

(a) An SEA shall distribute to each LEA that has submitted an application as required in § 298.6 the amount of its allocation as determined under paragraph (b) of this section.

(b)(1) From the funds made available to an SEA each year under Chapter 2, the SEA shall distribute not less than 80 percent to LEAs within the State according to the relative enrollments in public and private, nonprofit schools within the school districts of those agencies.

(2) The SEA shall—

(i) Calculate relative enrollments within each LEA on the basis of the total number of children enrolled for the fiscal year preceding the fiscal year in which the determination is made in—

(A) Public schools in the LEA; and

(B) Private, nonprofit schools in the LEA that desire that their students participate in Chapter 2 programs; and

(ii) Adjust those relative enrollments, in accordance with criteria approved by the Secretary under paragraph (d) of this section, to provide higher per pupil allocations only to LEAs that serve the greatest numbers or percentages of—

(A) Children living in areas with high concentrations of low-income families;

(B) Children from low-income families; or

(C) Children living in sparsely populated areas.

(c) The State shall include in the application under § 298.5 the following information concerning adjustments under paragraph (b)(2)(ii) of this section:

(1) How the State adjusted its formula.

(2) How children under paragraph (b)(2)(ii) of this section are defined.

(3) The basis on which the State determined which LEAs serve the greatest numbers or percentages of the children described in paragraph (b)(2)(ii) of this section.

(4) The percentage of the funds for LEAs that the State proposes to allot on an adjusted basis.

(d) The Secretary reviews and approves the State's criteria for adjusting allocations to LEAs if the criteria are reasonably calculated to produce an adjusted allocation that reflects the relative needs within the State's LEAs based on the factors contained in paragraph (b)(2)(ii) of this section.

(Authority: 20 U.S.C. 2922)

**§ 298.8 Reallocation.**

(a) An SEA may reallocate to other LEAs Chapter 2 funds—

(1) From an LEA that—

(i) Does not participate in the Chapter 2 program; or

(ii) Has Chapter 2 funds that exceed the amount required to—

(A) Operate its Chapter 2 projects during the current fiscal year in accordance with its approved application; and

(B) Provide a prudent and justifiable reserve of Chapter 2 funds for operating its Chapter 2 projects effectively during the next fiscal year; or

(2) That are recovered by the State based on a determination by the State that the LEA has failed to spend Chapter 2 funds in accordance with applicable law.

(b) A reallocation of funds under this section—

(1) May be made only during the fiscal year for which the funds were appropriated or during the succeeding fiscal year;

(2) Must be made in accordance with the purposes of Chapter 2; and

(3) Must be spent in accordance with the requirements in Chapter 2 and the regulations in this part.

(Authority: 20 U.S.C. 2922)

**§§ 298.9–298.10 [Reserved]**

## Subpart B—Project Requirements That a State or Local Educational Agency Must Meet

**§ 298.11 General responsibilities of State and local educational agencies.**

(a) *State educational agencies.* (1) (i) Except as provided in paragraph (a) (1) (ii) of this section, an SEA has the basic responsibility for the administration and supervision of programs assisted with Chapter 2 funds. This responsibility must be carried out with a minimum of paperwork.

(ii) Apart from providing technical and advisory assistance and monitoring compliance with Chapter 2, an SEA may not exercise any influence in the decisionmaking processes of an LEA concerning the expenditures described in the LEA's application.

(2) To carry out its responsibilities, an SEA may, in accordance with State law, issue rules, regulations, or policies relating to the administration and operation of programs funded under this part provided that those rules, regulations, or policies do not conflict with the provisions of—

(i) Chapter 2;

(ii) The regulations in this part, including the discretion granted to LEAs under paragraph (b) of this section; or

(iii) Other applicable Federal statutes and regulations.

(b) *Local educational agencies.* (1) An LEA has complete discretion, subject only to the limitations and requirements of Chapter 2, in determining how funds the agency receives under section 1512(a) of the Act are distributed among the areas of targeted assistance in accordance with the LEA's Chapter 2 application.

(2) In exercising this discretion, the LEA shall ensure that each expenditure of Chapter 2 funds—

(i) Carries out the purposes of Chapter 2; and

(ii) Meets the educational needs within the schools of that LEA.

(Authority: 20 U.S.C. 2911(c), 2932, 2943(c))

**§ 298.12 Targeted assistance programs.**

(a) Consistent with paragraphs (b) and (c) of this section, Chapter 2, funds may be used for the planning, development, operation, and expansion of the following:

(1) Programs to meet the educational needs of—

(i) Students at risk of failure in school;

(ii) Students at risk of dropping out of school; and

(iii) Students for whom providing an education entails higher than average costs.

(2) Programs for the acquisition and use of instructional and educational materials.

(3) Innovative programs designed to carry out schoolwide improvements, including effective schools programs under sections 1541–1542 of the Act.

(4) Programs of training and professional development to enhance the knowledge and skills of educational personnel.

(5) Programs designed to enhance personal excellence of students and student achievement.

(6) Innovative projects to enhance the educational program and climate of the school.

(b) Except to purchase computer hardware for instructional purposes under section 1531(b)(2) of the Act, Chapter 2 funds may not be used to purchase equipment unless that equipment is used as a part of a program under paragraph (a) of this section.

(Authority: 20 U.S.C. 2941–2942, 2951–2952)

**§ 298.13 Use of funds by SEAs.**

(a) *Authorized activities.* An SEA may use Chapter 2 funds reserved for State use only for—

(1) State administration of Chapter 2 programs, subject to paragraph (b)(1) of this section, including—

(i) Supervising the allocation of Chapter 2 funds to LEAs;

(ii) Planning, supervising, and processing Chapter 2 funds reserved for State use;

(iii) Monitoring and evaluating Chapter 2 programs and activities; and

(iv) Operating the State advisory committee.

(2) Assistance to LEAs to provide targeted assistance under § 298.12 in the form of—

(i) Direct grants to LEAs;

(ii) Statewide activities; and

(iii) Technical assistance; and

VOL 54 ISS 39 MR 1 1989 UMI

(3) Assistance to LEAs and statewide activities, in accordance with paragraph (b)(2) of this section, to carry out effective schools programs under sections 1541–1542 of the Act.

(b) *Limitations.* (1) *State administration.* An SEA may not use more than 25 percent of the Chapter 2 funds reserved for State use in any fiscal year for State administration under paragraph (a)(1) of this section.

(2) *Effective schools programs.* (i) Except as provided in paragraph (b)(2)(ii) of this section, an SEA shall use at least 20 percent of the Chapter 2 funds reserved for State use in any fiscal year for effective schools programs under sections 1541–1542 of the Act.

(ii) If an SEA is spending from non-Federal funds an amount equal to twice the amount the SEA is required to use under paragraph (b)(2)(i) of this section, the SEA may request the Secretary to waive the requirement in that paragraph by submitting a written request that includes—

(A) The amount the SEA is spending from non-Federal funds for effective schools programs; and

(B) A description of those effective schools programs that addresses the factors in Section 1542 of the Act.

(Authority: 20 U.S.C. 2931, 2941–2942, 2951–2952; H.R. Rept. 95, 100th Cong., 1st. Sess. 54 (1987))

**§ 298.14 Use of funds by LEAs.**

(a) *General.* An LEA may use Chapter 2 funds to support one or more of the targeted assistance programs under § 298.12.

(b) *Special rules.* (1) If an LEA receives additional Chapter 2 funds as a result of adjusted allocations under § 298.7(b)(2)(ii), the LEA may, at its discretion, use those funds either—

(i) To provide services to children enrolled in public and private, nonprofit schools in accordance with § 298.34(a)(2); or

(ii) To provide services only to children enrolled in schools—both public and private—in which children described in § 298.7(b)(2)(ii) are enrolled.

(2) If, in any fiscal year, an LEA uses Chapter 2 funds under paragraph (b)(1)(ii) of this section, the LEA shall—

(i) Use all funds received as a result of adjusted allocations in that manner; and

(ii) Use in each school with children described in § 298.7(b)(2)(ii) the amount generated by those children who are enrolled in that school.

(3) An LEA is not required to use Chapter 2 funds received under § 298.7(b)(2)(ii) to provide services to the children who generated those funds.

(Authority: 20 U.S.C. 2922(c)(2), 2941–2942, 2951–2952; H.R. Rept. 95, 100th Cong., 1st Sess. 53–54 (1987))

**§ 298.15 Evaluations and reports.**

(a) *LEA responsibilities.* (1) An LEA shall—

(i) Report annually to the SEA on the LEA's use of funds under § 298.14; and

(ii) Make that report available to the public.

(2) The LEA shall provide other information to the SEA as reasonably may be required for program evaluation consistent with the SEA's responsibilities under paragraph (b) of this section.

(b) *SEA responsibilities.* (1) An SEA shall submit annually to the Secretary data on—

(i) The use of Chapter 2 funds by the SEA and LEAs;

(ii) The types of services provided; and

(iii) The children to whom services were provided.

(2) In fiscal year 1992, the SEA shall—

(i) Evaluate the effectiveness of State and local programs conducted under this part;

(ii) Submit the evaluation to the State advisory committee for review and comment;

(iii) Make the evaluation available to the public; and

(iv) Submit a copy of the evaluation and a summary of the LEAs' report under paragraph (a)(1) of this section to the Secretary.

(3) The SEA shall provide other information to the Secretary as may be required for program evaluation.

(Authority: 20 U.S.C 2932(a)(6)–(7), 2943(a)(4), 2973)

**§§ 298.16—298.20 [Reserved]**

## Subpart C—Fiscal Requirements That a State or Local Educational Agency Must Meet

**§ 298.21 Maintenance of effort.**

(a) *Basic standard.* (1) Except as provided in § 298.22, the Secretary pays a State its full allocation of funds under this part if the Secretary finds that either the combined fiscal effort per student or the aggregate expenditures within the State with respect to the provision of free public education for the preceding fiscal year was not less than 90 percent of the combined fiscal effort per student or of the aggregate expenditures for the second preceding fiscal year.

(2) *Meaning of "preceding fiscal year."* For purposes of determining maintenance of effort, the "preceding fiscal year" is the Federal fiscal year or the twelve-month fiscal period most commonly used in a State for official reporting purposes prior to the beginning of the Federal fiscal year in which funds are available.

*Example:* For funds first made available on July 1, 1989, if a State is using the Federal fiscal year, the "preceding fiscal year" is fiscal year 1988 (which began on October 1, 1987) and the "second preceding fiscal year" is fiscal year 1987 (which began on October 1, 1986). If a State is using a fiscal year that begins on July 1, 1989, the "preceding fiscal year" is the twelve-month fiscal period ending on June 30, 1988 and the "second preceding fiscal year" is the period ending on June 30, 1987.

(3)(i) *Expenditures to be considered.* The expenditures the Secretary considers in determining a State's compliance with the maintenance of effort requirement in this paragraph are State and local expenditures for free public education. These include expenditures for administration, instruction, attendance, health services, pupil transportation, plant operation and maintenance, fixed charges, and net expenditures to cover deficits for food services and student body activities.

(ii) *Expenditures not to be considered.* The Secretary does not consider the following expenditures in determining a State's compliance with the maintenance of effort requirement in this paragraph:

(A) Any expenditures for community services, capital outlay, or debt service.

(B) Any expenditures of Federal funds.

(b) *Failure to maintain effort.* (1) If a State fails to maintain effort and a waiver under § 298.22 is not appropriate, the Secretary reduces the State's allocation of funds under this part in the exact proportion by which the State fails to meet 90 percent of both the State's combined fiscal effort per student and aggregate expenditures (using the measure most favorable to the State) for the second preceding fiscal year.

(2) In determining maintenance of effort for the fiscal year immediately following the fiscal year in which the State failed to maintain effort, the Secretary considers the fiscal effort for the second preceding fiscal year to be no less than 90 percent of the combined fiscal effort per student or aggregate expenditures (using the measure most favorable to the State) for the third preceding fiscal year.

*Example:* In Federal fiscal year 1990, a State fails to maintain effort because its fiscal effort in the preceding fiscal year (1988) is less than 90 percent of its fiscal effort in the second preceding fiscal year (1987). In assessing whether the State maintained effort during the next fiscal year (1991), the Secretary considers the State's expenditures for the second preceding fiscal year (1988)

(the year that caused the State's failure to maintain effort) to be no less than 90 percent of the State's expenditures in the prior fiscal year (1987).

(Authority: 20 U.S.C. 2971(a))

**§ 298.22 Waiver of the maintenance of effort requirement**

(a) *Waiver request.* A State that has not maintained its fiscal effort as required in § 298.21(a) may ask the Secretary to grant a waiver of that requirement by submitting a waiver request that includes—

(1) A statement of the combined fiscal effort per student and the aggregate expenditures for the two fiscal years being compared; and

(2) A description of the circumstances that the State considers to be exceptional or uncontrollable.

(b) *Secretary's criteria.* (1) The Secretary may grant a waiver, for one year only, of the maintenance of effort requirement in § 298.21(a) if the Secretary determines that the waiver is equitable due to exceptional or uncontrollable circumstances. Exceptional or uncontrollable circumstances include—

(i) A natural disaster;

(ii) A precipitous and unforeseen decline in the financial resources of the State; or

(iii) Other exceptional or uncontrollable circumstances.

(2) The Secretary does not consider tax initiatives or referenda to be exceptional or uncontrollable circumstances.

(c) *Effect of a waiver.* (1) If the Secretary grants a waiver under paragraph (b) of this section, the Secretary allocates to the affected State its full allocation of Chapter 2 funds.

(2) In determining maintenance of effort for the fiscal year immediately following the fiscal year for which the waiver was granted, the Secretary considers the fiscal effort for the second preceding fiscal year to be no less than 90 percent of the combined fiscal effort per student or aggregate expenditures (using the measure most favorable to the State) for the third preceding fiscal year.

*Example.* In Federal fiscal year 1990, a State secures a waiver because its fiscal effort in the preceding fiscal year (1988) is less than 90 percent of its fiscal effort in the second preceding fiscal year (1987) due to exceptional or uncontrollable circumstances. In assessing whether the State maintained effort during the next fiscal year (1991), the Secretary considers the State's expenditures for the second preceding fiscal year (1988) (the year for which the State needed a waiver) to be no less than 90 percent of the State's expenditures in the prior fiscal year (1987).

(Authority: 20 U.S.C. 2971(a))

**§ 298.23 Supplement-not-supplant.**

An SEA or LEA that receives Chapter 2 funds—

(a) May use and allocate those funds only to supplement and, to the extent practical, increase the level of funds that would, in the absence of Federal funds made available under Chapter 2, be made available from non-Federal sources; and

(b) May not use Chapter 2 funds to supplant funds from non-Federal sources.

(Authority: 20 U.S.C. 2971(b))

**§§ 298.24–298.30 [Reserved]**

## Subpart D—How Children Enrolled in Private Schools Participate

**§ 298.31 Responsibility of SEAs and LEAs.**

(a)(1) An LEA shall provide children enrolled in private schools in that LEA with secular, neutral, and nonideological services, materials, and equipment or other benefits that will ensure equitable (as compared to children enrolled in public schools) participation of private school children in the purposes and benefits of Chapter 2 in accordance with the requirements in §§ 298.32–298.37 and section 1572 of the Act.

(2) The LEA shall provide the opportunity to participate in a manner that is consistent with the number and needs of private school children in the school district of the LEA.

(3) The LEA shall exercise administrative direction and control over Chapter 2 funds and property that benefit children enrolled in private schools.

(4)(i) Provision of services to children enrolled in private schools must be provided by employees of a public agency or through contract by the public agency with a person, association, agency, or corporation that, in the provision of those services, is independent of the private school and of any religious organization.

(ii) This employment or contract must be under the control and supervision of the public agency.

(b)(1) An SEA shall—

(i) Ensure that each LEA complies with the requirements of §§ 298.32–298.37; or

(ii) If no Chapter 2 project is carried out by an LEA, make arrangements—such as through contracts with nonprofit agencies or organizations—under which children in private schools in that LEA are provided with services and materials to the extent that would have occurred if the LEA had received Chapter 2 funds.

(2) If an SEA conducts instructional programs or personnel training programs, it shall comply with these requirements as if it were an LEA.

(c) Under sections 1522(a)(3)(B) and 1533(a)(1)(B) of the Act, an application by an SEA or LEA must contain the planned allocation of funds required to implement section 1572.

(d) In accordance with section 1572(a)(1) of the Act, the regulations in this subpart only apply to children enrolled in private, nonprofit elementary and secondary schools.

(Authority: 20 U.S.C. 2972)

**§ 298.32 Consultation with private school officials.**

In order to receive Chapter 2 funds, an LEA shall—

(a) Contact annually appropriate officials from private schools within the area served by the LEA to determine whether those officials desire that their students participate in the Chapter 2 program; and

(b) With respect to those officials in schools with children who will participate, consult regarding the development and implementation of the Chapter 2 program before the LEA makes any decision that affects the opportunities of private school children to participate in the program.

(Authority: 20 U.S.C. 2922(b)(1), 2972)

**§ 298.33 Needs, number of children, and types of services.**

An LEA shall determine the following matters on a basis comparable to that used by the LEA in providing for participation of public school children:

(a) The needs of children enrolled in private schools.

(b) The number of those children who will participate in the Chapter 2 program.

(c) The Chapter 2 services that the LEA will provide to those children.

(Authority: 20 U.S.C. 2972)

**§ 298.34 Factors used in determining equitable participation.**

(a) *Equal expenditures.* (1) Expenditures for Chapter 2 programs for children enrolled in private schools must be equal (consistent with the number of children to be served) to expenditures for Chapter 2 programs for children enrolled in the public schools of an LEA, taking into account the needs of the individual children and other factors that relate to such expenditures.

(2) Except as provided in § 298.14(b)(1)(ii), in determining whether expenditures are equal under paragraph (a)(1) of this section, an LEA—

(i) May not take into account the extent to which children in private

VOL 54 ISS 39 MR 1 1989 UMI

schools generated a portion of the LEA's allocation under § 298.7(b)(2)(ii); but

(ii) May take into account differences in the costs per child of meeting the needs of the individual children to be served and other factors that relate to these expenditures, as provided in paragraph (a)(1) of this section.

(b) *Services on an equitable basis.* (1) In addition to meeting the equal expenditures requirement in paragraph (a) of this section, an LEA shall provide for the participation in the Chapter 2 program of children enrolled in private schools on an equitable basis.

(2)(i) In determining whether an LEA is providing for participation on an equitable basis, the services provided to private school children and the services provided to public school children are considered.

(ii) If an LEA uses Chapter 2 funds to concentrate programs for public school children on a particular group, attendance area, or grade or age level, the LEA shall ensure equitable opportunities for participation by children enrolled in private schools who—

(A) Have the same needs as the public school children to be served; and

(B) Are in that group, attendance area, or grade or age level.

(iii) If the needs of children enrolled in private schools are different from the needs of children enrolled in public schools, an LEA shall provide Chapter 2 services for the private school children that address their needs on an equitable basis.

(Authority: 20 U.S.C. 2972)

**§ 298.35 Funds not to benefit a private school.**

(a) An LEA may only use Chapter 2 funds to provide services that supplement the level of services that would, in the absence of Chapter 2 services, be available to children enrolled in a private school.

(b) An LEA shall use Chapter 2 funds to meet the needs of children enrolled in a private school, but not for the purpose of aiding the private school.

(Authority: 20 U.S.C. 2972)

**§ 298.36 Equipment and supplies.**

(a) To meet the requirements of section 1572(c) of the Act, a public agency must keep title to and exercise continuing administrative control of all equipment and supplies that the LEA acquires with Chapter 2 funds.

(b) The public agency may place equipment and supplies in a private school for the period of time needed for the program.

(c) The public agency shall ensure that the equipment or supplies placed in a private school—

(1) Are used for Chapter 2 purposes;

(2) Are used for secular, neutral, and nonideological purposes; and

(3) Can be removed from the private school without remodeling the private school facility.

(d) The public agency shall remove equipment or supplies from a private school if—

(1) The equipment or supplies are no longer needed for Chapter 2 purposes; or

(2) Removal is necessary to avoid unauthorized use of the equipment or supplies for other than Chapter 2 purposes.

(e) For the purpose of this section, the term "public agency" includes the LEA.

(Authority: 20 U.S.C. 2972)

**§ 298.37 Construction.**

(a) No Chapter 2 funds may be used to perform repairs, minor remodeling or construction of private school facilities.

(b) An LEA may use Chapter 2 funds to perform repairs, minor remodeling, or construction of public facilities as may be necessary to carry out its responsibilities under this subpart.

(Authority: 20 U.S.C. 2972)

**§ 298.38 Bypass.**

(a) The Secretary implements a bypass if an SEA or LEA—

(1) Is prohibited by law from providing Chapter 2 services for private school children on an equitable basis; or

(2) Has substantially failed, or is unwilling, to provide services for private school children on an equitable basis.

(b) If the Secretary implements a bypass, the Secretary—

(1) Waives an SEA's or LEA's responsibility for providing Chapter 2 services for private school children and arranges to provide the required services;

(2) Consults with appropriate public and private school officials; and

(3) Deducts the cost of these services, including any administrative costs, from the appropriate allotment of Chapter 2 funds provided to the State.

(c) Pending the final resolution of an investigation or a complaint that could result in a bypass action, the Secretary may withhold from the allocation of the affected SEA or LEA the amount the Secretary estimates is necessary to pay the cost of the services referred to in paragraph (b) of this section.

(Authority: 20 U.S.C. 2972 (d), (e), (g))

**§§ 298.39–298.40 [Reserved]**

**PART 76—STATE-ADMINISTERED PROGRAMS**

2. The authority citation for Part 76 is revised to read as follows:

Authority: 20 U.S.C. 1221e–3(a)(1), 2974(b), and 3474, unless otherwise noted.

**§ 76.1 [Amended]**

3. Section 76.1 is amended by removing paragraph (c) and adding the following authority citation at the end of the section:

(Authority: 20 U.S.C. 1221e–3(a)(1), 2974(b), and 3474)

4. Section 76.401 as set forth at 53 FR 31603, August 18, 1988, is amended by adding, as the second item in the chart in paragraph (a), an entry to read as follows:

**§ 76.401 Disapproval of an application—opportunity for a hearing.**

(a) • • •

| | | |
|---|---|---|
| Federal, State, and local Partnership for Educational Improvement. | Chapter 2 of Title I, Elementary and Secondary Education Act of 1965, as amended (20 U.S.C. 2911 *et seq.*). | 298 |

• • • • •

5. Section 76.563 is revised to read as follows:

**§ 76.563 Restricted indirect cost rate—programs covered.**

If a State or a subgrantee decides to charge indirect costs to a program that has a statutory requirement prohibiting the use of Federal funds to supplant non-Federal funds, the State or subgrantee shall use a restricted indirect cost rate computed under 34 CFR 75.564–75.568.

(Authority: 20 U.S.C. 1221e–3(a)(1), 2974(b), 3474)

**§ 76.734 [Amended]**

6. Section 76.734 is amended by removing "Unless a longer period is required under 34 CFR Part 74, a" and adding "A" in its place.

**§§ 76.2, 76.50, 76.51, 76.401, 76.500, 76.532, 76.533, 76.534, 76.592, 76.690, 76.705, 76.704, 76.707, 76.740 and 76.760 [Amended]**

7. The authority citations for the following sections are amended by adding ", 2974(b)" before the final parenthesis: §§ 76.2, 76.50, 76.51, 76.401, 76.500, 76.532, 76.533, 76.534, 76.592, 76.600, 76.703, 76.704, 76.707, 76.740, 76.760.

**§ 76.125 [Amended]**

8. The authority citation for § 76.125 as set forth at 53 FR 31602, August 18, 1988, is amended by removing "and" and adding, in its place, ", 2974(b)".

**§ 76.707 [Amended]**

9. The table in § 76.707 is amended by removing "under the cost principles in appendices C–F to 45 CFR Part 74" in paragraph (h).

**PART 77—[AMENDED]**

10. The following undesignated cross-references are removed from Part 76:

**§§ 76.50, 76.140, 76.305, 76.600 through 76.690, 76.702, 76.730 through 76.734, 76.770 through 76.772 and 76.900 through 76.902 [Amended]**

a. The cross-references following §§ 76.50, 76.305, 76.702, and 76.734.

b. The cross-references preceding §§ 76.140 through 76.142, 76.600, 76.681 through 76.690, 76.730 through 76.734, 76.770 through 76.792, and 76.900 through 76.902 (Subpart H).

**§ 77.1 [Amended]**

11. The authority citation for Part 77 (following § 77.1) is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3(a)(1), 2974(b), and 3474, unless otherwise noted.)

1989
UMI

**INTERSTATE COMMERCE COMMISSION**

**49 CFR Part 1135**

**[Ex Parte No. 290 (Sub-No. 2)]**

**Railroad Cost Recovery Procedures**

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Notice of interpretation of rule.

**SUMMARY:** The Commission is adopting an interest element for inclusion in the quarterly rail cost adjustment factor in order to add more accuracy to that calculation. The methodology for calculating the interest element will be based on changes in interest rates. The original proposal was contained in a notice served February 13, 1987, 52 FR 4790 (February 17, 1987). Interest rates will be calculated by dividing interest payments by average total debt. The weight of the interest component will be the percentage of operating expenses, rents, taxes and interest represented by interest payments. Class I railroad Annual Report Form R-1 data will be used for the calculation.

**DATES:** The interest element shall be included beginning with the second quarter 1989 submission.

**FOR FURTHER INFORMATION CONTACT:** William T. Bono, (202) 275-7354 or Robert C. Hasek, (202) 275-0938 or 275-7354. TDD for hearing impaired (202) 275-1721.

**SUPPLEMENTARY INFORMATION:** Additional information is contained in the Commission's decision. To purchase a copy of the full decision write to, call or pick up in person from: Dynamic Concepts Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or telephone (202) 289-4357. Assistance for the hearing impaired is available through TDD services (202) 275-1721 or by pickup from Dynamic Concepts Inc., Room 2229 at Commission headquarters.

This action will not affect either the quality of the human environment or energy conservation. It will not have a significant adverse impact on a substantial number of small entities.

Dated: February 8, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Simmons, Lamboley. Vice Chairman Simmons would have applied the new standard beginning with the second quarter of 1985.

**Noreta R. McGee,**

*Secretary.*

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 54 FR 12345.

# Presidential Documents

Title 3—

The President

## Proclamation 5938 of February 28, 1989

## American Red Cross Month, 1989

By the President of the United States of America

A Proclamation

The Red Cross, as a symbol and an ideal, has meant help and reassurance to millions of Americans and people around the world. To Henry Dunant, founder of the International Red Cross 125 years ago, help meant a bright red cross on a white banner, carried onto battlefields by those tending wounded soldiers and civilians innocently caught in conflict. To Clara Barton, founder of the American Red Cross, help meant all that Dunant envisioned plus a system by which people could voluntarily help each other cope during times of disaster, not just during war. Today, we need only look to the success of the American Red Cross to see how both visions have become realities.

Whether it has been in a major emergency like the tornadoes that struck North Carolina last fall or in the aftermath of the terrible death and destruction of the earthquake in Armenia, the Red Cross has been there extending the hand of help. In 1988, 4.2 million people were given emergency food, clothing, and shelter by more than 76 thousand Red Cross disaster volunteers.

Clara Barton's dream of mitigating the suffering of disaster victims also brought an understanding of the need to help the entire population to be better prepared for day-to-day emergencies. This has meant teaching 7.1 million people first aid, Red Cross CPR, swimming, and water and boating safety. Now, perhaps more than ever, we realize how education can mean survival as we and people around the world face the deadly threat of AIDS. The Red Cross has helped us understand this health crisis by disseminating AIDS prevention information.

Thousands of persons needing blood owe a debt of gratitude to the American Red Cross. From recruitment of volunteer donors to collecting and testing that ensures the safest blood possible, last year the Red Cross was able to provide our ill and injured with 6.4 million units of blood.

Our American Red Cross also provides important humanitarian service to our military personnel and their families, including counseling and assistance and referral services for active-duty military, veterans, and their dependents. Our young people, too—more than 3 million of them—have made a valuable commitment to public service through the Red Cross. From organizing high school and college bloodmobiles to visiting patients in hospitals and retirement homes, youth programs are another reason why we should appreciate the work of this remarkable organization.

From the visions of Henry Dunant and Clara Barton have come one of the greatest volunteer movements in history. The strength of the Red Cross can be seen every day, everywhere, through the work of people who believe that a successful life must include serving others. It is through their commitment that a bright red cross on a white banner continues to mean hope, dignity, and compassion to thousands of people in need, both here at home and around the world.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America and Honorary Chairman of the American National Red Cross, by virtue of the authority vested in me by the Constitution and laws of the United

States, do hereby proclaim the month of March 1989 as American Red Cross Month. I urge all Americans to continue their generous support and ready assistance to the work of the American Red Cross and its nearly 3,000 Chapters and stations on military installations.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of February, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and thirteenth.

George Bush

# Rules and Regulations

Federal Register
Vol. 54, No. 40
Thursday, March 2, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## MERIT SYSTEMS PROTECTION BOARD

### 5 CFR Part 1204

### Availability of Official Information

**AGENCY:** Merit Systems Protection Board.

**ACTION:** Final rule.

**SUMMARY:** The U.S. Merit Systems Protection Board (Board) is amending its regulations at 5 CFR Part 1204 by adding a section on the availability of confidential commercial information. The new section establishes procedures to notify submitters of records containing confidential commercial information when those records are requested under the Freedom of Information Act, 5 U.S.C. 552, as amended, if, after reviewing the request, the responsive records, and any appeal by the requester, the Board may be required to disclose the records. These procedures comply with Executive Order 12600 issued on June 23, 1987, and published in the **Federal Register** on June 25, 1987.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Michael H. Hoxie, (202) 653-7200.

**List of Subjects in 5 CFR Part 1204**

Freedom of Information, Practices and procedures, Privacy.

Accordingly, 5 CFR Part 1204 is amended as follows:

## PART 1204—AVAILABILITY OF OFFICIAL INFORMATION

1. The authority citation for Part 1204 is revised to read as follows:

**Authority:** 5 U.S.C. 552 and 1205, Pub. L. 99-507; Section 1204.14 also issued under E.O. 12600, 52 FR 23781, June 25, 1987.

2. Section 1204.14 is added to read as follows:

**§ 1204.14 Requests for access to confidential commercial information.**

(a) *General.* Confidential commercial information provided to the Board by a business submitter will not be disclosed in response to a Freedom of Information Act request except in accordance with this section.

(b) *Definitions.* (1) The term "confidential commercial information" means records provided to the government by a submitter that arguably contain material exempt from release under Exemption 4 of the Freedom of Information Act, 5 U.S.C. 552(b)(4), because disclosure could reasonably be expected to cause substantial competitive harm.

(2) The term "submitter" means any person or entity who provides confidential commercial information to the government. The term "submitter" includes, but is not limited to, corporations, state governments, and foreign governments.

(c) *Notice to business submitters.* The Board will provide a business submitter with prompt written notice of a request encompassing its confidential commercial information whenever that action is required under paragraph (d) of this section, and except as provided in paragraph (h) of this section. This written notice will either describe the exact nature of the confidential commercial information requested or will provide copies of the records or portions of records containing the commercial information.

(d) *When initial notice is required.* (1) With respect to confidential commercial information submitted to the Board before January 1, 1988, the Board will give the business submitter notice of a request whenever:

(i) The information is less than 10 years old; or

(ii) The Board has reason to believe that disclosure of the information could reasonably be expected to cause substantial competitive harm.

(2) With respect to confidential commercial information submitted to the Board on or after January 1, 1988, the Board will give notice to the business submitter whenever:

(i) The business submitter has designated the information in good faith as commercially or financially sensitive information; or

(ii) The Board has reason to believe that disclosure of the information could reasonably be expected to cause substantial competitive harm.

(3) Notice of a request for commercially confidential information submitted before January 1, 1988, is required for a period of not more than 10 years after the date on which the information is submitted unless the business submitter requests, and provides justification for, a longer specific notice period. Whenever possible, the submitter's claim of confidentiality must be supported by a statement or certification, by an officer or authorized representative of the company, the the information in question is in fact confidential commercial information and has not been disclosed to the public.

(e) *Opportunity to object to disclosure.* Through the notice described in paragraph (c) of this section, the Board will afford a business submitter a reasonable period within which to provide a detailed statement of any objection to disclosure. The statement must specify all grounds for withholding any of the information under any exemption of the Freedom of Information Act. In addition, in the case of Exemption 4, the statement must demonstrate why the information is alleged to be a trade secret, or to be commercial or financial information that is privileged or confidential. Information a business submitter provides under this paragraph may itself be subject to disclosure under the Freedom of Information Act.

(f) *Notice of intent to disclose information.* The Board will consider carefully a business submitter's objections and specific grounds for claiming that the information should not be disclosed before determining whether to disclose confidential commercial information. Whenever the Board decides to disclose confidential commercial information over the objection of a business submitter, it will forward to the business submitter a written notice that includes:

(1) A statement of the reasons for which the business submitter's disclosure objections were not sufficient;

(2) A description of the confidential commercial information to be disclosed; and

(3) A specified disclosure date. The Board will forward the notice of intent to disclose the information a reasonable

VOL 54 ISS 40 MR 2 1989 UMI

number of days, as circumstances permit, before the specified date upon which disclosure is expected. It will forward a copy of the disclosure notice to the requester at the same time.

(g) *Notice of Freedom of Information Act lawsuit.* Whenever a requester files a lawsuit seeking to compel disclosure of business information covered by paragraph (d) of this section, the Board will notify the business submitter promptly.

(h) *Exceptions to notice requirements.* The notice requirements of this section do not apply when:

(1) The Board determines that the information should not be disclosed;

(2) The information lawfully has been published or otherwise made available to the public;

(3) Disclosure of the information is required by law (other than 5 U.S.C. 552); or

(4) The disclosure is required by an agency rule that:

(i) Was adopted pursuant to notice and public comment;

(ii) Specifies narrow classes of records submitted to the agency that are to be released under the Freedom of Information Act; or

(iii) Provides in exceptional circumstances for notice when the submitter provides written justification, at the time the information is submitted or a reasonable time thereafter, that disclosure of the information could reasonably be expected to cause substantial competitive harm.

(5) The information requested is not designated by the submitter as exempt from disclosure in accordance with agency regulations promulgated pursuant to this section, when the submitter had an opportunity to do so at the time of submission of the information or a reasonable time thereafter, unless the agency has substantial reason to believe that disclosure of the information would result in competitive harm; or

(6) The designation made by the submitter in accordance with Board regulations appears obviously frivolous; except that, in such case, the Board must provide the submitter with written notice of any final administrative disclosure determination within a reasonable period prior to the specified disclosure date.

Date: February 24, 1989.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

### 14 CFR Part 71

**[Airspace Docket No. 88-ASO-23]**

### Revision of Transition Area, Alabaster, AL

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment revises the Alabaster, AL, Transition Area by adding an arrival area extension. The extension will provide airspace protection for aircraft executing a new Nondirectional Radio Beacon (NDB), Runway 33, Standard Instrument Approach Procedure (SIAP) to the Shelby County Airport. Also, this action corrects the geographic position coordinates for Bessemer Airport.

**EFFECTIVE DATE:** 0901 u.t.c., April 6, 1989.

**FOR FURTHER INFORMATION CONTACT:** James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

**SUPPLEMENTARY INFORMATION:**

**History**

On December 19, 1988, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the Alabaster, AL, Transition Area (53 FR 50974). This proposed revision would add an arrival area extension to provide airspace protection for aircraft executing a new NDB SIAP being planned for Runway 33 at the Shelby County Airport. Also, the proposal would correct the geographic position coordinates for the Bessemer Airport. Interested parties were invited to participated in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6D dated January 4, 1988.

**The Rule**

This amendment to Part 71 of the Federal Aviation Regulations revises the Alabaster, AL, Transition Area by adding an arrival area extension to provide additional controlled airspace for aircraft executing a new NDB SIAP to Runway 33 at the Shelby County Airport and corrects the geographic position coordinates for the Bessemer Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition area.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. § 71.181 is amended as follows:

**Alabaster, AL [Amended]**

By deleting the existing description and substituting the following: "That airspace extending upward from 700' above the surface within a 7-mile radius of Shelby County Airport (Lat. 33°10'41"N; Long. 86°47'01"W); within 3.5 miles each side of the 168° bearing of the Calera RBN (Lat. 33°07'06"N; Long. 86°46'02"W), extending from the 7-mile radius area to a point 11 miles south of the RBN; within a 6.5-mile radius of Bessemer Airport (Lat. 33°18'46"N; Long. 86°55'32"W); excluding that portion which coincides with the Birmingham, AL, Transition Area."

Issued in East Point, Georgia, on February 14, 1989.

**William D. Wood,**

*Acting Manager, Air Traffic Division Southern Region.*

[FR Doc. 89-4835 Filed 3-1-89; 8:45 am]

BILLING CODE 4910-13-M

### 14 CFR Part 71

**[Airspace Docket No. 88-ASO-21]**

### Revision to Transition Area, Lake City, SC

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment revises the Lake City, SC, Transition Area. This action deletes an arrival area extension based on the 192° bearing from the Evans RBN and adds a new extension either side of the 288° bearing of the RBN. This amendment is necessary to afford Airspace Protection for aircraft executing a new standard instrument approach procedure (SIAP) to the Lake City Municipal C.J. Evans Field Airport.

**EFFECTIVE DATE:** 0901 u.t.c., August 24, 1989.

**FOR FURTHER INFORMATION CONTACT:** Melvin Brock, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

**SUPPLEMENTARY INFORMATION:**

**History**

On December 19, 1988, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the Transition Area, Lake City, SC (53 FR 50974). The nondirectional radio beacon (NDB) standard instrument approach procedure (SIAP) originally proposed based on the 192° bearing from the Evans Radio Beacon (RBN) was never developed. A new NDB SIAP has been developed predicated on the 288° bearing of the Evans NDB. The proposed amendment would delete the arrival area extension along the 192° bearing and add a new extension either side of the 288° bearing of the Evans RBN. This action is necessary to afford airspace protection for aircraft executing the new SIAP. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6D dated January 4, 1988.

**The Rule**

This amendment of Part 71 of the Federal Aviation Regulations revises the Lake City, SC, Transition Area by deleting an arrival area extension and adding a new extension to provide airspace protection for aircraft executing a new SIAP.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition area.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. Section 71.181 is amended as follows:

**Lake City, SC [Amended]**

By removing the existing description and adding the following: "That airspace extending upward from 700' above the surface within a 6.5-mile radius of the Lake City Municipal C.J. Evans Field Airport (Lat. 33°51'14"N; Long. 79°46'08"W); within 3 miles each side of the 283° bearing from the Evans RBN (Lat. 33°51'21"N; Long. 79°45'58"W), extending from the 6.5-mile radius area to 8.5 miles west of the RBN; excluding that portion which coincides with the Kingstree, SC, Transition Area."

Issued in East Point, Georgia, on February 14, 1989.

**William D. Wood,**

*Acting Manager, Air Traffic Division Southern Region.*

### 14 CFR Part 71

**[Airspace Docket No. 88-ASW-6]**

### Revison of Transition Area; Athens, TX

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Correction to final rule.

**SUMMARY:** This action corrects the latitude and longitude coordinates describing the Athens Municipal Airport. The coordinates of the Athens Municipal Airport were revised after the original final rule Airspace Docket 88-ASW-6 was issued. This action will also change the name of the nondirectional radio beacon (NDB) used to execute the standard instrument approach procedure (SIAP) serving the Lochridge Ranch Airport. In the original final rule Airspace Docket 88-ASW-6, this NDB was incorrectly referred to as the Lochridge Ranch NDB. The correct name of this NDB is the Crossroads NDB.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Bruce C. Beard, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530, telephone (817) 624-5561.

**SUPPLEMENTARY INFORMATION:**

**History**

**Federal Register** Document 88-ASW-6 was published on August 24, 1988, revising the transition area located at Athens, TX. (53 FR 32211). This action will correct the latitude and longitude coordinates of the Athens Municipal Airport and will also change the name of the NDB used to execute SIAP serving the Lochridge Ranch Airport from Lochridge Ranch NDB to Crossroads NDB.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**SUPPLEMENTARY INFORMATION:**

The Commission staff is issuing certain revisions to the record formats for FERC Form No. 2 in order to correct certain inconsistencies with the printed version of the form. The revisions affect the following records in Schedule F5:

1. Record 23: Investments in Subsidiary Companies (Account 123.1).
   a. Information Reported Code has been revised: Individual investment, code = 1, Subtotal, code = 2, Grand total, code = 3.
   b. Item 493a, Total Cost Account 123.1, has been revised to include code = 3.
2. Record 32: Accumulated Deferred Income Taxes (Account 190).
   a. Utility Plant Codes have been revised as previously indicated in the January 31, 1989 Notice of Availability of COBOL Source Code.
   b. Utility Plant Code = 7 (other) is now specified in new Item 550a which was omitted in the previous notice. The location of the footnote ID is adjusted accordingly.
3. Record 41: Unamortized Loss and Gain on Reacquired Debt (Accounts 189, 257).
   a. Account Number is a new item located in character positions 11-17. Subsequent character positions are increased by seven.
4. Records 51, 52 and 53: Accumulated Deferred Income Taxes for Accounts 281, 282 and 283.
   a. Items 663, 674 and 685 have been revised from "Credit Account Number" to "Debit Account Number".
   b. Items 665, 676 and 687 have been revised from "Debit Account Number" to "Credit Account Number".

A complete description of the revised record formats is included in Appendix A of this notice. The print software will be revised to reflect these changes and released at a later date.

The Commission staff is also releasing proposed edit checks for FERC Form Nos. 2, 2-A, 8, 11, 14 and 16. The edit checks are listed in Appendices A through G. The Appendices are not being published in the **Federal Register**; copies are available in the Public Reference Room.

**DEPARTMENT OF THE TREASURY**

**Internal Revenue Service**

**[T.D. 8242]**

**26 CFR Part 1**

**Income Tax; Diversification Requirements for Variable Annuity, Endowment, and Life Insurance Contracts**

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Final regulations.

**SUMMARY:** This document contains final regulations relating to the diversification requirements for variable annuity, endowment, and life insurance contracts. Changes to the applicable law were made by the Tax Reform Act of 1984. The regulations affect issuers and policyholders of variable contracts and provide them with guidance concerning the tax treatment of those contracts.

**DATES:** The regulations apply to variable annuity, endowment, and life insurance contracts for taxable years beginning after December 31, 1983, except as follows: See 1.817-5(i)(2).

**FOR FURTHER INFORMATION CONTACT:** Katherine A. Hossofsky, of the Office of the Assistant Chief Counsel (Financial Institutions and Products), Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:FI&P:4), (202) 566-3458, not a toll-free call.

**SUPPLEMENTARY INFORMATION:**

**Background**

This document amends the Income Tax Regulations (26 CFR Part 1) to provide rules under section 817(h) of the Internal Revenue Code of 1986, relating to diversification requirements for variable annuity, endowment, and life insurance contracts. Section 817(h) was added to the Code by section 211(a) of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 750). On September 15, 1986, the **Federal Register** published amendments (T.D. 8101; 51 FR 32633) to the Income Tax Regulations (26 CFR Part 1) to provide temporary regulations under section 817(h). The same issue of the **Federal Register** also published proposed amendments (51 FR 32664) to the Income Tax Regulations and the Table of OMB Control Numbers based on those temporary regulations. This document supersedes the temporary regulations under section 817(h) and adopts final regulations based on the notice of proposed rulemaking published on September 15, 1986.

Before adopting the final regulations, the Internal Revenue Service solicited comments and held a public hearing on the proposed amendments. Fourteen written comments responding to the notice of proposed rulemaking were received. In addition, seven persons provided oral comments at the hearing held on July 1, 1987. After consideration of all comments received, the proposed amendments are adopted as revised by this Treasury decision.

**Public Comments**

Several commentators argued that if a segregated asset account fails the diversification requirements, any contract invested in such account should fail to qualify as an annuity, endowment, or life insurance contract only for the period during which the account was not adequately diversified. The Internal Revenue Service believes that, in general, failing the diversification requirements should result in disqualification of contracts for all periods. Section 817(h) provides that a variable contract shall not be treated as an annuity, endowment, or life insurance contract for purposes of subchapter L, section 72, and section 7702(a) for any period (and any subsequent period) for which the investments made by a segregated asset account underlying the contract are not adequately diversified. The statutory language indicates that contracts should remain disqualified for periods subsequent to the period for which the investments are not adequately diversified. With respect to prior periods, section 7702 requires that, for a life insurance or endowment contract, any income on the contract for all prior taxable years be treated as income received or accrued by the policyholder if the contract ceases to meet the definition of a life insurance contract. An annuity contract is treated in the same manner under these regulations.

Various commentators suggested that if a failure to diversify is inadvertent and the failure is promptly corrected, contracts based on such an account should continue to qualify as life insurance, endowment, or annuity contracts during all periods. The Internal Revenue Service agrees that variable contracts based upon a segregated asset account that inadvertently becomes nondiversified should be treated as remaining qualified, provided that the issuer or holder of the contract agrees to pay such amounts as may be required by the Commissioner. The amounts required by the Commissioner to be paid will be based on the amount of tax the policyholders would have been required to pay if they were treated as receiving the income on the contract during the period of nondiversification. Although based on the amount of tax described in the preceding sentence, it is anticipated that, in determining the amount of the payment, the absence of a policyholder basis adjustment and other relevant factors will be taken into account.

Several commentators disagreed with the treatment in the proposed regulations of all government securities as securities of a single issuer. This rule has been revised to conform to section 817(h)(6), as added by section 6080 of the Technical and Miscellaneous Revenue Act of 1988.

The proposed regulations provide that the members of an affiliated group, within the meaning of section 1504(a), ordinarily are treated as a single issuer. The final regulations delete this provision.

Various comments relating to the start-up period rules under paragraph (c)(2) of the proposed regulations were received. The proposed regulations provide that the start-up period rules apply only if no more than 30 percent of the amount allocated to a segregated asset account as of any date is attributable to premium and investment income received more than one year prior to such date. A commentator suggested that amounts transferred from a previously diversified account and amounts transferred as a result of a tax-free exchange of an unaffiliated company's contract do not constitute an abuse of the start-up period rules, even if such amounts were received more than one year prior to the test date. In addition, the commentator noted that it is burdensome for companies to trace premium and investment income as of any date. Accordingly, the final regulations provide that if more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than one year before such date, the start-up period rules do not apply. Any amount transferred to the account from a diversified account or any amount transferred as a result of an exchange pursuant to section 1035 with an unaffiliated company is not treated as an amount attributable to contracts entered into more than one year before such date.

Several commentators requested clarification of the rules relating to the aggregation of multiple accounts or funds. The final regulations restate these rules and provide additional clarifying examples.

The final regulations extend the look-through rules applicable to underlying investment companies or trusts all of the interests in which (with certain exceptions) are held by segregated asset accounts to underlying partnerships all of the interests in which are held by such persons. The final regulations clarify that this look-through rule is available to a segregated asset account (notwithstanding ownership of interests in the underlying entity by the public) if all the assets of the segregated asset account are attributable to (i) premium payments made by policyholders prior to September 26, 1981, (ii) premium payments made in connection with a qualified pension or retirement plan, or (iii) any combination of such premium payments. Additionally, the final regulations clarify that the return on an interest in an underlying entity held by the general account of a life insurance company must be computed in the same manner as the return for the related variable contracts prior to deducting expenses related to the variable contracts.

The final regulations include an additional look-through rule for trusts, substantially all of the assets of which are Treasury securities. Under this rule, Treasury securities are still treated as such, even though they are held through a custodial arrangement that is treated as a grantor trust.

Several commentators requested that the regulations clarify whether purchased put and call options on Treasury securities, interest rate futures contracts on Treasury securities, and options on such contracts are classified

VOL 54 ISS 40 MR 2 1989 UMI

as Treasury securities under the regulations. The final regulations clarify that such options and futures contracts are not Treasury securities because their direct obligor is not the U.S. Treasury.

The proposed regulations require that in order to qualify as a real property account, an account must have 40 percent of its assets invested in real property or interests in real property on the first anniversary of the date premium income is first received. A commentator requested that this period be increased to 18 months, because of the extensive time needed to identify and buy real property for investment. Accordingly, the final regulations provide that, if on or before the first anniversary of the account, the issuer has stated an intention to invest the assets of the account primarily in real property or interests in real property, the account will be permitted 18 months to invest at least 40 percent of its assets in such items.

**Special Analyses**

The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. Although a notice of proposed rulemaking that solicited public comment was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 did not apply. Accordingly, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

**Drafting Information**

The principal author of these regulations is Sharon L. Hall of the Office of Assistant Chief Counsel (Income Tax and Accounting), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

**List of Subjects in 26 CFR 1.801-1—1.852-6**

Income taxes, Insurance companies.

**Adoption of Amendments to the Regulations**

For the reasons set out in the preamble, Chapter I Subchapter A, Part I of Title 26 of the Code of Federal Regulations is amended as follows:

**PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 1, 1953**

**Paragraph 1.** The authority for Part 1 is amended by adding the following citation and by removing "Section 1.817-5T also issued under 26 U.S.C. 817(h)."

Authority: 26 U.S.C. 7805. * * * Section 1.817-5 also issued under 26 U.S.C. 817(h).

**§ 1.817-5T [Removed]**

**Par. 2.** 26 CFR Part 1 is amended by removing § 1.817-5T.

**Par. 3.** The following new § 1.817-5 is added to read as follows:

**§ 1.817-5 Diversification requirements for variable annuity, endowment, and life insurance contracts.**

(a) *Consequences of nondiversification*—(1) *In general.* Except as provided in paragraph (a)(2) of this section, for purposes of subchapter L, section 72, and section 7702(a), a variable contract (as defined in section 817(d)), other than a pension plan contract (as defined in section 818(a)), which is based on one or more segregated asset accounts shall not be treated as an annuity, endowment, or life insurance contract for any calendar quarter period for which the investments of any such account are not adequately diversified. For this purpose, a variable contract shall be treated as based on a segregated asset account for a calendar quarter period if amounts received under the contract (or earnings thereon) are allocated to the segregated asset account at any time during the period. In addition, a variable contract that is not treated as an annuity, endowment, or life insurance contract for any period by reason of this paragraph (a)(1) shall not be treated as an annuity, endowment, or life insurance contract for any subsequent period even if the investments are adequately diversified for such subsequent period. If a variable contract which is a life insurance or endowment contract under other applicable (e.g., State or foreign) law is not treated as a life insurance or endowment contract under section 7702(a), the income on the contract for any taxable year of the policyholder is treated as ordinary income received or accrued by the policyholder shall be treated as ordinary income received or accrued by the policyholder during such year in accordance with section 7702 (g) and (h). Likewise, if a variable contract is not treated as an annuity contract under section 72, the income on the contract for any taxable year of the policyholder shall be treated as ordinary income received or accrued by the policyholder during such year in the same manner as a life insurance or endowment contract under section 7702 (g) and (h).

(2) *Inadvertent failure to diversify.* The investments of a segregated asset account shall be treated as satisfying the requirements of paragraph (b) of this section for one or more periods, provided the following conditions are satisfied—

(i) The issuer or holder must show the Commissioner that the failure of the investments to satisfy the requirements of paragraph (b) of this section for such period or periods was inadvertent,

(ii) The investments of the account must satisfy the requirements of paragraph (b) of this section within a reasonable time after the discovery of such failure, and

(iii) The issuer or holder of the variable contract must agree to make such adjustments or pay such amounts as may be required by the Commissioner with respect to the period or periods during which the investments of the account did not satisfy the requirements of paragraph (b) of this section. The amount required by the Commissioner to be paid shall be an amount based upon the tax that would have been owed by the policyholders if they were treated as receiving the income on the contract (as defined in section 7702(g)(1)(B), without regard to section 7702(g)(1)(C)) for such period or periods.

(b) *Diversification of investments*—(1) *In general.* (i) Except as otherwise provided in this paragraph and paragraph (c) of this section, the investments of a segregated asset account shall be considered adequately diversified for purposes of this section and section 817(h) only if—

(A) No more than 55% of the value of the total assets of the account is represented by any one investment;

(B) No more than 70% of the value of the total assets of the account is represented by any two investments;

(C) No more than 80% of the value of the total assets of the account is represented by any three investments; and

(D) No more than 90% of the value of the total assets of the account is represented by any four investments.

(ii) For purposes of this section—

(A) All securities of the same issuer, all interests in the same real property project, and all interests in the same commodity are each treated as a single investment; and

(B) In the case of government securities, each government agency or instrumentality shall be treated as a separate issuer.

(iii) See paragraph (f) of this section for circumstances in which a segregated asset account is treated as the owner of assets held indirectly through certain pass-through entities and corporations taxed under subchapter M, chapter 1 of the Code.

(2) *Safe harbor.* A segregated asset account will be considered adequately diversified for purposes of this section and section 817(h) if—

(i) The account meets the requirements of section 851 (b)(4) and the regulations thereunder; and

(ii) No more than 55% of the value of the total assets of the account is attributable to cash, cash items (including receivables), government securities, and securities of other regulated investment companies.

(3) *Alternative diversification requirements for variable life insurance contracts.* (i) A segregated asset account with respect to variable life insurance contracts will be considered adequately diversified for purposes of this section and section 817(h) if the requirements of paragraph (b)(1) or (b)(2) of this section are satisfied of if the assets of such account, other than Treasury securities, satisfy the percentage limitations prescribed in paragraph (b)(1) of this section increased by the Product of (A) .5 and (B) the percentage of the value of the total assets of the account that is represented by Treasury securities. In determining whether the assets of an account, other than Treasury securities, satisfy the increased percentage limitations, such limitations are applied as if the Treasury securities were not included in the account (*i.e.*, the increased percentage limitations are not applied to Treasury securities and the value of the total assets of the account is reduced by the value of the Treasury securities).

(ii) The provisions of this paragraph (b)(3) may be illustrated by the following examples:

*Example (1).* On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of $100,000. The assets of the account are represented by Treasury securities having a total value of $90,000 and securities of Corporation A having a total value of $10,000. The 55% limit described in paragraph (b)(1)(i) of this section would be increased by 45% (0.5×90%) to 100%, and would then be applied to the assets of the account other than Treasury securities. Because no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporation A, the investments of the account will be considered adequately diversified.

*Example (2).* On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of $100,000. The assets of the account are represented by Treasury securities having a total value of $60,000, securities of Corporation A having a total value of $30,000, and securities of Corporation B having a total value of $10,000. The 55% and 70% limits described in paragraph (b)(1)(i) of this section would be increased by 30% (0.5×60%) to 85% and 100%, respectively, and would then be applied to the assets of the account other than Treasury securities. Securities of Corporation A represent 75%, and securities of Corporation B represent 25%, of the value of the assets of the account other than Treasury securities. Because no more than 85% of the value of the assets other than Treasury securities is represented by securities of Corporation A or B and no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporations A and B, the investments of the account will be considered adequately diversified.

(c) *Periods for which an account is adequately diversified*—(1) *In general.* A segregated asset account that satisfies the requirements of paragraph (b) of this section on the last day of a quarter of a calendar year (*i.e.*, March 31, June 30, September 30, and December 31) or within 30 days after such last day shall be considered adequately diversified for such quarter.

(2) *Start-up period.* (i) Except as provided in paragraph (c)(2)(iv) of this section, a segregated asset account that is not a real property account on its first anniversary shall be considered adequately diversified until such first anniversary.

(ii) Except as provided in paragraph (c)(2)(iv) of this section, a segregated asset account that is a real property account on its first anniversary shall be considered adequately diversified until the earlier of its fifth anniversary or the anniversary on which the account ceases to be a real property account.

(iii) For purposes of paragraph (c)(2)(i) and (ii) of this section, the anniversary of a segregated asset account is the anniversary of the date on which any amount received under a life insurance or annuity contract, other than a pension plan contract (as defined in section 818 (a)), is first allocated to the account.

(iv) If more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than one year before such date, paragraph (c)(2)(i) of this section shall not apply to the segregated asset account for any period after such date. Similarly, if more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than 5 years before such date, paragraph (c)(2)(ii) of this section shall not apply to the segregated asset account for any period after such date. For purposes of this paragraph (c)(2), amounts transferred to the account from a diversified account (determined without regard to this paragraph (c)(2)) or as a result of an exchange pursuant to section 1035 in which the issuer of the contract received in the exchange is not related in a manner specified in section 267(b) to the issuer of the contract transferred in the exchange are not treated as—

(A) Amounts attributable to contracts entered into more than one year before such date, in the case of accounts subject to paragraph (c)(2)(i) of this section, or

(B) Amounts attributable to contracts entered into more than five years before such date, in the case of accounts subject to paragraph (c)(2)(ii) of this section.

(3) *Liquidation period.* A segregated asset account that satisfies the requirements of paragraph (b) of this section on the date a plan of liquidation is adopted shall be considered adequately diversified for—

(i) The one-year period beginning on the date the plan of liquidation is adopted if the account is not a real property account on such date; or

(ii) The two-year period beginning on the date the plan of liquidation is adopted if the account is a real property account on such date.

(d) *Market fluctuations.* A segregated asset account that satisfies the requirements of paragraph (b) of this section at the end of any calendar quarter (or within 30 days after the end of such calendar quarter) shall not be considered nondiversified in a subsequent quarter because of a discrepancy between the value of its assets and the diversification requirements unless such discrepancy exists immediately after the acquisition of any asset and such discrepancy is wholly or partly the result of such acquisition.

(e) *Segregated asset account.* For purposes of section 817(h) and this section, a segregated asset account shall consist of all assets the investment return and market value of each of which must be allocated in an identical manner to any variable contract invested in any of such assets. See paragraph (g) for examples illustrating the application of this paragraph (e).

(f) *Look-through rule for assets held through certain investment companies, partnerships, or trusts*—(1) *In general.* If

VOL 54 ISS 40 MR 2 1989 UMI

this paragraph (f) applies, a beneficial interest in a regulated investment company, a real estate investment trust, a partnership, or a trust that is treated under sections 671 through 679 as owned by the grantor or another person ("investment company, partnership, or trust") shall not be treated as a single investment of a segregated asset account. Instead, a pro rata portion of each asset of the investment company, partnership, or trust shall be treated, for purposes of this section, as an asset of the segregated asset account. For purposes of this section, the ratable interest of a partner in a partnership's assets shall be determined in accordance with the partner's capital interest in the partnership.

(2) *Applicability*—(i) *Certain investment companies, partnerships, and trusts.* This paragraph (f) shall apply to an investment company, partnership, or trust if—

(A) All the beneficial interests in the investment company, partnership, or trust (other than those described in paragraph (f)(3) of this section) are held by one or more segregated asset accounts of one or more insurance companies; and

(B) Public access to such investment company, partnership, or trust is available exclusively (except as otherwise permitted in paragraph (f)(3) of this section) through the purchase of a variable contract. Solely for this purpose, the status of a contract as a variable contract will be determined without regard to section 817(h) and this section.

(ii) *Nonregistered partnerships.* This paragraph (f) shall also apply to a partnership interest if the partnership interest is not registered under a Federal or State law regulating the offering or sale of securities.

(iii) *Trusts holding Treasury securities.* This paragraph (f) shall also apply to a trust that is treated under section 671 through 679 as owned by the grantor or another person if substantially all of the assets of the trust are represented by Treasury securities.

(3) *Interests not held by segregated asset accounts.* Satisfaction of the requirements of paragraph (f)(2)(i) of this section shall not be prevented by reason of beneficial interests in the investment company, partnership, or trust that are—

(i) Held by the general account of a life insurance company or a corporation related in a manner specified in section 267(b) to a life insurance company, but only if the return on such interests is computed in the same manner as the return on an interest held by a segregated asset account is computed (determined without regard to expenses attributable to variable contracts), there is no intent to sell such interests to the public, and a segregated asset account of such life insurance company also holds or will hold a beneficial interest in the investment company, partnership, or trust;

(ii) Held by the manager, or a corporation related in a manner specified in section 267(b) to the manager, of the investment company, partnership, or trust, but only if the holding of the interests is in connection with the creation or management of the investment company, partnership, or trust, the return on such interest is computed in the same manner as the return on an interest held by a segregated asset account is computed (determined without regard to expenses attributable to variable contracts), and there is no intent to sell such interests to the public;

(iii) Held by the trustee of a qualified pension or retirement plan; or

(iv) Held by the public, or treated as owned by policyholders pursuant to Rev. Rul. 81-225, 1981-2 C.B. 12, but only if (A) the investment company, partnership, or trust was closed to the public in accordance with Rev. Rul. 82-55, 1982-1 C.B. 12, or (B) all the assets of the segregated asset account are attributable to premium payments made by policyholders prior to September 26, 1981, to premium payments made in connection with a qualified pension or retirement plan, or to any combination of such premium payments.

(g) *Examples.* The provisions of paragraphs (e) and (f) of this section may be illustrated by the following examples.

*Example (1).* (i) The assets underlying variable contracts issued by a life insurance company consist of two groups of assets: (a) a diversified portfolio of debt securities and (b) interests in P, a partnership that is publicly registered. All of the beneficial interests in P are held by one or more segregated asset accounts of one or more insurance companies and public access to P is available exclusively through the purchase of a variable contract. The variable contracts provide that policyholders may specify which portion of each premium is to be invested in the debt securities and which portion is to be invested in P interests. The portfolio of debt securities and the assets of P, considered separately, each satisfy the diversification requirements of paragraph (b) of this section.

(ii) As a result of the ability of policyholders to allocate premiums among the two groups of assets, the investment return and market value of the interests in P and the debt securities may be allocated to different variable contracts in a non-identical manner. Accordingly, under paragraph (e) of this section, the interests in P are treated as part of a single segregated asset account ("Account 1") and the debt securities are treated as part of a different segregated asset account ("Account 2").

(iii) Since P is described in paragraph (f)(2)(i) of this section, interests in P will not be treated as a single investment of Account 1. Rather, Account 1 is treated as owning a pro rata portion of the assets of P.

(iv) Since Account 1 and Account 2 each satisfy the requirements of paragraph (b) of this section, variable contracts that are based on either or both accounts are treated as annuity, endowment, or life insurance contracts.

*Example (2).* The facts are the same as in example (1) except that some of the beneficial interests in P are held by persons not described in paragraph (f)(3) of this section. Since P is not described in paragraph (f)(2) of this section, interests in P will be treated as a single investment of Account 1. As a result, Account 1 does not satisfy the requirements of paragraph (b) of this section. Variable contracts based in whole or in part on Account 1 are not treated as annuity, endowment, or life insurance contracts. Variable contracts that are not based on Account 1 at any time during the period in which such account fails to satisfy the requirements of paragraph (b) of this section (*i.e.*, contracts based entirely on Account 2), are treated as annuity, endowment, or life insurance contracts. See paragraph (a)(1).

*Example (3).* The facts are the same as in example (2) except that P is not publicly registered. Since P is described in paragraph (e)(2)(ii) of this section, the result is the same as in example (1).

*Example (4).* The facts are the same as in example (2) except that the variable contracts do not permit policyholders to allocate premiums between or among the debt securities and interests in P. Thus, the investment return and market value of the interests in P and the debt securities must be allocated to the same variable contracts and in an identical manner. Under paragraph (e) of this section, the interests in P and the debt securities are treated as part of a single segregated asset account. If the interests in P and the debt securities, considered together, satisfy the requirements of paragraph (b) of this section, contracts based on this segregated asset account will be treated as annuity, endowment, or life insurance contracts.

(h) *Definitions.* The terms defined below shall, for purposes of this section, have the meanings set forth in such definitions:

(1) *Government security*—(i) *General rule.* The term "government security" shall mean any security issued or guaranteed or insured by the United States or an instrumentality of the United States; or any certificate of deposit for any of the foregoing. Any security or certificate or deposit insured or guaranteed only in part by the United States or an instrumentality thereof is treated as issued by the United States or its instrumentality only to the extent so insured or guaranteed, and as issued by the direct obligor to the extent not so insured or guaranteed. For purposes of this paragraph (h)(1), an instrumentality of the United States shall mean any person that is treated for purposes of 15 U.S.C. 80a-2 (16), as amended, as a person controlled or supervised by and acting as an instrumentality of the Government of the United States pursuant to authority granted by the Congress of the United States.

(ii) *Example.* A segregated asset account purchases a certificate of deposit in the amount of $150,000 from bank A. Deposits in bank A are insured by the Federal Deposit Insurance Corporation, an instrumentality of the United States, to the extent of $100,000 per depositor. The certificate of deposit is treated as a government security to the extent of the $100,000 insured amount and is treated as a security issued by bank A to the extent of the $50,000 excess of the value of the certificate of deposit over the insured amount.

(2) *Treasury security*—(i) *General rule.* For purposes of paragraph (b)(3) of this section and section 817(h)(3), the term "Treasury security" shall mean a security the direct obligor of which is the United States Treasury.

(ii) *Example.* A segregated asset account purchases put and call options on U.S. Treasury securities issued by the Options Clearing Corporation. The options are not Treasury securities for purposes of paragraph (b)(3) and section 817(h)(3) because the direct obligor of the options is not the United States Treasury.

(3) *Real property.* The term "real property" shall mean any property that is treated as real property under 1.856-3 (d) except that it shall not include interests in real property.

(4) *Real property account.* A segregated asset account is a real property account on an anniversary of the account (within the meaning of paragraph (c)(2)(iii) of this section) or on the date a plan of liquidation is adopted if not less than the applicable percentage of the total assets of the account is represented by real property or interests in real property on such anniversary or date. For this purpose, the applicable percentage is 40% for the period ending on the first anniversary of the date on which premium income is first received, 50% for the year ending on the second anniversary, 60% for the year ending on the third anniversary, 70% for the year ending on the fourth anniversary, and 80% thereafter. A segregated asset account will also be treated as a real property account on its first anniversary if on or before such first anniversary the issuer has stated in the contract or prospectus or in a submission to a regulatory agency, an intention that the assets of the account will be primarily invested in real property or interests in real property, provided that at least 40% of the total assets of the account are so invested within six months after such first anniversary.

(5) *Commodity.* The term "commodity" shall mean any type of personal property other than a security.

(6) *Security.* The term "security" shall include a cash item and any partnership interest registered under a Federal or State law regulating the offering or sale of securities. The term shall not include any other partnership interest, any interest in real property, or any interest in a commodity.

(7) *Interest in real property.* The term "interest in real property" shall include the ownership and co-ownership of land or improvements thereon and leaseholds of land or improvements thereon. Such term shall not, however, include mineral, oil, or gas royalty interests, such as a retained economic interest in coal or iron ore with respect to which the special provisions of section 631(c) apply. The term "interest in real property" also shall include options to acquire land or improvements thereon, and options to acquire leaseholds of land or improvements thereon.

(8) *Interest in a commodity.* The term "interest in a commodity" shall include the ownership and co-ownership of any type of personal property other than a security, and any leaseholds thereof. Such term shall include mineral, oil, and gas royalty interests, including any fractional undivided interest therein. Such term also shall include any put, call, straddle, option, or privilege on any type of personal property other than a security.

(9) *Value.* The term "value" shall mean, with respect to investments for which market quotations are readily available, the market value of such investments; and with respect to other investments, fair value as determined in good faith by the managers of the segregated asset account.

(10) *Terms used in section 851.* To the extent not inconsistent with this paragraph (h) all terms used in this section shall have the same meaning as when used in section 851.

(i) *Effective date*—(1) *In general.* This section is effective for taxable years beginning after December 31, 1983.

(2) *Exceptions.* (i) If, at all times after December 31, 1983, an insurance company would be considered the owner of the assets of a segregated asset account under the principles of Rev. Rul. 81-225, 1981-2 C.B. 12, this section will not apply to such account until December 15, 1986.

(ii) This section will not apply to any variable contract to which Rev. Rul. 77-85, 1977-1 C.B. 12, or Rev. Rul. 81-225, 1981-2 C.B. 12, did not apply by reason of the limited retroactive effect of such rulings.

(iii) In determining whether a segregated asset account is adequately diversified for any calendar quarter ending before July 1, 1988, debt instruments that are issued, guaranteed, or insured by the United States or an instrumentality of the United States shall not be treated as government securities if such debt instruments are secured by a mortgage on real property (other than real property owned by the United States or an instrumentality of the United States) or represent an interest in a pool of debt instruments secured by such mortgages.

(iv) This section shall not apply until January 1, 1989, with respect to a variable contract (as defined in section 817(d)) that (1) provides for the payment of an immediate annuity (as defined in section 72(u)(4)); (2) was outstanding on September 12, 1986; and (3) the segregated asset account on which it was based was, on September 12, 1986, wholly invested in deposits insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation.

**Lawrence B. Gibbs,**

*Commissioner of Internal Revenues.*

Approved: January 26, 1989.

**Dennis Earl Roes,**

*Deputy Assistant Secretary of the Treasury.*

**[DoD 6010.8-R]**

### Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Reimbursement of Children's Hospitals and Neonatal Services Under the CHAMPUS DRG-Based Payment System

**AGENCY:** Office of the Secretary, DoD.

**ACTION:** Final rule amendment; change of effective date.

**SUMMARY:** This notice postpones the effective date for inclusion of children's hospitals and neonatal services under

VOL 54 ISS 40 MR 2 1989 UMI

the CHAMPUS DRG-based payment system until April 1, 1989.

**EFFECTIVE DATE:** The final rule published on December 16, 1988 (53 FR 50515) April 1, 1989 and applies to inpatient hospital admissions occurring on or after April 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Stephen E. Isaacson, Office of Program Development, Office of Civilian Health and Medical Program of the Uniformed Services (OCHAMPUS), Aurora, Colorado, 80045-6900, telephone (303) 361-4005.

**SUPPLEMENTARY INFORMATION:** The final rule published on December 16, 1988, (53 FR 50515) provided for inclusion of children's hospitals and neonatal services in the CHAMPUS DRG-based payment system effective for inpatient hospital admissions occurring on or after March 1, 1989. The actual weights and rates were not included in the final rule and will be published in a separate notice. As a result of unexpected delays and complications in calculating the weights and rates, we have decided to postpone implementation of these changes until April 1 so that hospitals can have adequate advance notice of the weights and rates. We expect to publish the weights and rates by the end of February.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 147

[FRL-3504-1]

### Mississippi State Oil & Gas Board; Underground Injection Control ("UIC") Primacy Program Approval

**AGENCY:** Environmental Protection Agency.

**ACTION:** Final rule; approval of State program.

**SUMMARY:** The State Oil and Gas Board of Mississippi (the "Board") submitted an application under section 1425 of the Safe Drinking Water Act ("SDWA") for the approval of the UIC program governing Class II oil and natural gas related injection wells. After careful review of the application, the Agency has determined that the State's injection well program for Class II wells meets the requirements of the Act, and therefore approves it.

**DATES:** This approval shall become effective on March 2, 1989. The incorporation by reference of certain State statutes and regulations listed in the State Primacy Program is approved by the Director of the Federal Register effective March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** John K. Mason, Ground-Water Management Unit, Ground-Water Protection Branch, Environmental Protection Agency, Region IV, 345 Courtland Street, Atlanta, Georgia 30365, (404) 347-3866. Copies of the Responsiveness Summary covering the public hearings are available at the above address.

**SUPPLEMENTARY INFORMATION:**

Background

Part C of the SDWA provides for a UIC program. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection which endangers drinking water sources. The Administrator is also to list in the **Federal Register** each State for which, in his judgment, a State UIC program may be necessary. Each State listed shall submit to the Administrator an application which contains a satisfactory demonstration that the State: (i) Has adopted, after reasonable notice and public hearings, an UIC program which meets the requirements of regulations in effect under section 1421 of the SWDA; and (ii) will keep such records and make such reports with respect to its activities under its UIC program as the Administrator may require by regulations. Section 1425 provides that for oil and gas-related injection control programs, the State may, in lieu of meeting the requirements under section 1422(b)(1)(A), demonstrate that the State program meets the requirements of section 1421(b)(1)(A)-(D) and represents an effective program to prevent underground injection which endangers drinking water sources. After reasonable opportunity for public comment, the Administrator shall be rule approve, disapprove or approve in part and disapprove in part, the State's UIC program.

The State of Mississippi was listed by EPA as needing an UIC program. The Board submitted an application under section 1425 on March 2, 1982 for the approval of an UIC program governing Class II oil and natural gas-related injection wells to be administrated by the Board. This application was determined to be inadequate and on December 1, 1983 was returned to the State. Effective December 30, 1984, EPA implemented a Federal UIC program for Class II wells in Mississippi. On December 21, 1987, the Board submitted a primacy application under section 1425 which was determined to be complete. On January 27, 1988, EPA published notice of its receipt of the application, requested public comments, and scheduled public hearings on the Mississippi UIC program submitted by the Board (53 FR 2236). Two public hearings were held on March 8, 1988 in Jackson, Mississippi. No comments were received opposing approval of the State's program.

Summary of Today's Action

After careful review of the application and comments received from the public, I have determined that the portion of the Mississippi UIC program submitted by the Board to regulate Class II injection wells, applicable on all lands in the State other than Indian lands, meets the requirements of section 1425 of the SDWA, and I hereby approve it. The effect of this approval is to establish this program under the SDWA for Class II wells on all non-Indian lands in the State of Mississippi.

This program replaces the existing EPA-administered program for all Class II wells (except on Indian lands). Now that EPA has determined that the State-administered program meets all applicable federal requirements, the Agency is withdrawing the EPA-administered program for Class II wells and establishing the State-administered program as the applicable UIC program in the State, except on Indian lands. EPA will continue to enforce the UIC program on Indian lands in Mississippi. See 53 FR 43080 for details.

This program approval will be codified in 40 CFR 147.1251. State statutes and regulations that contain standards, requirements, and procedures applicable to owners or operators are incorporated by reference. To the extent set forth in 40 CFR Part 144 and 40 CFR Part 146, these provisions incorporated by reference, as well as all permit conditions and permit denials issued pursuant to such provisions, are enforceable by EPA pursuant to section 1423 of the SDWA.

EPA shall continue to handle the enforcement actions on all wells, permitted or otherwise, which were under any active EPA enforcement action as of the date of this delegation. Wells for which a Notice of Violation has been issued will be considered to be under an active enforcement action. EPA shall continue with the enforcement actions on these wells until final resolution or until EPA determines that adequate State enforcement is being taken.

**Effective Date**

Today's program approval is effective March 2, 1989. The State of Mississippi desires to begin issuing Class II UIC permits as soon as possible. EPA has received no comments opposing today's action. EPA does not believe any potential permittees will be prejudiced. Therefore, EPA believes good cause exists to making this rule effective upon publication. 5 U.S.C. 553.

**OMB Review**

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

**Certification Under the Regulatory Flexibility Act**

Pursuant to the provisions of 5 U.S.C. 605(b), I certify that approval by EPA under section 1425 of the SDWA of the application by the Board will not have a significant economic impact on a substantial number of small entities, since this rule only approves State actions. It imposes no new requirements on small entities.

**List of Subjects in 40 CFR Part 147**

Indian lands, Reporting and recordkeeping requirements, Intergovernmental relations, Penalties, Confidential business information, Water supply, Incorporation by reference.

Dated: December 30, 1988.

**John Moore,**

*Acting Administrator.*

As set forth in the preamble, Part 147 of Title 40 of the Code of Federal Regulations is amended as follows:

## PART 147—STATE UNDERGROUND INJECTION CONTROL PROGRAMS

The authority for Part 147 continues to read as follows:

**Authority:** 42 U.S.C. 300h *et seq.* and 42 U.S.C. 6901 *et seq.*

**Supart Z—Mississippi**

1. Section 147.1251 is revised to read as follows:

**§ 147.1251 State—Administered Program—Class II Wells.**

The UIC program for Class II wells in the State of Mississippi, other than those on Indian lands, is the program administered by the State Oil and Gas Board of Mississippi approved by EPA pursuant to section 1425 of the SDWA. Notice of this approval was published in the **Federal Register** on March 2, 1989; the effective date of this program is March 2, 1989. This program consists of the following elements, as submitted to EPA in the State's program application:

(a) Incorporation by reference. The requirements set forth in the State statutes and regulations cited in this paragraph are hereby incorporated by reference and made a part of the applicable UIC program under the SDWA for the State of Mississippi. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a).

(1) Mississippi Code Annotated, section 5-9-9 (Supp. 1988).

(2) Mississippi Code Annotated, sections 53-1-1 through 53-1-47, inclusive and sections 53-1-71 through 53-1-77, inclusive (1972 and Supp. 1988).

(3) Mississippi Code Annotated, sections 53-3-1 through 53-3-165, inclusive (1972 and Supp. 1988).

(4) State Oil and Gas Board Statewide Rules and Regulations, Rules 1 through 65, inclusive (Aug. 1, 1987, as amended, Sept. 17, 1987).

(b) The Memorandum of Agreement between EPA Region IV and the State Oil and Gas Board of Mississippi signed by the Regional Administrator on October 31, 1988.

(c) Statement of legal authority. Statement from the Attorney General signed on October 1, 1987 with amendments to the Statement signed August 5, 1988 and September 15, 1988 by the Special Assistant Attorney General.

(d) The Program Description and any other materials submitted as part of the original application or as supplements thereto.

2. Section 147.1252 is amended by revising the section heading and adding text to read as follows:

**§ 147.1252 EPA-administered program—Indian lands.**

(a) *Contents.* The UIC program for all classes of wells on Indian lands in Mississippi is administered by EPA. The program consists of the UIC program requirements of 40 CFR Parts 124, 144, 146 and any additional requirements set forth in the remainder of this subpart. Injection well owners and operators and EPA shall comply with these requirements.

(b) *Effective date.* The effective date of the UIC program on Indian lands is November 25, 1988.

**§§ 147.1253 and 147.1254 [Removed]**

3. Sections 147.1253 and 147.1254 are removed.

BILLING CODE 6560-50-M

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Public Health Service

### 42 CFR Part 5

### Criteria for Designation of Health Manpower Shortage Areas

**AGENCY:** Public Health Service, HHS.

**ACTION:** Final regulations.

**SUMMARY:** These final regulations revise the existing regulations governing the criteria for Designation of Health Manpower Shortage Areas, required by section 332 of the Public Health Service Act (the Act). This amendment revises the definition for the term "internees" used in the criteria for designating those Federal and State institutions which have a shortage of primary medical care, dental care, or psychiatric manpower.

**EFFECTIVE DATE:** These regulations are effective March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Richard C. Lee, Chief, Shortage Analysis Staff, Bureau of Health Care Delivery and Assistance, Parklawn Building Room 8-57, 5600 Fishers Lane, Rockville, Maryland 20857; telephone 301 443-6932.

**SUPPLEMENTARY INFORMATION:** On October 29, 1987, a Notice of Proposed Rulemaking (NPRM) to amend the existing regulations governing the criteria for Designation of Health Manpower Shortage Areas was published in the **Federal Register** (52 FR 41594) by the Assistant Secretary for Health, Department of Health and Human Services, with the approval of the Secretary. The NPRM revises the definition for the term "internees" used in the criteria for designating medium to maxium security Federal and State correctional institutions and youth detention facilities that have a shortage of primary medical care, dental care, or psychiatric manpower.

The public comment period on the proposed regulations closed on December 28, 1987. The Department received nine letters. Seven of these were from State departments of correction; one was from the provider of medical services to correctional facilities of a major metropolitan area; and one was from a contractor that provides medical services in certain State correctional facilities. The

VOL 54 ISS 40 MR 2 1989 UMI

comments and the Department's responses to them are discussed below. For clarity, the comments and responses are arranged according to the issues to which they pertain.

**Physician Visits Per Unit Time**

One comment objected to the figure of 100 inmate visits per week as establishing unrealistically high expectation for physicians workload, i.e. underestimating staff needs. Another comment asserted that the proposed standards would generate unrealistically high medical staff requirements, which States would be unable to fund given the growth of prison populations. Other respondents stated that the new criteria are more realistic and equitable than the old.

The Department has retained these figures as proposed. The Secretary notes that the HMSA criteria in general and the correctional facility criteria in particular are not intended to take into account availability of funding; rather, their purpose is to accurately identify and quantify needs and shortages in order that Federal and State programs can target those resources that are available on the neediest areas, population groups and correctional facilities.

**Time Devoted to Take Exams**

One comment questioned the implied assumption that the time required to perform a complete intake examination is equivalent to that for a regular physician visit, stating that, "generally, thorough intake examinations require more time that other patient visits."

The Department does not disagree that the intake examination would require more time than a typical patient visit. However, as discussed in the preamble to the NPRM and acknowledged in some of the other comments received, much of the intake exam is typically performed by non-physician health professionals. The proposed criteria is based on the assumption that the physician's portion of the intake exam requires no more time than a patient visit, thus the Department has made final this criterion as proposed.

**Reexaminations**

One comment noted that "many facilities which house long-term inmates repeat complete examinations at annual or bi-annual intervals," and suggested that this be considered in the formula. The Secretary believes that the proposed criterion of five visits per year on the part of long-term inmates would adequately cover any reexaminations, and, therefore, has not accepted this comment.

**Follow-up Care**

One respondent asserted that the proposed criteria seem to assume higher requirements for health care providers at intake then subsequently, and that this conflicts with the respondent's experience, which indicates higher requirements for follow-up care due to chronic conditions identified in some inmates.

The Department notes that, in the case of primary care, the factors proposed assume that one follow-up visit occurs for every two new inmates. Thus, 100 new inmates will generate 50 follow-up visits. (This could mean that 50 of the new inmates have one follow-up visit each as a result of the intake exam, or that 25 have two follow-up visits each, or that 5 have 10 visits each.) The factors proposed also assume an additional 5 visits per year for long term inmates; clearly, inmates with chronic conditions would have more than 5 visits per year, but other inmates would have less. The factor of 5 visits per year is meant to be an average and has been made final as proposed.

**Ratio for Primary Care Shortage**

One comment specifically supported the use of the ratio 1000:1 for primary medical care, saying that this "has normally worked out in a real situation where 'pre-screening' is performed by another health professional." Another comment generally supported this and the other factors selected for primary medical care, but added "we do have institutions with health service missions where utilization of physicians may run higher," involving inmates with chronic health problems, and recommended a ratio closer to 750:1 for such institutions.

The Department has not developed a revised formula which would take into account the number of patients with chronic conditions, primarily because data were not available upon which to base such a revision but also because it is questionable whether these data would be uniformly available for all correctional institutions.

**Use of Average Length-of-stay (ALOS) Factor**

One comment pointed out that, in the equation defining internees for facilities with average length-of-stay (ALOS) specified as less than one year, ALOS should not be included as a factor modifying the average number of inmates in the equation's first term, since even when one inmate leaves during the year and is replaced by another, one averge inmate's full number of visits per year will still be generated (5 visits in the case of primary care). The Department agrees and will make this correction, deleting the factor ALOS in the first term.

The same respondent also recommended that the factor ALOS not be included in the equation's third term, which estimates the follow-up visits generated by intake exams, because such follow-up visits would occur soon after admission. The Department regards the use of the ALOS factor as appropriate in this third term since some facilities have such rapid turnover that time would not permit all the otherwise-expected follow-up visits to occur. Therefore, the factor ALOS has been retained in the equation's third term.

**Use of Psychologists as Well as Psychiatrists**

One commenter pointed out that psychologists as well as psychiartrists are used to provide mental health services. The Department recognizes this fact and will consider it when making future criteria revisions.

**Dental Care Factors**

One comment stated that the proposed correctional facility dental HMSA criteria understate typical needs, since most new inmates are in need of dental treatment, many having been to a dentist seldom if ever. This commenter proposed revising the factors used for defining internees in the dental care part of the criteria accordingly.

In the process of analyzing and responding to this comment, the Department found that the Proposed Rule had indicated an assumption that a dentist can handle 30 inmate visits or intake exams per week (or 1500 per year), but had used $k = \frac{1}{3}$ to represent this assumption in the formula. In fact, $k = 1$ is the correct factor to represent this assumption. Therefore, k for dental is being changed from $\frac{1}{3}$ to 1 in the final version. This results in increasing the calculated dental needs, as the comments suggested. However, in order to avoid overestimating these needs, a partially compensating reduction in the factors b (intake exams) and c (follow-up exams) is also being made, setting $b = \frac{1}{5}$ and $c = \frac{2}{5}$.

**Intake Psychiatric Exams/Psychological Testing**

One respondent stated that, in his State's correctional facilities, new inmates are given a battery of psychological tests at intake but only those whose test results suggest a problem are seen by a psychiatrist. This might indicate that the factor b could be set to equal to zero in the correctional facility HMSA criteria for psychiatry (i.e., no psychiatrists needed for intake exams), leaving the factor c (follow-up exams) to represent follow-up psychiatric visits based on the results of the testing.

While the Department had decided not to set $b = 0$ in the final regulations, it has reduced b to $\frac{1}{5}$ and c to $\frac{2}{5}$ in the psychiatric internee formula. In addition, the Department has revised the normalization factor k for psychiatry from $k = 2$ to $k = 1$ to avoid overestimating needs.

BEST COPY AVAILABLE

**Geographic Location of Prisons**

One comment stated that the proposed criteria "fail to account for geographical location of institutions; their inaccessibility to health care professionals; and the hardship posed by physician coverage at one or more remotely-situated prison facilities providing in- and out-patient health care."

It is true that the correctional facility HMSA criteria do not take into account (and never have) whether the prison is located within a county or city which has an adequate physician supply. This consideration was not included because the HMSA criteria are for medium-to-maximum security prisons, which are thought of as self-contained, not interacting with the rest of the area where they are located. However, clearly prisons located in a well-served area rather than an isolated, remote one should find it easier to recruit physicians on contract. This fact is taken into consideration in making decisions about which HMSA-designated prisons will actually receive the limited number of National Health Service Corps (NHSC) physicians available for service in a given year.

**Other Variables**

One comment noted that the proposed criteria failed to consider specifically a number of different variables which relate to the provision of medical services in correctional facilities, e.g. the percentage of inmates over age 40; the percentage of inmates requiring chronic inpatient or outpatient care; and the percentage of inmates suffering from AIDS or other catastrophic illness. The high percentage of inmates with a history of intravenous drug abuse, leading both to the necessity for drug treatment and to increasing levels of AIDS infection in prisons, was also cited by another commenter. The Department recognizes that these are important variables, but did not have data on which to base their use in any formula, nor a model for relating these factors to the number of physicians or other health professionals required.

**Litigation on Prison Health Care**

One comment stated that "the proposed criteria ignore the frequency of litigation and stipulated settlement agreements at the Federal and State levels," and referred to physician-patient ratios and quality of care required by court rulings in such cases. The Department recognizes that court rulings may mandate a different level of care than that called for by the HMSA criteria. In such cases, the States involved (or the Federal government, if such a case were to involve a Federal prison) clearly will need to obtain the court-ordered number of health professionals. In those cases where the prison involved also meets the HMSA criteria, the Public Health Service may be able to assist in recruiting to the extent of the number needed under the HMSA criteria. However, the Department must continue to base its HMSA designation criteria exclusively upon objective data measuring the supply of health personnel, and will not revise the HMSA designation process based on legal settlements or judgments relating to particular prison health needs.

**Restriction to Federal and State Correctional Facilities Only**

One comment objected to the restriction of these criteria to Federal and State correctional facilities only, given that some such facilities serving major metropolitan areas in fact operate in lieu of State (and perhaps Federal) facilities. The Department recognizes this problem and will consider case-by-case exceptions for large correctional facilities in major metropolitan areas.

**Regulatory Flexibility Act and Executive Order 12291**

The Secretary certifies that this amendment to the regulations does not have a significant economic impact on a substantial number of small entities; it primarily affects the way correctional institution populations are counted to allow more accurate calculation of the need for health care practitioners under the existing HMSA designation process. Therefore, a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980 is not required. Further, this rule will not exceed the threshold level of $100 million established in section (b) of Executive Order 12291. For these reasons, the Secretary has determined that the rule is not a major rule under Executive Order 12291 and a regulatory impact analysis is not required.

**Paperwork Reduction Act of 1980**

There are no information collection requirements in this regulation.

**Otis R. Bowen,**

*Secretary.*

## PART 5—DESIGNATION OF HEALTH MANPOWER SHORTAGE AREAS—[AMENDED]

1. The authority citation for Part 5 continues to read as follows:

**Authority:** Sec. 215 of the Public Health Service Act, 58 Stat. 690 (42 U.S.C. 216); Sec. 332 of the Public Health Service Act, 90 Stat. 2270–72 (42 U.S.C. 254e).

**Appendix A to Part 5—[Amended]**

2. Appendix A (Criteria for Designation of Primary Care HMSAs), Part III (Facilities), paragraph A is revised to read as follows:

A. *Federal and State Correctional Institutions.*

1. *Criteria.*

Medium to maximum security Federal and State correctional institutions and youth detention facilities will be designated as having a shortage of primary medical care manpower if both the following criteria are met:

(a) The institution has at least 250 inmates.

(b) The ratio of the number of internees per year to the number of FTE primary care physicians serving the institution is at least 1,000:1.

Here the number of internees is defined as follows:

(i) If the number of new inmates per year and the average length-of-stay are not specified, or if the information provided does not indicate that intake medical examinations are routinely performed upon entry, then—Number of internees = average number of inmates.

(ii) If the average length-of-stay is specified as one year or more, and intake medical examinations are routinely performed upon entry, then—Number of internees = average number of inmates + (0.3) × number of new inmates per year.

(iii) If the average length-of-stay is specified as less than one year, and intake examinations are routinely performed upon entry, then—Number of internees = average number of inmates + (0.2) × (1 + ALOS/2) × number of new inmates per year where ALOS = average length-of-stay (in fraction of year). (The number of FTE primary care

VOL 54 ISS 40 MR 2 1989 UMI

physicians is computed as in Part I, Section B, paragraph 3 above.)

1. Determination of Degree of Shortage.

Designated correctional institutions will be assigned to degree-of-shortage groups based on the number of inmates and/or the ratio (R) of internees to primary care physicians, as follows:

Group 1—Institutions with 500 or more inmates and no physicians.

Group 2—Other institutions with no physicians and institutions with R greater than (or equal to) 2,000:1.

Group 3—Institutions with R greater than (or equal to) 1,000:1 but less than 2,000:1.

**Appendix B to Part 5—[Amended]**

3. Appendix B (Criteria for Designation of Dental Care HMSAs), Part III (Facilities), paragraph A is revised to read as follows:

*A. Federal and State Correctional Institutions.*

1. *Criteria*

Medium to maximum security Federal and State correctional institutions and youth detention facilities will be designated as having a shortage of dental manpower if both the following criteria are met:

(a) The institution has at least 250 inmates.

(b) The ratio of the number of internees per year to the number of FTE dentists serving the institution is at least 1,500:1.

Here the number of internees is defined as follows:

(i) If the number of new inmates per year and the average length-of-stay are not specified, or if the information provided does not indicate that intake dental examinations are routinely performed by dentists upon entry, then—Number of internees = average number of inmates.

(ii) If the average length-of-stay is specified as one year or more, and intake dental examinations are routinely performed upon entry, then—Number of internees = average number of inmates + number of new inmates per year.

(iii) If the average length-of-stay is specified as less than one year, and intake dental examinations are routinely performed upon entry, then—Number of internees = average number of inmates + $\frac{1}{2} \times [1 + 2 \times \text{ALOS}] \times$ number of new inmates per year where ALOS = average length-of-stay (in fraction of year).

(The number of FTE dentists is computed as in Part I, Section B, paragraph 3 above.)

2. Determination of Degree of Shortage.

Designated correctional institutions will be assigned to degree-of-shortage groups based on the number of inmates and/or the ratio (R) of internees to dentists, as follows:

Group 1—Institutions with 500 or more inmates and no dentists.

Group 2—Other institutions with no dentists and institutions with R greater than (or equal to) 3,000:1.

Group 3—Institutions with R greater than (or equal to) 1,500:1 but less than 3,000:1.

**Appendix C to Part 5—[Amended]**

4. Appendix C (Criteria for Designation of Psychiatric HMSAs), Part III (Facilities), paragraph A is revised to read as follows:

*A. Federal and State Correctional Institutions*

*1. Criteria.*

Medium to maximum security Federal and State correctional institutions and youth detention facilities will be designated as having a shortage of psychiatric manpower if both of the following criteria are met:

(a) The institution has more than 250 inmates, and

(b) The ratio of the number of internees per year to the number of FTE psychiatrists serving the institution is at least 1,000:1.

Here the number of internees is defined as follows:

(i) If the number of new inmates per year and the average length-of-stay are not specified, or if the information provided does not indicate that intake psychiatric examinations are routinely performed upon entry, then—

Number of internees = average number of inmates

(ii) If the average length-of-stay is specified as one year or more, and intake psychiatric examinations are routinely performed upon entry, then—

Number of internees = average number of inmates + number of new inmates per year

(iii) If the average length-of-stay is specified as less than one year, and intake psychiatric examinations are routinely performed upon entry, then—

Number of internees = average number of inmates + $\frac{1}{2} \times [1 + (2 \times \text{ALOS})] \times$ number of new inmates per year

where ALOS = average length-of-stay (in fraction of year) (The number of FTE psychiatrists is computed as in Part I, Section B, paragraph 3 above.)

2. Determination of Degree of Shortage.

Designated correctional institutions will be assigned to degree-of-shortage groups, based on the number of inmates and/or the ratio (R) of internees to FTE psychiatrists, as follows:

Group 1—Institutions with 500 or more inmates and no psychiatrist.

Group 2—Other institutions with no psychiatrists and institutions with R greater than (or equal to) 3,000:1.

Group 3—Institutions with R greater than (or equal to) 2,000:1 but less than 3,000:1.

## Health Care Financing Administration

## 42 CFR Parts 433 and 435

**[BQC-671-IFC]**

## Medicaid Program; Targeting Information for Income and Eligibility Verification Systems

**AGENCY:** Health Care Financing Administration (HCFA), HHS.

**ACTION:** Interim final rule with comment period.

**SUMMARY:** This rule revises regulations text that is now obsolete because of section 9101 of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99-509); this section allows State Medicaid Agencies flexibility to use selectively (target) certain information about a Medicaid recipient's income obtained through their income and eligibility verification systems (IEVS). In addition, this rule implements a congressional directive to revise the timeliness standards for use of IEVS information to grant States more time to obtain and use the data.

**EFFECTIVE DATE:** These regulations are effective April 3, 1989. They are being issued in final for the reasons explained in Waiver of Proposed Rulemaking in the Supplementary Information section below. However, we will consider any comments received by May 1, 1989 and revise the regulations as necessary. In order for comments to be considered, we must receive them at the appropriate address, as provided below, no later than 5:00 p.m. on May 1, 1989. Sections 435.945 and 435.953, however, contain information collection requirements subject to Office of Management and Budget clearance. We will publish a notice in the **Federal Register** after we receive that Office's clearance.

**ADDRESS:** Mail comments to the following address:

Health Care Financing Administration, Department of Health and Human Services, Attention: BQC-671-IFC, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave. SW., Washington, DC, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BQC-671-IFC. Comments received timely will be available for public inspection as they are received, generally beginning approximately three weeks after publication of a document, in Room 309-G of the Department's offices at 200 Independence Ave. SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202-254-7890).

**FOR FURTHER INFORMATION CONTACT:** Elliot Naide, (301) 966-5920.

**SUPPLEMENTARY INFORMATION:**

### A. Background

On April 1, 1985, section 1137 of the Social Security Act (the Act) was established with provisions aimed at ensuring that various Federally-funded welfare agencies, including the Aid to Families with Dependent Children, the Food Stamp and Medicaid programs, furnish benefits to only those individuals who are eligible for them. (Section 2651 of Pub. L. 98-369). Section 1137 requires the agencies administering these programs to have an income and eligibility verification system (IEVS) for exchanging with each other information that may be of use in establishing or verifying eligibility or benefit amounts. The provision mandated that the agencies target the use of the information to the uses most likely to be productive in identifying and preventing ineligibility and incorrect payments.

On February 28, 1986, HCFA, the Food and Nutrition Service and the Family Support Administration published jointly a final rule (51 FR 7178) to implement the IEVS for the Medicaid, Food Stamp and AFDC programs. The rule required agencies that administer these programs to review and compare all information received against the case file to determine whether it affects the applicant's or recipient's eligibility or benefits. The regulations also require the agency to initiate a case action, or make an entry in the case record that no action is necessary, within 30 days of receipt of the infomation for 80 percent of the determinations.

The reasoning behind requiring use of all information was twofold:

(1) The agencies are responsible for ensuring that all determinations are correct and we believed that by requiring the use of the largest number of data items available we might reduce errors; and

(2) We anticipated that under any circumstances an agency would exclude an item of information that was obviously erroneous or useless in the eligibility determination.

HCFA's regulations on IEVS in general are found at 42 CFR Part 435, Subpart J; § 435.952 specifically concerns the use of data.

### B. Legislation

After the three agencies jointly published the final rules, the Budget Committee of the House of Representatives in its report accompanying H.R. 5300 (which was the basis for the Omnibus Reconciliation Act of 1986) noted that the agencies' current rules do not permit targeting in the manner it said it intended to allow in the original statute (H.R. Rep. No. 727, 99th Cong., 2d Sess. 424-425 (1986)). According to this 1986 report, it was the original intent of the House Budget Committee to have States utilize a variety of information sources to verify the eligibility of applicants and recipients of benefit programs, as an effective and efficient tool in preventing benefit payments from being made to individuals who are not eligible. The report states that the Committee believed that for the use of such information to be productive, States must be afforded the discretion to target their efforts in ways they determine most cost-effective. To require a follow up in all cases where any income is indicated "was not what was intended by Congress and would result in an unnecessary and costly administrative burden on the States". (H.R. Rep. No. 727, 99th Cong., 2d Sess. 424 (1986)).

To ensure that the required matches are cost-effective verification processes, the Committee indicated that the States should be allowed to arrange the follow up of case records based on match findings in order of importance. For example, following up on individuals whose unearned income exceeds certain tolerance levels is more efficient than verifying every case with unearned income.

In addition, the Committee stated its belief that requiring States to act upon the information they receive within 30 days, as prescribed in the final rule, is unrealistic. "States have a finite amount of administrative resources, and are dependent upon the actions of others outside the agency as well as the mail system to carry out their duties. For this reason, the Committee believes a 45-day requirement is more reasonable than the 30 days set forth in the final rule. The allowance that action can be delayed further on up to 20 percent of the information items when collateral verification sources are required—as provided in the final rules—should be retained." (H.R. Rep. No. 727, 99th Cong., 2d Sess. 425 (1986)).

In section 9101 of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99-509), Congress amended section 1137 (a)(4) of the Act to prohibit the Secretary from requiring States to use the information they receive because of the IEVS to verify the eligibility of all recipients. The House Budget Committee's directive to allow the public assistance agencies 45 days to act upon information received was not included as a legislative amendment, however.

### C. Revisions to the Regulations

In order to bring the regulations into conformity with the amendment to section 1137 of the Act made by Pub. L. 99-509, and to follow clearly expressed congressional intent on the time period for acting upon information received, we are amending our regulations at 42 CFR Part 435, Subpart J.

*1. Targeting the Use of Information*

We are adding a new § 435.953 to reflect existing law (section 1137(a)(4) of the Act) to provide that all information received through the IEVS on recipients need not be used but that its use may be targeted.

The revised regulations reflect amendments to section 1137(a)(4) of the Act, which permit each State agency to review and compare against the case file (follow up) all information items or to target, for each data source, those information items that are likely to be productive in identifying and preventing ineligibility and incorrect payments.

Any agency that intends to exclude items from follow-up must submit a follow-up plan that specifies the categories to be excluded and provides a description of the criteria defining each category. For each category, the agency must provide a reasonable justification explaining why the follow-up would not be cost-effective. A formal cost-benefit analysis is not required. An agency may find it preferable to base its justifications on the general experience of its program in following up on specific categories of information.

Restriction to recipients

Under our current rules at 42 CFR § 435.948, State agencies were required to use all information concerning both applicants and recipients.

In providing that State agencies are allowed to target information, the amendment to section 1137(a)(4) of the Act refers to "recipients" only. Our current regulations requiring the use of information on all applicants and recipients have thus been superseded with respect to recipients only. Therefore, we are revising the regulations to permit targeting to be used only for recipients. When the agency receives information on applicants whom it has not yet determined eligible, the match data continues to be, as under existing regulations, not subject to targeting.

We carefully considered proposing to revise our existing regulations to permit targeting of applicants, but we have decided at this time simply to revise the regulations to bring the text into conformity with the new statutory language that already legally governs targeting in the case of recipients. We believe it is not in the best interest of the program to revise the existing requirement that information on all applicants be used. The application period is particularly important in that

VOL 54 ISS 40 MR 2 1989 UMI

the State agency conducts an intensive review of all of the factors of the applicant's eligibility, including the economic circumstances of the household. Following an initial eligibility determination, periodic redeterminations of recipients tend to be somewhat less intensive with questions concentrating on whether a change in circumstances has occurred in the past few months or is expected to occur in the next few months. Moreover, redeterminations may be conducted by telephone or mail or in group interviews. The application process is therefore more crucial to the integrity of the program and all information items must be pursued and resolved to the extent possible before authorization of assistance. However, as currently required by § 435.911, State agencies may not delay a pending application solely to await IEVS information if other evidence establishes the individual's eligibility for assistance. Information the agency requests on an applicant that it receives after it authorizes assistance is considered to be information received on a recipient and may therefore be targeted under section 1137(a)(4) of the Act and under these regulations.

These regulation revisions do not affect the requirement that State agencies request information on all recipients from the required sources but merely concern targeting the use of data received in response to the request.

These changes, as do the current regulations, apply only in those situations for which the Medicaid agency makes the eligibility determination. For Medicaid recipients eligible because they receive AFDC assistance, the AFDC IEVS requirements already apply. For aged, blind or disabled Medicaid recipients receiving SSI payments, the Medicaid IEVS requirements apply only if such recipients' Medicaid eligibility is not determined by the Social Security Administration (SSA) pursuant to section 1634 of the Social Security Act (see § 435.909).

*2. Timeframe for Action on Match Results*

These regulations also provide in § 435.952 a 45-day period for following up on information items, instead of the current 30 days; this policy would implement the directive contained in the report of the House Budget Committee. This is a maximum time period and does not preclude a State agency from setting shorter timeframes for acting on information items from a particular data base. For example, information items showing unreported UIB might be given priority over other information and be looked at immediately.

The provision that allows a 20 percent allowance for action on information items in which third party information is late remains the same as stated in § 435.952(e) and applies also to targeted data since targeting will not have any effect on the responsiveness of third parties.

*3. Quality Control Requirements*

The current rule at § 435.952 clearly states that the requirements of this section do not relieve the agency of its responsibility for determinations of erroneous payments or the agency's liability for those erroneous payments. In order to clarify that the agency is liable even for items not followed up, we are amending § 435.945, General requirements, by adding paragraph (h) to require the State agencies to retain records of all the information items received, including those not followed up. The agency will, as now, have to retain information in a manner that assures that it does not compromise information safeguards; the agency must make this information available to quality control reviewers upon request.

*4. Third Party Liability*

Targeting does not apply to activities for establishing third party liability benefit amounts. Section 1902(a)(25) of the Act requires that State agencies or local Medicaid agencies take all reasonable measures to ascertain the legal liability of third parties to pay for care and services provided to Medicaid recipients. Every employment lead, no matter how small, could potentially be a lead for health insurance.

*5. Technical Changes*

We are making three technical changes to § 435.952. In paragraph (a), by cross reference, we incorporate the change that permits State agencies to limit review and comparison of information to targeted information. In paragraph (c) we reflect the correct order the State agency must follow when processing a recipient's case file under IEVS. Finally, in paragraph (e), we extend to 45 days the timeframe that a State agency may delay action for up to 20 percent of items and limit the items to those on which it requested verification timely, instead of all items of information received.

We are also changing § 433.138(g)(1)(i). We are revising the timeframe for followup for TPL purposes from 30 to 45 days to make it consistent with the timeframe for IEVS followup. We are retaining the provision for delayed action beyond 45 days in 20 percent of the information items when the agency does not receive requested verification.

**D. Impact Analysis**

*1. Executive Order 12291*

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any final rule that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in: An annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or, significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We expect that the net effect of the targeting requirement reflected in these regulations will be to reduce State agency costs since they will not have to follow up on all data. State agencies will be able to target their follow up activities on matched data that, for example, exceed certain tolerance levels because it would not be cost-effective to follow up on matched data below those levels. The extension from 30 to 45 days of the time permitted for follow up also will reduce the pressure placed on State administrative resources. For these reasons, we have determined that no threshold criteria under E.O. 12291 are met. Therefore, a regulatory impact analysis is not required.

*2. Regulatory Flexibility Act*

We generally prepare a final regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a final rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, State agencies are not small entities. We have determined, and the Secretary certifies, that this final rule does not have a significant economic impact on a substantial number of small entities. We have therefore not prepared a regulatory flexibility analysis.

**E. Paperwork Reduction Act**

Sections 435.945 and 435.953 of this rule contain information collection requirements that are subject to the Office of Management and Budget (OMB) review under the Paperwork Reduction Act of 1980. State agencies must be able to document that they received information for data matches from all sources for quality control purposes and, if they do not intend to follow up on a category or categories of information, they must submit a plan to the Secretary justifying the exclusion as cost-effective. The reporting burden for the information collections in § 435.945 is estimated to be 432 hours annually for a maximum of 54 States and jurisdictions. The reporting burden for the information collections in § 435.953 is estimated to be 40 hours per response for a maximum of 54 States and jurisdictions for a one-time total estimated burden of 2,160 hours. (We are assuming a one-time response from all States and jurisdictions for this estimate with no revised follow-up plans. However, some States and jurisdictions may submit no plan; others may revise theirs frequently.)

A notice will be published in the **Federal Register** when the OMB approval is obtained. Organizations and individuals desiring to submit comments on the information collection requirements should follow the directions in the address section within 30 days after publication of this rule.

Section 435.952 of this rule also contains information collection requirements that are subject to the OMB review. These requirements were approved by that Office on April 11, 1986 in accordance with the Paperwork Reduction Act. The approval number is 0938-0467 and the approval expires April 30, 1989. HCFA is requesting an extension of this approval for an additional 3 years.

**F. Waiver of Proposed Rulemaking**

Generally, we publish a notice of proposed rulemaking in the **Federal Register** and afford public comment before issuing a final rule. However, if adherence, to these procedures would be impracticable, unnecessary or contrary to the public interest, we may waive the procedures.

This interim final rule with comment period simply revises the text of existing regulations to bring them into conformity with statutory requirements and clearly expressed congressional intent without interpretation. With respect to the provisions permitting targeting of information on recipients, the revisions in these regulations have no substantive effect, as section 1137(a)(4) already requires that such targeting be permitted, even though the text of the existing regulations provides otherwise.

Therefore, the Secretary finds good cause that issuing a notice of proposed rulemaking before these final rules is unnecessary and contrary to the public interest.

**G. Response to Comments**

Because of the large number of items of correspondence we normally receive on rules requesting public comment, we are not able to acknowledge or respond to them individually.

However, we will consider all comments that we receive by the date and time specified in the "DATE" section of this preamble, and, if we revise this final rule, we will respond to the comments in the preamble of that revised rule.

**H. List of Subjects**

*42 CFR Part 433*

Administrative practice and procedure, Child support, Claims, Grant programs-health, Medicaid, Reporting and recordkeeping requirements.

*42 CFR Part 435*

Aid to Families with Dependent Children, Grant programs-health, Medicaid, Reporting and recordkeeping requirements, Supplemental Security Income (SSI), Wages.

42 CFR Chapter IV, Subchapter C is amended as set forth below:

**CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES**

* * * * *

**SUBCHAPTER C—MEDICAL ASSISTANCE PROGRAMS**

* * * * *

A. Part 433 is amended as set forth below:

1. The authority citation continues to read as follows:

**Authority:** Secs. 1102, 1137, 1902(a)(4), 1902(a)(25), 1902(a)(45), 1903(a)(3), 1903(d)(2), 1903(d)(5), 1903(o), 1903(p), 1903(r), and 1912 of the Social Security Act; 42 U.S.C. 1302, 1320b-7, 1396a(a)(4), 1396a(a)(25), 1396a(a)(45), 1396b(a)(3), 1396b(d)(2), 1396b(d)(5), 1396b(o), 1396b(p), 1396b(r) and 1396k, unless otherwise noted.

**§ 433.138 [Amended]**

2. In paragraph (g)(1)(i) of § 433.138, "30 days" is revised to read "45 days".

B. Part 435 is amended as follows:

1. The authority citation continues to read as follows:

**Authority:** Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. The table of contents is amended by adding a new § 435.953 to read as follows:

**PART 435—ELIGIBILITY IN THE STATES, DISTRICT OF COLUMBIA, THE NORTHERN MARIANA ISLANDS AND AMERICAN SAMOA**

* * * * *

**Subpart J—Eligibility in the States and District of Columbia**

* * * * *

**§ 435.953 Identifying items of information to use.**

* * * * *

3. In § 435.945, paragraph (a) is revised and paragraph (h) is added as follows:

**§ 435.945 General requirements.**

(a) The agency must request and use information timely in accordance with §§ 435.948, 435.952, and 435.953 of this subpart for verifying Medicaid eligibility and the amount of medical assistance payments.

* * * * *

(h) The agency must retain a record of all information items received, including those not followed up, and make the records available for quality control review purposes.

4. Section 435.952, paragraphs (a) and (c) through (e) are revised to read as follows:

**§ 435.952 Use of information.**

(a) Except as provided under § 435.953 of this subpart, the agency must review and compare against the casefile all information received under §§ 435.940 through 435.960 to determine whether it affects the applicant's or recipient's eligibility or amount of medical assistance payment. The agency must also verify the infomation if determined appropriate by agency experience or if required by § 435.955.

* * * * *

(c) Except as specified in § 435.953 of this subpart and paragraph (d) of this section, for recipients, the agency must, within 45 days of receipt of an item of information, request verification (if appropriate), determine whether the information affects eligibility or the amount of medical assistance payment, and either initiate a notice of case action to advise the recipient of any adverse action the agency intends to take or make an entry in the casefile that no further action is necessary.

(d) Subject to paragraph (e) of this section, if the agency does not receive requested third party verification within the 45-day period after receipt of information, the agency may determine whether the information affects eligibility or correct amount of medical

VOL 54 ISS 40 MR 2 1989 UMI

assistance payment after the 45-day period. However, the agency must make any delayed determinations permitted under this paragraph—

(1) Promptly, as required by § 435.916, if the verification is received before the next redetermination; or

(2) In conjunction with the next redetermination if no verification is received before that redetermination.

(e) The number of determinations delayed beyond 45 days from receipt of an item of information (as permitted by paragraph (d) of this section) must not exceed twenty percent of the number of items of information for which verification was requested.

* * * * *

5. A new § 435.953 is added to read as follows:

**§ 435.953 Identifying items of information to use.**

(a) With respect to information received on recipients under §§ 435.940 through 435.960, the agency may either review and compare against the case file all items of information received or it may identify (target) separately for each data source the information items that are most likely to be most productive in identifying and preventing ineligibility and incorrect payments.

(b) An agency that wishes to exclude categories of information items must submit for the Secretary's approval a follow-up plan describing the categories that it proposes to exclude. For each category, the agency must provide a reasonable justification that follow-up is not cost-effective; a formal cost/benefit analysis is not required.

(c) If an agency receives an item of unemployment compensation information from the Internal Revenue Service or earnings information from SSA that duplicates an item of information previously received from another source and followed up, the agency may exclude that information item without justification.

(d) An agency may submit a follow-up plan or alter its plan at any time by notifying the Secretary and submitting the necessary justification. The Secretary approves or disapproves categories of items to be excluded under the plan within 60 days of its submission. The categories approved by the Secretary constitute an approved agency follow-up plan for IEVS.

(Catalog of Federal Domestic Assistance Programs No. 13.714, Medical Assistance).

BILLING CODE 4120-03-M

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 73

**[MM Docket No. 88-146; RM-6048]**

### Radio Broadcasting Services; Osceola, AR

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This document substitutes Channel 251C for Channel 251C2 at Osceola, Arkansas, and modifies the Class C2 license of The Dittman Group, Inc. for Station KMPZ(FM), as requested, to specify operation on the higher class channel, thereby providing that community with its first wide coverage area FM service. Reference coordinates for Channel 251C at Osceola are 35-28-02 and 90-11-27. With this action, the proceeding is terminated.

**EFFECTIVE DATE:** April 10, 1989.

**FOR FURTHER INFORMATION CONTACT:** Nancy Joyner, Mass Media Bureau, (202) 634-6530.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Report and Order, MM Docket No. 88-146, adopted February 3, 1989, and released February 23, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

### 47 CFR Part 73

**[MM Docket No. 88-166; RM-6287]**

### Radio Broadcasting Services; Lawton, OK

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** The Commission, at the request of Broadco of Texas, Inc., allots Channel 258C2 to Lawton, Oklahoma, and modifies its license for Station KMGZ to specify operation on the higher powered channel. Channel 258C2 can be allotted to Lawton with a site restriction of 13.2 kilometers (8.2 miles) east to avoid a short-spacing to Station KBOG, Channel 257A, Cordell, Oklahoma. The coordinates for the allotment are North Latitude 33-34-43 and West Longitude 98-16-25. At the request of Mark Norman and Cameron University, we are also retaining Channel 237A at Lawton but not reserving it for noncommercial educational use as requested by Cameron. Channel 237A can be allotted to Lawton without the imposition of a site restriction. The coordinates for this allotment are North Latitude 34-36-42 and West Longitude 98-24-42. With this action, this proceeding is terminated.

**DATES:** Effective April 10, 1989. The window period for filing applications for Channel 237A at Lawton will open on April 11, 1989, and close on May 11, 1989.

**FOR FURTHER INFORMATION CONTACT:** Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

### 47 CFR Part 73

**[MM Docket No. 88-33; RM-6156, RM-6428]**

### Radio Broadcasting Services; Austin, TX et al.

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This document substitutes Channel 272C2 for Channel 272A at Austin, Texas, and modifies the license of Station KPEZ(FM) to specify operation on the higher class co-channel, at the request of Clear Channel Communications, Inc. In addition, in order to accomplish the Austin substitution, Channel 223A is substituted for Channel 272A at Yoakum, Texas, and the license of Station KYOC(FM) is modified accordingly. In addition, this action allots Channel 260A to Hallettsville, Texas, as a first local FM service at the request of Fred Lundgren. Channel 272C2 at Austin requires a site restriction of 13.0 kilometers (8.1 miles) southwest of the city, at coordinates 30-11-53 and 97-50-06. Channel 223A at Yoakum requires a site restriction of 11.1 kilometers (6.9 miles) northwest of the city, at coordinates 29-20-29 and 97-14-54. A site restriction of 11.5 kilometers (7.2 miles) east of Hallettsville is required for Channel 260A, at coordinates 29-25-46 and 96-49-25. Concurrence of the Mexican government has been obtained. With this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This document allots FM Channel 230A to Magee, Mississippi, in response to a petition filed by Airwaves Company. The coordinates for Channel 230A at Magee are 31-52-18 and 89-43-54. Colon Johnson filed a conflicting petition in this proceeding requesting the allotment of Channel 230A to Pearl, Mississippi. However, since no supporting comments have been received for a channel at Pearl, we shall dismiss the petition for lack of interest.

**DATES:** Effective April 10, 1989. The window period for filing applications for Channel 230A at Magee, Mississippi, will open on April 11, 1989, and close on May 11, 1989.

**FOR FURTHER INFORMATION CONTACT:** Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Report and Order, MM Docket 88-312, adopted February 3, 1989, and released February 23, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

**[MM Docket No. 87-7; FCC 88-407]**

**Broadcast Services; Amendment of the Radio-TV Cross-Ownership Rule, Section 73.3555 of the Commission's Rules and Regulations, to Liberalize the Commission's Waiver Policy With Respect to the Common Ownership of a Radio-TV Station Combination in the Same Market**

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** On December 12, 1988, the Commission adopted amendments to the radio-TV cross-ownership rule contained in § 73.3555(b) of the Commission's Rules and Regulations. Specifically, the Commission adopted a new waiver policy under which it will look with favor upon waiver applications involving either (1) stations in the top 25 ADI television markets where there will be 30 separate broadcast licensees or "voices" after the combination, or (2) "failed" stations that have not been operated for a substantial period of time or that are involved in bankruptcy proceedings; all other applications will be examined on a more rigorous case-by-case basis. The Commission will not grant any application under this policy, however, if the proposed combination would result in any one entity holding an attributable interest in more than one AM and FM radio station within any single television "metro" market, as defined by Arbitron Ratings Company.

**EFFECTIVE DATE:** March 31, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Michele Farquhar, Policy and Rules Division, Mass Media Bureau, (202) 632-7792.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's decision in MM Docket No. 87-7, adopted December 12, 1988 and released February 23, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

**Summary of Decision**

1. This decision relaxes one of the Commission's local ownership rules—the radio-TV cross-ownership rule, which prohibits the common ownership of radio and television stations in the same television market. Although the Commission is retaining the rule, it is adopting a waiver policy under which it will look with favor upon waiver requests when certain specific criteria are met. First, the Commission will tend to look favorably upon waiver applications involving radio and television station combinations in the top 25 television markets where there will be at least 30 separately owned, operated and controlled broadcast licensees or "voices" after the proposed merger. Second, it will also look favorably upon requests involving "failed" stations that have not been operated for a substantial period of time or that are involved in bankruptcy proceedings. All other waiver applications will be examined on a more rigorous case-by-case basis which will place particular emphasis on the potential benefits of the combination, the types of facilities involved, the number of stations already owned by the applicant, the financial difficulties of the station(s), and the nature of the market in light of diversity and competition concerns. Under this new waiver policy, however, the Commission will not grant any application if the proposed combination would result in any one entity holding an attributable interest in more than one AM and one FM radio station within any single television "metro" market, as defined by Arbitron Ratings Company.

2. The radio-TV cross-ownership rule was adopted in 1970 in order to promote the dual goals of economic competition and viewpoint diversity in the ownership of broadcast stations. The *Notice of Proposed Rule Making* in this proceeding proposed relaxing both the radio-TV cross-ownership and the radio "duopoly" rules to reflect the tremendous growth in the number and types of media outlets in large and small markets in the 18 years since the rules were last examined by the Commission. Based on the record in this proceeding and the overwhelming support of the comments received, the Commission voted to relax the duopoly rule to a principal-city contour standard on October 27, 1988. The commenters also agreed overwhelmingly with the Commission's initial determination that the radio-TV cross-ownership rule should be liberalized given the increased availability of media outlets in markets of all sizes and the benefits of common station ownerships.

3. In particular, the commenters submitted evidence that substantial economies of scale and cost savings could result from joint station ownership, which in turn would benefit the public by permitting broadcasters to invest more money and other resources into better and more diverse programming. Specifically, many agreed that efficiencies inherent in joint ownership might lead to more news and public affairs programming, a greater diversity of program formats, and better technical facilities, and could enable struggling radio and television stations to remain on the air. Furthermore, data and studies submitted in this proceeding indicated that relaxing the rule is unlikely to affect economic competition adversely.

4. In an abundance of caution, however, the Commission decided to retain the rule for all markets and adopt a new, more relaxed case-by-case waiver policy for all potential radio-TV combinations. Under this policy, the Commission will look with favor upon waiver requests that meet either of two standards and will review all other applications based upon certain specified public interest criteria. These new waiver standards would replace the current exception for radio-UHF television station combinations in Note 4 of § 73.3555, so that these combinations would now be evaluated under the same public interest criteria as all other prospective combinations. These amendments to § 73.3555 will become effective March 31, 1989.

**List of Subjects in 47 CFR Part 73**

Radio broadcasting, Television broadcasting.

**Rule Amendments**

Part 73 of Title 47 of the Code of Federal Regulations is amended as follows:

**PART 73—[AMENDED]**

1. The authority citation for Part 73 continues to read as follows:

**Authority:** 47 U.S.C. 154 and 303.

2. Section 73.3555 is amended by deleting the fifth and sixth sentences of Note 4 which begin with the words "This section" and end with the words "public interest" and adding a new Note 7, which reads as follows:

**§ 73.3555 Multiple ownership.**

* * * * *

**Note 7:** The Commission will entertain requests to waive the restrictions of paragraph (b) of this section on a case-by-case basis. The Commission will look favorably upon waiver applications that meet either of the following two standards: (1) Those involving radio and television station combinations in the top 25 television markets where there will be at least 30 separately owned, operated and controlled broadcast licensees after the proposed combination, as determined by counting television licensees in the relevant ADI television market and radio licensees in the relevant television metropolitan market; or (2) those involving "failed" broadcast stations that have not been operated for a substantial period of time, *e.g.*, four months, or that are involved in bankruptcy proceedings. For the purposes of determining the top 25 ADI television markets, the relevant ADI television market, and the relevant television metropolitan market for each prospective combination, we will use the most recent *Arbitron Ratings Television ADI Market Guide*. We will determine the number of radio stations in the relevant television metropolitan market and the number of television licensees within the relevant ADI television market based on the most recent Commission ownership records. Other waiver requests will be evaluated on a more rigorous case-by-case basis, as set forth in the *Second Report and Order* in MM Docket No. 87-7, FCC 88-407, released February 23, 1989. In implementing this new waiver policy, we will not grant any application if the proposed combination would result in any one entity holding an attributable interest in more than one AM and FM station within any single television metropolitan market.

**[FCC 89-26]**

**Maritime Services; Amendment to Permit Additional Use of VTS Channels in the Port Areas of New York and New Orleans**

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This action amends the Commission's rules for Vessel Traffic Services (VTS) systems for the port areas of New York and New Orleans. Effective July 30, 1988, the United States Coast Guard discontinued its VTS operations in these two port areas. This Order permits use of the affected VHF channels in these port areas by eligible users for other than VTS operations, pending possible future use for VTS communications.

**EFFECTIVE DATE:** March 2, 1989.

**ADDRESS:** Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Eric Malinen, Aviation & Marine Branch, Private Radio Bureau, (202) 632-7175.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Order, adopted January 27, 1989, and released February 15, 1989. The complete text of this Commission action, including the rule amendment, is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC 20554. The complete text of this action, including the rule amendment, may also be purchased from the Commission's copy contractor, International Transcription Services,

VOL 54 ISS 40 MR 2 1989 UMI

(202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

**Summary of Order**

1. The maritime services rules have been amended to allow Vessel Traffic Services (VTS) channels in the port areas of New York and New Orleans, LA, to be used by eligible users for other than VTS operations, pending possible future use for VTS communications.

2. Operated by the United States Coast Guard (Coast Guard), VTS systems are ship movement reporting systems designed to prevent damage to ships, bridges, and other structures in U.S. navigable waters. VTS systems are also used to minimize environmental damage associated with navigational accidents. Effective July 30, 1988, the Coast Guard discontinued its VTS systems for the port areas of New York and New Orleans, leaving VHF marine channels 11 and 14 in New York, and channels 11, 12, and 14 in New Orleans, idle.

3. The Commission noted that allowing the above frequencies to be used for other purposes instead of remaining idle would increase spectrum efficiency and help satisfy the demand for maritime frequencies in these two port areas. The Commission's action allows eligible users in the two port areas to be licensed to use channel 11 for commercial communications and channels 12 and 14 for port operations communications, with one exception: the Coast Guard retains channel 12 in New York for anchorage management services that have continued despite the closing of the New York VTS system.

4. The Commission recognized that the Coast Guard acted due to budgetary constraints, and that re-establishment of one or both of the two VTS systems is a possibility. The Commission therefore ordered that licenses granted under the Order be granted only on a provisional basis, contingent on a continuation of Coast Guard policy. The Commission may thus require operations pursuant to such conditional licenses to cease upon notification to the licensee, or may choose not to renew such licenses, if VTS systems for the port areas of New York and New Orleans are re-established.

5. The amended rule is set forth at the end of this document.

6. The rule amendment contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501-3520, and found to contain no new or modified form, information collection or recordkeeping, labeling, disclosure, or record retention requirements; and will not increase or decrease burden hours imposed on the public.

7. Because the Commission found that the rule amendment contained herein constitutes a minor amendment to the Commission's Rules in which the public is not likely to be interested, the Commission found for good cause that compliance with the notice and comment procedures of the Administrative Procedure Act, 5 U.S.C. 553(b)(B), was unnecessary. Furthermore, in light of the heavy maritime frequency traffic in New York and New Orleans, the Commission found good cause to make the specified VTS channels available immediately. Therefore, the rule amendment is effective immediately upon this publication in the **Federal Register**.

8. The amended rule is issued under the authority contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r). The authority citation for Part 80 continues to read as follows:

**Authority:** Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply 48 Stat. 1064-1068, 1081-1105, as amended; 47 U.S.C. 151-155, 301-609; 3 UST 3450, 3 UST 4726, 12 UST 2377, unless otherwise noted.

**List of Subjects in 47 CFR Part 80**

Coast stations, Radio, Ship stations, Telephone.

Federal Communications Commission.

**Donna R. Searcy,**

*Secretary.*

**Amended Rule**

Part 80 of Chapter I of Title 47 of the Code of Federal Regulations is amended, as follows:

1. The authority citation for Part 80 continues to read as follows:

**Authority:** Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply 48 Stat. 1064-1068, 1081-1105, as amended; 47 U.S.C. 151-155, 301-609; 3 UST 3450, 3 UST 4726, 12 UST 2377, unless otherwise noted.

2. Section 80.383(a) is revised to read as follows:

**§ 80.383 Vessel Traffic Services (VTS) system frequencies.**

* * * * *

(a) Assigned frequencies:

VESSEL TRAFFIC CONTROL FREQUENCIES

| Carrier frequencies (MHz) | Geographic areas |
|---|---|
| 156.250 | Seattle. |
| 156.550 | New York [1], New Orleans [1], Houston. |
| 156.600 | New York [1], New Orleans [1], Houston. |
| 156.700 | New York [1], New Orleans [1], Seattle. |

[1] Until further notice, this frequency is available for use as permitted by § 80.373(f), notwithstanding the provisions of footnote 3 that are applicable to the VTS system. Availability is a result of the closure of the VTS systems for the port areas of New York and New Orleans. If the United States Coast Guard re-establishes one or both of these systems, the Commission may require operations pursuant to such conditional licenses for this frequency to cease, or may choose not to renew such conditional licenses. All licenses for this frequency will be expressly conditioned upon the continued availability of the frequency for non-VTS use.

BILLING CODE 6712-01-M

## DEPARTMENT OF TRANSPORTATION

### Office of the Secretary

### 49 CFR Part 1

**[OST Docket No. 1; Amdmt 1-227]**

### Organization and Delegation of Powers and Duties to Administrator of Federal Railroad Administration

**AGENCY:** Office of the Secretary, DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment delegates to the Administrator of the Federal Railroad Administration ("FRA") all functions vested in the Secretary of Transportation ("Secretary") by section 18 (g) and (h) of the Rail Safety Improvement Act of 1988 (Pub. L. No. 100-342, 102 Stat. 636) since these functions relate to duties normally carried out by FRA.

**EFFECTIVE DATE:** The effective date of this amendment is February 25, 1989.

**FOR FURTHER INFORMATION CONTACT:** Samuel E. Whitehorn, Esq., Office of the General Counsel, C-50, Department of Transportation, 400—7th Street, SW., Washington, DC 20590 (202) 366-9306.

**SUPPLEMENTARY INFORMATION:** Since this amendment relates to Departmental management, procedures, and practice, notice and comment on it are unnecessary, and it may be made effective in fewer than thirty days after publication in the **Federal Register**.

Section 18 of the Rail Safety Improvement Act of 1988 contains two provisions related to rail passenger service and the operation of such service by the National Railroad Passenger Corporation ("Amtrak"). Section 18(g) provides that Amtrak or the owner of any facility which presents

a danger to the employees, passengers, or property of Amtrak may petition the Secretary of Transportation for assistance to the owner of the facility for relocation or other remedial measures to minimize or eliminate such danger. If the Secretary determines that the facility presents a danger of death or serious injury to any employee or passenger of Amtrak or serious damage to any property of Amtrak and that the owner of the facility should not be expected to bear the cost of the relocation or other remedial measures necessary to minimize or eliminate the danger, then the Secretary is to recommend to Congress that Congress authorize funding, by reimbursement or otherwise, for the relocation or other remedial measures.

Section 18(h) provides that Amtrak may apply to the Secretary of Transportation, alone or in cooperation with the owner or operator of any rail passenger station, for funding appropriated by Congress to correct violations of building, construction, fire, electric, sanitation, mechanical, or plumbing codes, that were the subject of a violation notice received before October 1, 1987, from state or local authorities.

Since both of these statutory provisions involve rail passenger service issues traditionally within the responsibility of the Federal Railroad Administrator, they are being delegated to the Administrator.

**List of Subjects of 49 CFR Part 1**

Authority delegations (government agencies), Organization and functions (government agencies), Transportation Department.

For the reasons set forth in the preamble, Title 49, Part 1, of the Code of Federal Regulations is amended as follows:

**PART 1—[AMENDED]**

1. The authority citation for Part 1 continues to read as follows:

**Authority:** 49 U.S.C. 322.

2. Section 1.49 of Part 1 of Title 49, Code of Federal Regulations, is amended by adding at the end thereof a new paragraph (cc), and the introductory text of § 1.49 is reprinted for the convenience of the reader, as follows:

**§ 1.49 Delegations to Federal Railroad Administrator.**

The Federal Railroad Administrator is delegated authority to—

* * * * *

(cc) Carry out the functions vested in the Secretary by section 18 (g) and (h) of the Rail Safety Improvement Act of 1988 (Pub. L. No. 100-342).

Issued in Washington, DC, on February 25, 1989.

BILLING CODE 4910-62-M

## National Highway Traffic Safety Administration

### 49 CFR Part 580

**[Docket No. 87-09; Notice 4E]**

### Odometer Disclosure Requirements; Alabama

**AGENCY:** National Highway Traffic Safety Administration.

**ACTION:** Grant of petition for extension of time (Alabama).

**SUMMARY:** This is in response to a petition for an extension of time filed by the Alabama Department of Revenue, Motor Vehicle Division (Alabama). Alabama cannot conform its laws and title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Alabama an extension of time, until December 31, 1989, to achieve compliance. Because Alabama has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted Alabama's petition for an extension of time. Alabama has until December 31, 1989 to revise its titles and laws to meet the requirements of the Truth in Mileage Act and the final rule.

**FOR FURTHER INFORMATION CONTACT:** Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202-366-1834).

**SUPPLEMENTARY INFORMATION:**

**Background**

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to such compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

**Alabama's Petition**

The Alabama Department of Revenue, Motor Vehicle Division, (Alabama) submitted a petition for an extension of time. In support of its petition, Alabama states that it will require a conforming odometer disclosure statement with every application for title to support the final reassignment to the title applicant. This requirement and computer programming changes, which have been requested, will ensure that Alabama is able to include the odometer reading on the title and whether or not the odometer reading reflects the actual mileage or exceeds the mechanical limits of the odometer. Legislation paralleling the Federal law has been drafted and will be introduced in the Alabama Legislature shortly. Alabama is currently working to develop a conforming title document. Finally, Alabama states that it has a seven month stock of title documents and that issuing conforming title documents prior to exhausting its current supply "will create a severe financial burden on an already tight budget." Therefore, Alabama requests that it be granted an extension of time until December 31, 1989.

**NHTSA's Response to the Petition**

NHTSA finds that Alabama has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

Since enactment of the Truth in Mileage Act and the issuance of the implementing regulation, Alabama drafted and introduced legislation to enact odometer statutes which parallel the Federal odometer law. In addition, Alabama has requested computer programming changes and will require, on or before April 29, 1989, that each application for title be accompanied by a conforming odometer disclosure statement. These two actions will ensure that the title documents, issued

VOL 54 ISS 40 MR 2 1989 UMI

by Alabama, will conform to the Federal requirements by including an odometer reading and a notation of whether or not the odometer reading reflects the actual mileage or whether the reading reflects the mileage in excess of the designed mechanical limits. Alabama is currently developing a conforming title document. Destroying a seven month supply of title documents could result in a severe financial burden to Alabama.

In light of Alabama's past and planned actions, and in order to allow Alabama to expend its current supply of title documents, we grant Alabama's request for an extension of time until December 31, 1989, to revise its title documents and laws to meet the Federal criteria.

**Authority:** 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e)

Issued on February 27, 1989.

BILLING CODE 4910-59-M

## 49 CFR Part 580

**[Docket No. 87-08; Notice 4F]**

## Odometer Disclosure Requirements; Delaware

**AGENCY:** National Highway Traffic Safety Administration.

**ACTION:** Grant of petition for extension of time (Delaware).

**SUMMARY:** This is in response to a petition for an extension of time filed by the Delaware Department of Public Safety, Division of Motor Vehicles (Delaware). Delaware cannot conform its title documents and laws to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Delaware an extension of time, until January 1, 1990, to achieve compliance. Because Delaware has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted Delaware's petition for an extension of time. Delaware has until January 1, 1990 to revise its title documents and its laws to meet the requirements of the Truth in Mileage Act and the final rule.

**FOR FURTHER INFORMATION CONTACT:** Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202-366-1834).

**SUPPLEMENTARY INFORMATION:**

### Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extenison of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to such compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

### Delaware's Petition

The Delaware Department of Public Safety, Division of Motor Vehicles, (Delaware) submitted a petition for an extension of time. In support of its petition, Delaware states that it drafted legislation to amend its existing odometer mileage law and has requested funds in its budget request to accomplish revisions to the title document and reassignment forms. Although the Delaware General Assembly convened in January, due to recesses, most legislative action will take place after April 15, 1989. Delaware is unable to purchase new title documents until a new budget is enacted and a contract is awarded. Finally, Delaware is planning revisions to its title documents to comply with the Federal law and regulations and computer programming changes. Therefore, Delaware requests that it be granted an extension of time until January 1, 1990.

### NHTSA's Response to the Petition

NHTSA finds that Delaware has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

Since the enactment of the Truth in Mileage Act, Delaware has drafted legislation to amend its existing odometer mileage law and requested the necessary funds to accomplish revisions to the title documents and reassignment forms. The Delaware General Assembly convened in January, but due to recesses, the April 29, 1989 effective date of the Federal laws and regulations does not afford the General Assembly sufficient time to consider the proposed legislation.

In light of Delaware's past and planned actions, we grant Delaware's request for an extension of time until January 1, 1990, to revise its titles documents and its laws to meet the Federal criteria.

**Authority:** 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e).

## Odometer Disclosure Requirements; Georgia

**AGENCY:** National Highway Traffic Safety Administration.

**ACTION:** Grant of petition for extension of time (Georgia).

**SUMMARY:** This is in response to a petition for an extension of time filed by the Georgia Department of Revenue, Motor Vehicle Division (Georgia). Georgia cannot conform its laws and title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Georgia an extension of time, until July 1, 1990, to achieve compliance. Because Georgia has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and intends to take additional action while the extension is in effect, we have granted Georgia's petition for an extension of time until July 1, 1990 to revise its laws and its title documents to meet the requirements of the Truth in Mileage Act and the final rule.

**FOR FURTHER INFORMATION CONTACT:** Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202-366-1834).

**SUPPLEMENTARY INFORMATION:**

### Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to such compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer rules, the agency published final rules, which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

### Georgia's Petition

The Georgia Department of Revenue, Motor Vehicle Division, (Georgia) submitted a petition for an extension of time. In support of its petition, Georgia states that it has been actively implementing the provisions of the Truth in Mileage Act. Georgia's current title was revised in March 1988 (after NHTSA's notice of proposed rulemaking, but prior to the issuance of NHTSA'S final rule). In addition, the Georgia Legislature revised some of the State's laws to conform to the Truth in Mileage Act, however, some additional revisions are needed to conform to NHTSA's August 1988 final rule. Georgia is uncertain whether the current legislature, which meets until March 1989, will enact all of the enabling legislation. Georgia may need to defer to the next legislative session which begins in January 1990. Computer programs at State and county levels must be revised. Therefore, Georgia requests that it be granted an extension of time until July 1, 1990.

### NHTSA's Response to the Petition

NHTSA finds that Georgia has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

In March 1988, Georgia redesigned its title document, incorporating several improved features. New security features were used. Georgia added spaces for the printed name of the seller and buyer. These new titles also include a more thorough reference to the Federal law. However, in order to conform with the Federal requirements, as noted in Georgia's petition, Georgia must make additional revisions to the title document. (The State will be notified by letter of the changes needed.) Georgia is also revising its laws to meet the new Federal requirements and expects to make changes to its computer programs.

In light of Georgia's past actions and its expressed intention to make additional changes, and in order to allow Georgia to expend its current supply of title documents which it had ordered prior to the publication of NHTSA's final rule, we grant Georgia's request for an extension of time until July 1, 1990, to revise its title documents and its laws to meet the Federal criteria.

**[Docket No. 87-09; Notice 4H]**

## Odometer Disclosure Requirements; Maryland

**AGENCY:** National Highway Traffic Safety Administration.

**ACTION:** Grant of petition for extension of time (Maryland).

**SUMMARY:** This is in response to a petition for an extension of time filed by the Maryland Motor Vehicle Administration (Maryland). Maryland cannot conform its title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant Maryland an extension of time, until April 30, 1990, to achieve compliance. Because Maryland has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted Maryland's petition for an extension of time. Maryland has until April 30, 1990 to revise its title documents to meet the requirements of the Truth in Mileage Act and the final rule.

**FOR FURTHER INFORMATION CONTACT:** Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202-366-1834).

**SUPPLEMENTARY INFORMATION:**

### Background

Section 2(c) of the Truth in Mileage Act of 1986 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations sets forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to achieve such compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

### Maryland's Petition

The Maryland Motor Vehicle Administration (Maryland) submitted a petition for an extension of time. In support of its petition, Maryland states that in September 1988, Maryland began to revise its title and reassignment documents to conform to the Truth in Mileage Act and the implementing regulations. Maryland is redesigning the title document to incorporate all the information required including space for the signatures and printed names of the buyers and sellers and mileage disclosures. Once the format is finalized, Maryland will submit it to NHTSA for review and enter into a contract for the printing of the title documents. Maryland estimates that this process will take between eight and ten months. In addition, Maryland is designing an automated titling system that will enable the State to issue a title document within forty-eight hours after it receives an application for title. Therefore, Maryland requests that it be granted an extension of time until April 30, 1990.

### NHTSA's Response to the Petition

NHTSA finds that Maryland has made reasonable efforts to achieve compliance with the Motor Vehicle

VOL 54 ISS 40 MR 2 1989 UMI

Information and Cost Savings Act and the implementing regulations.

After enactment of the regulation implementing the Truth in Mileage Act, Maryland began to redesign its title documents to incorporate the information required by the Act. Maryland will submit a copy of this title specimen to NHTSA for review. Upon completion of this review, the State will be notified by letter as to the acceptability of the proposed title.

In light of Maryland's past and planned actions, we grant Maryland's request for an extension of time until April 30, 1990, to revise its title documents to meet the Federal criteria.

**[Docket No. 87-09; Notice 4]**

## Odometer Disclosure Requirements; New Hampshire

**AGENCY:** National Highway Traffic Safety Administration.

**ACTION:** Grant of petition for extension of time (New Hampshire).

**SUMMARY:** This is in response to a petition for an extension of time filed by the New Hampshire Department of Safety, Division of Motor Vehicles (New Hampshire). New Hampshire cannot conform its title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant New Hampshire an extension of time, until April 29, 1990, to achieve compliance. Because New Hampshire has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted New Hampshire's petition for an extension of time. New Hampshire has until April 29, 1990 to revise its title documents to meet the requirements of the Truth in Mileage Act and the final rule.

**FOR FURTHER INFORMATION CONTACT:** Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202-366-1834).

**SUPPLEMENTARY INFORMATION:**

### Background

Section 2(c) of the Truth in Mileage Act of 1988 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to such compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needed additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

### New Hampshire's Petition

The New Hampshire Department of Safety, Division of Motor Vehicles, (New Hampshire) submitted a petition for an extension of time. In support of its petition, New Hampshire states that its title meets the security requirements of the law and the August 1988 regulation. The title is printed on security paper by the intaglio method and includes latent images and micro-line printing. To enable the detection of alterations, the title has erasure sensitive background inks. New Hampshire is actively seeking to secure its separate reassignment documents. New Hampshire is also modifying its title to meet the new requirements and expects to issue a title upon which the owner's and lienholder's names and addresses, vehicle identification information, and date of issue are computer generated. Finally, New Hampshire states that it has a one year supply of titles and that issuing conforming documents on April 29, 1989, "would constitute an undue hardship." Therefore, New Hampshire requests that it be granted an extension of time until April 29, 1990.

### NHTSA's Response to the Petition

NHTSA finds that New Hampshire has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

Since 1983, New Hampshire has issued title documents which are set forth by a secure process. After enactment of the Truth in Mileage Act and the implementing regulations, New Hampshire planned changes to their computer system and will be issuing title documents upon which certain information will be computer generated and printed. This action will lessen the likelihood of errors which could result from transposing numbers and/or letters when copying them from a title application. This action will also deter alterations because it is more difficult to alter information that is printed by a computer than to alter information that is handwritten in ink. The compter data and the title information will also be consistent. New Hampshire also began to modify its title to meet the new Federal requirements and destroying a one year supply of titles could result in hardship.

In light of New Hampshire's past and planned actions, and in order to allow New Hampshire to expend its current supply of titles, we grant New Hampshire's request for an extension of time until April 29, 1990, to revise its title documents to meet the Federal criteria.

**Authority:** 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e).

## Odometer Disclosure Requirements; New York

**AGENCY:** National Highway Traffic Safety Administration.

**ACTION:** Grant of petition for extension of time (New York).

**SUMMARY:** This is in response to a petition for an extension of time filed by the New York Department of Motor Vehicles (New York). New York cannot conform its title documents to meet the requirements of the Truth in Mileage Act and the final rule implementing the Act by April 29, 1989, the effective date of the statutory and regulatory requirements. Therefore, the petition requests that NHTSA grant New York an extension of time, until April 29, 1990, to achieve compliance. Because New York has made an effort to meet the deadline, sets forth reasons why it has failed to do so, and has included a description of the steps to be taken while the extension is in effect, we have granted New York's petition for an extension of time. New York has until April 29, 1990 to revise its title documents to meet the requirements of the Truth in Mileage Act and the final rule.

**FOR FURTHER INFORMATION CONTACT:** Judith Kaleta, Office of the Chief Counsel, Room 5219, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202-366-1834).

**SUPPLEMENTARY INFORMATION:**

### Background

Section 2(c) of the Truth in Mileage Act of 1988 authorizes the National Highway Traffic Safety Administration (NHTSA) to provide for an extension of time in the event that any State requires additional time beyond April 29, 1989, in revising its laws to meet the requirements of the Motor Vehicle Information and Cost Savings Act and the implementing regulations set forth in 49 CFR Part 580. It provides that, in granting an extension, NHTSA "shall ensure that the State is making reasonable efforts to such compliance."

To implement the Truth in Mileage Act and to make some needed changes in the Federal odometer laws, the agency published final rules which provide that a State may file a petition for an extension of time. The petition should discuss the efforts the State has taken to meet the deadline, the reasons why it needs additional time, the length of time desired for extension, and a description of the steps to be taken while the extension is in effect. 53 FR 29464 (1988).

### New York's Petition

The New York Department of Motor Vehicles (New York) submitted a petition for an extension of time. In support of its petition, New York states that by April 29, 1989, it will have amended the Commissioner's Regulations to include the Federal regulatory definitions and it will print the odometer reading on the face of its title documents, with a notation of either actual mileage, not the actual mileage, or exceeds the mechanical limits. New York also states that the three documents that are used in the State to transfer ownership, the Title Document (MV999); Certificate of Sale (MV-50); and the salvage certificate (MV-907A), are set forth by means of a secure process. However, New York cannot conform its title documents to all the other Federal regulatory requirements by April 29, 1989. New York plans to revise the current title documents to meet the Federal requirements and have them printed and distributed within eight to ten months. In addition, New York has a one year supply of the title documents, purchased at a total document cost of $255,600. New York explains that destroying the documents could result in a financial burden to the State. Until the current supply is depleted, New York will issue a supplemental odometer disclosure statement which meets the Federal regulatory requirements. Because the current inventory of title documents will be depleted by April 1990, New York requests that it be granted an extension of time until April 29, 1990.

### NHTSA's Response to the Petition

NHTSA finds that New York has made reasonable efforts to achieve compliance with the Motor Vehicle Information and Cost Savings Act and the implementing regulations.

Since the enactment of the Truth in Mileage Act and the issuance of the implementing Federal regulations, New York has drafted regulations to incorporate the Federal regulatory definitions into the Commissioner's Regulations. In addition, New York has designed, and will be issuing, a supplemental odometer disclosure statement that meets the Federal requirements. It will also be revising its current title documents and expects that they will be ready for distribution within the next eight to ten months.

In light of New York's past and planned actions, and in order to allow New York to expend its current supply of title documents, we grant New York's request for an extension of time until April 29, 1990, to revise its title documents to meet the Federal criteria.

**Authority:** 15 U.S.C. 1988 note; delegation of authority at 49 CFR 1.50(f) and 501.8(e).

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

**50 CFR Part 652**

**[Docket No. 81133-9030]**

## Atlantic Surf Clam and Ocean Quahog Fisheries

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

**ACTION:** Notice of adjustment of 1989 fishing quotas.

**SUMMARY:** NOAA issues this notice of adjustment of fishing quotas for the surf clam and ocean quahog fisheries for 1989. These quotas were selected from a range defined as optimum yield for each fishery and are adjusted to reflect 1988 fishing activity at the conclusion of the year. The intended effect of this action is to establish adjusted allowable harvests of surf clams and ocean quahogs from the exclusive economic zone in 1989.

**EFFECTIVE DATE:** March 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Jack Terrill (Resource Policy Analyst), 508-281-3600, ext. 252.

**SUPPLEMENTARY INFORMATION:** The regulations implementing the Fishery Management Plan for the Atlantic Surf Clam and Ocean Quahog Fisheries (FMP) directs the Secretary of Commerce (Secretary), in consultation with the Mid-Atlantic Fishery Management Council (Council), to specify quotas for surf clams and ocean quahogs on an annual basis from within ranges which have been established as the optimum yield for each fishery.

The final 1989 quotas were published on February 10, 1989 (54 FR 6415). The final quotas are adjusted under § 652.21 (a), (b), and (c) to reflect the amount of underharvest or overharvest in each designated surf clam fishery for 1988. The ocean quahog quota is not adjusted unless quarterly quotas have been established, which to date, has not been necessary.

The total harvest at the conclusion of the 1988 fishing season for the Mid-Atlantic surf clam fishery was 2,782,000 bushels out of an adjusted quota of 2,695,000 bushels and a base quota of 2,650,000 bushels. The 1988 Nantucket Shoals surf clam fishery harvest amounted to 205,000 bushels out of an adjusted quota of 205,000 bushels and a base quota of 200,000 bushels. The Georges Bank surf clam fishery harvest for 1988 was 97,000 bushels out of an adjusted quota of 485,000 bushels and a

VOL 54 ISS 40 MR 2 1989 UMI

base quota of 300,000 bushels. As a result of the final 1988 harvest, the Mid-Atlantic surf clam fishery quota is adjusted downward by 87,000 bushels, the Georges Bank surf clam fishery quota is adjusted upward by 203,000 bushels and the Nantucket Shoals surf clam fishery quota is unchanged. Overages are deducted from the adjusted quota for the fishing year. This is the amount of resource that may be extracted during any one fishing year. Underages or carryovers are the remainder of the base quota which are unharvested by the end of the fishing year. The Council established the base quotas as the legitimate extraction rates from the resource on a yearly basis. The Council did not intend that the adjusted quota be used to calculate carryovers or underages since it could result in a cumulative quota over several years well in excess of the optimum yield for the fishery. This would be contrary to sound management of the resource. The total ocean quahog harvest for 1988 was 4,423,000 bushels from a quota of 6,000,000 bushels.

The final quotes for the surf clam ocean quahog fisheries for 1989 are:

1989 ADJUSTED FINAL SURF CLAM/OCEAN QUAHOG QUOTAS

| Fishery areas | 1989 adjusted final quotas (in bushels) |
|---|---|
| Mid-Atlantic surf clam | 2,563,000 |
| Georges Bank surf clam | 503,000 |
| Nantucket Shoals surf clam | 200,000 |
| Ocean quahog | 5,200,000 |

For the surf clam fisheries, the annual quotas are divided into quarterly quotas under § 652.21 (a), (b) and (c), as follows:

1989 SURF CLAM/OCEAN QUAHOG QUARTERLY QUOTAS

(In bushels)

| Fishery area | Qtr 1 | Qtr 2 | Qtr 3 | Qtr 4 |
|---|---|---|---|---|
| Mid-Atlantic surf clam | 575,500 | 662,500 | 662,500 | 662,500 |
| Georges Bank surf clam | 125,750 | 125,750 | 125,750 | 125,750 |
| Nantucket Shoals surf clam | 40,000 | 60,000 | 60,000 | 40,000 |

**Other Matters**

This action is taken under authority of 50 CFR 652.21 and is taken in compliance with E.O. 12291. The action is covered by the certification for Amendment 3 to the FMP, and under the Regulatory Flexibility Act, that the authorizing regulations do not have a significant economic impact on a substantial number of small entities.

# Proposed Rules

Federal Register
Vol. 54, No. 40
Thursday, March 2, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## MERIT SYSTEMS PROTECTION BOARD

**5 CFR Part 1201**

**Practice and Procedure: Appeal Form (Optional Form 283); Revision**

**AGENCY:** Merit Systems Protection Board.

**ACTION:** Proposed rule; notice of public information collection requirements submitted to OMB for review.

**SUMMARY:** The U.S. Merit Systems Protection Board (MSPB) proposes to revise its appeal form, Optional Form 283 (Rev. 5–85), which currently appears in 5 CFR Part 1201, Appendix I, and is stocked by the General Services Administration. The form is being revised to (1) eliminate reference to the Voluntary Expedited Appeals Procedure (VEAP) as announced in 52 FR 47547, December 15, 1987, (2) explain that disclosure of the Social Security number on the appeal form is voluntary and that failure to provide it will not result in the rejection of an appeal, and (3) make minor revisions in format. Further, the MSPB is submitting the form to the Office of Management and Budget (OMB) for assignment of an OMB control number under section 3504(h) of the Paperwork Reduction Act of 1980, and calling for comments on the public reporting burden.

**DATES:** Send comments concerning the proposed revision of the form before March 15, 1989; send comments concerning the paperwork burden before May 15, 1989.

**ADDRESSES:** Comments concerning the proposed revision of the appeal form should be addressed to Paul D. Mahoney, Director, Office of Management Analysis, Merit Systems Protection Board, 1120 Vermont Ave., NW., Washington, DC 20419. Comments concerning the paperwork burden should be addressed to Paul D. Mahoney, Director, Office of Management Analysis, Merit Systems Protection Board, 1120 Vermont Ave., NW., Washington, DC 20419; and the Office of Management and Budget, Paperwork Reduction Project (Optional Form 283), Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** Paul D. Mahoney, Director, Office of Management Analysis; (202) 653–8892.

**SUPPLEMENTARY INFORMATION:** The Merit Systems Protection Board (MSPB) processes appeals from current and former Federal employees and applicants for Federal employment. Through years of experience, the MSPB has determined that certain information will help process these appeals. An optional form for voluntary use by persons appealing to the MSPB has been designed to assist appellants in providing relevant information. The MSPB is submitting the form to the Office of Management and Budget for assignment of an OMB control number under section 3504(h) of the Paperwork Reduction Act of 1980, and calling for comments on the public reporting burden, even though this form is not used by the "public" in the usual sense. Rather, it concerns the employment relationship between an applicant for Federal employment or employees and their agency. With this in mind, the reporting burden for the collection of information on this form is estimated to vary from 20 minutes to one hour per response, with an average of 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the MSPB and OMB at the addresses shown above. The OMB is being asked to approve the form by May 15, 1989.

**Regulatory Flexibility Act**

The Clerk, Merit Systems Protection Board, certifies that the Board is not required to prepare an initial or final regulatory analysis of this proposed rule pursuant to sections 603 or 604 of the Regulatory Flexibility Act, because of the determination that this regulation would not have significant economic impact on a substantial number of small entities, including small businesses, small organizational units and small governmental jurisdictions.

**List of Subjects in 5 CFR Part 1201**

Administrative practice and procedure, Civil rights, Government employees.

Accordingly, the Merit Systems Protection Board proposes to amend Part 1201 as follows:

**PART 1201—[AMENDED]**

1. Authority for Title 5 CFR Part 1201 continues to read:

**Authority:** 5 U.S.C. 1205 and 7701(j).

2. Appendix I to Part 1201 is proposed to be amended by revising MSPB Optional Form 283 (Rev. 5–85) to read as follows:

BILLING CODE 7400-01-M

VOL 54 ISS 40 MR 2 1989 UMI

Appendix I to Part 1201—Merit Systems Protection Board Appeal Form

# U. S. MERIT SYSTEMS PROTECTION BOARD

## APPEAL FORM

### INSTRUCTIONS

The purpose of this form is to help you provide important information to the U.S. Merit Systems Protection Board ("the Board") when you file an appeal. You are not required to use this form, and you are not limited to answering the questions if you feel there is other information you wish to provide. However, if you do not use the form, your appeal documents must comply with the Board's regulations. Your agency's personnel office will provide you with a copy of these regulations and the Board advises you to review them.

**You may not file your appeal before the effective date of the action you are appealing.**

All persons filing an appeal (appellants) who elect to use this form should complete Parts I through IV. Only those who are appealing reduction-in-force (RIF) actions are required to complete Part V. The information must be typed or printed clearly. Answer all questions and use "N/A" when the question is not applicable to your appeal.

You may supplement your response to any question on separate sheets of paper. **If separate sheets are used, please put your name and Social Security number at the top of each page.** Indicate by number which question you are answering, and attach the extra pages to the form.

### Where To File

You or your representative are required to file one original and one copy of this form, together with its attachments, with the Board's regional office identified in the decision notice provided by the agency. Filing must be made either by personal delivery during normal business hours to the appropriate Board regional office or by mail addressed to that office. The Board recommends but does not require that you use certified mail.

### Important

**YOU MUST SIGN THIS FORM**

Signing this form indicates your approval of the contents of the entire form, and it must be signed in the space provided for it *(Part I, item 6)* to be accepted by the Board.

### Privacy Act Statement

*This form requests personal information which is relevant and necessary to reach a decision in your appeal. The U.S. Merit Systems Protection Board collects this information in order to process appeals under its statutory and regulatory authority. Since your appeal is voluntary action you are not required to provide any personal information in connection with it. However, failure to supply the U.S. Merit Systems Protection Board with all the information essential to reach a decision in your case could result in the rejection of your appeal.*

*The U.S. Merit Systems Protection Board is authorized under provisions of Executive Order 9397, dated November 22, 1943, to request your Social Security number. Providing your Social Security number is voluntary and failure to provide it will not result in the rejection of your appeal. Your Social Security number will only be used for identification purposes in the processing of your appeal.*

*You should know that the decisions of the U.S. Merit Systems Protection Board on appeals are final administrative decisions and, as such, are available to the public under the provisions of the Freedom of Information Act. Additionally, it is possible that information contained in your appeal file may be released as required by the Freedom of Information Act. Some information about your appeal will also be used in depersonalized form as a data base for program statistics.*

### Part I Appellant Identification

| | |
|---|---|
| 1. Name *(last, first, middle initial)* | 2. Social Security Number |
| 3. Present address *(number and street, city, state, and ZIP code)*. **You are required to notify the Board of any address change in order to insure the correct delivery of a decision.** | 4. Home phone *(include area code)*<br>5. Office phone *(include area code)* |
| 6. I certify that all of the statements made in this appeal are true, complete, and correct to the best of my knowledge and belief. | Signature of Appellant — Date signed |

## Part III Hearing

36. You may have a right to a hearing on this appeal. If you do not want a hearing, the Board will make its decision on the basis of the documents you and the agency submit. If no box is checked, the Board will presume you are waiving a hearing. Do you want a hearing?

**Do you want a hearing?** ☐ *Yes* ☐ *No*

If you choose to have a hearing, the Board will notify you where and when it is to be held.

## Part IV Designation of Representative

37. You have the right to designate someone to represent you on this appeal. If he/she agrees to do so, this person does not have to be an attorney. The agency has a right to challenge your choice of a representative if there is a conflict of interest or position. You may change your designation of a representative at a later date, if you so desire, but must notify the Board promptly of any change.

"I hereby designate _____ to serve as my representative during the course of this appeal. I understand that my representative is authorized to act on my behalf."

| 38. Representative's address | 39. Representative's employer |
|---|---|
| | 40. Representative's telephone number *(include area code)* |
| | 41. Representative's signature Date |

## Part V Reduction-In-Force (RIF)

### Instructions

Fill out this part only if you are appealing from a Reduction-In-Force. Your agency's personnel office can furnish you with most of the information requested below.

| 42. Retention group and sub-group | 43. Service computation date | 44. Has your agency offered you another position rather than separating you? ☐ *Yes* ☐ *No* |
|---|---|---|
| 45. Title of position offered | 46. Grade of position offered | 47. Salary of position offered $ per |
| 48. Location of position offered | | 49. Did you accept this position? ☐ *Yes* ☐ *No* |

50. Explain why you think you should not have been affected by the Reduction-In-Force. *(Explanations could include: you were placed in the wrong retention group or sub-group; an error was made in the computation of your service computation date; competitive area was too narrow; improperly reached for separation from competitive level; an exception was made to the regular order of selection; full 30-day notice was not given; you believe you have assignment [bump or retreat] rights; or any other reasons. Please provide as much information as possible regarding each reason.)*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

### 14 CFR Part 39

**[Docket No. 88-NM-196-AD]**

### Airworthiness Directives: Boeing Model 757 Series Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** This notice proposes a new airworthiness directive (AD), applicable to certain Boeing Model 757 series airplanes, equipped with steel brakes or interim carbon brake control systems, which would require the replacement of aluminum brake control shafts with steel brake control shafts. These shafts are part of the brake metering valve control assembly. This proposal is prompted by reports of four brake control shafts failing in service. This condition, if not corrected, could result in the loss of braking to one side of the airplane or, potentially, the complete loss of braking.

**DATE:** Comments must be received no later than April 24, 1989.

**ADDRESSES:** Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-196-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

**FOR FURTHER INFORMATION CONTACT:** Mr. David M. Herron, Systems and Equipment Branch, ANM-130S; telephone (206) 431-1949. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

**SUPPLEMENTARY INFORMATION:**

#### Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

#### Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-196-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

*Discussion:* Operators of Boeing Model 757 series airplanes have reported four occurrences where the brake metering valve actuation shafts have failed and caused partial loss of braking. Boeing subsequently sent Telex BAB-LHR-88-0898RR, "Brake Metering Valve Actuation Shaft Failure," dated June 22, 1988, to operators, informing them of the problem and requesting expeditious replacement of the aluminum shafts with steel shafts as specified in the telex.

Subsequent investigation by the manufacturer revealed that the aluminum shafts were failing due to fatigue. The manufacturer has initiated a program to replace the aluminum shafts with a steel shaft that has increased strength.

The FAA has reviewed and approved Boeing Service Bulletin number 757-32-0083, dated December 15, 1988, which describes the replacement of the aluminum brake metering valve actuator shafts with steel shafts.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require the replacement of aluminum brake metering valve actuation shafts, in accordance with the service bulletin previously mentioned.

There are approximately 110 Model 757 series airplanes of the affected design in the worldwide fleet. It is estimated that 78 airplanes of U.S. registry would be affected by this AD, that it would take approximately 16 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Required parts would be supplied by the manufacturer at no cost to operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $48,640.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model 757 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

#### List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

#### The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

### PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

**§ 39.13 [Amended]**

2. By adding the following new airworthiness directive:

**Boeing:** Applies to Model 757 series airplanes, as listed in Boeing Service Bulletin 757-32-0083, dated December 15, 1988, certificated in any category. Compliance required within the next 750 landings after the effective date of this AD or prior to the accumulation of 10,000 landings, whichever occurs later, unless previously accomplished.

To prevent the partial loss of braking and, potentially, the complete loss of braking, accomplish the following:

A. Replace aluminum brake metering valve actuation shafts with steel shafts, in accordance with Boeing Service Bulletin 757-32-0083, dated December 15, 1988.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

**Note.**—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the modifications of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on February 17, 1989.

**Leroy A. Keith,**

*Manager, Transport Airplane Directorate, Aircraft Certification Service.*

BILLING CODE 4910-13-M

### 14 CFR Part 39

**[Docket No. 88-NM-193-AD]**

### Airworthiness Directives: Boeing Model 767 Series Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** This notice proposes to revise an existing airworthiness directive (AD), applicable to certain Boeing Model 767 series airplanes equipped with General Electric CF6 engines, which currently requires replacement of aluminum brackets with inconel brackets at three locations in each engine strut area to support the hydraulic pressure line. That action was prompted by reports of cracks in the aluminum brackets, which allowed the bracket flange and clamp to contact and wear the adjacent fuel line. This proposal is prompted by reports that the manufacturer subsequently delivered six airplanes with aluminum brackets that were not included in the applicability of that AD. This condition, if not corrected, could lead to abrasion of the fuel line wall, creating a fuel leak.

**DATE:** Comments must be received no later than April 24, 1989.

**ADDRESSES:** Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-193-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

**FOR FURTHER INFORMATION CONTACT:** Mr. David M. Herron, Systems and Equipment Branch, ANM-130S; telephone (206) 431-1949. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

**SUPPLEMENTARY INFORMATION:**

#### Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

#### Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 88-NM-193-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

*Discussion:* On August 28, 1987, the FAA issued AD 87-18-05, Amendment 39-5722 (52 FR 34631; September 14, 1987), applicable to certain Boeing Model 767 series airplanes equipped with General Electric CF6 engines. That AD requires replacement of hydraulic line support brackets in the engine strut with brackets made of inconel. Failure of the aluminum brackets had been reported to allow abrasion of the adjacent fuel line and result in a fuel leak.

Since issuance of that AD the manufacturer delivered six airplanes with aluminum brackets that are not included in the applicability of the AD. The FAA has determined that AD 87-18-05 must be revised to include those six airplanes.

The FAA has reviewed and approved Boeing Service Bulletin 767-29-0032, Revision 1, dated June 16, 1988, which describes the replacement of aluminum brackets with inconel brackets at three locations in each engine strut area. Revision 1 adds six airplanes to the service bulletin effectivity.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would revise AD 87-18-05 and require the installation of inconel brackets in each strut area on six additional Boeing Model 767 airplanes, in accordance with the service bulletin previously mentioned.

There are 6 additional Boeing Model 767 series airplanes of the affected design in the worldwide fleet. It is estimated that 1 airplane of U.S. registry would be affected by this AD, that it would take approximately 16 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Required parts would be supplied by the manufacturer at no cost to operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $640.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and

VOL 54 ISS 40 MR 2 1989 UMI

the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive, or negative, on a substantial number of small entities because few, if any, Model 767 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

**List of Subjects in 14 CFR Part 39**

Aviation safety, Aircraft.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend Section 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

**PART 39—[AMENDED]**

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

**§ 39.13 [Amended]**

2. By revising AD 87-18-05, Amendment 39-5722 (52 FR 34631; September 14, 1987), to read as follows:

**Boeing:** Applies to Model 767 series airplanes, equipped with General Electric CF6 engines, listed in Boeing Service Bulletin 767-29-0032 dated January 15, 1987, and airplanes Serial Numbers 22322, 23431, 23432, 23494, 23623, and 23624, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent cracking of the hydraulic pressure line aluminum support brackets in the engine strut, and possible fuel line penetration, accomplish the following:

A. For airplanes listed in Boeing Service Bulletin 767-29-0032, dated January 15, 1987: Within the next 3,000 hours time-in-service after October 7, 1987, (which is the effective date of Amendment 39-5722) replace aluminum brackets with inconel brackets at three locations in each engine strut area to support the hydraulic pressure line, in accordance with that service bulletin.

B. For all other airplanes: Within the next 3,000 hours time-in-service after the effective date of this amendment, replace aluminum brackets with inconel brackets at three locations in each engine strut area to support the hydraulic pressure line in accordance with Boeing Service Bulletin 767-29-0032, Revision 1, dated June 18, 1988.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note.—The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplane to a base for the accomplishment of the inspections and-or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Transport Airplane Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on February 17, 1989.

**Leroy A. Keith,** *Manager,*
*Transport Airplane Directorate, Aircraft Certification Service.*

**[Airspace Docket No. 89-AGL-4]**

**Proposed Casey, IL, Transition Area Alteration**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to alter the existing Casey, IL, transition area to accommodate existing Standard Instrument Approach Procedures (SIAPs) to Casey Municipal Airport, Casey, IL. The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

**DATE:** Comments must be received on or before April 5, 1989.

**ADDRESS:** Send comments on the proposal in triplicate to: Federal Aviation Administration, Regional Counsel, AGL-7, Attn: Rules Docket No. 89-AGL-4, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket may be examined in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

An informal docket may also be examined during normal business hours at the Air Traffic Division, Airspace Branch, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

**FOR FURTHER INFORMATION CONTACT:** Harold G. Hale, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-AGL-4". The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket, FAA, Great Lakes Region, Office of Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM'S**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2, which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the designated transition area airspace near Casey, IL.

The present transition area is being modified to accommodate existing SIAPs. The only modification to the existing airspace is in the transition area extensions.

The extensions extend from the 5 mile radius area to 8.5 miles southwest and northeast of the airport; and within 4.25 miles each side of the 220° bearing and the 0350° bearing from the airport.

The realignment of existing SIAPs requires that the FAA alter the designated airspace to insure that the procedures will be contained within controlled airspace. The minimum descent altitude for the procedures may be established below the floor of the 700-foot controlled airspace.

Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition areas.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

**PART 71—[AMENDED]**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12,1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. Section 71.181 is amended as follows:

**Casey, IL [Revised]**

That airspace extending upward from 700 feet above the surface within a 5 mile radius of Casey Municipal Airport, Casey, IL (lat. 39°18'07"N., long. 88°00'13"W.) and within 4.25 miles each side of the 220° bearing from the airport extending from the 5 mile radius area to 8.5 miles southwest of the airport; and within 4.25 miles each side of the 035° bearing from the airport extending from the 5 mile radius to 8.5 miles northeast of the airport.

Issued in Des Plaines, Illinois, on February 14, 1989.

**FOR FURTHER INFORMATION CONTACT:** James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ASO-5." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

VOL 54 ISS 40 MR 2 1989 UMI

**Availability of NPRM's**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO–530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the Laurenburg, NC, transition area. This action will eliminate the arrival area extension based on the Rocky Ford 226° bearing, revise the description of the arrival area extension based on the Sandhills VORTAC bearing and correct the geographic position coordinates of the Laurenburg-Maxton Airport. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition Area.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation of Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1345(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Public Law 97–449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. Section 71.181 is amended as follows:

**Laurenburg, NC [Revised]**

That airspace extending upward from 700' above the surface within an 8.5-mile radius of Laurinburg-Maxton Airport (Lat. 34°47'15"N., Long. 79°21'50"W); within 3 miles each side of Sandhills VORTAC 154° radial extending from the 8.5-mile radius area to 19 miles southeast of the VORTAC, excluding that area which coincides with the Mackall AAF, NC, transition area.

Issued in East Point, Georgia, on February 14, 1989.

**William D. Wood,**

*Acting Manager, Air Traffic Division, Southern Region.*

**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 52**

**[FRL–3531–3]**

**Approval and Promulgation of Implementation Plans; Minnesota**

**AGENCY:** U.S. Environmental Protection Agency (USEPA).

**ACTION:** Proposed rulemaking.

**SUMMARY:** On January 7, 1985, the Minnesota Pollution Control Agency (MPCA) submitted a proposed revision to the Minnesota particulate matter State Implementation Plan (SIP). This proposed revision includes a rule and appendices by which the State of Minnesota will issue equivalent visible emission limits (EVEL) to emission sources. However, under the terms of the rule, these EVELs, in certain cases, would automatically be made part of the SIP without the proper Federal rulemaking.

USEPA is proposing to disapprove this revision because: (1) The proposed procedures to determine EVELs allow the State to make certain discretionary decisions regarding opacity adjustments and therefore, the techniques are not completely replicable [1]; (2) relaxations under the rule do not require the Prevention of Significant Deterioration (PSD—Part C of the Clean Air Act) increments to be protected; and (3) the appendices to the rule have not undergone complete Minnesota rulemaking procedures and, therefore, are unenforceable.

The purpose of this notice is to present a discussion of the material submitted by the State to support the revisions, and to provide an opportunity for public comment on the revisions and on USEPA's proposed action.

**DATE:** Comments on this revision and on USEPA's proposed action must be received by April 3, 1989.

**ADDRESSES:** Copies of the SIP revision are available at the following addresses for review: (It is recommended that you telephone Anne E. Tenner, at (312) 886–6034, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR–26), 230 South Dearborn Street, Chicago, Illinois 60604.

Minnesota Pollution Control Agency, Division of Air Quality, 520 Lafayette Road, St. Paul, Minnesota 55155.

Comments on this proposed rule should be addressed to: (Please submit an original and three copies, if possible.) Gary Gulerian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

**FOR FURTHER INFORMATION CONTACT:** Anne E. Tenner, (312) 886–6034.

**SUPPLEMENTARY INFORMATION:** On January 7, 1985, the MPCA submitted to USEPA a proposed revision to the Minnesota SIP in order to satisfy the requirements of 40 CFR 51.18 (a) through (h) for a general NSR program, as well as the Federal requirements for a Pb NSR program.

USEPA proposed rulemaking action on the majority of this submittal on February 17, 1987 (52 FR 4785). USEPA, at that time, did not propose action on a part of the January 7, 1985, submittal, 6 MCAR § 4.002 Part D, Opacity Standard Adjustment.

Rule C MCAR 4.002 Part D is a proposed revision to former APC–2(e), Variances. It allows an emission facility to apply for an alternative opacity limit

[1] In order for State SIP procedures to be replicable, they must be specific written procedures that apply to all SIP packages the State presents to USEPA for review. The concept of replicability is one of the tests used by USEPA to ensure that the decisions made by the State are sound and not arbitrary.

if (1) the source is in compliance with all other particulate regulations; (2) the total emission facility is in compliance with all applicable standards of performance (except the opacity standard); and, (3) the total emission facility was operated in a manner to minimize the opacity of emissions at the emission source during the performance tests.

Atmospheric modeling is required under Minnesota's proposed SIP revision in those cases where the entire emission facility has particulate emissions equal to or greater than 25 tons per year and the source's application for a permit modification contains data that indicates that an adjustment of the opacity standard may cause, or contribute to, a violation of a national ambient air quality standard. Minnesota intends these "standards" to include both the National Ambient Air Quality Standards (NAAQS) and the Prevention of Significant Deterioration (PSD) increments.

The adjusted opacity standard must be set at the most restrictive attainable level that the required performance tests establish for the emission source. The total emission facility with the adjusted opacity standard must comply with at least one of the following requirements: (a) Not cause or contribute to a violation of an ambient air quality standard, (i.e., NAAQS or PSD increment); (b) have potential emissions of particulate matter of less than 25 tons per year, and less than one ton per day; or (c) contribute less than one microgram per cubic meter to an annual ambient particulate matter standard (i.e., NAAQS or PSD increment) violation and less than five micrograms per cubic meter to a 24-hour ambient total suspended (TSP) particulate matter standard (i.e., NAAQS or PSD increment) violation. However, USEPA is not satisfied that the rule establishes replicable procedures for choosing alternative opacity limits. Therefore, USEPA proposes to disapprove this portion of the rule.

Appendices AA, BB, and CC discussed below, were submitted as technical support documents for the opacity standard adjustment provision of 6 MCAR § 4.0002. These Appendices will not be adopted as rules and regulations by Minnesota, and, therefore, the enforceability of the Appendices is questionable.

**Appendix AA—Procedures for Making an Opacity Standard Adjustment**

These procedures require that the adjusted opacity standard be set using the second high six-minute average of runs, during which no scheduled increased emissions occurred. These procedures also require that during runs when increased emissions occur, the adjusted opacity standard be set using either the high six-minute average which complies with the new adjusted standard, or opacity readings which comply with any exceptions allowed by an applicable rule. Appendix AA also specified that this general procedure for making opacity adjustment may be changed on a case to case basis. Because Appendix AA does not clearly define the deviation from the general procedure USEPA believes that the results may not be reproducible. Therefore, USEPA proposes to disapprove Appendix AA.

**Appendix BB—Opacity Standard Adjustment and USEPA Review**

Appendix BB describes the various levels of State and USEPA review required for opacity standard adjustments.

Nonattainment Areas—Any opacity adjustments to a boiler in a nonattainment area must be submitted to USEPA as a SIP revision. This was done to ensure that Reasonably Available Control Technology (RACT) would still be required (Minnesota's opacity regulations are largely responsible for RACT controls on boilers.) [2] If the opacity adjustment is for a non-boiler source in a nonattainment area, it must be submitted for USEPA review (but not necessarily as a SIP revision).

Opacity standard adjustments in attainment areas can generally be handled solely by MPCA. In those cases where the adjustment might increase emissions in an attainment area, the State would apply a generic screening procedure. USEPA has reviewed this procedure and has determined that it is not approvable because emission increases resulting from the relaxation of the opacity limit may not protect the PSD increment. Therefore, USEPA proposes disapproval of Appendix BB.

**Appendix CC—Screening Methodology for Opacity Standard Adjustment in Attainment Areas**

This Appendix contains a screening model which will be used in assessing the impact of an opacity standard adjustment in an attainment area. This analysis was intended to provide a quick assessment of the anticipated impact of an opacity adjustment and the need for more detailed analysis. USEPA has reviewed this Appendix and determined it is not approvable. Therefore, USEPA proposes the disapproval of Appendix CC.

**Reasons for Proposed Disapproval**

USEPA has reviewed the January 7, 1985, State submittal and determined that it is not approvable for the following reasons: First, the Minnesota rule and appendices do not establish replicable procedures for choosing alternative opacity limit adjustments. Second, neither the State rule nor appendices directly addresses the PSD increments. Finally, the appendices are not considered to be legally enforceable.

Further analysis of these issues is discussed below:

1. The process of adjusting opacity limits to correspond with emission levels that comply with the mass limits involves source specific rulemaking based upon the judgement of the MPCA without specific guidelines. Unless and until the Minnesota rules and appendices prescribe how the State is to exercise its judgement in reviewing an application for an alternative opacity limit, those procedures would not be replicable.

The opacity adjustment rule does not circumscribe the MPCA's discretion in setting testing conditions. The rule requires that the test data needed to calculate alternative opacity limits be collectd pursuant to 6 MCAR § 4.0021. That provision, however, permits the Director of the MPCA to set testing conditions. Furthermore, Appendix AA does not adequately prescribe how the MPCA would exercise its judgement in choosing testing conditions. Instead, it sets forth the "general philosophy" it would use in accounting for variables that present themselves in individual cases.

For all these reasons, the Minnesota procedures for determining opacity adjustment are not replicable. Approving them as generic procedures would create an impermissible delegation of USEPA's responsibility to decide whether the opacity limits provide the necessary guarantee that the SIP mass limits are being met.

Section 110(a) of the Clean Air Act does not authorize such a delegation.

2. Neither the Minnesota rule nor the technical support document ensures that emissions increases resulting from relaxations of the SIP opacity limits would not jeopardize the PSD increments. The rule refers only to "standards", not increments. The state had committed in a letter to interpret "standards" to include the "increments". However, according to USEPA's legal analysis, such a letter would not be

[2] RACT is a requirement for TSP nonattainment areas under section 172 of the Clean Air Act, but it is not required for $PM_{10}$ SIPS.

VOL 54 ISS 40 MR 2 1989 UMI

legally enforceable and, therefore, would not provide the necessary protection. The State also has not addressed how it would protect visibility in its Class I PSD areas. Any relaxation in its particulate matter SIP, e.g., an EVEL, which triggers the visibility protection provisions of the PSD rules, must be analyzed to determine if visibility in Minnesota's Class I areas are still protected with such a relaxation.

3. Additionally, even if the appendices were replicable and protected the PSD increments (and visibility) and even if they were replicable, they still would be flawed because they are not legally enforceable. The appendices contain important substantive provisions not addressed in the rule itself. However, these provisions have not been adopted as enforceable rules by the State's rulemaking board. On a hypothetical level, even if the rule adopted by the board delegated to MPCA the authority to issue these substantive provisions, it is not likely that such a delegation would be valid, because the rule itself does not circumscribe the MPCA's discretion to decide whether these relaxations would conform to the general principles in the rule.

**Conclusions**

As a result of USEPA's analysis of the January 7, 1985, State submittal which contains a rule and appendices by which the State of Minnesota will issue equivalent visible emission limits (EVEL) to sources, USEPA proposes to disapprove this revision to the Minnesota particulate matter SIP, because: (1) The procedures to determine EVELs allow the State to make certain discretionary decisions in testing a source and, therefore, the techniques are not completely replicable; (2) relaxations under the rule do not require the PSD increments and visibility to be protected; and (3) the appendices to the rule have not gone through complete Minnesota rulemaking procedures.

Notwithstanding the above, the State of Minnesota may still submit site-specific EVELs to USEPA, and the Agency will rulemake on them based on the merits of the individual case.

Under Executive Order 12291, today's action is not "Major". It has been submitted to the Office of Management and Budget (OMB) for review.

Under 5 U.S.C. 605(b), I certify that this SIP disapproval will not have a significant economic impact on a substantial number of small entities because there will be no relaxation of the emission limits.

**40 CFR Part 52**

**[FRL-3531-2; MS-013]**

**Approval And Promulgation of Implementation Plans; Mississippi; $PM_{10}$ SIP Revisions**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** On July 26, 1988, the State of Mississippi submitted revisions to its State Implementation (SIP) for particulate matter. The revisions became State-effective on June 4, 1988. The revisions were adopted pursuant to the requirements of section 110 of the Clean Air Act to provide for the attainment of EPA's new particulate matter standards, known as "$PM_{10}$" standards.

**DATE:** To be considered, comments must reach us on or before April 3, 1989.

**ADDRESSES:** Written comments should be addressed to Rosalyn D. Hughes of EPA Region IV's Air Programs Branch (see EPA Region IV address below). Copies of the State's submittal are available for review during normal business hours at the following locations:

Environmental Protection Agency, Region IV, Air Programs Branch, 345 Courtland Street, NE., Atlanta, Georgia 30365.

Mississippi Department of Natural Resources, Bureau of Pollution Control, Post Office Box 10385, Jackson, Mississippi 39205.

**FOR FURTHER INFORMATION CONTACT:** Ms. Rosalyn D. Hughes, Air Programs Branch, EPA Region IV, at the above address and telephone number (404) 347-2864.

**SUPPLEMENTARY INFORMATION:** Pursuant to the 1977 amendments to the Clean Air Act, EPA, on July 1, 1987 (52 FR 24634), promulgated revised primary and secondary National Ambient Air Quality Standards (NAAQS) for particulate matter by replacing the total suspended particulate matter standard with a standard that included only those particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers. The particles are referred to as $PM_{10}$.

The $PM_{10}$ standards cover a size range of particles that is different than the range of particles covered by the former particulate standard for total suspended particulates (TSP). This means that states must develop and implement $PM_{10}$ control programs. The process being used generally follows the basic approach used in the development and implementation of TSP control programs. First, EPA evaluated the probabilities of $PM_{10}$ air quality levels predicted from actual TSP data and concluded that Mississippi was a Group III area, which means that the existing particulate matter control strategy is believed to be largely adequate to attain and maintain the $PM_{10}$ standards. However, the Mississippi SIP still needs to be revised to address the $PM_{10}$ NAAQS in the following ways:

a. To include State abient air quality standards for $PM_{10}$ at least as stringent as the NAAQS,

b. To trigger preconstruction review for new or modified sources which would emit significant amounts of either PM or $PM_{10}$ emissions,

c. To invoke the emergency episode plan to prevent $PM_{10}$ concentrations from reaching the significant harm level of 600 $\mu g/m^3$,

d. To meet ambient $PM_{10}$ monitoring requirements of 40 CFR Part 58, and

e. To meet the requirements of 40 CFR 51.322 and 51.323 to report actual annual emissions of $PM_{10}$ (beginning with emissions for 1988) for point sources emitting 100 tons per year or more.

Mississippi is proposing to revise its SIP to address the $PM_{10}$ NAAQS. The definitions for "Total suspended particulate," "Particulate matter," "Particulate matter emissions," "$PM_{10}$," and "$PM_{10}$ emissions" are being added or modified to read the same as the federal definitions. The other existing definitions in the SIP are being recodified.

In the new source review permit regulations, the definition of "Offset policy" was modified to identify the version of the federal regulations adopted. Also, definitions for "Significance levels" and "Significant impact" were added. The Redesignated Offset Policy was restructured so that the applicability requirement was recodified with two criteria and a new section was added defining prohibitions, more stringent than the federal conditions, on receiving a construction permit.

In the Emergency Episode Regulations several revisions were made. In the Episode Criteria Section, the paragraphs

for Alert, Warning and Emergency were revised to add the criterion for $PM_{10}$, to delete the criteria for particulates and for particulates and $SO_2$ combined and to add wording which matches the federal definition regarding continuation or recurrence of high pollutant concentration. The state is taking this opportunity to make additional changes unrelated to $PM_{10}$. The paragraph about air pollution forecasts was modified to contain the proper name of the air pollution agency; the criterion for oxidants was changed to ozone in the Alert, Warning and Emergency paragraphs; and the ozone concentration criteria in the Emergency paragraph was modified to match the federal definition.

In the Emergency Orders Section, "Suspended particulate matter" was deleted from the Air Pollution Alert and Air Pollution Warning paragraphs and replaced with $PM_{10}$."

Mississippi updated their Air Quality Surveillance Plan to reflect the addition of $PM_{10}$. EPA updated its delegation of the Prevention of Significant Deterioration program to Mississippi on May 20, 1988. Ambient Air Quality Standards are not included in the federally-approved Mississippi SIP; however, they have been revised to be consistent with the $PM_{10}$ regulations and are referenced only for clarity.

**Proposed Action:**

EPA has reviewed the submitted material and found it to meet the requirements of 40 CFR Part 51. Therefore, EPA is today proposing to approve Mississippi's revisions for $PM_{10}$ and is soliciting public comment.

For further information on EPA's analysis, the reader may consult a Technical Support Document which contains a detailed review of the materials submitted. This is available at the EPA address given above. Interested persons are invited to submit comments on this proposed approval. EPA will consider all comments received within thirty days of the publication of this notice.

Under 5 U.S.C. 605(b), I certify that these revisions will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

**Commercial Fishing Industry Vessel Regulations, Extension of Comment Period**

**AGENCY:** Coast Guard, DOT.

**ACTION:** Advance notice of proposed rulemaking; extension of comment period.

**SUMMARY:** This notice extends the comment period of the advance notice of proposed rulemaking to develop the safety regulations for uninspected fishing, fish processing and fish tender vessels to implement the provisions of the Commercial Fishing Industry Vessel Safety Act of 1988 (Act), Pub. L. 100-424 (53 FR 52735, December 29, 1988). The extension was requested by numerous concerns in the fishing vessel industry. The time period of the fishing season and the publication date of the advance notice created later receipt of the Advance Notice of Proposed Rulemaking. The requesters cited the broad scope of this regulatory initiative and their difficulty in providing meaningful responses within the original 60 day comment period due their personal involvement with the fishing vessel industry. Because of the requests for additional time to comment on the advance notice of proposed rulemaking, the deadline for receipt of comments is extended to April 15, 1989.

**DATE:** The comment period on the advance notice of proposed rulemaking is extended to April 15, 1989.

**ADDRESS:** Comments should be mailed to the Executive Secretary, Marine Safety Council (G-LRA-2/3600)(GCD 88-079), U.S. Coast Guard, 2100 Second Street SW., Washington, DC 20593-0001. Between the hours of 8 a.m. and 4 p.m. Monday through Friday except holidays, comments may be delivered to, and are available for inspection and copying at, the Marine Safety Council (G-LRA-2), Room 3600, Coast Guard Headquarters, 2100 Second Street SW., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Mr. Norman L. Lemley, Office of Marine Safety, Security and Environmental Protection, (202) 267-0001.

**AGENCY:** Federal Communications Commission.

**ACTION:** Proposed rule.

**SUMMARY:** This document requests comments on a petition filed by Columbia FM, Inc., proposing the allotment of FM Channel 224C2 to Savannah, Missouri, as that community's first FM broadcast service. There is a site restriction 8.4 kilometers west of the community. The coordinates for Channel 224C2 are 39–57–35 and 94–54–14.

**DATES:** Comments must be filed on or before April 17, 1989, and reply comments on or before May 2, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Columbia FM, Inc., 503 Old 63 North, Columbia, Missouri 65201.

**FOR FURTHER INFORMATION CONTACT:** Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 89–36, adopted February 23, 1989, and released February 23, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contracts. For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Human Nutrition Board of Scientific Counselors; Board Meeting

According to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), the Office of the Secretary announces the following meeting:

*Name:* Human Nutrition Board of Scientific Counselors

*Date:* April 26-27, 1989

*Time and Place:* April 26, 1989, 9 a.m.-5 p.m. and April 27, 1989, 9 a.m.-1 p.m.; Room 104-A, Administration Building on April 26, and on April 27, Room 107-A, Administration Building, United States Department of Agriculture, Independence Avenue, between 12th and 14th Streets, SW., Washington, DC.

*Type of Meeting:* Open to public. Persons may participate in the meeting as time and space permit.

*Comments:* The public may file written comments before or after the meeting with the contact person below.

*Purpose:* To review as appropriate and advise the Department as to the scope and quality of the human nutrition research and education programs carried out in the Department of Agriculture. The board also will prepare a report of its review, including evaluation and recommendations, to be submitted to the Secretary of Agriculture.

*Contact Person:* Gerald F. Combs, Assistant Deputy Administrator for Human Nutrition, Agricultural Research Service, U.S. Department of Agriculture, Room 132, Building 005, Beltsville Agricultural Research Center-West, Beltsville, Maryland 20705, telephone (301) 344-3216.

Done at Washington, DC, this 13th day of February, 1989.

**Orville G. Bentley,**

*Assistant Secretary Science and Education.*

BILLING CODE 3410-03-M

### Forest Service

### Ward Timber Sale

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The Department of Agriculture, Forest Service will prepare an environmental impact statement for the proposed Ward Timber Sale on the Luna Ranger District, Gila National Forest, Luna, New Mexico.

The proposed Ward Timber Sale is included in the Gila Forest Plan. Scoping, data collection and analysis have been in progress for over a year.

The scoping process has included public meetings, on-the-ground reviews, posting of notices, news releases, personal telephone conversations, interviews, and letters. The environmental analysis progressed to the point of identifying alternatives when it was determined that the intensity of the controversy over the effects of the proposal was considered significant. Gila National Forest Supervisor, David Dahl, decided to prepare an environmental impact statement.

A range of alternatives will be considered. A no action alternative will consider no timber harvest. Other alternatives will include management themes emphasizing: spotted owl, bear, and old-growth habitat; emphasis on maintaining primitive, roadless management; obtaining habitat diversity objectives by use of fire without timber harvest; emphasis on timber harvest with minimum wildlife habitat restrictions; emphasis on utilizing conventional tractor skidding logging methods to harvest timber; and other alternatives that may be developed as the process continues.

Federal, State, local agencies, organizations, and individuals have participated in the scoping process. Additional scoping will be conducted so that any additional agencies, organizations, or individuals may participate. This process includes:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a previous environmental review.

The Luna District Ranger will hold an open house in his office at Luna, New Mexico from 8:00 a.m. until 5:00 p.m. on Saturday, March 11, 1989.

The analysis is expected to take about 6 months. The draft environmental impact statement should be available for public review by August, 1989. The final environmental impact statement is scheduled to be completed by November, 1989.

David Dahl, Forest Supervisor, Gila National Forest is the responsible official.

**DATE:** Comments concerning the scope of the analysis should be received by July 1, 1989.

**ADDRESSES:** Written comments and suggestions concerning the analysis should be sent to Jerry Hibbetts, District Ranger, P.O. Box 91, Luna, New Mexico 87824, by July 1, 1989.

**FOR FURTHER INFORMATION CONTACT:** Questions about the proposed action and environmental impact statement should be directed to Brian Ferguson or Jerry Hibbetts, phone 505-547-2611.

Date: February 6, 1989.

**David W. Dahl,**

*Forest Supervisor.*

## ARCTIC RESEARCH COMMISSION

### Meeting

Notice is hereby given that the United States Arctic Research Commission will hold its 17th Meeting in Washington, DC, on 28-29 March, 1989. The meeting will start at 9:30 a.m. in Hearing Room A of the Interstate Commerce Commission Building at 12th and Constitution Avenue NW., Washington, DC. Agenda items include: (1) Chairman's Report; (2) Comments from the Interagency Arctic Research Policy Committee, the Alaska Congressional Delegation, and the Alaska Governor's Office; (3) Report on "A Strategic Plan for Cold Regions Engineering Research"; (4) Status of the proposed establishment of an International Arctic Science Committee; (5) Ethical principles for the conduct of research; (6) Federal Budget Process for Funding Research; and (7) Arctic Programs of the National Oceanic and Atmospheric Administration, the Department of the Interior, and the National Science Foundation.

On 29 March the Commission will meet starting at 9:00 a.m. in Room 6333 of the Interstate Commerce Commission Building. Matters to be discussed include: (1) Approval of minutes of the 16th Meeting; (2) Resolution on Arctic vessels; (3) Discussion of procedures leading to environmental impact statements; and (4) Consideration of ARC Brochure and logo.

From 1:30 p.m., until 3:00 p.m., on 29 March 1989 the Commission will meet in Executive Session to discuss (1) Commission meeting procedures and responsibilities of Members and Staff; (2) Adoption of an ethics policy; (3) Additions to the Group of Advisors; (4) Budget Request for FY 91; and (5) Plans for Future Meetings.

*Contact Person for More Information:* Philip L. Johnson, Executive Director, U.S. Arctic Research Commission (202) 371-0831.

**Philip L. Johnson,**

*Exective Director, U.S. Arctic Research Commission.*

## DEPARTMENT OF COMMERCE

### Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for expedited clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* Bureau of Export Administration.

*Title:* Export Administration Focus Group Guide.

*Form Number:* Agency—N/A; OMB—N/A.

*Type of Request:* New Collection—Expedited Review Requested—Within 10 days of OMB's receipt.

*Burden:* 120 respondents; 480 reporting hours. Average Hours Per Response—4 hours.

*Needs and Uses:* The information is needed to conduct an evaluative study of the delivery of export administration services to the public at selected locations in the U.S. The findings will be shared by OMB and the Congress and will be used by the Department as a basis for decisions concerning the future organization and delivery of export administration services outside of Washington, DC.

*Affected Public:* Businesses or other for-profit institutions; small businesses or organizations.

*Frequency:* One-time.

*Respondent's Obligation:* Voluntary.

*OMB Desk Officer:* Francine Picoult, 395-7340.

The information collection instrument follows: If you need additional information, please call or write DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Francine Picoult, OMB Desk Officer, Room 3208, New Executive Office Building, Washington, DC 20503.

Dated: February 24, 1989.

**Edward Michals,**

*Departmental Clearance Officer, Office of Management and Organization.*

Public reporting for this collection of information is estimated to average four hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of reducing this burden, to Office of Security and Management Support, Bureau of Export Administration, U.S. Department of Commerce, Washington, DC 20230 and the Office of Management and Budget, Paperwork Reduction Project (0694-XXXX), Washington, DC 20503.

*Guide for Conducting Focus Groups*

The Department of Commerce has contracted with Price Waterhouse to conduct an evaluative study of the delivery of export administration services to the public at selected locations around the U.S. The purpose of the study is to (1), assess the quality and quantity of services; (2), assess current and projected demand for services; and (3), make recommendations as to future organization and funding of these services.

To assist in assessing export administration service delivery, Price Waterhouse is conducting a series of ten focus groups with exporters who have received export administration assistance from nine U.S. Department of Commerce District Offices and a recently opened Bureau of Export Administration Office in Newport Beach, CA. Each focus group will be comprised of an average of 12 exporters for a total of approximately 120 companies

This focus group guide is designed to facilitate the conduct of these focus group sessions with exporters in the nine study cities. The guide is divided into six major sections as follows:

- Company Background
- Quality of Export Administration Services
- Demand for Services
- Other Issues
- Conclusion and Summary

Focus Group Guide

It is envisaged that free-form discussion will focus on questions such as those listed in the bullet points under each subject area:

*I. Question 1: Describe the Background of Your Company*

The purpose of this section of the focus group will be to develop an understanding of participants' experience with local delivery of export administration services. Issue areas to be discussed may include the following:

- Has your company requested export administration assistance from a District Office, Commerce Headquarters, or another organization (such as a state or local trade office)?
- If you came to this office to seek advice on export administration, why did you select this office?
- Describe the types of export administration services that your company has used.
- Are you aware of the range of services provided and how they might apply to your company?

*II. Question 2: Quality of Export Administration Services*

During this section of the focus group, exporters will be asked to comment on the equality of services provided in their city. Illustrative questions to be addressed may include the following:

- How would you define the term "quality" with respect to export administration services?
- What are your views on the quality of export administration services provided by the District Offices?
- What is your perception of the knowledge and experience of the persons providing export administration services?
- What strengths of weaknesses do you see in the present system for delivery of export administration services?

*III. Question 3: Demand for Services*

In this session, exporters will be asked to comment on future demand for export administration services. Issue areas may include the following:

- How often do you anticipate that your company will need export administration services in the future?

VOL 54 ISS 40 MR 2 1989 UMI

Would you use the District Offices for these services?

• For your industry as a whole, what will be the future needs for export administration services?

• What factors will affect your needs for future export administration services?

*IV. Question 4: Delivery of Services*

Exporters will be asked to comment on service delivery issues including organization and level of assistance. Examples of questions to be addressed may include:

• Should there be any change in the way export administration services are currently provided?

• What level of export administration services should be available at this local level (i.e., general advice, commitments on classification, license acceptance)?

• Should there be any change in the way they are provided?

• What organizational alternatives would you suggest for service delivery?

*V. Question 5: Other Issues*

Participants will be asked to comment about the focus group session and about the project. Examples of questions to be asked may include:

• Do you have any general comments about this focus group session or about this U.S. DOC/Price Waterhouse project?

• What advice or suggestions do you have that will help meet the project objectives?

*VI. Conclusion and Summary*

In this final part of the session, the focus group leader will summarize the tentative findings and conclusions of the focus group as well as discuss findings of other sessions. The focus group leader will also describe the next steps to be conducted through completion of the project in mid–June 1989.

[FR Doc. 89–4785 Filed 3–1–89; 8:45 am]

BILLING CODE 3510–DT–M

---

**International Trade Administration**

**[A–122–047]**

**Elemental Sulphur From Canada; Preliminary Results of Antidumping Duty Administrative Review, Tentative Determination To Revoke in Part, and Intent To Revoke in Part**

**AGENCY:** International Trade Administration/Import Administration, Commerce.

**ACTION:** Notice of preliminary results of antidumping duty administrative review, tentative determination to revoke in part, and intent to revoke in the part.

**SUMMARY:** In response to requests by the petitioner and eleven respondents, the Department of Commerce has conducted an administrative review of the antidumping finding on elemental sulphur from Canada. The review covers 12 producers and/or exporters of this merchandise and generally the period December 1, 1986 through November 30, 1987. The review indicates the existence of dumping margins for certain firms during the period.

As a result of the review, the Department has tentatively determined to revoke in part the antidumping finding with respect to B.P. Oil, Cornwall Chemicals, Home Oil, and Suncor, and intends to revoke the finding with respect to Cities Service, Imperial Oil, PetroGass Processing, Ltd., and Texaco Canada.

Interested parties are invited to comment on these preliminary results, tentative determination to revoke in part, and intent to revoke in part.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Joseph A. Fargo or Laurie A. Lucksinger, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5255.

**SUPPLEMENTARY INFORMATION:**

**Background**

On April 28, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 15257) the final results of its last administrative review of the antidumping finding on elemental sulphur from Canada (38 FR 35655, December 17, 1973). The petitioner and eleven respondents requested in accordance with § 353.53a(a) of the Commerce Regulations that we conduct an administrative review. We published a notice of initiation on January 27, 1988 (53 FR 2262). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

**Scope of Review**

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 et seq. of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appopriate HTS item number(s).

Imports covered by the review are shipments of elemental sulphur from Canada. During the review period such merchandise was classifiable under item 415.4500 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item 2503.10.00. The HTS item number is provided for convenience and Customs purposes. The written description remains dispositive. The review covers 12 producers and/or exporters of Canadian elemental sulphur to the United States and generally the period December 1, 1986 through November 30, 1987.

**United States Price**

In calculating United States price the Department used purchase price or exporter's sales price ("ESP"), both as defined in section 772 of the Tariff Act, as appropriate. Purchase price was based on the f.o.b. or delivered price to unrelated purchasers in the United States. ESP was based on the packed, delivered price to the first unrelated purchaser in the United States. We made adjustments, where applicable, for foreign and U.S. inland freight, brokerage and handling charges, and in ESP calculations, the U.S. subsidiary's selling expenses. No other adjustments were claimed or allowed.

**Foreign Market Value**

In calculating foreign market value the Department used home market price and third country price, as defined in section 773 of the Tariff Act. Where there were no home market sales we used sales in a third country. Home market and third country prices were based on f.o.b. prices or delivered prices to unrelated purchasers in the applicable market. We made adjustments, where applicable, for tank car expenses, inland freight, forming, handling charges, and differences in credit expenses. No other adjustments were claimed or allowed.

**Preliminary Results of the Review, Tentative Determination to Revoke in Part, and Intent to Revoke in Part**

Timshel failed to respond to the Department's antidumping questionnaire, and we used the best information otherwise available for purposes of assessment and cash deposit of estimated antidumping duties for the firm. The best information otherwise available was Timshel's most recent rate.

As a result of our review, we preliminarily determine that the following margins exist:

| Manufacturer/Exporter | Period of Review | Margin (Percent) |
|---|---|---|
| BP Resources Canada | 12/01/86–11/30/87 | [1] 5.56 |
| Burza Resources | 12/01/86–11/30/87 | 0 |
| Cities Services Oil & Gas | 12/01/86–07/30/87 | [1] 0 |
| Cornwall Chemicals | 12/01/86–11/30/87 | [1] 3.84 |
| Home Oil | 12/01/86–11/30/87 | 0 |
| Imperial Oil | 12/01/86–07/09/87 | 0 |
| InterRedec | 12/01/86–11/30/87 | 0 |
| Petro-Canada Resources | 12/01/86–11/30/87 | 0 |
| PetroGass Processing | 12/01/86–08/19/86 | [1] 0 |
| Suncor | 12/01/86–11/30/87 | [1] 0 |
| Texaco Canada | 12/01/86–07/09/87 | 0 |
| Timshel | 12/01/86–11/30/87 | 26.90 |

[1] No shipments during the period; margins from last review in which there were shipments.

Parties to the proceeding may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 8 days of publication. Any hearing, if requested, will be held 35 days after the date of publication or the first workday thereafter. Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Furthermore, as provided for by section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties based on the above margins shall be required for these firms. For any shipments of this merchandise produced or exported by the remaining known producers and/or exporters not covered in this review, the cash deposit will continue to be at the rate published in the final results of the last administrative review for these firms (53 FR 15257, April 28, 1988).

For any future entries of this merchandise from a new producer and/or exporter, not covered in this or prior administrative reviews, whose first shipments occurred after November 30, 1987 and who is unrelated to the reviewed firms or any previously reviewed firm, no cash deposit shall be required. These deposit requirements are effective for all shipments of Canadian elemental sulphur entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

Although a review was requested for Koch Sulphur Products Company and we included it in our notice of initiation, we have determined that it is an importer of elemental sulphur from Canada. We conduct administrative reviews of exporters and producers as provided in § 353.53a of the Commerce Regulations. Therefore, we are not proceeding with an administrative review of Koch and will instruct the Customs Service to liquidate entries by Koch at the rates applicable to its suppliers.

On June 19, 1987, we tentatively determined to revoke in part the antidumping finding on elemental sulphur from Canada for PetroGass (53 FR 23327). On July 9, 1987, we tentatively determined to revoke in part the antidumping finding on elemental sulphur from Canada for Cities Services, Imperial, and Texaco Canada (53 FR 25895). PetroGass and Cities Services made no shipments of the subject merchandise to the United States for four years. Imperial and Texaco Canada made sales of the imported merchandise at not less than fair value for two years. As provided for in §353.54(e) of our regulations, these four firms agreed in writing to an immediate suspension of liquidation and reinstatement of the antidumping finding under circumstances specified in the agreements. Therefore, if this partial revocation is made final, it will apply to all unliquidated entries of this merchandise manufactured and exported by these four companies, and entered or withdrawn from warehouse, for consumption on or after the date of publication of our tentative determinations to revoke with respect to these firms

B.P., Cornwall Chemicals, Home Oil, and Suncor requested partial revocation of the antidumping finding on elemental sulphur from Canada. B.P., Cornwall Chemicals, and Suncor made no shipments of the subject merchandise to the United States for four years. Home Oil made sales of the imported merchandise at not less than fair value for two years. These four companies agreed in writing to an immediate suspension of liquidation and reinstatement of the antidumping finding under circumstances specified in the agreements. Therefore, we tentatively determine to revoke in part the antidumping finding on elemental sulphur from Canada with respect to these four companies. If this tentative determination to revoke is made final, it will apply to all unliquidated entries of the subject merchandise manufactured and exported by B.P., Cornwall Chemicals, Home Oil, and Suncor, and entered to withdrawn from warehouse, for consumption on or after the date of publication of this notice.

This administrative review, tentative determination to revoke in part, intent to revoke in part, and notice are in accordance with §51 (a)(1) and (c) of the Tariff Act (19 U.S.C. 1675 (a)(1), (c)) and §§ 353.53a and 353.54 fo the Commerce Regulations (19 CFR 353.53a and 353.54).

**Jan W. Mares,**

*Assistant Secretary for Import Administration.*

**Final Determination of Sales at Less Than Fair Value; Electrolytic Manganese Dioxide From Greece**

**AGENCY:** International Trade Administration, Import Administration, Commerce.

**ACTION:** Notice.

VOL 54 ISS 40 MR 2 1989 UMI

**SUMMARY:** We have determined that electrolytic manganese dioxide from Greece is being, or is likely to be, sold in the United States at less than fair value. We also determine that critical circumstances do not exist with respect to imports of electrolytic manganese dioxide from Greece. The U.S. International Trade Commission (ITC) will determine, within 45 days of the publication of this notice, whether these imports are materially injuring, or are threatening material injury to, a United States industry.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Anne D'Alauro (202) 377–1130 or Holly Kuga (202) 377–4733, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC, 20230.

**SUPPLEMENTARY INFORMATION:**

### Final Determination

We have determined that electrolytic manganese dioxide ("EMD") from Greece is being, or is likely to be, sold in the United States at less than fair value as provided in section 735(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) ("the Act"). The weighted-average margin of sales at less than fair value is shown in the "Suspension of Liquidation" section of this notice.

### Case History

On November 14, 1988, we made an affirmative preliminary determination (53 FR 45793). The following events have occurred since the publication of that notice.

On November 31, 1988, Tosoh Hellas requested that we postpone making our final determination for a period of thirty days pursuant to section 735(a)(2)(A) of the Act. On December 20, 1988, we issued a notice postponing the final determination until February 22, 1989 (53 FR 51129).

Both the cost of production and sales questionnaire responses from Tosoh Hellas were verified in Greece between November 28, and December 2, 1988.

On January 23, 1988, the Department held a public hearing. Petitioners and respondent also submitted comments for the record in prehearing briefs on January 17, 1989, and in posthearing briefs on February 2, 1989.

### Scope of the Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted from the tariff Schedules of the United States Annotated ("TSUSA") to the Harmonized Tariff Schedule ("HTS"), as provided for in section 12101 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS number. As with the TSUSA numbers, the HTS numbers are provided for convenience and customs purposes. The written product description remains dispositive.

The product covered by this investigation is electrolytic manganese dioxide from Greece. During the investigation period, such merchandise was classifiable under item 419.4420 of the TSUSA. This merchandise is currently classifiable under HTS item number 2820.10.0000.

EMD is manganese dioxide ($MnO_2$) that has been refined in an electrolysis process. The subject merchandise is an intermediate product used in the production of dry cell batteries. EMD is sold in three physical forms, powder, chip or plate, and two grades, alkaline and zinc chloride. EMD in all three forms and both grades is included in the scope of the investigation.

### Fair Value Comparisons

To determine whether sales of EMD in the United States were made at less than fair value, we compared the United States price to the foreign market value as specified below. We made comparisons on all sales of the product during the period of investigation December 1, 1987 through May 31, 1988.

### United States Price

As provided in section 772 of the Act, we used the purchase price of the subject merchandise to represent the United States price for the sales by Tosoh Hellas to unrelated customers in the United States, all of which were made through a related trading company. We used purchase price as the basis for determining United States price since the following criteria were met: (1) The merchandise was sold to unrelated purchasers in the U.S. prior to importation; (2) the merchandise in question was shipped directly from the manufacturer to the unrelated buyer, without being introduced into the inventory of the related selling agent; (3) this was the customary commercial channel for sales of this merchandise between the parties involved; (4) the related selling agent acted only as a processor of sales-related documentation and a communication link with the unrelated U.S. buyer.

Purchase price was based on the C.I.F. and F.O.B. (foreign port) price to unrelated purchasers in the United States. Where applicable, we made deductions for foreign inland freight and insurance, brokerage and handling, ocean freight, marine insurance, export licensing fees, U.S. inland freight, as well as additions for import duties, import taxes and value-added taxes not collected on exports of the merchandise.

### Foreign Market Value

In accordance with section 773(a) of the Act, we determined that there were sufficient home market sales of such or similar merchandise by Tosoh Hellas to form the basis for foreign market value. For this reason, we have not applied the special rule for certain multinational corporations contained in section 773(d) of the Act as requested by petitioners (see Petitioners' comment 2 and the Department's response). Petitioners alleged that home market sales were made at less than the cost of production. We compared the home market prices exclusive of value-added tax to the cost of production, which included materials, fabrication costs, and selling, general, and administration expenses. Because all sales were found to be made at or above the cost of production, the Department used all home market sales in its fair value comparison.

Home market price was based on the delivered and "free on truck" price to unrelated purchasers in the home market. We deducted inland freight and home market packing, and added U.S. packing. We made a circumstance of sale adjustment for differences in credit and value-added taxes between the two markets.

### Currency Conversions

We used the exchange rate described in § 353.56(a)(1) of our regulations. All currency conversions were made at the rates certified by the Federal Reserve Bank.

### Negative Determination of Critical Circumstances

Petitioners alleged that imports of EMD from Greece present "critical circumstances." Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that there is a reasonable basis to believe or suspect that:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than fair value, and

(B) There have been massive imports of the merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3)(B), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

For purposes of this finding, we based our analysis on the verified shipment data of the Greek respondent, for equal periods immediately preceding and following the filing of the petition until the month of our preliminary determination. Using this data, we find that there has been a slight decrease in imports of EMD following the initiation of this investigation. Since we do not find that there have been massive imports, we need not consider whether there is a history of dumping or whether importers of this product knew, or should have known, that it was being sold at less than fair value. Therefore, we determine that critical circumstances do not exist with respect to imports of EMD from Greece. We have notified the ITC of this determination.

### Verification

As provided in section 776(b) of the Act, we verified all information used in reaching the final determination in this investigation. We used standard verification procedures, including examination of relevant accounting records and original source documents provided by respondents.

### Petitioners' Comments

*Comment 1.* Because home market sales of alkaline EMD are identical to U.S. sales of alkaline grade EMD and home market sales of zinc chloride grade EMD are identical to U.S. sales of zinc chloride grade EMD, the petitioners contend that alkaline and zinc chloride grades of EMD constitute two separate "such or similar" categories of EMD. Petitioners state that this conclusion is mandated by law since the definition of "such or similar merchandise" under section 771(16) specifically means "merchandise in the first of the following categories," *i.e.*, "merchandise which is identical in physical characteristics." Following this reasoning, since the home market sales of alkaline grade EMD by Tosoh Hellas are, when viewed alone, not viable (and the home market "such or similar" category of identical merchandise to which we are limited has been exhausted), petitioner further argues that the Department is precluded from using home market sales of zinc chloride grade EMD as the basis of comparison with U.S. alkaline sales. Therefore, foreign market value for alkaline grade EMD should be based on the home market selling price of the related Japanese producer according to the multinational provision.

*Department's Position.* We disagree. When analyzing the viability of a foreign market, the Department must determine whether adequate sales of comparable merchandise exist. The Department examines a category of merchandise composed of both such *and* similar merchandise in accordance with section 773(a)(1) because this category represents those sales which can serve as a basis for comparison. When testing market viability, section 771(16) of the Act does not preclude us from using a category containing both such and similar merchandise.

In this case, the Department determined that alkaline and zinc chloride EMD are comparable or "similar" merchandise. Information on the record clearly supports this conclusion since the two types of EMD are produced in the same production process and differ only in their final finishing. This finishing merely establishes the grind and the pH to which the EMD is neutralized. Additionally, there is minimal, if any, cost difference attributed to this finishing step, and these two grades are equal in commercial value. Both grades of EMD are used in the production of dry cell batteries. Accordingly, respondent's combined home market sales of alkaline and zinc chloride grade EMD are adequate as a basis of comparison since these sales exceed five percent of sales of that merchandise to third countries.

*Comment 2.* Petitioners argue that the multinational provision applies in this investigation and requires foreign market value to be determined on the basis of EMD sales in Japanese home market of Tosoh Hellas' parent. Section 773(d) of the Tariff Act provides that the special rule is applicable whenever:

(1) Merchandise exported to the United States is being produced in facilities which are owned or controlled, directly, or indirectly, by a person, firm or corporation which also owns or controls, directly or indirectly, other facilities for the production of such or similar merchandise which are located in another country or countries;

(2) The sales of such or similar merchandise by the company concerned in the home market of the exporting country are nonexistent or inadequate as a basis for comparison with sales of the merchandise to the United States; and

(3) The foreign market value of such or similar merchandise produced in one or more of the facilities outside the country of exportation is higher than the foreign market value of such or similar merchandise produced in the facilities located in the country of exportation (19 U.S.C. section 1677b(d)).

Petitioners maintain that all of the above criteria are satisfied in this case. Regarding the second point, they state that, in determining home market viability, the Department erroneously applied the five percent standard specified in § 353.4. However, § 353.4 is not applicable to a determination of home market sales adequacy for the purpose of application of the multinational rule, which is governed by § 353.9 of the regulations.

*Department's Position.* The Department agrees with the petitioners that the first criterion of the multinational rule applies in this case since the Greek respondent, Tosoh Hellas, is owned by a firm with additional facilities in Japan to manufacture EMD. As for the second criterion, however, the Department disagrees with the petitioners' conclusions as to the viability of the Greek home market. As explained above, the Department has determined that alkaline and zinc chloride EMD comprise one "such or similar" category of merchandise. Sales of this merchandise in the home market are well above the five percent standard for the home market viability test established in § 353.4 of our regulations. Therefore, we determine that the special rule for multinational corporations contained in section 773(d) of the Act does not apply in this investigation.

The Department is not precluded from using the five percent standard when applying the multinational rule as petitioners contend. In our recent preliminary determination concerning *Ball Bearings and Parts Thereof From Thailand*, 53 FR 45334 (1988), the Department determined that the special rule for multinational corporations did not apply where the home market in Thailand was viable based on the criteria set forth in 19 CFR 353.4. In applying the multinational rule, section 773(d)(2) of the Act requires that sales in the home market be inadequate as a

VOL 54 ISS 40 MR 2 1989 UMI

basis for comparison. The Department has only one viability test for determining the adequacy of a home market, the five percent standard as set out in § 353.4 of the Department's regulations, which it has routinely applied when judging home market viability.

While the language of § 353.4 states, in part, that this section is to be applied to situations "other than that provided for in § 353.9," this language does not affect the application of the five percent test, but rather governs the choice of the appropriate market for determining FMV where sales in the country of exportation are deemed inadequate. Section 353.4 should be read in a manner that applies the five percent benchmark to situations where there is a question concerning home market viability such as where the multinational corporations provision might be applicable. However, unless the five percent test of § 353.4 indicates there is no viable home market, the requirements of the multinational corporations provision have not been met.

*Comment 3.* If the Department bases foreign market value on home market sales in Greece, it should continue to compare the export prices of alkaline EMD and zinc chloride EMD sold to the United States with, respectively, the prices of home market sales of the same grade of EMB.

*Department's Position.* We agree. The Department selects that merchandise which is most appropriate for specific price comparisons in accordance with section 771(16) of the Act. The Department followed its standard methodology in this investigation by first matching identical merchandise sold in both markets. Specifically, the Department matched EMD of the same grade (alkaline or zinc chloride grade) when both were sold in the U.S. and home markets.

*Comment 4.* Petitioners advocate that the respondent's G&A, indirect selling expenses, and financing expenses be allocated over the reported volume of sales during the period of investigation.

*Department's Position.* We see no reason to change the respondent's allocation methodology. The petitioners are advocating the allocation of period expenses on the basis of "sales" as defined by the Department's date of sale methodology, which is used for properly determining those sales subject to the investigation. On its own books and records, a finished good usually is reflected as sold when it is shipped to fill a customer's order. Since, in this case, the allocation by shipment volume during the POI did not prove distortive, we have accepted the respondent's allocation.

*Comment 5.* Petitioners fault the treatment of manganese oxide ("MnO") in the calculation of the cost of production ("COP"). Because of the small volume and low value of MnO sales during the period as well as the fact that it is produced in the same process but only incidentally to the production of EMD, petitioners argue MnO is properly treated as a by-product of EMD production. Therefore, manufacturing costs should not be allocated to MnO, but rather the revenue received from the sale of MnO should be used to offset total production costs during the period.

*Department's Position.* The Department does not agree that MnO should be treated as a by-product in the production of EMD. By-products are basically waste products from the production of the primary product and possess only a residual value. The manufacture of MnO is the first step in the production process of EMD. Manganese ore is converted in this single, distinct production process which yields only one product, MnO. EMD is not produced at this stage. MnO generally continues on in the production process to be further transformed into EMD. Therefore, all costs incurred in the production process of converting manganese ore into MnO should appropriately be allocated to the MnO produced by this initial process.

*Comment 6.* Inventory carrying costs should be inputed for Tosoh Greece's inventories of manganese ore, anodes, and finished goods inventories.

*Department's Position.* When we calculate COP pursuant to section 773(b) of the Act, the Department is only interested in determining the actual costs incurred to produce the merchandise under investigation. The Department is not concerned with imputations necessary for determining differences in selling expenses between markets and, for this reason, does not impute costs in the calculation of cost of production. See *Final Determination of Sales at Less Than Fair Value: Certain All-Terrain Vehicles from Japan*, 54 FR 4804 (1989). Since the respondent included imputed credit expenses for home market sales in its calculation of COP, we have deleted this imputed credit expense from the COP used in our final determination.

*Comment 7.* Petitioners argue that the COP should be adjusted to compensate for certain practices that cannot be continued on a sustained basis. In particular, petitioners question whether the reported level of maintenance can continue to meet the requirements of a plant when operating at high production capacity.

*Department's Position.* We based our COP on the verified actual costs incurred by the respondent during the period of investigation. Since the respondent's accounting practice follows generally accepted accounting principles, which appropriately reflect the company's accounting methods used in the ordinary course of business and which the Department did not find to be distortive, the Department has based its COP on those costs.

*Comment 8.* Petitioners argue that the Department has made an improper adjustment with respect to the Greek value-added tax ("VAT"). The petitioners state that the Department has added an amount for VAT to the U.S. selling price while also adjusting FMV by the absolute difference between the Greek VAT on home market sales and the VAT added to United States sales. Petitioners contend that the adjustment the Department made on the foreign market side is not authorized as an adjustment for "other differences in circumstances of sale" (19 U.S.C. section 1677b(a)(4)(B)). Moreover, the petitioners cite *Zenith Electronics Corp. v. United States*, 633 F. Supp. 1382 (1986), as evidence that the Court of International Trade has specifically rejected this "circumstances of sale" approach to the treatment of VAT.

*Department's Position.* The ruling of the Court of International Trade in *Zenith*, now on appeal, does not bar Commerce from making a circumstance of sale adjustment for the differences in VAT between markets. In practice, the Department has routinely recognized that differences in the tax burden on home market and exported merchandise are properly accounted for by making circumstances of sale adjustments for these differences. See *Television Receivers, Monochrome and Color, from Japan*, 53 FR 4050, 4051 (1988); *Color Television Receivers from Korea*, 53 FR 24975, 25976 (1988).

*Comment 9.* Petitioners argue that home market sales at less than the cost of production should be excluded from the determination of foreign market value.

*Department's Position.* The Department found no home market sales to be below the cost of production.

*Comment 10.* Petitioners contend the Department has incorrectly treated a royalty payment made by the respondent as a direct selling expense rather than as a manufacturing expense. Since the royalty expense is related to certain technical production rights being provided, the expense is more properly recognized as a cost of manufacturing.

*Department's Position.* Having examined the agreement governing the respondent's royalty payment, we agree with the petitioners and have disallowed this adjustment as a direct selling expense in our final determination. We have treated it instead as a cost of manufacturing.

*Comment 11.* The petitioners question the accuracy of the export license fee reported per transaction since this amount does not correlate with the total fee divided by the quantities sold.

*Department's Position.* The total amount reported for each export license fee was verified as was the per kilogram expense listed for several U.S. transactions. The confusion stems from the transportation of two figures in the total export fee reported in the narrative section of the respondent's questionnaire response. Additionally, shipments of smaller quantities were not charged the same fee.

*Comment 12.* The Department incorrectly calculated the amount to be added to United States price for the applicable Greek VAT that was forgiven upon exportation of the merchandise. Petitioners argue that the tax percentage should be applied on the basis of the ex-mill price of the U.S. merchandise.

*Department's Position.* The Department verified that the Greek VAT is applied to the selling price of the merchandise inclusive of transportation expenses when the merchandise is sold on delivered terms. Therefore, the Department has properly calculated the applicable VAT on U.S. sales by multiplying the tax percentage by the same tax base used in the home market, *i.e.*, the selling price.

*Comment 13.* No addition should be made to U.S. price for import duties and taxes rebated or not collected on graphite anodes used in production. Petitioners argue that this adjustment should be denied since the graphite anodes are not raw materials and it is not apparent whether Greek law permits a credit against duties and taxes paid in these circumstances.

*Department's Position.* The Department verified that import duties and taxes are forgiven by the Greek government on graphite anodes consumed in the production of EMD that is exported. For this reason, we have added to U.S. price those import duties and taxes forgiven on graphite anodes when EMD is exported.

*Comment 14.* The Department should compute credit expense using Tosoh Hellas' interest rate rather than it's related trading company's interest rate because it could not verify the latter.

*Department's Position.* We agree and have made the change in our final determination.

**Respondent's Comments**

*Comment 1.* Tosoh Hellas reports the date of sale for one of its home market customers should be changed from the previously reported date of the internal sales "contract" to the date of shipment. Respondent states that sales to this customer were made on a spot basis and the quantity within the sales contract was based simply on an estimate to which the customer was not committed.

*Department's Position.* We accept that the sales "contract" used by the respondent for the home market customer in question is not a contract establishing terms of sale. The "contract" was written by the respondent for its own internal planning purposes and did not commit either party to the terms contained therein. Accordingly, the Department agrees that the appropriate date of sale is the date of shipment for that customer and has made that change in its final determination.

*Comment 2.* Since sales in the home market of alkaline grade EMD are not viable, the Department should use sales of zinc chloride EMD as the basis of FMV.

*Department's Position.* Having determined that the combined sales of alkaline EMD and zinc chloride EMD are viable, the Department compared the same grades of merchandise from within that category of sales to the corresponding grades of U.S. merchandise when this was feasible. See the Department's Response to Petitioners' Comment 3.

*Comment 3.* Respondent argues that since the sales of alkaline grade EMD in the home market were not in the usual commercial quantities, these sales cannot serve as the basis for foreign market value. Respondent cites section 1677b(a)(1), which provides that the foreign market value shall be the price "* * * at which such or similar merchandise is sold * * * in the principal markets of the country from which exported, in the usual commercial quantities * * * for home consumption."

*Department's Position.* During the period under investigation, we note that U.S. sales of similar quantities were also made. For this reason, we do not agree with respondent's argument regarding the referenced home market sales and have used these sales in determining foreign market value.

*Comment 4.* Respondent further argues that sales of EMD to this home market customer were made outside the ordinary course of trade and, therefore, should not be used as the basis for FMV. As support for this argument, respondent states that the terms of sale are not consistent with the terms of other sales made in the home market, that the sales price to this customer differs based on this fact, and sales to this customer were not made under terms similar to those employed in the U.S. market.

*Department's Position.* As stated above, the quantities that were sold to this home market customer are similar in size to sales made to a U.S. customer. Furthermore, in comparing these sales, price appears to vary independently of quantity. Furthermore, the terms of sale for the U.S. sales of similar quantity and those of the home market customer cited differ more because of specific payment terms than for any other reason. Such differences are more reflective of the particular customer's credit history rather than a basis for concluding that sales to that customer are outside the ordinary course of trade. Sales to this home market customer were made at regular intervals throughout the period of investigation and the Department has used these sales in its final determination.

*Comment 5.* Respondent states that the legal prerequisites for a critical circumstance finding have not been met.

*Department's Position.* We agree. See the "Negative Determination of Critical Circumstances" section of this notice.

**Suspension of Liquidation**

Since we have determined that critical circumstances do not exist with regard to this investigation, entries suspended prior to November 14, 1988, the date of publication of the preliminary determination in the **Federal Register**, can now be liquidated and all securities posted as a result of the suspension of liquidation prior to that date will be refunded or cancelled. We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of EMD from Greece that are entered, or withdrawn from warehouse, for consumption on or after November 14, 1988. The Customs Service shall continue to require a cash deposit or posting of bond equal to the estimated amounts by which the foreign market value of the merchandise subject to this investigation exceeds the United States price, as shown below. This suspension of liquidation will remain in effect until further notice.

The weighted-average margins are as follows:

BEST COPY AVAILABLE

VOL 54 ISS 40 MR 2 1989 UMI

| Manufacturer/producer/exporter | Weighted-average margin percentage |
|---|---|
| Tosoh Hellas | 36.72 |
| All others | 36.72 |

**ITC Notification**

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all securities posted as a result of suspension of liquidation will be refunded. However, if the ITC determines that such an injury does exist, the Department will issue an antidumping duty order directing Customs officers to assess an antidumping duty on EMD from Greece as defined in the "Scope of Investigation" section of this notice, entered or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the U.S. price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

## Electrolytic Manganese Dioxide From Ireland; Final Determination of No Sales at Less Than Fair Value

**AGENCY:** International Trade Administration, Import Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** We have determined that electrolytic manganese dioxide from Ireland is neither being, nor is likely to be, sold in the United States at less than fair value. The respondent in this investigation, the sole producer of electroytic manganese dioxide in Ireland, Mitsui Denman Ireland, reported no sales and no outstanding offers for sales during the period of investigation. We have notified the International Trade Commission ("ITC") of our determination.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Anne D'Alauro (202) 377-1130 or Holly Kuga (202) 377-4733, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

**SUPPLEMENTARY INFORMATION:**

**Final Determination**

We have determined that electrolytic manganese dioxide ("EMD") from Ireland is not being, nor is likely to be, sold in the United States at less than fair value as provided in section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d) ("the Act"). The Department found no sales, commercial shipments, outstanding contractual obligations for sales, or irrevocable offers for sale to the United States during the period of investigation ("POI") to compare with foreign market value.

**Case History**

On November 14, 1988, we made a negative preliminary determination (53 FR 45795). The following events have occurred since the publication of that notice.

On November 29, 1988, the petitioners, Kerr-McGee Chemical Corporation and Chemetals Inc., requested that we postpone making our final determination for a period of thirty days pursuant to section 735(a)(2)(B) of the Act. On December 20, 1988, we issued a notice postponing the final determination until February 22, 1989 (53 FR 51129).

The Department conducted a verification of respondent, Mitsui Denman Ireland ("MDI") in Ireland on December 5, 1988, and its related trading company, Mitsui & Co., U.S.A., on December 16, 1988.

On January 23, 1989, the Department held a public hearing. Petitioners and respondent submitted comments for the record in prehearing briefs on January 17, 1989, and in posthearing briefs on February 2, 1989. Additional comments were submitted on January 30 and on February 6 and 9, 1989.

**Scope of the Investigation**

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted from the Tariff Schedules of the United States Annotated ("TSUSA") to be Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS number. As with the TSUSA numbers, the HTS numbers are provided for convenience and customs purposes. The written product description remains dispositive.

The product covered by this investigation is electrolytic manganese dioxide from Ireland. During the investigation period, such merchandise was classifiable under item 419.4420 of the TSUSA. This merchandise is currently classifiable under HTS item number 2820.10.0000.

EMD is manganese dioxide ($MnO_2$) that has been refined in an electrolysis process. The subject merchandise is an intermediate product used in the production of dry cell batteries. EMD is sold in three physical forms, powder, chip or plate, and two grades, alkaline and zinc chloride. EMD in all three forms and both grades is included in the scope of the investigation.

**Period of Investigation**

The petitioners requested the Department to extend the POI because the investigation period initially specified by the Department is not representative of levels of EMD exports to the United States from Ireland. Petitioners request that the Department extend the POI to include those sales made by MDI which correspond to United States entries made in the first half of 1987. They argue that this is the appropriate POI since Irish EMD has been exported to the United States in all of the most recent years except the current one, a fact that reflects a mere depression in current sales activity.

The Department has extended the normal six-month POI where that period did not adequately reflect the sales practices of the firms subject to the investigation. For example, where sales were made pursuant to long term contracts, the Department has extended the period in order to include the date of sale corresponding to shipments during the period. See *Certain Forged Steel Crankshafts from the United Kingdom*, 52 FR 32951 (1987). In instances where distortions would have resulted from using a POI limited to six months, as in the case of seasonally-affected sales, the Department has extended the period to eliminate such distortions. See *Certain Fresh Cut Flowers from Colombia*, 52 FR 6842 (1987). The Department has also extended the period in cases where special order or customized sales are under investigation in order to accommodate the unique circumstances involved in investigating this type of merchandise. See *Offshore Platform Jackets and Piles from Japan*, 51 FR 11788 (1986). Finally, the Department has extended the period in cases where sales activity was unusually depressed

resulting in too few sales for an adequate investigation. See *Certain Iron Metal Castings from India*, 46 FR 39869 (1981).

We have determined that there are no factors in this case that would justify an extension of the POI. No shipments of EMD from MDI were made during the POI which correspond to sales made prior to the period nor were the shipments made during 1987 pursuant to long term contracts with U.S. purchasers. Petitioners argue that sales of EMD are greatest in the fall of the year necessitating the extention of the period to capture this peak sales activitity. The evidence for MDI, however, shows that when it supplied the U.S. market, its monthly shipment volume remained constant. This shipment stability is also evidenced by MDI's related Japanese producer. Even if seasonality were a factor and the POI were extended by an additional six months to capture a full year in our investigation, a sufficient period for eliminating distoritions, no sales would be found within that expanded period.

Finally, the circumstances presented in this case do not support a finding of unusually depressed sales sufficient to warrant extension of the POI. There were no U.S. sales or commercial shipments within the POI. The evidence documents that there had been no commercial sales by the respondent in the U.S. market for an extended period of time which did not coincide with any industry-wide depression in EMD demand. MDI continues to have no current contractual obligation outstanding for EMD of Irish origin (see our response to comment 1). Its product has been disqualified by its primary U.S. purchaser (and remains unqualified by other major U.S. purchasers) and must successfully undergo a considerable qualification process to regain approval. Because of the quality problems that have been experienced with MDI's product, completion of qualification is of particular significance. Since these circumstances go well beyond those that would be present for a firm experiencing only "unusually depressed" sales activity, the Department determines that this reason for expanding the POI does not apply in this case.

**Fair Value Comparisons**

If we were to determine whether sales of EMD in the United States are made at less than fair value, we would have compared the United States price to the foreign market value. However, in the present investigation, we were unable to make this comparison due to the absence of U.S. sales during the period of investigation, December 1, 1987 through May 31, 1988.

**Negative Determination of Critical Circumstances**

Petitioners alleged that "critical circumstances" exists with respect to imports of EMD from Ireland. Section 735(a)(3) of the Act provides that critical circumstances exists if we determine that there is a reasonable to believe or suspect that:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than fair value, and

(B) There have been massive imports of the merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3)(B), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

For purposes of this finding, we used company specific shipment data for EMD from Ireland. Since there were no commercial shipments made during 1988, we find that imports of the subject merchandise from Ireland have not been massive over a relatively short period of time.

Since we do not find that there have been massive imports, we need not consider whether there is a history of dumping or whether importers of this product knew or should have known that it was being sold at less than fair value. Therefore, we determine that critical circumstances do not exist with respect to imports of EMD from Ireland.

**Verification**

As provided in section 776(b) of the Act, we verified all information used in reaching the final determination in this investigation. We used standard verification procedures, including examination of relevant sales records and original source documents provided by the respondent.

**Petitioners' Comments**

*Comment 1.* Petitioners contend that MDI's EMD is likely to be sold in the U.S. at less than fair value. In support of this contention, petitioners allege (1) that MDI has made bona fide offers to sell EMD during the POI, and (2) that MDI has been supplying samples for testing and qualification purposes in an attempt to supply the U.S. market.

*Department's Position.* We disagree with petitioners' conclusion. Section 731 of the Act provides, in part, that in order to find that dumping is occurring the Department must determine that the merchandise subject to investigation "is being, or is likely to be, sold in the United States at less than fair value." "More than a speculative potential of future sales for export is necessary to meet the 'likely to be sold' criterion of section 731 of the Act" *Certain Carbon Steel Products from Czechoslovakia*, 50 FR 1912 (1985). The Department looks for evidence of a current offer, the acceptance of which is reasonably expected. See *Dismissal of Antidumping Petitions on Certain Steel Products from Romania*, 47 FR 5752 (1982). At the very least this requires evidence of an irrevocable offer to sell (*Carbon Steel from Czechoslovakia*).

The Department verified that MDI had no contractual obligations outstanding as of the date our verification was completed, December 16, 1988. Information regarding an April 1988 meeting with a potential customer has been carefully evaluated by the Department. There was no signed, written offer by MDI specifying the price and quantity at which it would sell EMD. No promise was made to hold any offer open for a period of time. The evidence is unclear as to whether quantity terms were specified; price was discussed in relation to a competitive level at an unspecified point in time. Moreover, any agreement that might have been made was subject to successful qualification of MDI's EMD, which requires several months of additional testing. We have determined that discussions at that meeting did not reach the level of an irrevocable offer. Even assuming, *arguendo*, that some form of bona fide offer existed at that time, ten months have passed since this meeting without further action by either party. If this were the case, any reasonable time period for holding an offer open would have expired.

Finally, supplying samples of EMD in an attempt to qualify MDI's merchandise does not constitute "likelihood of sales" for purposes of the antidumping law. The qualification process for EMD is complex and time consuming, requiring at minimum a six month testing period. Irish EMD has been and remains disqualified by one major U.S. purchaser and unqualified by other potential major U.S. purchasers; qualification is a necessary requirement

VOL 54 ISS 40 MR 2 1989 UMI

of battery producers prior to commercial purchase of the subject merchandise. Any likelihood of future sales, pending successful qualification of MDI's EMD, is too speculative for the Department to consider them as sales during the POI.

*Comment 2.* Petitioners contend that the special rule for multinational corporations contained in section 773(d) of the Act should be applied to calculate the foreign market value of MDI's EMD.

*Department's Position.* Since we have determined that MDI did not sell EMD to the United States during the POI, nor was there a likelihood of such sales, we did not calculate foreign market value.

*Comment 3.* Petitioners contend that the Department should determine the appropriate margin based upon the information submitted by petitioners as the best information available.

*Department's Position.* The respondent has furnished, in proper form, all information requested by the Department. Based on the information reported, and which we have deemed adequate, we have determined that MDI did not sell EMD, nor was there a likelihood of such sales, to the U.S. during the POI. For these reasons, the Department has no reason to resort to the use of best information available as suggested by the petitioners.

**ITC Notification**

In accordance with section 735(d) of the Act, we have notified the ITC of our determination.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Date: February 22, 1989.

## Final Determination of Sales of Less Than Fair Value: Electrolytic Manganese Dioxide From Japan

**AGENCY:** International Trade Administration, Import Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** We have determined that electrolytic manganese dioxide from Japan is being, or is likely to be, sold in the United States at less than fair value. We also determine that critical circumstances do not exist with respect to imports of electrolytic manganese dioxide from Japan. The U.S. International Trade Commission (ITC) will determine, within 45 days of the publication of this notice, whether these imports are materially injuring, or are threatening material injury to, a United States industry.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Kelly Parkhill (202) 377-1130 or Holly Kuga (202) 377-4733, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC, 20230.

**SUPPLEMENTARY INFORMATION:**

**Final Determination**

We have determined that electrolytic manganese dioxide ("EMD") from Japan is being, or is likely to be, sold in the United States at less than fair value as provided in section 735(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) (the Act). The weighted-average margin of sales at less than fair value is shown in the "Suspension of Liquidation" section of this notice.

**Case History**

The petitioners in this investigation, Kerr-McGee Chemical Corporation and Chemetals Incorporated, are manufacturers of EMD. The respondents, who account for virtually all of the exports to the United States, are Mitsui Mining and Smelting ("MMS") and Tosoh Corporation ("Tosoh").

On November 14, 1988, we made an affirmative preliminary determination (53 FR 45796). The following events have occurred since the publication of that notice.

On November 21, 1988, Tosoh requested that we postpone making our final determination for a period of thirty days pursuant to section 735(a)(2)(A) of the Act. On December 20, 1988, we issued a notice postponing the final determination until February 22, 1989 (53 FR 51130).

The questionnaire responses from MMS and Tosoh were verified in Japan between November 28 and December 9, 1988.

Petitioners and respondents submitted written comments for the record on January 25 and 31, 1989.

**Scope of the Investigation**

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted from the Tariff Schedules of the United States Annotated ("TSUSA") to the Harmonized Tariff Schedule ("HTS"), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS number. As with the TSUSA numbers, the HTS numbers are provided for convenience and customs purposes. The written product description remains dispositive.

The product covered by this investigation is electrolytic manganese dioxide from Japan. During the period of investigation ("POI"), such merchandise was classifiable under item 419.4420 of the TSUSA. This merchandise is currently classifiable under HTS item number 2820.10.0000.

EMD is manganese dioxide ($MnO_2$) that has been refined in an electrolysis process. The subject merchandise is an intermediate product used in the production of dry cell batteries. EMD is sold in three physical forms, powder, chip or plate, and two grades, alkaline and zinc chloride. EMD in all three forms and both grades is included in the scope of the investigation.

**Fair Value Comparisons**

To determine whether sales of EMD in the United States were made at less than fair value, we compared the United States price to the foreign market value as specified below. We made comparisons on all sales of the product during the period of investigation December 1, 1987 through May 31, 1988.

**United States Price**

As provided in section 772 of the Act, we used the purchase price of the subject merchandise to represent the United States price for all sales made by MMS and Tosoh. We used purchase price as the basis for determining United States price since the merchandise was sold to an unrelated purchaser in Japan with the knowledge that that purchaser would then export the merchandise to the United States.

Purchase price was based on the F.O.B. (foreign port) and ex-godown price to unrelated purchasers in Japan. Where applicable, we made deductions for foreign inland freight, brokerage and handling, and certain other movement expenses.

**Foreign Market Value**

In accordance with section 773(a) of the Act, we determined that there were sufficient home market sales of such or similar merchandise by both MMS and Tosoh to form the basis for foreign market value.

Home market price was based on the delivered price to unrelated purchasers in the home market. We deducted inland freight and home market packing, and added U.S. packing. We made a circumstance of sale adjustment for differences in credit between the two markets.

**Negative Determination of Critical Circumstances**

Petitioners allege that imports of EMD from Japan present "critical circumstances." Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that there is a reasonable basis to believe or suspect that:

(A) (i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than fair value, and

(B) There have been massive imports of the merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3)(B), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

For purposes of this finding, we based our analysis on the verified shipment data of the Japanese respondents, for equal periods immediately preceding and following the filing of the petition until the month of our preliminary determination. In the case of MMS, shipments declined during the five month period between the petition and the preliminary determination. Tosoh's shipments increased less than the 15 percent considered to be indicative of massive imports. Based on the above, we find that there is no reasonable basis to conclude that imports of EMD have been massive over a relatively short period.

Since we do not find that there have been massive imports, we need not consider whether there is a history of dumping or whether importers of this product knew or should have known that it was being sold at less than fair value. Therefore, we determine that critical circumstances do not exist with respect to imports of EMD from Japan.

**Verification**

As provided in section 776(b) of the Act, we verified all information used in reaching the final determination in this investigation. We used standard verification procedures, including examination of relevant accounting records and original source documents provided by respondents.

**Petitioners' Comments**

*Comment 1.* Petitioners state that MMS' foreign market value should be based on its home market sales of both types of alkaline EMD. Petitioners state that the two types of alkaline EMD sold in the home market are identical within the meaning of the antidumping statute.

*Department's Response.* The Department disagrees. MMS provided us with additional information at verification from which we were able to determine that the two types of alkaline EMD are similar, not identical merchandise. One of the two types of EMD sold in the home market was identical to that sold in the U.S. market. We based the foreign market value on sales of that identical merchandise in the home market.

*Comment 2.* Petitioners contend that a rebate granted by MMS in the home market is a quantity discount which should not be allowed as a deduction by Commerce. Alternatively, petitioners contend that if the deduction is granted, the Department should make a circumstance of sale adjustment in order to reflect price differences resulting from the quantities being sold in both markets.

*Department's Response.* We disagree. The Department has verified that the adjustment in question is a rebate, *i.e.*, a pre-established post-sale credit or refund based upon meeting certain conditions established between the buyer and the seller at the time of sale. That the condition for obtaining the rebate in this case is based on the cumulative quantity sold does not alter this fact. Even if this was a quantity-based discount, petitioners have not provided the basis for making their proposed adjustments.

*Comment 3.* Petitioners state that the Department should calculate the dumping margin for MMS based on a dollar denominated U.S. price with any yen denominated adjustments converted at the prevailing exchange rate on the date of sale. To do otherwise, would allow the respondent to artificially reduce the margins by manipulating the exchange rate conversions.

*Department's Response.* MMS is paid in yen by its unrelated Japanese distributor for its U.S. sales. Foreign market value is also yen-denominated. Therefore, there is no need for currency conversions in performing the dumping calculation. The yen amount MMS receives for its U.S. sales does depend on the exchange rate. However, because the trading company is paid in dollars and then pays MMS using the exchange rate in effect on the date of payment, that date of payment, and therefore the exchange rate used, is determined by the trading company, not MMS. Therefore, we do not see how MMS is able to manipulate its margins through currency conversions.

*Comment 4.* Petitioners contend that the date of sale for a certain U.S. customer should be the date of the purchase order rather than the date of the contract which predates the POI. Alternatively, the POI should be extended back to include this sale.

*Department's Response.* The Department determined that the sale terms for the U.S. customer in question were established in a contract which was entered into prior to the date of the POI. This was verified through sales documentation which established a fixed price as well as the specific shipping schedule for each transaction. The Department feels no need to expand the POI to include this transaction since the Department has reviewed 80 percent of Tosoh's shipments and all of their U.S. sales that occurred during the six-month POI.

*Comment 5.* Petitioners state that Tosoh should report its U.S. prices in dollars, not yen.

*Department's Response.* We disagree. Tosoh reported its prices in the currency in which it was paid, as requested by the Department in its questionnaire.

*Comment 6.* Petitioners claim that the Department should not deduct the double payment of rebate incorrectly paid by Tosoh on one of its sales.

*Department's Response.* The Department verified the amount of rebate paid on home market sales. On the sale in question, the Department verified that, due to a billing error, a rebate was paid twice. Since the customer did not return the second, erroneous rebate payment, the Department believes that a deduction, in the full amount of the rebate actually paid on that transaction, should be allowed.

*Comment 7.* Petitioners state that Tosoh's credit expenses must be calculated on the basis of gross price less discount in order to reflect the true

VOL 54 ISS 40 MR 2 1989 UMI

cost of extending credit to its customers between shipment and final payment.

*Department's Response.* The Department agrees. We have subtracted the discount from the gross price before calculating the credit expense.

*Comment 8.* Petitioners state that the Preliminary Determination of Critical Circumstances must be affirmed in the final determination based upon Tosoh's massive imports during the three month period following the petition and its knowledge of dumping.

*Department's Response.* The Department disagrees. (See the "Negative Determination of Critical Circumstances" section of this notice.) The period for determining massive imports in this investigation is the five month period between the filling of the petition and the preliminary determination not the three month period following the petition. The Department uses this period between the filing of the petition and the preliminary determination to determine whether there are massive imports since this is the period in which respondents could take advantage of their knowledge of the dumping case to increase exports to the United States without being subject to antidumping duties. See *Certain Internal-Combustion, Industrial Forklift Trucks From Japan*, 53 FR 12552, 12566 (1988). During this time, Tosoh's shipments to the United States increased less than the 15 percent increase considered to be indicative of massive imports. Therefore, we have determined that imports durtng the period have not been massive and that the requirements for determining critical circumstances have not been met.

**Respondents' Comments**

*Comment 1.* Tosoh claims that the legal requirements for critical circumstances have not been met. Specifically, Tosoh claims that the increase in its shipments to the U.S. during the five month period between the petition and suspension of liquidation do not meet the Department's definition of "massive imports." Furthermore, Tosoh claims that its increase is overstated because it includes EMD shipped under long-term contracts outside the POI.

*Department's Response.* The Department agrees that the requirements for an affirmative determination of critical circumstances have not been met. (See the "Negative Determination of Critical Circumstances" section of this notice.)

**Suspension of Liquidation**

Since we have determined that critical circumstances do not exist with regard to this investigation, entries suspended prior to November 14, 1988, the date of publication of the preliminary determination in the Federal Register, can now be liquidated and all securities posted as a result of the suspension of liquidation prior to that date will be refunded or cancelled. We are directing the U.S. Customs Service to continue to suspend liquidation of all entries EMD from Japan that are entered or withdrawn from warehouse, for consumption on or after November 14, 1988. The Customs Service shall continue to require a cash deposit or posting of bond equal to the estimated amounts by which the foreign market value of the merchandise subject to this investigation exceeds the United States price, as shown below. This suspension of liquidation will remain in effect until futher notice.

The weighted-average margins are as follows:.

| Manufacturer/producer/exporter | Weighted-average margin percentage |
|---|---|
| Mitsui Mining and Smelting | 77.43 |
| Tosoh Corporation | 71.91 |
| All others | 73.30 |

**ITC Notification**

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all securities posted as a result of suspension of liquidation will be refunded. However, if the ITC determines that such an injury does exist, the Department will issue an antidumping duty order directing Customs officers to assess an antidumping duty order directing Customs officers to assess an antidumping duty on EMD from Japan as defined in the "Scope of Investigation" section of this notice, entered or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the U.S. price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

**[A-351-601]**

**Preliminary Determination of Sales at Not Less Than Fair Value: Steel Wheels From Brazil**

**AGENCY:** Import Administration, International Trade Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** We preliminarily determine that steel wheels from Brazil are neither being, nor are likely to be, sold in the United States at less than fair value. We have notified the International Trade Commission of our determination. If this investigation proceeds normally, we will make a final determination by May 10, 1989.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION:** Contact J. David Dirstine (202) 377-5255 or Anne D'Alauro (202) 377-2923, Office of Antidumping Compliance, Import Administration, International Trade Administraiton, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

**SUPPLEMENTARY INFORMATION:**

**Preliminary Determination.**

We preliminarily determine that steel wheels from Brazil are neither being, nor are likely to be, sold in the United States at less than fair value as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the "Act").

**Case History**

Since the notice of initiation, (53 FR 32267, August 24, 1988), the following events have occurred. On September 12, 1988, the International Trade Commission ("ITC") found that there is a reasonable indication that imports of steel wheels from Brazil are materially injuring, or threatening material injury to, a U.S. industry (USUTC Pub. No. 2124, September 1988).

On September 6, 1988, we presented questionnaires to Borlem S.A. Empreendimentos Industriais ("Borlem S.A.") and Rockwell-Fumagalli ("Fumagalli"), manufacturers of steel wheels from Brazil. On September 23, 27, October 24, November 1, 10, and December 1, 6, 1988, we received replies to the questionnaires.

On November 16, 1988, we presented a questionnaire to Borlem do Nordeste S.A. Empreendimentos Industriais ("BNE"), a subsidiary of Borlem S.A. We received replies to the questionnaire on December 1 and 28, 1988.

On December 12, 1988, the petitioner, Kelsey-Hayes Company, requested that the Department extend the period for the preliminary determination until not later than 210 days after receipt of the petition in accordance with section 733(c)(1)(A) of the Act.

Verification of the responses was conducted from January 16 through February 3, 1989 and on February 8, 1989.

**Scope of Investigation**

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 et seq. of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

The products covered by this investigation are steel wheels, assembled or unassembled, consisting of a disc and a rim, designed to be mounted with both tube type or tubeless pneumatic tires, in wheel diameter sizes ranging from 13.0 inches to 16.5 inches, inclusive, and generally for use on passenger automobiles, light trucks, and other vehicles. During the period of investigation, such merchandise was classifiable under item under 692.3230 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item number 8708.70.60. The HTS number is provided for convenience and Customs purposes. The written description remains dispositive.

In a submission dated September 28, 1988, Borlem S.A., a respondent company, argued that rims imported separately are not within the scope of the investigation. In submissions dated October 7, 1988 and October 12, 1988, the petitioner argued that rims imported separately and sold as "distinct articles of commerce" are not within the scope of the investigation, but that rims imported separately as a means of circumvention are within the scope of the investigation. In a submission dated October 21, 1988, the petitioner, as well as NI Industries, a domestic interested party, argued that rims imported separately are within the scope of the investigation.

For purposes of the preliminary determination, we have treated rims or discs, whether imported separately or together, as included in the scope of this investigation.

**Period of Investigation**

Sales of steel wheels to original equipment manufacturers ("OEMs") account for more than 60 percent of imports of the subject merchandise into the United States from Brazil. Steel wheels are normally sold to OEMs in the United States on the basis of long-term requirements contracts. We found that shipments to the United States by Fumagalli during the February 1-July 31, 1988 investigation period were pursuant to agreements executed in November 1986. Therefore, under § 353.38(a) of our regulations, we extended the period of investigation for Fumagalli to seven months by including November 1986 as well. See *Certain Forged Steel Crankshafts from Japan*, 52 FR 17999 (1987) and *Certain Granite Products from Italy*, 53 FR 27187 (1988). The period of investigation for Borlem S.A. and BNE is February 1, 1988 through July 31, 1988.

**Fair Value Comparisons**

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price for sales of wheels to OEMs with foreign market value for sales of wheels to OEMs in Brazil. Since there were no viable rim sales in the home market or third countries, we compared the United States price for rim sales to BNE's sole U.S. rim customer, an unrelated wheel customizer, with a foreign market value based on constructed value.

Although not expressly required by the Act, the Departmet has a long-standing practice of calculating a separate dumping margin for each manufacturer or exporter investigated. We have concluded, however, that, for purposes of this investigation, Borlem S.A. and BNE are not separate, and that it is appropriate to calculate a single, weighted-average margin for Borlem S.A. and BNE.

The administrative record establishes that Borlem S.A. holds over 95 percent of the voting capital and over 73 percent of the total capital of BNE. Since the vice president of Borlem S.A. is the president of BNE and the financial director of Borlem S.A. is financial director of BNE, there is common access to pertinent sales and manufacturing information. Even though each company maintains separate manufacturing facilities and sales operations, the production facilities at both companies consist of similar types of equipment. Therefore, it would not be necessary to retool extensively either plant's facilities before implementing a decision to restructure either company's manufacturing priorities. Given these facts, it would be incorrect to conclude that these entities constitute two separate manufacturers or exporters under the dumping law. See *Certain Granite Products from Spain*, 53 FR 24337 (1988).

**United States Price**

As provided in section 772(b) of the Act, we used purchase price to represent the United States price for sales of steel wheels made by Borlem S.A. to an unrelated purchaser prior to importation of the merchandise into the United States.

The Department also determined that purchase price and not exporter's sales price was the most appropriate indicator of United States price for Fumagalli based on the following elements:

1. The merchandise was purchased or agreed to be purchased prior to the date of importation from the manufacturer or producer of the merchandise for exportation to the United States.

2. The selling agent located in the United States acted only as a processor of sales-related documentation and as a communication link with the unrelated U.S. buyers.

3. The wheels sold to OEMs were made-to-order and not sold through inventory. Although a party related to the seller took title to the wheels and held them in its warehouse after the sale was made, this was only to accommodate the "just-in-time" delivery terms stipulated in the requirements contract negotiated between the Brazilian producer and the U.S. OEM purchaser. All terms of the sale were settled in this contract and were not changed by the related party when it released the wheels to the U.S. OEM purchaser.

4. Warehousing for "just-in-time" delivery was the customary channel of trade for wheels sold by Fumagalli to the U.S. OEM purchaser.

We calculated purchase price based on the packed ex-factory prices to unrelated purchasers in the United States. Where appropriate, we made deductions for brokerage and handling, foreign inland freight, ocean freight, marine insurance, U.S. duty, and U.S. inland freight. In accordance with section 772(d)(1)(C) of the Act, we made additions for indirect taxes not collected by reason of the exportation of the merchandise.

**Foreign Market Value**

We calculated foreign market value for wheel sales by Fumagalli and Borlem S.A. based on home market packed prices to unrelated purchasers in

VOL 54 ISS 40 MR 2 1989 UMI

accordance with section 773(a) of the Act.

When basing foreign market value on home market prices, we made deductions, where appropriate, for inland freight, and inland insurance. We deducted the home market packing cost and added U.S. packing costs. We made circumstance of sale adjustments for differences in credit, post-sale warehousing expenses, and indirect taxes between the two markets.

In accordance with section 773(a)(4)(C) of the Act, we made adjustments to similar merchandise to account for differences in the physical characteristics of the merchandise where there were no identical products in the home market with which to compare products sold in the United States. These adjustments were based on differences in the costs of materials, direct labor and factory overhead.

In accordance with section 773(a)(2) of the Act, we used the constructed value of the exported merchandise to determine foreign market value for BNE, since no viable home market or third country rim sales were found during the period of investigation. The constructed value was based upon the most recent information submitted by BNE and included adjustments for calculation errors noted by the company prior to the verification.

Section 773(e)(1)(A) of the Act directs that foreign market value shall be constructed as of the date of exportation. At the same time, however, § 353.56(a)(1) of our regulations requires that currency conversions for "purchase price" transactions be made using the exchange rate in effect on the date of the U.S. sale. Previous investigations have shown that in hyperinflationary economies, when the date of sale occurs in a month preceding the date of shipment, application of the earlier date of sale exchange rate may result in distortions. Nominal increases in cost between the date of sale and the date of shipment are accounted for by using monthly replacement costs to construct foreign market value; however, the decreased value of the currency, in which those costs are expressed, remains unadjusted.

In consideration of the above, we calculated foreign market value for BNE using the exchange rate in effect on the date of sale as prescribed in our regulations. In addition, a circumstance of sale adjustment was made prior to currency conversion, eliminating the artificial distortion of value caused by the rapid devaluation of Brazil's currency. See *Tubeless Steel Disc Wheels from Brazil*, 53 FR 34566 (1988).

**Currency Conversion**

When calculating foreign market value, we normally make currency conversions in accordance with § 353.56 of our regulations, using the certified exchange rates furnished by the Federal Reserve Bank of New York. Since the Federal Reserve Bank of New York stopped providing exchange rate information for Brazil prior to the period of this investigation, we used the monthly exchange rates provided by the International Monetary Fund.

**Verification**

The verification was conducted from January 16 through February 3, 1989 and on February 6, 1989, using standard verification procedures, including examination of relevant accounting records and original source documents provided by the respondents. With the exception of BNE, the information used in reaching the preliminary determination in this investigation was based upon data reviewed during our verification.

Our verification of BNE's submitted constructed value data was also conducted during the above stated period. Pending further review of this complex constructed value data, we have based BNE's preliminary determination upon the company's submitted constructed value data. The continuing review of the verification results and constructed value data may lead to decisions which produce results differing from these preliminary results.

Our verification reports will be available to all parties for comment shortly after publication of this preliminary notice.

**Preliminary Results**

We preliminarily determine that steel wheels from Brazil are neither being, nor are likely to be, sold in the United States at less than fair value as provided in section 733 of the Act.

**ITC Notification**

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the consent of the Assistant Secretary for Import Administration.

If our final determination is affirmative, then the ITC will determine no later than 120 days after the date of this preliminary determination or 45 days after the final determination, whichever is later, whether these imports are materially injuring, or threaten material injury to, a United States industry.

**Public Comment**

In accordance with § 353.47 of the Department's regulations, if requested within ten days of publication of this notice, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 1:00 p.m., on April 10, 1989, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Assistant Secretary for Import Administration, Room B-099, at the above address within ten days of the publication of this notice.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed.

In addition, fifteen copies of the business proprietary version and seven copies of the nonproprietary version of the prehearing briefs must be submitted to the Assistant Secretary at least seven days prior to the scheduled date of the public hearing. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, at the above address, and will be considered if received not less than 30 days before the final determination is due or, if a hearing is held, within seven days after the hearing transcript is available.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673b(f)).

## Fabricated Automotive Glass From Mexico; Preliminary Results of Countervailing Duty Administrative Review

**AGENCY:** International Trade Administration/Import Administration, Commerce.

**ACTION:** Notice of preliminary results of Countervailing Duty Administrative Review.

**SUMMARY:** The Department of Commerce has conducted an administrative review of the countervailing duty order on fabricated automotive glass from Mexico. We preliminarily determine the total bounty or grant to be zero for the period January 1, 1988 through December 31, 1988. We invite interested parties to comment on these preliminary results.

**EFFECTIVE DATE:** March 2, 1989.

**FOR FURTHER INFORMATION CONTACT:** Christopher Beach or Bernard Carreau, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

**SUPPLEMENTARY INFORMATION:**

**Background**

On December 11, 1986, the Department of Commerce ("the Department") published in the **Federal Register** (51 FR 44652) the final results of its last administrative review of the countervailing duty order on fabricated automotive glass from Mexico (50 FR 1908; January 14, 1985). On January 28, 1987 and January 30, 1987, PPG Industries and the Government of Mexico, respectively, requested in accordance with 19 CFR 355.10 an administrative review of the order. We published the initiation on February 23, 1987 (52 FR 5479). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

**Scope of Review**

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 et seq. of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

Imports covered by this review are shipments of Mexican fabricated automotive glass, including tempered and laminated automotive glass. During the review period, such merchandise was classifiable under items 544.3100 and 544.4120 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS items 7007.11.00, 7007.19.00, 7007.21.00 and 7007.21.50. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period January 1, 1988 through December 31, 1988 and 14 programs.

**Analysis of Programs**

*(1) FOMEX*

The Fund for the Promotion of Exports of Mexican Manufactured Products ("FOMEX") is a trust of the Mexican Treasury Department, with the National Bank of Foreign Trade acting as trustee for the program. The National Bank of Foreign Trade, through financial institutions, makes FOMEX loans available at preferential rates to Mexican exporters and U.S. importers for two purposes: pre-export financing and export financing. We consider both pre-export and export FOMEX loans to confer export bounties or grants since these loans are given at preferential rates only on merchandise destined for export.

The exporters were able to tie both types of FOMEX loans to their exports to specific countries. We verified that the two known exporters of this merchandise did not receive any FOMEX loans on shipments to the United States during the review period. Therefore, we preliminarily determine that there was no benefit from this program during the review period.

*(2) FICORCA*

On December 20, 1982, the Government of Mexico and the Banco de Mexico established the Trust Fund for Coverage of Risks ("FICORCA"), which operates through credit institutions. All Mexican firms with registered long-term debt in foreign currency and payable abroad to foreign financial institutions or suppliers were able to purchase, at a controlled rate, the amount in dollars necessary to pay the principal on that debt.

In *Unprocessed Float Glass from Mexico, Countervailing Duty Determination* (49 FR 23097; June 4, 1984), we determined that the FICORCA program was available to all Mexican firms with foreign indebtedness and that it was not targeted to a specific industry or region, and that it was not tied to exports. During the first administrative review of this countervailing duty order, we reinvestigated the FICORCA program and reaffirmed our determination that it is not countervailable. (*See, Fabricated Automotive Glass from Mexico; Final Results of Countervailing Duty Administrative Review* (51 FR 44652; December 11, 1986)).

The petitioner, PPG Industries, Inc. ("PPG"), requested that the Department reevaluate FICORCA in light of new information and/or changes to existing regulations. PPG asserts that: (1) Capitalization of unpaid interest on FICORCA debt provides a benefit equalling the difference between what the auto glass companies would have paid in the commercial sector and the amounts they actually paid; (2) special permission from the Mexican government is required to enroll nonbank debt, such as commercial paper, in FICORCA; (3) the Mexican government allowed companies in the Vitro group to provisionally enroll unrescheduled debt in the program; (4) companies in the Vitro group converted a portion of the FICORCA debt into floating rate notes to avoid the 15 percent withholding tax levied on interest payments; and (5) Mexican firms with foreign debt enrolled in FICORCA could capitalize this debt and benefit from the sale of their FICORCA contracts.

All FICORCA contracts are structured so that regular, minimum interest payments are required. In the early stages of the loan, the minimum payment is less than the interest payment due. The remaining unpaid interest is capitalized and added to the outstanding principal. As a result, the debt increases and subsequent interest payments are computed based on a larger balance. In the latter stages of repayment, the firm is faced with a balloon payment and higher interest amounts. We find no benefit with this method of payment because the firm is not relieved of any debt obligations. The capitalization of interest is no different from what would happen on a commercial loan.

According to the terms of the FICORCA regulations, there is no special permission required to enroll nonbank debt. Mexican firms with foreign debt payable to banks, finance companies or suppliers, were eligible to participate in the FICORCA program.

When the period for registering debt into FICORCA closed, some companies had not yet concluded their FICORCA negotiations. The creditors issued a "provisional" notice that the debt was in a rescheduling process, which many firms referred to as provisional enrollment in FICORCA. The Vitro group reported long-term foreign debt "provisionally" enrolled in FICORCA in notes to its 1984 financial statements. This merely meant that, until the creditors submitted a written statement

VOL 54 ISS 40 MR 2 1989 UMI

to FICORCA advising that the debt had been rescheduled, FICORCA contracts would not be issued to the company or group. As stipulated in the FICORCA regulations, foreign debt had to be rescheduled prior to enrollment in the FICORCA program.

On fixed-interest rate notes, the Mexican government taxes the interest income of the foreign bank at the rate of 15 percent, so that 15 percent of the company's interest payment goes to the Government of Mexico and 85 percent goes to the foreign bank. Floating rate notes are exempt from the 15 percent tax on interest income, and all of the interest paid on floating rate notes goes to the foreign bank. In either case, the Mexican firms continue to pay the full amount of the interest. Therefore, we preliminarily determine that there is no benefit to Mexican firms in the conversion of FICORCA debt into floating rate notes.

FICORCA contracts are negotiable instruments. As such, FICORCA does not participate in the transfer or sale of such contracts and only requires that the new firm have foreign debt registered with the Secretaria de Hacienda y Credito Publico. Approval from the foreign creditor must also be obtained. When a FICORCA contract is sold, a new contract is not issued to the new firm, and the terms and conditions on the original contract remain in force.

The information PPG presented on new programs or changes to existing programs contains various features of the FICORCA program that are part of the original regulations. We believe that this information does not change the Department's understanding of the operation of the program or the reasoning that led to our decision in the final determination in float glass and in the final results of the first administrative review of automotive glass. Therefore, we preliminary reaffirm our prior determination that FICORCA is not countervailable.

*(3) Other Programs*

We also examined the following programs and preliminary determine that neither company used them during the review period:

(A) CEPROFI;
(B) Guarantee and Development Fund for Medium and Small Industries ("FOGAIN");
(C) Fund for Industrial Development ("FONEI");
(D) Import duty drawback;
(E) National Development Program preferential discount;
(F) Article 15/94 loans;
(G) Preferential state investment incentives;
(H) State tax incentives;
(I) NAFINSA loans;
(J) BANCOMEXT loans;
(K) Debt/Equity swaps;
(L) CEDI tax certificates; and
(M) CEDI's for foreign trade consortia.

**Preliminary Results of Review**

As a result of our review, we preliminary determine the total bounty or grant to be zero for 1988.

The Department intends to instruct the Customs Service to liquidate, without regard to countervailing duties, all shipments of this merchandise exported on or after January 1, 1988 and on or before December 31, 1988.

Further, the Department intends to instruct the Customs Service to waive deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. This deposit waiver shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days from the date of publication or the following workday. Any request for an administrative protective order must be made no later than five days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.10

Date: February 23, 1989.

[C-122-085]

**Preliminary Affirmative Countervailing Duty Determination: New Steel Rail, Except Light Rail, From Canada**

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to producers, manufacturers or exporters in Canada of new steel rail, except light rail, ("steel rail") as described in the "Scope of Investigation" section of this notice. The estimated net subsidy is 103.55 percent *ad valorem* for all manufacturers, producers or exporters in Canada of steel rail, except the Algoma Steel Corporation Ltd. (Algoma), which is excluded from this preliminary determination. The estimated net subsidy for Algoma is 0.05 percent *ad valorem*, which is *de minimis*. We have calculated a separate estimated net subsidy for Algoma because its rate differs significantly from the country-wide rate. If this investigation proceeds normally, we will make a final determination on or before May 9, 1989.

EFFECTIVE DATE: March 2, 1989.

FOR FURTHER INFORMATION CONTACT: Roy A. Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-5414.

SUPPLEMENTARY INFORMATION:

**Preliminary Determination**

Based on our investigation, we preliminarily determine that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters in Canada of steel rail. For purposes of this investigation, the following programs are preliminarily found to confer subsidies:

*Federal Programs*

- Debenture Guarantees Provided to Sydney Steel Corporation (Sysco).
- Forgiven Wharf Loan.
- Regional Development Incentives Program.
- Certain Investment Tax Credits.

*Joint Federal-Provincial Programs*

- General Development Agreements.
- Economic and Regional Development Agreements.

*Provincial Programs*

- Operating Grants Provided to Sysco.
- Long-Term Loan Guarantees Provided to Sysco.
- Equity Infusions Provided to Sysco.

We preliminarily determine the estimated net subsidy to be 103.55 percent *ad valorem* for all manufacturers, producers or exporters in Canada of steel rail, except Algoma, which is excluded from this preliminary determination.

**Case History**

Since the publication of the Notice of Initiation in the Federal Register (53 FR 41394, October 21, 1988), the following events have occurred. On October 27, 1988, we presented a questionnaire to the Government of Canada in Washington, DC, concerning petitioner's allegations. On November 17, 1988, petitioner filed a request that the preliminary determination be postponed. Pursuant to section 703(c)(1)(A) of the Act, we postponed the preliminary determination to no later than February 23, 1989 (53 FR 49562, December 8, 1988).

On December 8, 1988, we received responses from the Government of Canada (GOC), the Provincial Governments of Nova Scotia (GONS) and Ontario, Sysco and Algoma. The response of the GOC listed five non-producer exporters of steel rail to the United States: Grand Valley Steel Ltd., Nortrack Ltd., Sessenwein Inc., C.P. Rail Ltd. and Bernard Railtrack Export Inc. We requested that these exporters answer the original questionnaire.

On December 23, 1988, we delivered a supplemental/deficiency questionnaire to the GOC. On January 13, 1989, we received responses from the GOC, GONS, and the Government of Ontario to the supplemental/deficiency questionnaires, and responses to the original questionnaire from the following three non-producer exporters: Grand Valley Steel Ltd., Nortrack Ltd. and Sessenwein Inc. On January 18, 1989, we received responses to our supplemental/deficiency questionnaire from Algoma, Sysco and Algoma Central Railway.

On February 10, 1989, we delivered an additional supplemental/deficiency questionnaire to the GOC requesting further information from the GOC, GONS and Sysco. On February 17, 1989, we received responses from the GONS and Sysco to this questionnaire. On February 21, 1989, we received the response from the GOC.

On February 21, 1989, we also received a response to our original questionnaire from C.P. Rail Ltd., the fourth non-producer exporter of steel rail. We have not received a response from Bernard Railtrack Export Inc., the remaining non-producer exporter of steel rail.

On January 17, 1989, we received further subsidy program allegations from petitioner. We declined to initiate an investigation on these additional programs and have informed all interested parties of our decision.

**Scope of Investigation**

The products covered by this investigation are new steel rail, except light rail, currently classifiable under HTS item numbers 7302.10.1020, 7302.101.1040, 7302.10.5000, and 8548.00.0000.

Steel rail, whether of carbon, high carbon, alloy or other quality steel, includes but is not limited to, standard rails, all main line sections (over 60 pounds per yard), heat-treated or head-hardened (premium) rails, transit rails, contact rail (or "third rail") and crane rails. Rails are used by the railroad industry, by rapid transit lines, by subways, in mines and in industrial applications.

Specifically excluded from this investigation are light rails which are 60 pounds or less per yard. Also excluded are relay rails which are used rails taken up from a primary railroad track and relaid in a railroad yard or on a secondary track.

**Analysis of Programs**

For purposes of this preliminary determination, the period for which we are measuring subsidies ("the review period") is calendar year 1987 for Algoma and April 1, 1987–March 30, 1988 for Sysco. These review periods correspond to the respective companies' fiscal years. Normally, we would select the calendar year as the review period for all companies if the companies under investigation had different fiscal years. We have chosen Sysco's fiscal year as that company's review period in order to measure more accurately the subsidies received over time, which have been reported to the Department on a fiscal year basis.

Petitioner alleged that Sysco is unequityworthy and uncreditworthy. We have consistently held that the government provision of equity does not *per se* confer a subsidy. Government equity purchases bestow countervailable benefits only when they occur on terms inconsistent with commercial considerations. When there is no market-determined price for equity, it is necessary to determine whether the company was a reasonable commercial investment or, in other words, whether the company was "equityworthy."

The GONS is the sole owner of Sysco, which it purchased in 1988. Sysco has never issued shares; therefore, we must determine whether Sysco was equityworthy in each instance when the GONS made an equity infusion. We do not reach the question of whether Sysco was equityworthy in 1988. The initial purchase of Sysco by the GONS occurred prior to the 15 year period in which we are examining all the financial assistance received by Sysco which may have benefited the company during the review period. We are using 15 years because it represents the average useful life of assets in the steel industry as determined by the U.S. Internal Revenue Service's 1977 Class Life Asset Depreciation Range System. (Use of the IRS tables is in accordance with past practice and is described in detail in the "Subsidies Appendix" attached to the *Final Affirmative Countervailing Duty Determination and Countervailing Duty Order: Cold-Rolled Carbon Steel and Flat-Rolled Products from Argentina*, 49 FR 18006, April 26, 1984 (*Subsidies Appendix*).)

Although Sysco's equityworthiness in 1988 and the GONS's equity infusion in 1988 will not be examined, the GONS made additional equity infusions into Sysco in the period 1977–1988. Therefore, we have preliminarily determined Sysco's equityworthiness in each year in which it received equity capital from the GONS.

A company is considered unequityworthy if it is deemed unable to generate a reasonable rate of return within a reasonable period of time. In making our equityworthiness determinations, we assess the company's current and past financial health, as reflected in various financial indicators taken from its financial statements, and where appropriate, internal accounts. The indicators we examine include the following ratios: rate of return on equity, gross margin to sales, financial expenses to sales, the current ratio and debt to equity. We give great weight to the company's recent rate of return on equity as an indication of financial health and prospects. Based on the factors described above, we preliminarily determine that Sysco was unequityworthy in each year in which it received an equity infusion in the period from 1977–1988.

Petitioner's other broad allegation is that Sysco is uncreditworthy. We consider a company creditworthy if it appears that it will have sufficient revenues or resources to meet its costs and fixed financial obligations, absent government intervention. Like our equityworthiness test, to determine the creditworthiness of a company we analyze the company's present and past health, as reflected in various financial

VOL 54 ISS 40 MR 2 1989 UMI

indicators calculated from its financial statements. We give great weight to the company's recent past and present ability to meet its financial cost obligations with its cash flow. Based on an analysis of the factors described above, we preliminarily determine Sysco to be uncreditworthy for the period from 1973 to 1986.

We have preliminarily determined that Sysco is uncreditworthy despite the fact that it has received financing from private commercial sources. We are discounting the importance of such financing because it appears that Sysco would not have recieved this financing but for the guarantees provided by the GOC and the CONS.

With respect to the calculations of benefits from grants and government loan and debenture guarantees received by Sysco, we used as the discount rate for allocating the benefits over time the benchmark interest rate calculated for purposes of analyzing the interest rate on Sysco's debentures and loans which were guaranteed by either the federal or provincial government (see sections I.A.1. and I.C.2.). We were unable to use Sysco's weighted cost of capital, which is our preferred method of deriving the discount rate, for the following reasons. In the years 1973–1978, we do not have information on the national average rate of return on equity. In the years 1977–1988, either Sysco's equity as a percent of total capitalization was negative or Sysco's capitalization in its entirety was negative. Consequently, we could not meaningfully employ our weighted cost of capital formula.

Sysco received grants or equity infusions, which we are treating as grants (see section I.C.3.), in every year during the period 1974–1988. In accordance with past practice (see *Final Affirmative Countervailing Duty Determination: Oil Country Tubular Goods from Canada*, 51 FR 15037, April 22, 1986 (*OCTG*)), for all the programs which provided non-recurring grants and for all the benefits received by Sysco which we treated as non-recurring grants, we first determined if the benefit amount received by Sysco, in each of the years in which the benefit was received, was more than 0.50 percent of the company's total sales for that year. In every year, the benefit amount exceeded the 0.50 percent rate; therefore, for all of the grants and equity infusions received by Sysco, unless otherwise specified, we allocated the benefit over the average useful life of equipment in the steel industry which is 15 years. Using the above methodology, we also allocated over 15 years, unless otherwise specified, the benefit from the grants received by Algoma.

Consistent with our practice in preliminary determinations, when a response to an allegation denies the existence of a program, receipt of benefits under a program, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses, however, are subject to verification. If the response cannot be supported at verification, and a program is otherwise countervailable, the program will be considered a subsidy in the final determination.

As mentioned in the "Case History" section above, we have received questionnaire responses from two producers and four non-producer exporters. Each of the respondent non-producer exporters has denied the direct receipt of benefits from the programs under investigation. Therefore, the steel rail exports of each respondent non-producer exporter will be subject to the estimated net subsidy of the producer from which it purchased the steel rail. As the best information available, we are assigning the estimated net subsidy rate of Sysco to the non-respondent non-producer exporter, Bernard Railtrack Export Inc.

**I. Programs Preliminarily Determined to Confer Subsidies**

We preliminarily determine that subsidies are being provided to manufacturers, producers or exporters in Canada of steel rail under the following programs:

*A. Federal Programs*

1. Debenture Guarantees Provided to Sysco

Petitioner alleged that the federal and provincial governments have provided loan guarantees to Sysco. (Provincial loan guarantees are discussed in sections I.C.2. and II.A.). According to Sysco's questionnaire response and its financial statements, in the years 1974–1978, Sysco issued two debenture series; one was guaranteed by the Cape Breton Development Corporation (Devco), a crown corporation of the GOC, and the other was guaranteed by the GONS. The series guaranteed by Devco was denominated in Canadian dollars; the series guaranteed by the GONS was denominated in U.S. dollars. (Both guarantees will be discussed in this section). No fee was paid for these guarantees.

These guarantees were provided to a specific enterprise, therefore, we preliminarily consider that they are countervailable for the following reasons. According to the questionnaire responses, a fee would not have been charged for a commercial guarantee similar to the guarantees provided by the federal and provincial governments. However, we are skeptical that a firm in the same financial position as Sysco would have been able to obtain such a guarantee. Therefore, for purposes of this preliminary determination, we analyzed the extent to which Sysco was able to issue the debentures on terms more favorable than the benchmark financing.

As described in the "Analysis of Programs" section above, we have preliminarily determined that Sysco has been uncreditworthy throughout the period 1973–1988. In the case of uncreditworthy companies, we assume that private lenders either would not provide loans to such companies or would require a premium interest rate. In selecting an appropriate benchmark, we must formulate an approximation of the premium interest rate a commercial source of financing would charge an uncreditworthy company (see the *Subsidies Appendix*). The first step in the formulation of such an interest rate is to determine the highest commonly-available commercial interest rate a creditworthy borrower would have to pay in order to receive a loan. This interest rate is the rate that would be charged a marginally creditworthy company.

The next step is the calculation of a risk premium. This amount represents the difference in risk between a marginally creditworthy company and an uncreditworthy company. In previous cases (See *Certain Carbon Steel Products from Brazil; Final results of Countervailing Duty Administrative Review*, 52 FR 829, January 9, 1987), we have derived this risk premium by examining the difference between *Moody's* Aaa and Baa corporate bond rates and calculating the percentage this difference represents of the prime interest rate in the United States. We have found that the risk premium as calculated by this approach is 12 percent. If the financing is not in U.S. currency, this percentage is then applied to the prime interest rate in the country concerned to get a comparable measure of the risk premium in the local economy. The final step in our calculation of the appropriate benchmark for an uncreditworthy company is to add the risk premium to the highest long-term commercial interest rate commonly-available to companies in the country in question.

For the debentures denominated in Canadian dollars, we calculated the benchmark interest rate as described below. According to the federal government response, the Canadian government does not maintain statistics on the highest long-term commercial interest rate commonly-available to companies. Therefore, for purposes of the first step of our calculations we chose a surrogate interest rate using the following approach. If the national average short-term interest rate in the year the debenture was issued, as represented by the interest rate on 90-day commercial paper, was greater than the national average long-term interest rate in the year the debenture was issued, as represented by the average yield on long-term corporate bonds, we used the national average short-term rate in 1987. If the national average short-term interest rate in the year the debenture was issued was less than the national average long-term interest rate in the year the debenture was issued, we used the national average long-term interest rate in the year the debenture was issued.

We added to the chosen interest rate the risk premium, which we calculated according to the methodology described above as 12 percent of the Canadian prime rate. We used the resulting interest rate as our benchmark for the debentures denominated in Canadian currency.

With respect to the debentures denominated in U.S. dollars, we followed the same general approach described above in constructing a benchmark. We used the rates on Baa corporate bonds as the highest long-term commercial rate commonly available to companies and 12 percent of the U.S. prime rate for the calculation of the risk premium. Based on this methodology, we derived a benchmark for the debentures denominated in U.S. dollars.

We compared the two benchmarks formulated above to the interest rates received on the two series of debentures issued by Sysco and found that the interest rates on Sysco's debentures were lower than the respective benchmarks. Therefore, we preliminarily determine that the guarantees provided to Sysco by the GOC and the GONS are countervailable.

To determine the benefit, we calculated the payment differential between the benchmark financing and the guaranteed debentures using our loan methodology for long-term loans which is described in the *Subsidies Appendix* and has been described in numerous previous cases (See *Final Affirmative Countervailing Duty Determination; Certain Granite Products from Spain*, 53 FR 24340, June 28, 1988). We allocated the benefit over time using as the discount rate the benchmark interest rates described above. (We were not able to base the discount rate on Sysco's weighted cost of capital for the reasons discussed above in the "Analysis of Programs" section). We then divided the benefit attributable to the review period by Sysco's total sales and calculated an estimated net subsidy of 1.45 percent *ad valorem* for Sysco.

2. Forgiven Wharf Loan

According to Sysco's questionnaire response, in 1974, the federal government provided Sysco with a loan to construct a loading wharf. In 1981, the federal government announced that the loan would be forgiven. In 1982, Sysco removed this loan from its long-term liabilities as shown in its financial statements.

We preliminarily determine that the benefit provided by the loan forgiveness is countervailable because it was provided to a specific enterprise. Furthermore, we preliminarily determine that the outstanding principal and accrued interest as of 1982 should be treated as a grant received in 1982 because the loan has been forgiven.

Using the declining balance methodology and the benchmark interest rate described in the previous section as the discount rate, we allocated the benefit over 20 years, which represents the average useful life of a wharf according to the U.S. Internal Revenue Service's 1977 Class Life Asset Depreciation Range System. We then divided the benefit attributable to the review period by Sysco's total sales and calculated an estimated net subsidy rate of 1.16 percent *ad valorem* for Sysco.

3. Regional Development Incentive Program (RDIP)

The RDIP was administered by the Department of Regional Economic Expansion (DREE) until its replacement with the Industrial Regional Development Program (IRDP) in 1983. It was established in 1969 for the purpose of creating stable employment opportunities in areas of Canada where employment and economic opportunities are chronically low, namely the Atlantic provinces. The DREE offered incenties based on a case-by-case evaluation of capital investment projects. Projects that could proceed without RDIP assistance were ineligible. Assistance was provided in the form of grants or loan guarantees.

Although the program was terminated in 1983, RDIP grants were provided to both Sysco and Algoma, prior to its termination. We preliminarily determine that the RDIP grants are countervailable because the benefits are limited to companies located within specific regions.

Sysco received four RDIP grants; Algoma received two RDIP grants. According to Algoma's questionnaire response, one of its grants was specifically tied to the production of products not under investigation. Therefore, consistent with past practice (see *OCTG*), we did not include this grant in our calculations. Algoma's other grant was approved in 1972.

To calculate a benefit we used the declining balance methodology. We used as the discount rate for Algoma the national average long-term interest rate in Canada in 1972. (We were unable to use our weighted cost of capital formula because we do not have information on the rate of return on equity in Canada in 1972). We used as the discount rate for Sysco the interest rate benchmark discussed in section I.A.1. On this basis, we calculated the benefits attributable to the review period and allocated them to the respective total sales of Algoma and Sysco. We calculated the estimated net subsidy to be 0.03 percent *ad valorem* for Algoma and 1.01 percent *ad valorem* for Sysco.

4. Certain Investment Tax Credit (ITCs)

There are a number of categories of ITCs in Canada and varying tax credit percentage levels within some of the categories. Based on our previous examination of all types of ITCs in Canada (see *OCTG* and *Final Affirmative Countervailing Duty Determination: Certain Fresh Atlantic Groundfish from Canada*, 51 FR 10041, March 24, 1986 (*Groundfish*)), we initiated an investigation on the following four types of ITCs: (1) tax credits of three and 13 percent, above the basic seven percent rate which we have previously found non-specific, for investment in "qualified property" located in certain regions of Canada; (2) tax credits for investment in "certified property"; (3) tax credits for large companies of 10 percent above the basic twenty percent for investment in capital equipment used for scientific research; and (4) tax credits for investment in transportation and construction equipment.

Canadian tax law provides that ITCs may be subtracted from taxes owed, but if no taxes are owed (either because a company is initially in a tax loss position or because only some of the

VOL 54 ISS 40 MR 2 1989 UMI

ITCs have been used to satisfy all tax liability), those excess ITCs earned after April 19, 1983 have a refundable, one-time cash value equal to 20 percent of the initial, face value of the ITC (40 percent for small businesses).

According to its questionnaire response, Sysco, as a provincially-owned corporation, is not liable for federal tax. During and prior to the review period, Sysco made numerous capital investments and experienced large losses. However, because the company is not liable for federal taxes, it was not eligible for a refund of taxes under the ITC law.

Algoma, in its questionnaire response, stated that it benefited from the three percent tax credit, above the basic rate of seven percent, for investment in "qualified property" because it is located in northern Ontario and that it did not use the other ITCs under investigation. Furthermore, because Algoma did not owe taxes on the tax return filed in the review period, it received a refund under the procedures described above.

We preliminarily determine that the three percent tax credit, above the basic rate of seven percent, for investment in "qualified property" is countervailable because it is limited to companies located in certain regions of Canada.

To calculate the benefit from the "qualified property" ITC, we followed our standard tax methodology. Under our tax methodology, we allocate an income tax benefit to the year in which the tax return was filed. Algoma received a refund on the tax return filed during the review period. Therefore, we consider the amount of the refund attributable to the three percent in excess of the basic rate of seven percent, to be the benefit Algoma received during the review period. We divided this benefit amount by Algoma's total sales for the review period and calculated an estimated net subsidy of 0.02 percent *ad valorem*.

*B. Joint Federal-Provincial Programs*

1. General Development Agreements (GDA)

GDAs provided the legal basis for various departments of the federal and provincial governments to cooperate in the establishment of economic development programs. The GDAs were umbrella agreements which stated general economic development goals. Ten-year GDAs were signed with most provinces in 1974.

Subsidiary agreements were signed pursuant to the GDAs. The subsidiary agreements were generally between particular federal and provincial government departments and addressed economic development and infrastructure needs. These agreements established various individuals types of economic development programs, delineated administrative procedures and set out the relative funding commitments of the federal and provincial governments. Subsidiary agreements were typically directed at establishing traditional government economic assistance programs, developing infrastructure, providing for economic development assistance for certain regions within the province, and providing financial assistance to specific regions, industries or enterprises.

Three such subsidiary agreements were signed between the federal government and the government of Nova Scotia. Two agreements were specifically designed to provide assistance to Sysco. The third provided for the funding of industrial development projects throughout the province.

We preliminarily determine that funds provided to Sysco under the first two agreements are countervailable in their entirety because they provided grants to a specific enterprise. With respect to the funds provided under the Industrial Development Subsidiary Agreement, we preliminarily determine that the portion of funds provided by the GONS are not countervailable because the assistance is not limited to a specific enterprise or industry or group of enterprises or industries in Nova Scotia. However, we also preliminarily determine that the portion of funds provided by the GOC are countervailable because they are limited to companies in a particular region of Canada (*i.e.*, the Province of Nova Scotia).

With respect to the Industrial Development Subsidiary Agreement, we note that although the agreement provided benefits to a wide range and number of industries, an amendment was made to the agreement, subsequent to its implementation, providing specific funds for Sysco. We will examine this amendment and whether it constitutes a discretionary governmental action which provided a benefit to a specific enterprise.

No assistance to Algoma was provided under the Canada/Ontario GDA or corresponding subsidiary agreements.

We calculated the benefit conferred by the grants using the discount rate for Sysco referred to above (see section I.A.1.), and our declining balance methodology. We divided the benefit attributable to the review period by Sysco's total sales and calculated an estimated net subsidy of 24.72 percent *ad valorem* for Sysco.

2. Economic and Regional Development Agreements (ERDA)

ERDAs are essentially a continuation of the GDAs. ERDAs were signed with every province and territory in the early 1980's. Similar to GDA subsidiary agreements, ERDA subsidiary agreements establish programs, delineate administrative procedures and set up the relative funding commitments of the federal and provincial governments.

Two subsidiary agreements were signed between the federal government and the province of Nova Scotia which related to Sysco. The first provided for grants to fund the modernization of Sysco's operations. The second provided for the funding of economic planning projects throughout the province.

We preliminarily determine that funds provided to Sysco under the first agreement are countervailable in their entirety because the agreement provides grants to a specific enterprise. With respect to the funds provided under the second agreement, we preliminarily determine that the portion of funds provided by the GONS are not countervailable because the assistance is not limited to a specific enterprise or industry or group of enterprises or industries in Nova Scotia. However, we also preliminarily determine that the portion of funds provided by the GOC are countervailable because they are limited to companies in a particular region of Canada (*i.e.*, the Province of Nova Scotia).

No assistance under the Canada/Ontario ERDA was provided to Algoma.

To calculate the benefit we used the same methodology described in the previous section. We calculated an estimated net subsidy of 4.86 percent *ad valorem* for Sysco.

*C. Provincial Programs—Province of Nova Scotia*

1. Operating Grants to Sysco

The GONS has provided Sysco with "operating grants" to cover interest on long-term debentures and other operating costs.

We preliminarily determine that these operating grants are countervailable because they provide funds to a specific enterprise. We also determine that these grants are non-recurring grants because of their exceptional nature and the uncertainty that they will continue. Furthermore, we note that these operating grants have not been provided under any particular long-standing

provincial program. Instead, it appears from the information in the questionnaire responses that the funds are provided by the GONS to Sysco according to the irregular financial needs of the company in a particular year.

To calculate the benefit, we used the same methodology described in the previous section. The estimated net subsidy is 29.61 percent *ad valorem* for Sysco.

2. Long-Term Loan Guarantees Provided to Sysco

The province of Nova Scotia guarantees all of the long-term loans made to Sysco by banks and trust companies. These guarantees were provided to a specific enterprise; therefore, we preliminarily consider that they are countervailable for the following reasons. According to the questionnaire responses, a fee would not have been charged for a commercial guarantee similar to the guarantees provided by the GONS. However, we are skeptical that a firm in the same financial position as Sysco would have been able to obtain such a guarantee. Therefore, for purposes of this preliminary determination, we analyzed the extent to which Sysco was able to obtain the long-term loans on terms more favorable than the benchmark financing.

We used as our benchmark for the long-term loans guaranteed by the GONS, the benchmark interest rate calculated in section I.A.1. pertaining to the debentures denominated in Canadian dollars guaranteed by the federal government. We compared this benchmark to the interest rates on long-term loans received by Sysco and found that the interest rates on Sysco's long-term loans were lower than the benchmark. Therefore, we preliminarily determine that the guarantees provided to Sysco by the GONS on Sysco's long-term loans are countervailable.

To determine the benefit, we calculated the payment differential between the benchmark financing and the guaranteed long-term loans using our loan methodology for long-term loans described in section I.A.1. We then divided the benefit attributable to the review period by Sysco's total sales and calculated an estimated net subsidy of 14.11 percent *ad valorem* for Sysco.

3. Equity infusions

The province of Nova Scotia has made several equity infusions into Sysco. These equity infusions consisted of the conversion of outstanding debt to equity, and the provision of money for redemption of loans and capital construction. As noted in the "Analysis of Programs" section above, we have preliminarily found Sysco to be unequityworthy.

We normally calculate the benefit conferred by government equity infusions inconsistent with commercial considerations by determining the difference between the national average rate of return on equity and the rate of return on equity of the company under investigation. However, Sysco's financial statements indicate that the entire amount of the GONS's equity capital has been consumed. Therefore, the calculation of any rate of return on equity for Sysco would not be a meaningful measure. Furthermore, we believe that even if we could somehow calculate a rate of return on equity for Sysco, the difference between Sysco's rate of return, presumably a negative value, and the national average rate of return would be so great that the "grant cap" would be exceeded. We therefore treated all the equity infusions received by Sysco as grants.

We calculated the benefit from the equity infusions using the grant methodology described in previous sections (see, for example, section I.B.1.). We divided the benefit attributable to the review period by Sysco's total sales and calculated an estimated net subsidy of 26.63 percent *ad valorem* for Sysco.

**II. Programs Preliminarily Determined Not To Confer Subsidies**

We preliminarily determine that the following programs do not confer subsidies:

*A. Short-Term Loan Guarantees.*

The GONS also guarantees all of the demand loans made to Sysco by banks. We consider these loans to be short-term loans because they are listed under current liabilities in Sysco's financial statements.

The guarantees on these demand loans were provided to a specific enterprise; therefore, we preliminarily consider that they are countervailable for the following reasons. According to the questionnaire responses, a fee would not have been charged for a commercial guarantee similar to the guarantees provided by the GONS. However, we are skeptical that a firm in the same financial position as Sysco would have been able to obtain such a guarantee. Therefore, for purposes of this preliminary determination, we analyzed the extent to which Sysco was able to issue the loans on terms more favorable than the benchmark financing.

We used as our benchmark, the interest rate on 90-day commercial paper in Canada. (According to the GOC questionnaire response, this rate represents the national average short-term interest rate in Canada). We compared this benchmark to the interest rates received on the demand loans received by Sysco and found that the interest rates on Sysco's loans were higher than the benchmark. Therefore, we preliminarily determine that the guarantees provided to Sysco by the GONS on Sysco's demand loans are not countervailable.

*B. Iron Ore Freight Subsidy to Alogoma*

Algoma ships sintered iron ore pellets from its mine in Wawa, Ontario to its steel mill at Sault Ste. Marie by rail on the Algoma Central Railway (ACR). The ACR also operates the Agawa Canyon Tour Train which is an important tourist attraction in Northern Ontario.

In 1986, Algoma reconsidered its use of Wawa iron ore because the delivered cost of Wawa ore was not competitive when compared to the delivered cost of ore from alternative sources. In order to make the delivered cost of Wawa ore competitive, Algoma sought a reduction in ACR's freight rates.

Algoma considered closing its Wawa mine, if ACR did not reduce the freight rate to a competitive level. Such an action would have forced ACR to cease all operations, including its tour train operation.

To preserve the continued operation of ACR, the Ontario and the Federal Governments provided grants to the ACR. The grants were made under a joint federal-provincial program established under the "Canada-Ontario Subsidiary Agreement for Tourism Development" (COTDA), which is a subsidiary agreement under ERDA. The purpose of COTDA is to stimulate the development of tourism in Ontario.

Petitioner alleges that the grants received by ACR confer a benefit to Algoma since ACR reduced the freight rate charged to Algoma after receiving the grants from the two governments. Algoma states in its questionnaire response that since it could have bought iron ore from other sources at a cost lower than mining and transporting its own ore, it did not receive a benefit from the grants received by ACR.

We preliminarily determine that the grants provided to ACR do not confer a countervailable benefit to Algoma. Algoma has provided documentations indicating it was able to purchase iron ore at a cheaper price than the cost of mining its own ore at the Wawa mines and transporting it through ACR. Thus, the grants received by ACR do not

VOL 54 ISS 40 MR 2 1989 UMI

provide a countervailable benefit to Algoma.

**III. Programs Preliminarily Determined Not to be Used**

We preliminarily determine that the following programs were not used by manufacturers, producers or exporters in Canada of steel rail during the review period:

*A. Federal Programs*

1. Industrial and Regional Development Program (IRDP).

The IRDP was established in 1983, replacing the RDIP. The program was designed to promote indistrial development in all regions of Canada through financial support in the form of grants, loans and loan guarantees. The IRDP program terminated on June 30, 1988. According to the responses, no financial assistance under this program was provided to the respondent companies under this program.

2. Loans under the Enterprise Development Programs (EDP)

The EDP was established in 1977 and terminated in 1983. It was designed to assist individuals, companies and corporations to enhance productivity in the manufacturing and processing sectors of the Canadian economy. According to the responses, the respondent companies did not receive any assistance under this program.

3. Program for Export Market Development (PEMD) and Promotional Projects Program (PPP)

The PEMD was consolidated and restructured in 1987 and now includes the former PPP. Support provided under the new program is either industry-initiated (former PEMD) or government-initiated (former PPP). Under the industry-initiated component, interest-fee loans are provided to industries requesting assistance in export market development. Under the government-initiated component, the GOC organizes and sponsors international trade fairs and missions. According to the responses, the respondent companies did not receive assistance under this program for sales to the United States.

4. Federal Expansion and Development/ Northern Ontario (FEDNOR)

FEDNOR, established in 1987 with a five-year mandate, was designed to promote economic development in Northern Ontario. The CORE Industrial program, as part of FEDNOR, provides assistance through loan insurance and grants for various projects. According to the responses, the respondent companies did not receive assistance under this program.

5. Community-Based Industrial Adjustment Program (CIAP) Grants

CIAP was established in 1981 as part of the Industrial and Labor Adjustment Program. It was terminated in 1984. Assistance under the CIAP was provided for capital projects to commercial enterprises located in areas affected by serious industrial dislocations. According to the responses, no assistance under this program was provided to the respondent companies.

6. Export Credit Financing

The Export Development Council (EDC) was created to facilitate Canada's export trade within the framework of the Canadian Export Development Act. The EDC, a self-sustaining Crown Corporation, insures and finances Canadian export sales. According to the responses, EDC did not finance or insure the sale of steel rail to the United States during the review period.

7. Defense Industry Productivity Program

The DIPP, administered by the Department of Regional and Industrial Expansion (DRIE) has several purposes. Among these purposes is the stimulation of exports of military hardware and the provision of assistance to upgrade equipment processes and facilities to make companies more competitive in bidding for military hardware contracts.

Algoma applied for DIPP grants for the installation of hot metal desulphurization facilities. DIPP funds were paid to Algoma in 1980 and 1981. We examined these grants in *OCTG*. Although the Department may determine that DIPP grants serve as export subsidies in other cases, we determined in *OCTG* that there were no conditions in the Algoma DIPP grant which were tied to export performance or which made the grant contingent on exports. Algoma has a large home market for desulfurized steel and products made from desulfurized steel. This DIPP grant benefits Algoma's entire production, and not exports alone. Thus, we preliminarily determine that this grant was not an export subsidy.

Although we have preliminarily determined that this program is not an export subsidy, we must still determine whether any benefits were received during the review period and if so whether this program is limited to a specific enterprise or industry or group of enterprises or industries. Consistent with the *Subsidies Appendix*, we divide the sum of all grants received in each year by the total sales of the company in the same year. Algoma received no other grants in 1980 and 1981. The calculated benefits in *OCTG* were *de minimis*, i.e., less than 0.50 percent. Therefore, as in *OCTG*, we expensed them in the year of receipt. Because the DIPP grants received by Algoma were expensed prior to the review period and because no DIPP grants were received by Algoma during the review period, we preliminarily determine that Algoma did not use this program. According to its questionnaire response, Sysco did not receive any grants under this program.

*B. Joint Federal-Provincial Programs*

Mineral Development Agreement (MDA) Benefits to Algoma

The MDA agreement is a subsidiary agreement pursuant to the Economic Regional Development Agreement between Canada and the Province of Ontario effective November 2, 1984. The MDA Subsidiary Agreement was implemented on June 17, 1985 with a five-year mandate. Its purpose is to aid and encourage Ontario's mineral industry. According to the responses, Algoma has not received assistance under the MDA subsidiary agreement.

*C. Provincial Programs*

1. Ontario Development Corporation (ODC) Export Support Loans, Other Loans and Loan Guarantees

This program was established to assist in the development and diversification of industries in Ontario. According to the responses, Algoma and Sysco have not received assistance under this program.

2. Provision of Electricity by Ontario Hydro to Algoma

Petitioner alleged that the government-owned power company in Ontario, Ontario Hydro, provides incentive rates for large industrial customers in off-peak hours. According to the response, Algoma did not purchase electricity from Ontario Hydro.

3. Income Tax Exemption for Sysco

As a crown corporation owned by the GONS, Sysco is exempt from the payment of federal taxes. According to Sysco's financial statements, the company has incurred losses throughout the 1980s. As a result, Sysco would have incurred no federal income tax liability before or during the review period. Therefore, Sysco did not benefit from its tax exemption during the review period.

**Verification**

In accordance with section 776(b) of the Act, we will verify the information used in making our final determination.

**Suspension of Liquidation**

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of steel rail from Canada which are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register**, and to require a cash deposit or bond for all entries of this merchandise, except entries by Algoma, equal to 103.55 percent *ad valorem*. Algoma is excluded from this preliminary determination. This suspension will remain in effect until further notice.

Entries of the subject merchandise by all non-producer exporters, except Bernard Railtrack Export Inc., will not be subject to suspension of liquidation and a cash deposit or bond equal to the estimated net subsidy if it can be demonstrated to the U.S. Customs Service that the entries of the subject merchandise were produced by and purchased from Algoma. Entries made by Bernard Railtrack Export Inc. will be subject to suspension of liquidation and a cash deposit or bond equal to the estimated net subsidy shown of 103.55 percent *ad valorem*.

**ITC Notification**

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If our final determination is affirmative, the ITC will make its final determination 45 days after the Department makes its final determination.

**Public Comment**

In accordance with § 355.38 of the Commerce Department's regulations published in the **Federal Register** on December 27, 1988 (53 FR 52306) (to be codified at 19 CFR 355.38), we will hold a public hearing, if requested, on April 21, 1989 at 10:00 a.m. in room 3708, to afford interested parties an opportunity to comment on this preliminary determination. Interested parties who wish to request or to participate in a hearing must submit a request within 10 days of the publication of this notice in the **Federal Register** to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B-099, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the arguments to be raised at the hearing. In addition, ten copies of the business proprietary version and five copies of the nonproprietary version of case briefs must be submitted to the Assistant Secretary no later than April 14, 1989. Ten copies of the business proprietary version and five copies of the nonproprietary version of rebuttal briefs must be submitted to the Assistant Secretary no later than April 19, 1989. An interested party may make an affirmative presentation at the public hearing only on arguments included in that party's case brief, and may make a rebuttal presentation only on arguments included in that party's rebuttal brief. Written argument should be submitted in accordance with § 355.38 of the Commerce Department's regulations published in the **Federal Register** on December 27, 1988 (53 FR 52306) (to be codified at 19 CFR 355.38), and will be considered if received within the time limits specified in this notice.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

**Jan W. Mares,**

*Assistant Secretary for Import Administration.*

BILLING CODE 3510-DS-M

## Export Trade Certificate of Review

**AGENCY:** International Trade Administration, Commerce.

**ACTION:** Notice of application.

**SUMMARY:** The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and requests comments relevent to whether the Certificate should be issued.

**FOR FURTHER INFORMATION CONTACT:** Thomas H. Stillman, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

**SUPPLEMENTARY INFORMATION:** Title III of the Export Trading Company Act of 1982 (Pub. L. 97-290) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and federal government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

**Request for Public Comments**

Interested parties may submit written comments relevant to the determination whether a Certificate should be issued. An original and five (5) copies should be submitted no later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 1223, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 89-00004." A summary of the application follows.

Applicant: KIAD International Trading Company, Inc., 7501 Chesterfield Place, Suite 1424, Dallas, Texas 75237.

Contact: Vuna Adams, II, Chief Executive Officer

Telephone: (214) 780-9818

*Application No.:* 89-00004.

*Dated Deemed Submitted:* February 15, 1989.

*Members (in addition to applicant):* None.

**Summary of the Application**

*Export Trade*

Products

All products.

Export Trade Facilitation Services (as they relate to the export of Products)

All trade-facilitating services in connection with the export of Products, including matching buyer with seller; furnishing financing; placement of marine, casualty, and war risk insurance; coordinating the shipment of

VOL 54 ISS 40 MR 2 1989 UMI

Products; processing documentation; establishing repayment mechanisms; providing ancillary procurement services; market analysis and research; countertrade services; and consulting.

*Export Markets*

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

*Export Trade Activities and Methods of Operation*

KIAD international seeks certification to:

1. Enter into any number of non-exclusive agreements with individual buyers in the Export Markets or with individual suppliers to act as a sales representative or broker for the export of Products and the provision of Export Trade Facilitation Services.

2. Enter into agreements with individual suppliers for the export of Products and the provision of Export Trade Facilitation Services wherein:

(a) KIAD establishes prices for Products in Export Markets; and/or

(b) KIAD agrees to serve as the exclusive sales representative. "Exclusive" means that KIAD may agree not to represent any competitors of the supplier unless authorized by the supplier; and/or the supplier may agree not to sell, directly or indirectly through any other intermediary, into the Export Markets in which KIAD represents the supplier.

3. Enter into exclusive agreements with persons in the Export Markets (including distributors and sales or marketing agents), wherein KIAD agrees to pay a competitive commission or other compensation. "Exclusive" means:

(a) KIAD may agree to deal in Products in the Export Markets only through that person, and/or

(b) that person agrees not to represent in Export Markets, or purchase Products from, anyone other than KIAD.

4. Establish price, quantity, territorial, and customer restrictions for Products to be sold in the Export Markets for KIAD's own account or on behalf of an individual supplier.

5. Enter into exclusive or non-exclusive agreements with individual buyers to provide Export Trade Facilitation Services and to act as a purchasing agent with respect to a particular transaction involving the export of Products.

6. Upon receiving a request from a buyer in the Export Markets for the price of a particular Product, KIAD may ask one or more U.S. suppliers individually to supply a price quotation to KIAD for that Product, add its own markup to the supplier's price, and transmit a price quotation to the buyer. Upon placement of an order by a buyer, KIAD may purchase Products and ship to the buyer.

7. As KIAD becomes aware of invitations to bid or other sales opportunities in the Export Markets, KIAD may:

(a) Contact individual suppliers of the Products specified in the invitation to bid or the purchase specifications;

(b) Invite the suppliers to provide independent quotations to KIAD for the export of the Products (provided that KIAD does not reveal to any supplier the quotation of any other Supplier), and

(c) Enter into independent, individual agreements with suppliers whereby KIAD will submit a response to the bid invitation or the purchase specifications.

Dated: February 24, 1989.

**Thomas H. Stillman,**

*Director, Office of Export Trading Company Affairs.*

BILLING CODE 3510-DR-M

## Short-Supply Review on Certain Semi-Finished Steel Slabs; Request for Comments

**AGENCY:** Import Administration/International Trade Administration, Commerce.

**ACTION:** Notice and request for comments.

**SUMMARY:** The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-Australia, U.S.-Brazil, U.S.-EC, and U.S.-Korea Arrangements Concerning Trade in Certain Steel Products, Article 8 of the U.S.-Mexico Understanding Concerning Trade in Certain Steel Products, and Paragraph 8 of the U.S.-Japan Arrangement Concerning Trade in Certain Steel Products, with respect to certain semi-finished steel slabs.

**DATE:** Comments must be submitted no later than March 13, 1989.

**ADDRESS:** Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

**FOR FURTHER INFORMATION CONTACT:** Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

**SUPPLEMENTARY INFORMATION:** Article 8 of the U.S.-Australia, U.S.-Brazil, U.S.-EC, and U.S.-Korea Arrangements Concerning Trade in Certain Steel Products, Article 8 of the U.S.-Mexico Understanding Concerning Trade in Certain Steel Products, and Paragraph 8 of the U.S.-Japan Arrangement Concerning Trade in Certain Steel Products provides that if the U.S. determines that because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product, (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors) an additional tonnage shall be allowed for such product or products.

We have received a short-supply request for various grades of semi-finished steel slabs for use in producing hot-rolled sheet and strip, cold-rolled sheet, galvanized sheet, and electric-resistance/welded pipe. The slabs are in thicknesses ranging from 7.00 inches through 8.81 inches, widths ranging from 28 inches through 61 inches, and lengths ranging from 212 inches through 260 inches.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than March 13, 1989. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly so label the business proprietary portion of the submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B-099, Import Administration, U.S. Department of Commerce at the above address.

February 23, 1989.

**Jan W. Mares,**

*Assistant Secretary for Import Administration.*

## DEPARTMENT OF DEFENSE

### Public Information Collection Requirement Submitted to OMB for Review

**ACTION:** Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Title, Applicable Form, and Applicable OMB Control Number:* DoD FAR Supplements, Part 252, Solicitation Provisions and Contract Clause; No Forms; and OMB Control Number 0704-0250.

*Type of Request:* Extension of currently approved collection.

*Average Burden Hours/Minutes Per Response:* .25 Hours.

*Frequency of Response:* Required only when a company offers surplus material.

*Number of Respondents:* 50.

*Annual Burden Hours:* 1,000.

*Annual Responses:* 4,000.

*Needs and Uses:* This request concerns information collection and recordkeeping requirements related to the purchase of surplus material.

*Affected Public:* Businesses or other for-profit.

*Respondent's Obligation:* Mandatory.

*OMB Desk Officer:* Ms. Eyvette R. Flynn.

Written comments and recommendations on the proposed information collection should be sent to Ms. Eyvette R. Flynn at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

*DOD Clearance Officer:* Ms. Pearl Rascoe-Harrison.

Written requests for copies of the information collection proposal should be sent to Ms. Rascoe-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302.

**Patricia H. Means,**

*OSD Federal Register Liaison Officer, Department of Defense.*

## Office of the Secretary

### Defense Intelligence Agency Advisory Board; Meeting

**AGENCY:** Defense Intelligence Agency Advisory Board.

**ACTION:** Notice of closed meeting.

**SUMMARY:** Pursuant to the provisions of subsection (d) of section 10 of Pub. L. 92-463, as amended by section 5 of Pub. L. 94-409, notice is hereby given that a closed meeting of a panel of the DIA Advisory Board has been relocated as follows:

**DATE:** Tuesday, 28 February 1989.

**ADDRESS:** NSA, Fort George G. Meade, MD.

**FOR FURTHER INFORMATION CONTACT:** Lieutenant Colonel John E. Hatlelid, USAF, Executive Secretary, DIA Advisory Board, Washington, DC 20340-1328 (202 373-4930).

**SUPPLEMENTARY INFORMATION:** The entire meeting is devoted to the discussion of classified information as defined in section 552b(c)(1), Title 5 of the U.S. Code and therefore will be closed to the public. Subject matter will be used in a special study on intelligence support systems.

**P.H. Means,**

## DEPARTMENT OF EDUCATION

### Office of Elementary and Secondary Education

### Intent To Waive Certain Requirements; Federal States of Micronesia

**AGENCY:** Department of Education.

**ACTION:** Notice of intent.

**SUMMARY:** Notice is given that, under section 8003(a) of the Elementary and Secondary Education Act of 1965 (ESEA), as amended, the Secretary intends to waive certain requirements under Chapter 1 of the Education Consolidation and Improvement Act of 1981 (ECIA) and under Chapter 1 of Title I of the ESEA for the Office of Education (OE) of the Federated States of Micronesia (FSM) (formerly part of the Trust Territory of the Pacific Islands). This notice sets forth the terms and conditions under which the Secretary intends to grant the waiver, and invites public comments.

**DATE:** Comments must be received on or before April 3, 1989.

**ADDRESS:** All written comments concerning this notice should be addressed to Mr. Benjamin Rice, Chief, Grants, Administration, and Support Branch, Compensatory Education Programs, U.S. Department of Education, 400 Maryland Avenue SW. (Room 2043, FOB-6), Washington, DC 20202-6132.

**FOR FURTHER INFORMATION CONTACT:** Mr. Benjamin Rice. Telephone: (202) 732-4692.

**SUPPLEMENTARY INFORMATION:**

**A. Background**

Title V of the Omnibus Territories Act, 48 U.S.C. 1469a, authorizes the Secretary to consolidate Federal education programs for which an Insular Area is eligible to apply. Programs that the Secretary has consolidated include,

VOL 54 ISS 40 MR 2 1989 UMI

for example, Chapter 1 and Chapter 2 of the ECIA and Chapter 1 and Chapter 2 of Title I of the ESEA, as amended (which supersede Chapters 1 and 2 of the ECIA). From the list of consolidated programs, an Insular Area may apply annually for a consolidated grant for two or more of those programs. The Insular Area may then use its consolidated grant funds to carry out one or more of the programs included in its consolidated grant application. The Insular Area must comply with the statutory and regulatory requirements that apply to each program under which it expends its consolidated grant funds. Since the Compact of Free Association was signed, the OE of the FSM has applied to receive consolidated grant funds, including funds for the 1988–89 school year.

**B. Authority for Granting a Waiver**

Under section 8003(a) of the ESEA, 20 U.S.C. 3383(a), the Secretary is authorized to waive, upon request, any requirements of the ESEA or the ECIA for an Insular Area if the Secretary determines that compliance with those requirements is "impractical or inappropriate because of conditions or circumstances particular to any of such jurisdictions * * *." Any waiver under section 8003(a) is subject to the terms and conditions that the Secretary deems necessary to carry out the purposes of the program whose requirements are being waived.

**C. Waiver Request**

The OE has indicated in its consolidated grant application that it intends to spend a portion of its consolidated grant funds on activities under Chapter 1 of the ECIA. Accordingly, the OE has requested the Secretary to waive the applicability of four Chapter 1 requirements because those requirements are impractical or inappropriate due to conditions or circumstances particular to the FSM. First, the OE has requested a waiver of section 556(b)(2) of the ECIA, 20 U.S.C. 3805(b)(2), which requires an annual assessment of educational needs and inclusion in the Chapter 1 program of those children who have the greatest need for special assistance. Essentially, this same requirement is also contained in section 1014(b) of the ESEA, 20 U.S.C. 2724(b). According to the OE, 90 percent of the elementary and secondary school children in the FSM are educationally deprived and eligible for Chapter 1 services. As a result, selecting children who are in greatest need when all children have great needs is inappropriate. In addition, the requirement to perform an annual needs assessment is impractical. According to the OE, there is no instrument available to assess the educational needs of all children. Moreover, if an instrument were available, there would be no way to collect the data, assemble it, and communicate the results back to the operating schools in time to be used due to the great distances between the islands of the FSM.

Second, the OE has requested a waiver of section 556(e) of the ECIA, 20 U.S.C. 3805(e), which requires, in part, a local educational agency to convene an annual public meeting, to which all parents of eligible students must be invited, to explain to parents the programs and activities provided with Chapter 1 funds. This requirement is also contained in section 1016(c)(2) of the ESEA, 20 U.S.C. 2726(c)(2). According to the OE, it is too costly to bring all parents together for a meeting or to charter ships to go to the outer islands to meet with parents. In addition, there are several languages spoken by the parents, which would require that expensive interpreters be hired for translations. Per diem costs for persons to travel among the islands to attend parent meetings would also be prohibitive. Furthermore, there is no space available on many of the islands to hold such meetings.

Third, the OE has requested a waiver of section 557 of the ECIA, 20 U.S.C. 3806, which requires that eligible students in private schools receive equitable Chapter 1 services. This requirement is also contained in section 1017 of the ESEA, 20 U.S.C. 2727. In *Aguilar* v. *Felton*, the United States Supreme Court held that it was unconstitutional for public school personnel to provide Chapter 1 instructional services to private school children on the premises of religiously affiliated private schools. As a result, Chapter 1 benefits must be provided through instructional services at a neutral site or by certain other means. In the FSM, however, neutral facilities are not available near the private schools to provide Chapter 1 services; public school sites are already overcrowded; and educational radio, television, mobile vans, and computer-assisted instruction are impractical or unavailable. Instead, under its consolidated grant application, the OE would use the funds it would be required to expend on services for eligible private school children under Chapter 1 to provide additional services for those children under Chapter 2.

Finally, the OE has requested a waiver of section 558(c), 20 U.S.C. 3807(c), which requires, in part, that a school district in which all school attendance areas are project areas provide services with State and local funds that are substantially comparable in each area. Comparability is determined by factors such as a districtwide salary schedule, pupil/staff ratios, and expenditures/pupil ratios. This requirement is also contained in section 1018(c) of the ESEA, 20 U.S.C. 2728(c). According to the OE, there are conditions and circumstances in the FSM that make compliance with the requirement impractical. For instance, the local educational agencies do not have sufficient local funds to add personnel to the noncomparable schools to achieve comparability and the tax base is insufficient to generate additional funds. Moreover, the FSM cannot reassign students to other schools, often hundreds of miles away from their homes, to meet comparability requirements. Such reassignment would require setting up boarding schools for very young children that would be neither practical, economical, or socially desirable. In addition, school facilities may not be able to accommodate the additional students that would have to be transferred. For similar reasons, it would be impractical and costly to reassign instructional personnel to schools other than those in their home communities.

**D. Management Plan**

Section 8003(a)(2) of the ESEA provides that any waiver is subject to the terms and conditions that the Secretary deems necessary, including submission of a plan for management of the funds in a manner designed to achieve the purposes of the program whose requirements are being waived. The Secretary has determined that the descriptions in the OE's consolidated grant applications of the Chapter 1 activities the OE plans to conduct are sufficient for purposes of section 8003(a)(2). Under the application for 1988–89, for example, the OE plans to expend approximately $2.6 million for Chapter 1 activities. Of that amount, approximately $11,000 would be used for construction of school facilities for the FSM's educationally deprived school population, and $1.4 million would be used for teachers, aides, and supplies to provide basic skills. The OE also plans, in accordance with its waiver request, to use the consolidated grant funds it would be required to expend on services for eligible private school children under Chapter 1 to provide additional services to those children under Chapter 2.

**E. Notice of the Secretary's Intent to Grant a Waiver**

Section 8003(a)(1) of the ESEA requires that, at least 30 days before approving a request for a waiver, the Secretary must publish in the **Federal Register** a notice of his intent to do so and the terms and conditions under which the waiver will be granted. In accordance with this requirement, notice is hereby given that, subject to the terms and conditions described below, the Secretary intends to waive the applicability to the OE of the requirements in sections 556(b)(2), 556(e), 557, and 558(c) of the ECIA and the comparable requirements in sections 1014(b), 1016(c)(2), 1017, and 1018(c) of the ESEA.

**F. Terms and Conditions Under Which a Waiver Would be Granted**

Under section 8003(a)(2), the OE agrees to comply with the following terms and conditions:

(1) All consolidated grant funds that are expended for Chapter 1 activities by the OE during the period covered by the waiver will be spent in accordance with—

(a) All applicable statutory and regulatory requirements, except those Chapter 1 requirements that are specifically identified in the waiver.

(b) The Chapter 1 activities described in the OE's annual consolidated grant application or amendments to the application;

(c) The budget contained in the OE's annual consolidated grant application; and

(d) These terms and conditions.

(2) Consolidated grant funds that the OE would be required to expend on Chapter 1 services for students in private schools will be used to provide additional services for those students under Chapter 2.

(3) The waiver remains in effect until the OE is able to comply with the waived requirements and/or until the OE ceases to operate Chapter 1 activities; and

(4) If the conditions or circumstances that justified the waiver change, the OE will notify the Department and the terms of the waiver will be adjusted accordingly.

Dated: February 27, 1989.

## Applications Under the Strengthening Institutions Program and the Endowment Challenge Grant Program; Extension of Closing Date

**AGENCY:** Department of Education.

**ACTION:** Extension of closing date for transmittal of applications for eligibility under the Strengthening Institutions Program and the Endowment Challenge Grant Program.

The Secretary extends to April 17, 1989, the closing date by which an institution may submit an application for eligibility under the Strengthening Institutions Program and the Endowment Challenge Grant Program. The previous closing date of January 27, 1989, has been extended because the Secretary has identified a problem related to the mail delivery system.

On December 19, 1988, the Secretary published a Notice establishing the closing date for transmittal of eligibility applications for fiscal year 1989 under the Strengthening Institutions Program and the Endowment Challenge Grant Program (53 FR 50989). The purpose of this notice is to extend the closing date for transmittal of applications.

**FOR FURTHER INFORMATION CONTACT:** For further information, contact Dr. Caroline J. Gillin, Director of Institutional Development, U.S. Department of Education, Room 3042, Regional Office Building 3, 400 Maryland Avenue SW., Washington, DC 20202. Telephone (202) 732–3314.

(20 U.S.C. 1057 and 1065a)

Dated: February 23, 1989.

## DEPARTMENT OF ENERGY

## Financial Assistance Award; Intention To Award Grant to Princeton University

**AGENCY:** Department of Energy.

**ACTION:** Notice of Noncompetitive Financial Assistance Award.

**SUMMARY:** The Department of Energy announces that pursuant to 10 CFR 600.7(b), it is restricting eligibility for award under Grant Number DE–FC01–89CE21032 to Princeton University.

*Scope:* The funding for this grant will support research in the area of airflow measurements in buildings and will allow Princeton University to improve airflow measurement techniques.

The purpose of this project is to provide further understanding of airflow in various types of buildings, and improve efforts to transfer the airflow measurement technology to the private sector.

*Eligibility:* Eligibility for this award is being limited to Princeton University, because of its high qualifications in the field of airflow measurements in buildings and because the proposed work would be a follow-on to the Office of Buildings and Community Systems supported activities that are necessary for the satisfactory completion of a project presently being funded by DOE.

This project is a research program in Indoor Air Quality, Infiltration and Ventilation. Competition for support would have a significant adverse effect on continuity or completion of this project. This adverse effect would be the loss of opportunity to use the exclusive capabilities available to Princeton at this time. Princeton University's Center for Energy and Environmental Studies has made major contributions to the energy research community's understanding of airflow characteristics in buildings. In addition, Princeton is uniquely suited to carry out the proposed tasks because of the measurement capabilities already developed on site at Princeton.

The term of this grant shall be nine months from the effective date of award.

**FOR FURTHER INFORMATION CONTACT:** U.S. Department of Energy, Office of Procurement Operations, Attn: Phyllis Morgan, MA–453.2, 1000 Independence Avenue, SW., Washington, DC 20585.

**Scott Sheffield,**

## Financial Assistance Award; Intent To Award a Grant to the Underground Injection Practices Council

**AGENCY:** Department of Energy.

**ACTION:** Notice of noncompetitive financial assistance.

**SUMMARY:** The Department of Energy announces that pursuant to 10 CFR 600.7(b), it is restricting eligibility for a grant under Bartlesville Project Office procurement request number 19–89BC14331.000 to the Underground Injection Practices Council (UIPC) for an effort entitled, "Study of Oil and Gas Industry Subsurface Water Injection Operations in the Williston Basin".

*Scope:* The purpose of the grant project is to define the data

BEST COPY AVAILABLE

VOL 54 ISS 40 MR 2 1989 UMI

requirements and develop the procedures needed to formulate a risk-based regulatory program for consideration by the State and Federal Agencies responsible for administering underground injection control (UIC) programs. The objective will be accomplished by conducting a detailed study of subsurface water injection operations in the Williston Basin. The benefits to be derived include the following:

(1) Develop information which may foster the establishment of more reasonable regulatory requirements applicable to oil and gas subsurface water injection wells.

(2) Obtain data useful in DOE's Tertiary Oil Recovery Information System.

(3) Support efforts established to evaluate federal regulation and guidelines applicable to oil and gas injection wells.

In accordance with 10 CFR 600.7(b)(2)(i)(B), the UIPC has been selected as the grant recipient. This activity is being or would be conducted by the applicant using its own resources or those of a third party; however, DOE support of this activity would enhance the public benefits to be derived and DOE knows of no other entity which is conducting or is planning on conducting such an activity.

The term of the grant is for seven months with a total estimated value of $100,000.00 and DOE sharing 33% and the recipient sharing 67% of this amount.

**FOR FURTHER INFORMATION CONTACT:** U.S. Department of Energy, Pittsburgh Energy Technology Center, Attn: David N. Barnett, P.O. Box 10940, MS 921-165, Pittsburgh, PA 15236, telephone (412) 892-5012.

Date: February 23, 1989.

Gregory J. Kawalkin,

*Director, Acquisition and Assistance Division (Acting).*

BILLING CODE 6450-01-M

## Office of Fossil Energy

**[ERA Docket No. 89-02-NG]**

### Cornerstone Natural Gas Co.; Application To Import Natural Gas From and Export Natural Gas to Canada and Mexico

**AGENCY:** Office of Fossil Energy, Department of Energy.

**ACTION:** Notice of application for blanket authorization to import natural gas from and export natural gas to Canada and Mexico.

**SUMMARY:** The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on January 19, 1989, of an application filed by Cornerstone Natural Gas Company (Cornerstone) for blanket authorization to import up to 100 Bcf of natural gas from Canada and Mexico and to export up to 100 Bcf of natural gas to Canada and Mexico. The application requests that the authorization be approved for a two-year term beginning on the date of the first delivery. Cornerstone intends to utilize existing pipeline facilities for transportation of the volumes to be imported and exported, and indicates it would submit quarterly reports detailing each transaction.

The application is filed pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, requests for additional procedures and written comments are invited.

**DATE:** Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed no later than April 3, 1989.

**FOR FURTHER INFORMATION CONTACT:**

Robert M. Stronach, Office of Fuels Programs, Office of Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F-056, 1000 Independence Avenue, SW, Washington, DC 20585, (202) 586-9622.

Diane J. Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

**SUPPLEMENTARY INFORMATION:**

Cornerstone, a Delaware corporation, with its principal place of business in Dallas, Texas, proposes to import or export natual gas either for its own account or as agent on behalf of both suppliers and purchasers, including local distribution companies, pipelines, municipalities, and end users. According to the application, the authority requested by Cornerstone contemplates the following types of import and export transactions: (1) Importation of supplies of Canadian and Mexican natural gas for consumption in U.S. markets; (2) importation of Canadian natural gas for eventual return (via export) to Canadian markets; (3) exportation of domestically produced natural gas for consumption in Canadian and Mexican markets; and (4) exportation of domestically produced gas for eventual return (via import) to U.S. markets.

According to Cornerstone, the specific terms of each transaction would be negotiated on an individual basis, including price and volumes, to reflect market conditions.

Cornerstone requests that an authorization be granted on an expedited basis. A decision on Cornerstone's request for expedited treatment will not be made until all responses to this notice have been received and evaluated.

The decision on the application for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). In reviewing natual gas export applications, the domestic need for the gas to be exported is considered, and any other issues determined to be appropriate in a particular case, including whether the arrangement is consistent with the DOE policy of promoting competition in the natural gas marketplace by allowing commerical parties to freely negotiate their own trade arrangements. Parties, expecially those that may oppose this application, should comment in their responses on these matters as they relate to the requested import and export authority. The applicant asserts that this import/export arrangement will be competitive and in the public interest. Parties opposing the arrangement bear the burden of overcoming this assertion.

All parties should be aware that if this blanket import/export application is granted, the authorization may permit the import or export of the gas at any point of entry or exit on the international boundary where existing pipeline facilities are located.

### NEPA Compliance

On August 9, 1988, the DOE published in the **Federal Register** (53 FR 29934) a notice of proposed amendments to its guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, effective on an interim basis upon publication. In that notice, the DOE proposed to amend the department's NEPA guidelines to add to its list of categorical exclusions the approval or disapproval of an import/export authorization for natural gas in cases not involving new construction. Application of the categorical exclusion in any particular case raises a rebuttable presumption that the action is not a major Federal action under NEPA. Unless comments are received indicating the presumption does not or should not apply in this case, no further NEPA review will be conducted by the DOE.

### Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs, Fossil Energy, Room 3F-056, FE-50, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585. They must be filed no later than 4:30 p.m. e.s.t., April 3, 1989.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial questions of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice to all parties will be provided. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Cornerstone's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, February 24, 1989.

J. E. Walsh, Jr.,

*Acting Principal Deputy Assistant Secretary, Fossil Energy.*

**[ERA Docket Nos. 88-19-NG, 88-39-NG, & 88-63-NG]**

### Hydro Engineering, Inc., et al; NEPA Compliance For Applications To Import Natural Gas From Canada

**AGENCY:** Office of Fossil Energy, Department of Energy.

**ACTION:** Supplemental notice regarding NEPA compliance for applications for authorization to import natural gas for cogeneration facilities.

**SUMMARY:** The Department of Energy (DOE) previously noticed in the **Federal Register** three publications to import natural gas from Canada to be used to fuel cogeneration facilities. They are: Hydro Engineering, Inc., ERA Docket No. 88-19-NG (53 FR 25203, July 5, 1988); Midland Cogeneration Venture Limited Partnership, ERA Docket No. 88-39-NG (53 FR 34811, September 8, 1988); and, Vector Energy (U.S.A.) Inc., ERA Docket No. 88-63-NG (53 FR 47857, November 28, 1988). This notice supplements those notices with respect to DOE's compliance with the National Environmental Policy Act of 1969 (NEPA).

The DOE has concluded that compliance with the NEPA for the proposed actions to grant or deny these import applications can be achieved by invoking two categorical exclusions in the DOE NEPA Guidelines (52 FR 47662, December 15, 1987). Comments on this procedure may be submitted by any interested person no later than March 17, 1989.

**FOR FURTHER INFORMATION CONTACT:**

William L. Durbin, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F-094, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9616.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

Carol Borgstrom, Director, Office of NEPA Project Assistance, EH-25, U.S. Department of Energy, Forrestal Building, Room 3E-080, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-4600.

**SUPPLEMENTARY INFORMATION:** On August 9, 1988, the DOE published in the **Federal Register** (53 FR 29934) a notice of proposed changes to Section D of its NEPA Guidelines by adding to the list of categorical exclusions in Section D, the approval or disapproval of an import/export authorization for natural gas under section 3 of the Natural Gas Act, in cases not involving new construction. A categorical exclusion is a class of DOE action which normally does not require the preparation of either an environmental impact statement (EIS) or environmental assessment (EA). In addition, the DOE proposed to change the classification in Sectioin D of approval or disapproval of an import/export authorization involving minor new construction from the type of actions normally requiring preparation of an EIS to the type of actions normally requiring preparation of an EA, but not necessarily an EIS. As indicated in the August 9 **Federal Register** notice, the DOE is applying the proposed changes pending a final decision on their adoption.

Under these changes, actions that grant or deny import authorizations where no new pipeline is needed but where new ancillary facilities, such as a cogeneration facility, are to be constructed would normally require the preparation of an EA, because they involved "minor new construction." However, for the reasons stated below, we believe that preparation of an EA for these actions is unnecessary due to the joint application of two other categorical exclusions contained in the DOE NEPA guidelines.

The environmental impacts of constructing and operating new cogeneration facilities have been addressed on numerous occasions by the Economic Regulatory Administration (ERA) in conjunction with processing exemption petitions under the Powerplant and Industrial Fuel Use Act (FUA) (10 U.S.C. 3201 *et seq.*, as

VOL 54 ISS 40 MR 2 1989 UMI

amended), and as a result, such actions have been granted a categorical exclusion from further NEPA review (52 FR 47670, December 15, 1987). The cogeneration facilities to be constructed in connection with these import applications are identical to those facilities covered by the categorical exclusion for FUA actions. Therefore, it is an appropriate application of another categorical exclusion contained in the DOE guidelines for "actions that are substantially the same as other actions for which the environmental effects have already been assessed in a NEPA document and determined by DOE to be clearly insignificant and where such assessment is currently valid" (52 FR 47668, December 15, 1987) to extend the FUA categorical exclusion for cogeneration facilities to the grant of an authorization to import natural gas under the NGA which results in the construction and operation of a cogeneration facility.

A categorical exclusion raises a rebuttable presumption that the Federal action will not significantly affect the quality of the human environment. Unless it appears during the proceedings on these import applications that the grant or denial of authorization will significantly affect the quality of the human environment, the Office of Fuels Programs expects that no additional environmental review will be required.

A copy of each application is available for inspection and copying in the Office of Fuels Programs Docket Room, Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F-056, 1000 Independence Ave., SW., Washington, DC 20585. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, February 24, 1989.

J. E. Walsh, Jr.,

*Acting Principal Deputy Assistant Secretary, Fossil Energy.*

[ERA Docket No. 89-03-NG]

**Washington Natural Gas Co.; Application To Import Natural Gas From Canada**

**AGENCY:** Office Of Fossil Energy, Department of Energy.

**ACTION:** Notice of application for blanket authorization to import natural gas from Canada.

**SUMMARY:** The Office of Fossil Energy of the Department of Energy (DOE) gives notice of receipt on January 19, 1989, of an application filed by Washington Natural Gas Company (Washington Natural) for blanket authorization to import up to 50 Bcf of natural gas from Canada over a two-year term beginning on the date of first delivery.

The application is filed pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

**DATE:** Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed no later than April 3, 1989.

**FOR FURTHER INFORMATION CONTACT:**

Edward J. Peters, Jr., Office of Fuels Programs, Office of Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3H-087, 1000 Independence Avenue, SW. Washington, DC 20585, (202) 586-6162.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW. Washington, DC 20585, (202) 586-6667.

**SUPPLEMENTARY INFORMATION:**

Washington Natural, a Washington State corporation, is a natural gas distribution company serving residential, commercial and industrial customers in 50 cities, towns, and adjacent unincorporated areas within its five-county service area in the State of Washington. Washington Natural purchases a firm supply of natural gas for its distribution operations from Northwest Pipeline Corporation (Northwest). Washington Natural also receives firm and interruptible transportation services from Northwest.

Washington Natural proposes to purchase the imported gas from a variety of Canadian suppliers on an interruptible basis at competitive prices for its system supply. Washington Natural states that the terms of each sales transaction, including price and volume, would be freely negotiated, thus ensuring that the imports will reflect market conditions. The proposed imports will be accomplished using existing pipeline capacity and no new construction will be involved. Washington Natural also states that it would file reports within 30 days of the end of each calendar quarter giving details of individual transactions.

The decision on the application for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts this import arrangement will be competitive and this in the public interest. Parties opposing the arrangement bear the burden of overcoming this assertion.

All parties should be aware that if this request is granted, the import of gas from Canada may be permitted at any existing import point and through any existing transmission system.

**NEPA Compliance**

On August 9, 1988, the DOE published in the **Federal Register** (53 FR 29934) a notice of proposed amendments to its guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 5321 *et seq.*, effective on an interim basis upon publication. In that notice, the DOE proposed to amend the department's NEPA guidelines to add to its list of categorical exclusions the approval or disapproval of an import/export authorization for natural gas in cases not involving new construction. Application of the categorical exclusions in any particular case raises a rebuttable presumption that the action is not a major Federal action under NEPA. Unless comments are received indicating the presumption does not or should not apply in this case, no further NEPA review will be conducted by the DOE.

**Public Comment Procedures**

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs, Fossil Energy, Room 3F-056, FE-50, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585. They must be filed no later than 4:30 p.m., e.s.t., April 3, 1989.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Washington Natural's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, February 24, 1989.

J. E. Walsh, Jr.,

*Acting Principal Deputy Assistant Secretary, Fossil Energy.*

BILLING CODE 6450-01-M

**Energy Information Administration**

**American Statistical Association Committee on Energy Statistics; Open Meeting**

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

*Name:* American Statistical Association's Committee on Energy Statistics, a utilized Federal Advisory Committee

*Date and Time:* Thursday, April 6, 1989, 1:30 p.m.—5:00 p.m. Friday, April 7, 1989, 9:00 a.m.—3:00 p.m.

*Place:* Omni Shoreham Hotel, 2500 Calvert Street, NW., Washington, DC 20008.

*Contact:* Ms. Renee Miller, EIA Committee Liaison, U.S. Department of Energy, Energy Information Administration, EI-72, Washington, DC 20585, Telephone: (202) 586-2068.

*Purpose of Committee:* To advise the Department of Energy, Energy Information Administration (EIA), on EIA technical statistical issues and to enable the EIA to benefit from the Committee's expertise concerning other energy statistical matters.

*Tentative Agenda:*

Thursday, April 6, 1989

A. Opening Remarks

B. Major Topics:

1. Capturing Non-Utility Generation of Electricity
2. Uncertainty Analysis in Forecasting
3. New Confidentiality Legislation (Public Comments)

Friday, April 7, 1989

4. Analysis of Nuclear Capacity Factor Increase
5. Statistical Packages for the PC
6. PC Supply Models: The New Generation
7. Information Resource Management
8. Expert Systems (Public Comments)

C. Topics for Future Meetings

*Public Participation:* The meeting is open to the public. The chairperson of the committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Written statements may be filed with the committee either before or after the meeting. If there are any questions, please contact Ms. Renee Miller, EIA Committee Liaison, at the address or telephone number listed above or Ms. Carole Patton at 202-586-2222.

*Transcripts:* Available for public review and copying at the Public Reading Room, (Room 1E-190), 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6025, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday.

Issued at Washington, DC on February 27, 1989.

J. Robert Franklin,

*Deputy Advisory Committee Management Officer.*

BILLING CODE 6450-01-M

---

**Federal Energy Regulatory Commission**

[Docket Nos. ER89-232-000 et al.]

**Detroit Edison Company et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings**

February 24, 1989.

Take notice that the following filings have been made with the Commission:

**1. Detroit Edison Company**

[Docket No. ER89-232-000]

Take notice that Detroit Edison Company (Detroit Edison) on February 14, 1989, tendered for filing a letter agreement dated January 9, 1989, between Detroit Edison and General Public Utilities which constitutes a redetermination of the fixed charge rate applicable to transactions under Amendment No. 6 among Consumers Power Company, the Detroit Edison Company, and the Toledo Edison Company, dated June 1, 1982, for the sale of Specific Capacity Power to General Public Utilities. This Amendment has been denoted as the Detroit Edison Company Rate Schedule FERC No. 11. Detroit Edison states that the redetermination of the fixed charge rate was made pursuant to the terms of Amendment No. 6.

Detroit Edison states that the letter agreement establishes the fixed charge rate at 13.545% for service rendered on and after January 1, 1989, and is subject to redetermination during the term of Amendment No. 6 in accordance with § 7.12. Detroit Edison stated the redetermination reflects the reduction of its Michigan Public Service Commission authorized return on common equity from 14.5% to 13.0% the effect being a reduction of 2.325% in the fixed charge rate from that used in the initial agreement. This determination will decrease the monthly demand charge to $412,532 in accordance with §§ 7.11 and 7.12 of Service Schedule G.

VOL 54 ISS 40 MR 2 1989 UMI

Detroit Edison states that copies of the filing were served upon Consumers Power Company, the Cleveland Electric Illuminating Company (Centerior Energy), General Public Utilities Corporation, the Toledo Edison Company, and the Michigan Public Service Commission.

*Comment date:* March 10, 1989, in accordance with Standard Paragraph E at the end of this notice.

**2. New England Power Company**

[Docket No. ER89-233-000]

February 24, 1989.

Take notice that New England Power Company (NEP) on February 16, 1989, tendered for an initial rate schedule a Letter Agreement between NEP and Boston Edison Company (BECO) that provides for the sale by NEP of twenty-five megawatts of capacity and related energy from NEP's purchase from Public Service Electric and Gas Company for the period January 1, 1989 through January 31, 1989.

NEP requests that the notice requirements be waived and that the agreement be permitted to become effective on January 1, 1989.

*Comment date:* March 10, 1989, in accordance with Standard Paragraph E at the end of this notice.

**3. Allegheny Power Service Corporation**

[Docket No. ER89-158-000]

Take notice that on February 7, 1989, Allegheny Power Service Corporation (APS) tendered for filing additional information, at the Commission's request, concerning various modifications of the APS Interconnection Agreement with Baltimore Gas and Electric Company.

*Comment date:* March 10, 1989, in accordance with Standard Paragraph E at the end of this notice.

**Standard Paragraph**

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

*Secretary.*

[FR Doc. 89-4902 Filed 3-1-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP89-843-000 et al.]

**Northwest Pipeline Corporation et al.; Natural Gas Certificate Filings**

Take notice that the following filings have been made with the Commission:

**1. Northwest Pipeline Corporation**

[Docket No. CP89-843-000]

February 23, 1989.

Take notice that on February 17, 1989, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-843-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Williams Gas Marketing Company (Williams), under Northwest's blanket certificate issued in Docket No. CP86-578-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northwest requests authorization to transport, on an interruptible basis, up to a maximum of 15,000 MMBtu of natural gas per day for Williams, a marketer of natural gas, from receipt points located in Carbon, Fremont and Sweetwater Counties, Wyoming, Daggett County, Utah and Moffat County, Colorado to delivery points also located in Wyoming, Utah and Colorado. Northwest anticipates transporting, on an average day, 260 MMBtu and an annual volume of 95,000 MMBtu.

Northwest states that the transportation of natural gas for Williams commenced December 2, 1988, as reported in Docket No. ST89-2160-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Northwest in Docket No. CP86-578-000.

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**2. Northwest Pipeline Corporation**

[Docket No. CP89-844-000]

February 23, 1989.

Take notice that on February 17, 1989, Northwest Pipeline Corporation (Northwest), P.O. Box 8900, Salt Lake City, Utah 84108, filed in Docket No. CP89-844-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Normandy Oil & Gas Company, Inc. (Normandy), a producer of natural gas, under its blanket certificate issued in Docket No. CP86-578-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest states that pursuant to an agreement dated September 22, 1988, as amended November 22, 1988, under Rate Schedule TI-1, it would transport up to 1,500 MMBtu per day of natural gas for Normandy for a term continuing on a month-to-month basis, subject to termination upon 30 business days' written notice by either party. Northwest further states that it would transport the natural gas from wells located in La Plata County, Colorado to El Paso Natural Gas Company at the Alkali Gulch delivery point located in La Plata County, Colorado. Northwest indicates that no construction of new facilities would be required to provide the proposed transportation service.

Northwest indicates that the maximum day, average day and annual transportation volumes would be approximately 1,500 MMBtu, 150 MMBtu and 50,000 MMBtu, respectively.

Northwest states that it commenced the transportation of natural gas for Normandy on December 16, 1988, at Docket No. ST89-2093-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations (18 CFR 284.223(a)).

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**3. Panhandle Eastern Pipe Line Company**

[Docket No. CP89-827-000]

February 23, 1989.

Take notice that on February 15, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-827-000 a request pursuant to §§ 157.205(b) and 284.223 of the Regulations under the Natural Gas Act for authorization to provide a transportation service for Amgas, Inc. (Amgas), under the certificate issued in Docket No. CP88-585-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request with the Commission and open to public inspection.

Panhandle states that it proposes to transport natural gas for Amgas from various receipt points located in Texas, Oklahoma, Kansas, Colorado, Wyoming and Illinois and redeliver subject gas, less fuel used and line loss gas, to Central Illinois Light Company in Tazewell County, Illinois. Panhandle further states that the maximum daily and annual quantities that it would transport for Amgas would be 500 dekatherms and 182,500 dekatherms, respectively.

Panhandle indicates that in a filing made with the Commission in Docket ST89-1927, it reported that transportation service for Amgas commenced on January 1, 1989 under the 120-day automatic authorization provisions of Section 284.233(a).

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**4. Transcontinental Gas Pipe Line Corporation**

[Docket No. CP89-861-000]

February 23, 1989.

Take notice that on February 21, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89-861-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Taylor Energy Company (Taylor), indicated to be a producer, under the blanket certificate issued in Docket No. CP88-328-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Transco states that pursuant to a transportation agreement dated January 5, 1989, under its Rate Schedule IT, it proposes to transport up to 9,500 dt per day equivalent of natural gas for Taylor. Transco states that it would transport the gas from an existing receipt point at Matagorda Island Block 619, offshore Texas, and deliver the gas at an existing point of interconnection between Transco and Natural Gas Pipeline Company of America at Wharton County, Texas.

Transco advises that service under Section 284.223(a) commenced January 28, 1989, as reported in Docket No. ST89-2187. Transco further advises that it would transport 5,700 dt on an average day and 2,080,500 dt annually.

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**5. Transcontinental Gas Pipe Line Corporation**

[Docket No. CP89-807-000]

February 23, 1989.

Take notice that on February 10, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas, filed in Docket No. CP89-807-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Shell Gas Trading Company (Shell Gas), under Transco's blanket certificate issued in Docket No. CP88-328-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco requests authorization to transport, on an interruptible basis, up to a maximum of 1,450,000 dekatherms (dt) of natural gas per day for Shell Gas from receipt points located in Louisiana, offshore Louisiana, Mississippi, Texas and offshore Texas to delivery points located in Louisiana, offshore Louisiana, Mississippi, Texas and offshore Texas. Transco anticipates transporting, on an average day 750,000 dt and an annual volume of 273,750,000 dt.

Transco advises that the transportation of natural gas for Shell Gas commenced January 1, 1989, as reported in Docket No. ST89-1925-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Transco in Docket No. CP88-328-000.

*Comment date:* April 10, 1989 in accordance with Standard Paragraph G at the end of the notice.

**6. Texas Gas Transmission Corporation**

[Docket No. CP89-828-000]

February 23, 1989.

Take notice that on February 15, 1989, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89-828-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for General Motors Corporation (GM), under its blanket certificate issued in Docket No. CP88-686-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and available for public inspection.

Pursuant to a gas transportation agreement executed on November 15, 1988, Texas Gas requests authorization to transport up to 10,000 MMBtu of natural gas per day for GM from various exiting points of receipt located along its system to a single point of delivery located in Warren County, Ohio. Texas Gas states that the service would be provided on a month-to-month basis and could be terminated upon thirty (30) days written notice by either party. The average day and annual transportation quantities are expected to be 5,360 MMBtu and 1,956,575 MMBtu, respectively. Texas Gas advises that it began transporting gas for FM on January 1, 1989, are reported in Docket No. ST89-1717-000, pursuant to § 284.223(a) of the Commission's Regulations.

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**7. Panhandle Eastern Pipe Line**

[Docket No. CP89-817-000]

February 24, 1989.

Take notice that on February 14, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas, 77001, filed in Docket No. CP89-817-000 an application pursuant to section 7(b) of the Natural Gas Act requesting an order permitting and approving partial abandonment of sales service to Indiana Gas Company, Inc. (Indiana Gas), an existing jurisdictional sales customer, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Panhandle states that, pursuant to § 284.10 of the Commission's Regulations, Panhandle and Indiana Gas have entered into a Sales Agreement dated January 1, 1989, which provides for a 15% reduction of its sales contract demand (CD) level which was converted to firm transportation service effective on January 1, 1989. Thus, Panhandle seeks authority for partial abandonment of Indiana Gas' daily sales contract quantity. Panhandle further states that it will provide the resulting firm transportation service in accordance with the terms and conditions of Panhandle's Rate Schedule PT-Firm, as such may be amended from time to time, or a successor tariff.

Specifically, Panhandle states that it seeks authority for partial abandonment of Indiana Gas' current sales CD, to be effective January 1, 1989, by the daily amount in Column No. 2, as shown below:

VOL 54 ISS 40 MR 2 1989 UMI

| Month | Current CD Mcf/d (1) | Reduction Mcf/d (2) | Resulting CD Mcf/d (3) |
|---|---|---|---|
| January | 291,465 | 51,435 | 240,030 |
| February | 291,465 | 51,435 | 240,030 |
| March | 291,465 | 51,435 | 240,030 |
| April | 211,522 | 37,328 | 174,194 |

It is stated that this proposed abandonment will reduce the annualized total CD from 77,683,056 Mcf to 63,974,266 Mcf.

*Comment date:* March 17, 1989, in accordance with Standard Paragraph F at the end of this notice.

**8. ANR Pipeline Company**

[Docket No. CP89-833-000]

February 24, 1989.

Take notice that on February 15, 1989, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP89-833-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to perform an interruptible transportation service for Enron Gas Marketing, Inc. (Enron), a marketer, under ANR's blanket certificate issued in Docket No. CP86-532-000, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

ANR states that pursuant to a transportation agreement dated September 8, 1988, it proposes to receive up to 200,000 dt equivalent of natural gas per day from specified points located in Oklahoma, Texas, Offshore Texas, Louisiana, Offshore Louisiana and Kansas, and redeliver the gas into the facilities of Northern Illinois Gas Company in Will County, Illinois. ANR states that the peak day and average day volumes would be 200,000 dt equivalent of natural gas per day and annual volumes would be 73,000,000 dt equivalent of natural gas. It is stated that ANR commenced a 120-day transportation service for Enron under § 284.223(a) as reported in Docket No. ST89-2104.

ANR further states that no facilities need be constructed to implement the service. It is indicated that ANR would provide the service for a term expiring September 30, 1990, but would continue the service on a month to month basis until terminated by either party upon thirty days prior written notice to the other specifying a termination date at the end of such period or any successive monthly period thereafter. ANR proposes to charge the rates and abide by the terms and conditions of its Rate Schedule IT.

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**9. Northwest Pipeline Corporation**

[Docket No. CP89-845-000]

February 24, 1989.

Take notice that on February 17, 1989, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-845-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of TXO Production Corp. (TXO), a natural gas producer, under its blanket authorization issued in Docket No. CP86-578-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northwest would perform the proposed interruptible transportation service for TXO, pursuant to an interruptible transportation service agreement dated September 26, 1988, as amended September 26, 1988. The transportation agreement is effective for a term continuing until October 31, 1989, and month to month thereafter until terminated by either party on thirty days written notice. Northwest proposes to transport approximately 8,000 MMBtu on a peak day; 5,600 MMBtu on an average day; and on an annual basis 2,100,000 MMBtu of natural gas for TXO. Northwest proposes to transport the subject gas through its transmission system from wells located in Rio Blanco County, Colorado and Grand and Uintah Counties, Utah, to delivery points located in Grand County, Utah and Mesa County, Colorado.

It is explained that the proposed service is currently being performed pursuant to the 120-day self-implementing provision of § 284.223(a)(1) of the Commission's Regulations. Northwest commenced such self-implementing service on January 4, 1989, as reported in Docket No. ST89-2161-000.

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**10. Williams Natural Gas Company**

[Docket No. CP89-846-000]

February 24, 1989.

Take notice that on February 17, 1989, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89-846-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for permission and approval to abandon by reclaim measuring and appurtenant facilities serving one industrial customer in Cherokee County, Kansas, under WNG's blanket certificate issue in Docket No. CP82-479-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

WNG proposes to abandon the facilities in response to a request from the customer, Robert H. Case, who was receiving the gas from WNG for his meat packing plant. It is stated that the facilities were installed under Commission authorization in Docket No. CP65-77. It is explained that the customer has requested the abandonment because he plans to switch to an alternate fuel. It is asserted that the proposed abandonment will have no effect on WNG's capacity and no effect on WNG's rate schedules or tariffs on file with the Commission.

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**11. United Gas Pipe Line Company**

[Docket No. CP89-786-000]

February 24, 1989.

Take notice that on February 8, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-786-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a interruptible transportation service on behalf of Texican Natural Gas Company (Texican), a marketer of natural gas, under its blanket certificate issued in Docket No. CP86-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United states that pursuant to an Interruptible Gas Transportation Agreement dated January 1, 1989, it would transport a maximum daily quantity of 20,600 MMBtu. United further states that is would utilize existing facilities to provide the proposed transportation service.

United states that it commenced the transportation of natural gas for Texican on January 4, 1989, as reported in Docket No. ST89-1941-000, for a 120-day period pursuant to § 284-223(a) of the Commission's Regulations (18 CFR 284.223(a)).

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**12. Northwest Pipeline Corporation**

[Docket No. CP89-843-000]

February 27, 1989.

Take notice that on February 17, 1989, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP89-843-000, a request, pursuant to §§ 157.205 and 284.223 of the Commission's Regulations, for authorization to provide a transportation service for Williams Gas Marketing (Williams), a marketer of natural gas, under Northwest's blanket certificate issued in Docket No. CP86-578-000 pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northwest states that pursuant to an Agreement dated September 28, 1988, as amended September 28, 1988, December 8, 1988, and January 25, 1989, it proposes to transport up to 37,000 MMBtu per day of natural gas for Williams under Rate Schedule TI-1, for a term continuing to September 30, 1989, and month to month thereafter, subject to termination upon 30 business days written notice by either party.

Northwest will transport the subject gas through its transmission system from wells in Lincoln, Sublette and Sweetwater Counties, Wyoming to delivery points located in Lincoln County, Wyoming.

Northwest also states that no construction of new facilities will be required to provide this transportation service.

Northwest further states that the maximum day, average day, and annual transportation volumes would be approximately 37,000 MMBtu, 22,000 MMBtu and 8,000,000 MMBtu, respectively.

Northwest advises that service under § 284.223(a) commenced November 1, 1988, as reported in Docket No. ST89-2206 (filed February 13, 1989).

*Comment date:* April 10, 1989, in accordance with Standard Paragraph G at the end of this notice.

**13. Tennessee Gas Pipeline Company**

[Docket No. CP89-873-000]

February 27, 1989.

Take notice that on February 21, 1989, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89-873-000 a request pursuant to §§ 157.205 and 284.223(2)(b) of the Commission's Regulations under the Natural Gas Act for authorization to provide transportation service for Energy Marketing Exchange, Inc. (Energy Marketing), a marketing company, under Tennessee's blanket certificate issued in Docket No. CP87-115-000 on June 18, 1987, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Tennessee states that it would transport, on an interruptible basis, up to 15,000 dekatherms of natural gas per day for Energy Marketing. Tennessee further states that it proposes to transport natural gas for Energy Marketing from points of receipt located offshore Louisiana, offshore Texas, and in the states of Louisiana, Ohio, Texas, Mississippi, Pennsylvania, New Jersey, Alabama, and New York. The points of delivery and ultimate points of delivery are located in the states of New York and Pennsylvania, it is stated.

Tennessee further states that the total volume of gas to be transported for Energy Marketing would be 15,000 dekatherms on a peak day, 15,000 dekatherms on an average day and 5,475,000 dekatherms on an annual basis. Tennessee also states that it would perform the proposed transportation service for Energy Marketing pursuant to a service agreement dated October 24, 1988, between Tennessee and Energy Marketing.

Tennessee states that it commenced the transportation for Energy Marketing pursuant to § 284.223(a)(1) of the Commission's Regulations on January 6, 1989, at Docket No. ST89-2125 for a 120-day period. Tennessee further states that all facilities are in place to provide for this service.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

**14. Panhandle Eastern Pipe Line Company**

[Docket No. CP89-847-000]

February 27, 1989.

Take notice that on February 21, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-847-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to transport natural gas for Union Texas Products Corporation (Union Texas or shipper), a shipper and gas processor of natural gas, under Panhandle's blanket certificate issued in Docket No. CP86-585-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

Panhandle requests authority to transport up to 80,000 dt equivalent of natural gas per day on an interruptible basis on behalf of Union Texas, pursuant to a transportation agreement dated January 6, 1989, between Panhandle and Union Texas. It is stated that the transportation agreement provides for Panhandle to receive gas from various existing points of receipt on its system in Texas, Oklahoma, Kansas, Colorado, Wyoming and Illinois. It is stated the Panhandle will then transport and redeliver the subject gas, less fuel used and unaccounted for line loss, to Northern Natural Gas Company in Kiowa County, Kansas. Panhandle states that the shipper's estimated average day and annual

VOL 54 ISS 40 MR 2 1989 UMI

quantities would be 50,000 dt equivalent of natural gas and 18,250,000 dt equivalent of natural gas, respectively. It is stated that the transportation charge for this service is stated that the transportation charge for this service is based upon Panhandle's currently effective Rate Schedule PT. Panhandle further states that service under the 120-day automatic provisions of § 284.223(a) of the Commission's Regulations commenced on January 10, 1989, as reported in Docket No. ST89-2064.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

**15. Panhandle Eastern Pipe Line Company**

[Docket No. CP89-849-000]

February 27, 1989.

Take notice that on February 21, 1989, Panhandle Eastern Pipe Line Company, (Panhandle) P.O. Box 1642, Houston, Texas, 77251-1642 filed in Docket No. CP89-849-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Amoco Production Company (Amoco), under its blanket authorization issued in Docket No. CP86-585-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle would perform the proposed interruptible transportation service for Amoco, a shipper and producer of natural gas, pursuant to a transportation agreement Rate Schedule PT dated January 5, 1989 (Contract No. P-PLT-2602). The term of the transportation agreement is for a primary term of one month from the initial date for service, and shall continue in effect month-to-month thereafter until terminated by either party upon at least 30 days' prior notice to the other party. Panhandle proposes to transport on a peak day up to 150,000 dekatherm equivalent; on an average day up to 25,000 dekatherm equivalent; and on an annual basis 9,125,000 dekatherm equivalent of natural gas for Amoco. Panhandle proposes to receive the subject gas from various exiting points of receipt on its system in Texas, Oklahoma, Kansas, Colorado, Wyoming, and Illinois. The volumes would be transported and redelivered. Less fuel used and unaccounted for line loss to Amoco's Wattenburg Plant Inlet in Adams County, Colorado. The gas would be purchased from producers in Texas, Oklahoma, Colorado, Kansas, Louisiana, offshore Louisiana, offshore Texas, Canada, Illinois, and Wyoming. Panhandle proposes to charge the then effective, applicable rates and charges under its PT rate schedule. It is averred that the subject gas would be purchased by local distribution companies, producers and intrastate pipelines. Panhandle avers that no new facilities nor expansion of existing facilities are required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. Panhandle commenced such self-implementing service on January 5, 1989, as reported in Docket No. ST89-2085-000.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

**16. Panhandle Eastern Pipe Line Company**

[Docket No. CP89-819-000]

February 27, 1989.

Take notice that on February 14, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas, 77251, filed in Docket No. CP89-819-000, an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to partially abandon sales service to a certain existing jurisdictional sales customer, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Panhandle proposes to partially abandon sales service to Citizens Gas Fuel Company (Citizens). Panhandle states that Citizens has elected under § 284.10 of the Commission's Regulations to convert a portion of its daily Contract Demand (CD) to firm transportation effective as of February 1, 1989. Panhandle explains that the firm transportation would be rendered under the terms and conditions of its Rate Schedule PT. Accordingly, Panhandle proposes to reduce Citizens' annualized total CD from 4,115,570 Mcf to 3,369,220 Mcf.

*Comment date:* March 20, 1989 in accordance with Standard Paragraph F at the end of the notice.

**17. Trunkline Gas Company**

[Docket No. CP89-868-000]

February 27, 1989.

Take notice that on February 21, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-868-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Conoco, Inc. (Conoco), a producer, under the blanket certificate issued in Docket No. CP86-586-000 on April 30, 1987, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Trunkline states that pursuant to a transportation agreement dated January 11, 1989, under its Rate Schedule PT, it proposes to transport up to 50,000 dt per day equivalent of natural gas for Conoco. Trunkline states that it would transport the gas from various existing receipt points on its system, and deliver such gas, less fuel and unaccounted for line loss, at an interconnection with Columbia Gulf Transmission Company in St. Mary Parish, Louisiana.

Trunkline advises that service under § 284.223(a) commenced January 13, 1989, as reported in Docket No. ST89-2174. Trunkline further advises that it would transport 10,000 dt on an average day and 3,650,000 dt annually.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

**18. Natural Gas Pipeline Company of America**

[Docket No. CP89-835-000]

February 27, 1989.

Take notice that on February 16, 1989, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois, 60148, filed in Docket No. CP89-835-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Archer Daniels Midland Company (Archer), under Natural's blanket certificate issued in Docket No. CP86-582-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Natural requests authorization to transport, on a firm basis, up to a maximum of 15,000 MMBtu of natural gas per day (plus any additional volumes accepted pursuant to the overrun provision's of Natural's Rate Schedule FTS) for Archer from receipt points located in Oklahoma, Kansas and Iowa to a delivery point located in Iowa. Natural anticipates transporting, on an average day 15,000 MMBtu and an annual volume of 5,475,000 MMBtu.

Natural states that the transportation for natural gas for Archer commenced January 1, 1989, as reported in Docket No. ST89-2280-000, for a 120-day period pursuant to Section 284.223(a) of the Commission's Regulations and the blanket certificate issued to Natural in Docket No. CP86-582-000.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

**19. Trunkline Gas Company**

[Docket No. CP89-872-000]

February 27, 1989.

Take notice that on February 21, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-872-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide tan interruptible transportation service for TXG Gas Marketing Company (TXG), a marketer, under the blanket certificate issued in Docket No. CP86-586-000 on April 30, 1987, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Trunkline states that pursuant to a transportation agreement dated January 5, 1989, under its Rate Schedule PT, it proposes to transport up to 30,000 dt per day equivalent of natural gas for TXG. Trunkline states that it would transport the gas from various existing receipt points on its system, and deliver such gas, less fuel and unaccounted for line loss, at an interconnection at the Texaco, Inc., Henry Plant in Vermilion Parish, Louisiana.

Trunkline advises that service under Section 284.223(a) commenced January 5, 1989, as reported in Docket No. ST89-2136. Trunkline further advises that it would transport 15,000 dt on an average day and 5,475,000 dt annually.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

**20. Trunkline Gas Company**

[Docket No. CP89-870-000]

February 27, 1989.

Take notice that on February 21, 1989, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-870-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for ANR Gathering Company (ANR), a marketer, under the blanket certificate issued in Docket No. CP86-586-000 on April 30, 1987, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Trunkline states that pursuant to a transportation agreement dated November 22, 1988, under its Rate Schedule PT, it proposes to transport up to 100,000 dt per day equivalent of natural gas for ANR. Trunkline states that it would transport the gas from various existing receipt points on its system, and deliver such gas, less fuel and unaccounted for line loss, at an interconnection with Tennessee Gas Pipeline Company in Bolivar County, Mississippi.

Trunkline advises that service under § 284.223(a) commenced January 11, 1989, as reported in Docket No. ST89-2171. Trunkline further advises that it would transport 100,000 dt on an average day and 36,500,000 dt annually.

*Comment date:* April 13, 1989, in accordance with Standard Paragraph G at the end of this notice.

**Standard Paragraphs**

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal January Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385-214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed witnin the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

[Project No. 10573-000-New York]

**Trenton Falls Hydroelectric Co.; Surrender of Preliminary Permit**

February 27, 1989.

Take notice that Trenton Falls Hydroelectric Company, permittee for the proposed Fowlerville Hydro Project No. 10573, has requested that its preliminary permit be terminated. The permit was issued on September 9, 1988, and would have expired August 31, 1991. The project would have been located on the Moose River in Lewis County, New York. The permittee cites that the proposed project is not economically feasible as the basis for the surrender request.

The permittee filed the request on January 30, 1989, and the preliminary permit for Project No. 10573 shall remain in affect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

### Arkla Energy Resources, a Division of Arkla, Inc.; Proposed Change in FERC Gas Tariff

February 24, 1989.

Take notice that on February 17, 1989, Arkla Energy Resources (AER), a division of Arkla, Inc. tendered for filing certain tariff sheets to its FERC Gas Tariff. AER states that these tariff sheets implement the Stipulation and Agreement Regarding Interim Rates, which was approved by the Commission in an order dated January 23, 1989. AER states in its compliance filing that it reserves the right to seek rehearing of the January 23 order.

Any person desiring to be heard or to protest the subject filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211. All such motions or protests must be filed by March 3, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

### Corpus Christi Transmission Co.; Petition For Adjustment

February 27, 1989.

Take notice that on February 3, 1989, Corpus Christi Transmission Company (Corpus Christi) filed pursuant to section 502(c) of the Natural Gas Policy Act of 1978 (NGPA) a petition for adjustment from § 284.123(b)(1)(ii) of the Commission's regulations to permit Corpus Christi to base its rates for NGPA section 311(a) transportation services on the rate contained in Tariff Sheet No. T-01 currently on file with the Railroad Commission of Texas (Texas).

Corpus Christi States that the gas will be transported under transportation agreements providing for rates not greater than comparable intrastate service as reflected in rates filed with Texas. Corpus Christi further states that Tariff Sheet No. T-01 provides for a rate of $0.03 per MMBtu.

Corpus Christi submits that § 284.123(b)(1)(ii) of the Commission's regulations allows an intrastate pipeline to elect to charge a rate filed with the appropriate State agency for section 311(a) transportation if the service is comparable and that the Commission has interpreted comparable service to refer to city gate service. Corpus Christi states that since it does not render city gate service, it is requesting this adjustment to permit it to base its rates on its tariff on file with Texas.

Corpus Christi states that upon issuance of an adjustment it would, within a reasonable time, not to exceed 30 days, make a filing with supporting documents necessary for Texas to make a determination that its rate proposed for section 311(a) service is cost-based and fair and equitable. It agrees to use for its section 311(a) services rates not in excess of the rate found by Texas to be cost-based and fair and equitable. Corpus Christi states that the adjustment it seeks is necessary to prevent special hardship and inequity that would otherwise result from forcing it to submit a § 284.123(b)(2) filing and would avoid unnecessary dual agency review.

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure. Any person desiring to participate in this adjustment proceeding must file a motion to intervene in accordance with the provisions of such Subpart K. All motions to intervene must be filed within 15 days after publication of this notice in the **Federal Register**. The petition is on file with the Commission and is available for public inspection.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Project No. 2392-004—Vermont, New Hampshire]

### Georgia-Pacific Corp.; Establishing Procedures for Relicensing and a Deadline for Submission of Final Amendments

February 24, 1989.

The license for the Gilman Project No. 2392 located on the Connecticut River in Essex County, Vermont and Coos County, New Hampshire, expires on December 31, 1990. The statutory deadline for filing applications for new license was December 31, 1988. An application for new license has been filed as follows:

| Project No. | Applicant | Contact |
|---|---|---|
| 2392-004 | Georgia-Pacific Corporation, Gilman, VT 05904. | Mr. David G. Stanchette, Georgia-Pacific Corporation, Gilman, VT 05904. |

Pursuant to section 15(c)(1) of the Federal Power Act, the deadline for the applicant to file final amendments, if any, to its application is June 30, 1989.

The following is an approximate schedule and procedures that will be followed in processing the application.

| Date | Action |
|---|---|
| February 21, 1989. | The Commission notified the applicant that its application has been accepted. The notification of acceptance specified the need for additional information and the date the information is due. |
| March 31, 1989. | Commission issues public notice of application that has been accepted describing project and establishing dates for filing motions to intervene, comments, protests, and agency recommendations. |

Upon receipt of all additional information and the information filed in response to the public notice of the acceptance of the application, the Commission will evaluate the application in accordance with applicable statutory requirements and take appropriate action on the application.

Any questions concerning this notice should be directed to Steven H. Rossi at (202) 376-9814.

Lois D. Cashell,

*Secretary.*

[Docket No. RP88-225-004]

### Inter-City Minnesota Pipelines Ltd., Inc.; Tariff Filing

February 24, 1989.

Take notice that on February 17, 1989, Inter-City Minnesota Pipelines Ltd., Inc. ("Inter-City"), 245 Yorkland Boulevard, North York, Ontario, Canada M2J 1R1, submitted revised tariff sheets:

*Original Volume No. 1*

Second Substitute Thirtieth Revised Sheet No. 4 Alternate Second Substitute Thirtieth Revised Sheet No. 4 Third Substitute Third Revised Sheet No. 61-C.

Copies of this filing were served on Inter-City's jurisdictional customers and interested state commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 3, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Project No. 2323 Vermont & Massachusetts]

### New England Power Co.; Intent To File an Application for a New License

February 24, 1989.

Take notice that on December 22, 1988, New England Power Company, the existing licensee for the Deerfield River Hydroelectric Project No. 2323, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2323 was issued effective April 1, 1982, and expires December 31, 1993.

The project is located on the Deerfield River in Windham & Bennington Counties, Vermont, and Franklin & Berkshire Counties, Massachusetts. The principal works of the Deerfield River Project include eight dam and reservoir developments: Somerset, Searsburg, Harriman, Sherman, Deerfield No. 5, Deerfield No. 4, Deerfield No. 3, and Deerfield No. 2. Somerset is a storage reservoir, and the other seven developments have powerhouses with a total installed capacity of 81,500 kW; all have transmission line connections and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at 25 Research Drive, Westborough, MA 01582, Attn: L.P. Sicuranza, telephone (508) 366-9011.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 31, 1991.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Project No. 2315 South Carolina]

### South Carolina Electric & Gas Co. Intent To File an Application for a New License

February 24, 1989

Take notice that on December 29, 1988, South Carolina Electric & Gas Company, the existing licensee for the Neal Shoals Hydroelectric Project No. 2315, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Pub. L. 99-495. The original license for Project No. 2315 was issued effective April 1, 1963, and expires December 31, 1993.

The project is located on the Broad River in Union and Chester Counties, South Carolina. The principal works of the Neal Shoals Project include a 1,087-foot-long dam; reservoir of 600 acres; a 141-foot-long powerhouse containing four generating units with a total capacity of 5,200 kW; 14 miles of two-circuit, 13.2-kV, 3-phase transmission line; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87-7-000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at 1426 Main Street, Columbia, SC 29218.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 31, 1991.

BILLING CODE 6717-01-M

### Office of Hearings and Appeals

### Issuance of Decisions and Orders During the Week of January 2 Through January 6, 1989

During the week of January 2 through January 6, 1989, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

**Appeals**

*Terry J. Fox, 1/5/89, KFA-0248*

Terry J. Fox filed an Appeal from a denial by the Portland Office of the Bonneville Power Administration of a Request for Information which he had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the search performed by the BPA's Freedom of Information official was adequate. Important issues that were considered in the Decision and Order were the adequacy of the search performed and whether the requested documents were agency records.

*Tri-City Herald, 1/5/89, KFA-0241*

The Tri-City Herald filed an Appeal from a determination issued to it by the Richland Operations Office concerning a Request for Information which the newspaper had submitted under the Freedom of Information Act (FOIA). The newspaper sought documents relating to the decision of the DOE or its contractor, Westinghouse Hanford Company, to settle litigation involving two former Westinghouse employees. The Operations Office identified a letter from Westinghouse labor counsel to the Operations Office's Chief Counsel as being responsive to the request. The Operations Office withheld the letter on the ground that it was attorney work-product and, therefore, exempt from disclosure under Exemption 5 of the FOIA. In considering the Appeal, the DOE found that the letter was attorney work-product and that the agency could properly assert the attorney work-product privilege with respect to

VOL 54 ISS 40 MR 2 1989 UMI

contractor documents. Accordingly, the Appeal was denied.

*Walbridge J. Powell, 1/3/89, KFA-0235*

Walbridge J. Powell filed an Appeal from a determination issued to him by the DOE's Richland Operations Office concerning a Request for Information that he had filed under the Freedom of Information Act (FOIA). In his Request for Information, Mr. Powell sought a bibliography of the latest 25 safety studies for the Hanford, Washington nuclear reactor. The Operations Office denied the request on the ground that the requested document did not exist. In considering the Appeal, the DOE found that the Operations Office had made an adequate search for the requested document and, therefore, upheld the denial. In making this determination, the DOE noted that Mr. Powell had failed to cooperate with the DOE in its attempts to help him reformulate his request in a manner that would produce responsive documents.

**Motion for Discovery**

*Tesoro Petroleum Corporation and Kenco Refining, Inc., 1/4/89, KRD-0540 and KRD-0541*

Kenco Refining, Inc. (Kenco) and Tesoro Petroleum Corporation (Tesoro) filed separate Motions for Discovery in connection with their Statements of Objections to the Proposed Remedial Order (PRO) that the Economic Regulatory Administration (ERA) issued to them on November 6, 1986. In the PRO, the ERA alleged that Kenco improperly received small refiner bias entitlements as a result of an April 1977 processing agreement with Tesoro. The ERA also alleged that Kenco and Tesoro improperly reported sales of residual fuel oil into the East Coast Market, thereby permitting Tesoro to avoid entitlements obligations on that fuel oil.

Tesoro sought discovery of (1) certain factual materials in the PRO audit file; and (2) documents which would show the unreasonableness of the ERA's delay in issuing the PRO. With respect to the first request, the DOE found that the ERA had already released the requested factual material to Tesoro in response to a Freedom of Information Act (FOIA) request and, therefore, that the instant request was moot. With respect to the second request, the DOE found that Tesoro had not shown adequate grounds to obtain access to documents in the audit file concerning the timing of the enforcement action. Accordingly, Tesoro's Motion for Discovery was denied.

Kenco sought discovery of (1) all documents in the audit file that concerned Kenco, Tesoro and the purchasers of the petroleum products produced under the processing agreement; (2) depositions and transcripts of all oral interviews conducted by the ERA; and (3) contemporaneous construction discovery of the disputed regulation. Most of the documents responsive to Kenco's first request and all of the documents responsive to Kenco's second request had been released to Tesoro through its FOIA request. The DOE accordingly granted Kenco access to this previously released material. The DOE also granted Kenco discovery of all other factual, non-deliberative materials in the audit file that concerned Kenco, Tesoro and the purchasers of the products produced under the processing agreement. The DOE found that Kenco had not demonstrated that its requested contemporaneous construction discovery would provide relevant and material information. Accordingly, Kenco's Motion for Discovery was granted in part.

**Refund Applications**

*Aminoil U.S.A., Inc./Ellison Enterprises, et al., 1/6/89, RF139-161, et al.*

The DOE issued a Decision and Order concerning Applications for Refund filed by six claimants in the Aminoil U.S.A., Inc. special refund proceeding. The firms submitted cost banks which indicated that they did not recover the full amount of their increased costs during the period of regulation. The firms also submitted market price comparisons upon which the DOE determined the degree that each firm was injured. After examining the firms' applications and supporting documentation, the DOE concluded that the firms should receive refunds totaling $138,574, representing $77,850 in principal and $60,724 in interest.

*Atlantic Richfield Company/Capitol Products Corp., et al., 1/3/89, RF304-1576, et al.*

The DOE issued a Decision and Order concerning 50 Applications for Refund filed in the Atlantic Richfield Company special refund proceeding. All of the applicants documented the volume of their ARCO purchases and were end-users or reseller/retailers requesting refunds of $5,000 or less. Therefore, each applicant was presumed injured. The refunds granted in this decision totalled $67,230, representing $53,017 in principal and $14,213 in interest.

*Atlantic Richfield Company/John B. Fine, et al., 1/3/89, RF304-10106, et al.*

The DOE issued a Decision and Order concerning 45 Applications for Refund filed by 44 applicants in the Atlantic Richfield Company special refund proceeding. All of the applicants were either end-users or reseller/retailers that applied for small claims presumption refunds. In addition, each applicant documented the volume of its purchases from ARCO. The DOE concluded that the applicants should receive refunds totalling $72,253, representing $56,980 in principal and $15,273 in interest.

*Exxon Corporation/Corning Glass Works, et al., 1/6/89, RF307-4464, et al.*

The DOE issued a Decision and Order concerning 45 Applications for Refund filed in the Exxon Corporation special refund proceeding. Each of the applicants purchased directly from Exxon and was either a reseller whose allocable share is less than $5,000 or an end-user of Exxon products. The DOE determined that each applicant was eligible to receive a refund equal to its full allocable share. The sum of the refunds granted in this Decision is $33,094, representing $28,770 in principal and $4,324 in interest.

*Exxon Corporation/Tate Oil Co., Inc., Service Oil Co. and The Carolinas Domestic Gas Co., 1/6/89, RF307-2695; RF307-2755, RF307-2756*

The DOE issued a Decision and Order concerning three Applications for Refund filed in the Exxon Corporation special refund proceeding. Each firm purchased directly from Exxon and was a reseller of Exxon products. Tate Oil's allocable share exceeds $5,000. Instead of making an injury showing to receive its full allocable share, Tate elected to receive either 40 percent of its allocable share or $5,000, whichever is greater. Service Oil's allocable share exceeds $5,000 and, like Tate, it elected to receive either 40 percent of its allocable share or $5,000, whichever is greater. The allocable share of Carolinas is under $5,000, and thus the firm ordinarily would be entitled to receive its full allocable share. However, because Carolinas is a subsidiary of Service Oil, the two applications were combined. Each firm will receive a refund based on 40 percent of its purchase volume. The sum of the refunds granted in this Decision is $15,745, representing $13,667 in principal and $2,058 in interest.

*Exxon Corporation/Tavo Salinas Exxon, et al., 1/6/89, RF307-1823, et al.*

The DOE issued a Decision and Order concerning eight Applications for Refund filed in the Exxon Corporation special refund proceeding. Each of the applicants purchased directly from Exxon and was either an end-user or a reseller whose allocable share is less than $5,000. Four of the applicants disagreed with the purchase volumes recorded in their Exxon volume printout, and the DOE approved the gallonage figures they submitted based on purchase invoices. Accordingly, the DOE determined that each applicant was eligible to receive a refund equal to its full allocable share. The sum of the refunds granted in this Decision is $6,707, representing $5,831 in principal and $876 in interest.

*Gulf Oil Corporation/C T P Petroleum Co., Inc. and Ossipee Oil Co., Inc., 1/6/89, RF300-2616, RF300-2617*

The DOE issued a Decision and Order concerning two Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding by C T P Petroleum Co., Inc., and Ossipee Oil Co., Inc. Because the firms were under common ownership during the consent order period, they could not be considered separately under the small claims presumption of injury. The two companies collectively purchased 10,452,013 gallons of Gulf product, and were granted a refund under the small claims presumption of injury. The amount of the refund granted in this Decision is $6,406, representing $5,000 in principal and $1,406 in interest.

*Gulf Oil Corporation/Columbus Southern Power Company, RF300-4153, Ohio Power Company and RF300-10640, and Appalachian Power Company, 1/5/89, RF300-10641*

The DOE issued a Decision and Order concerning three Applications for Refund filed by the Columbus Southern Power Company, The Ohio Power Company and the Appalachian Power Company, all regulated public utilities, in the Gulf Oil Corporation special refund proceeding. The applicants applied for refunds on a total of 16,666,695 gallons of covered Gulf products. Each applicant documented its purchases and was granted a refund. Appalachian, whose requested refund exceeded $5,000, certified that it will notify its appropriate state regulatory agency of any refund received in the Gulf proceeding and that it will pass through the amount of any refund received to its customers. This Decision granted total refunds of $13,666.

*Gulf Oil Corporation/Edelmiro Lezasvain, et al., 1/6/89, RF300-6691 et al.*

The DOE issued a Decision and Order concerning 74 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $191,700.

*Gulf Oil Corporation/Fiore Bros., Inc., et al., 1/4/89, RF300-1771 et al.*

The DOE issued a Decision and Order concerning nine Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $62,305.

*Gulf Oil Corporation/Henderson County Board of Education, et al., 1/3/89, RF300-5706 et al.*

The DOE issued a Decision and Order concerning 68 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $109,211.

*Gulf Oil Corporation/L.S. Riggins Oil Company, 1/3/89, RF300-10651*

The DOE issued a Supplemental Order rescending a refund granted on December 15, 1988 to L.S. Riggins Oil Company from the Gulf Oil Corporation special refund proceeding (*Gulf Oil Corporation/Dallas Gulf Service, et al.*). The applicant has previously been approved a refund for a virtually identical application (*Gulf Oil Corporation Singing River Electric Power Association, et al.*, issued November 10, 1988). In the Supplemental Order, the DOE added 123,287 gallons to its November 10, 1988 approval to reflect the additional gallonage claimed in the application approved on December 15, 1988. Accordingly, the DOE amended the November 1988 Order to grant a refund to the applicant of $2,321, based on purchases of 2,830,488 gallons.

*Gulf Oil Corporation/Pennsylvania Power & Light Company, 1/5/89 RF300-2042*

The DOE issued a Decision and Order concerning an Application for Refund filed by Pennsylvania Power & Light Company, a regulated public utility, in the Gulf Oil Corporation special refund proceeding. In accordance with the requirements of the Gulf proceeding, Pennsylvania Power & Light has certified that it will notify its appropriate state regulatory agency of any refund received in the Gulf proceeding and that it will pass through the amount of any refund received to its customers. The refund granted in this Decision is $52,472.

*Gulf Oil Corporation/Rite Way Oil & Gas Co., Inc., et al., 1/4/89, RF300-6476 et al.*

The DOE issued a Decision and Order concerning 13 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $140,679.

*Gulf Oil Corporation/Rohrbacher Bros., Inc., et al., 1/4/89, RF300-2075 et al.*

The DOE issued a Decision and Order concerning 12 Applications for Refund filed in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $101,050.

*Gulf Oil Corporation/William Hennis, et al., 1/6/89, RF300-0669 et al.*

The DOE issued a Decision and Order concerning 161 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $257,630.

*Murphy Oil Corporation/Schwegmann Giant Super Markets, et al., 1/4/89, RF309-306 et al.*

The DOE issued a Decision and Order granting Applications for Refund filed by six purchasers of refined petroleum products in the Murphy Oil Corporation special refund proceeding. According to the procedures set forth in *Murphy Oil Corp.*, 17 DOE ¶ 85,782 (1988), each applicant was found to be eligible for a refund based on the volume of products it purchased from Murphy. One applicant received approval for a refund at the 40 percent mid-level presumption while the other five were approved at the $5,000 small-claims presumption level. The total amount of refunds approved in this Decision is $66,705, representing $59,086 in principal and $7,619 in interest.

*Prince George's County Public Schools, 1/6/89 RF272-31507*

The Prince George's County Public Schools (PGCPS), a county school district, filed an Application for Refund in the Subpart V crude oil refund proceedings. An objection was filed by Philip Kalodner, counsel for Utilities, Transporters and Manufacturers, claiming that the school district should not receive a refund on the grounds that

VOL 54 ISS 40 MR 2 1989 UMI

governmental authorities are ineligible for a refund from the 20 percent reserved for directly injured claimants and the school district passed through all overcharges. The DOE rejected both these arguments. Accordingly, the DOE awarded PGCPS a refund of $15,628.

### Crude Oil End-Users

The Office of Hearings and Appeals granted crude oil overcharge refunds to end-user applicants in the following Decisions and Orders:

| Name | Case No. | Date | No. of applicants | Total refund |
|---|---|---|---|---|
| Chelmsford Public Schools, et al | RF272-18431 | 1/3/89 | 34 | $6,974 |
| Clifford Wagner, et al | RF272-41400 | 1/5/89 | 140 | 3,346 |
| Ervin J. Zeamer, Sr., et al | RF272-41601 | 1/6/89 | 180 | 3,446 |
| Huron Co. Sheriff's Dept., et al | RF272-43603 | 1/5/89 | 125 | 3,238 |
| James W. Stewart, et al | RF272-42400 | 1/5/89 | 146 | 3,662 |
| Mrs. L.S. Covey, et al | RF272-41800 | 1/5/89 | 151 | 3,297 |
| Norbert C. Portratz, et al | RF272-41001 | 1/5/89 | 105 | 2,732 |
| Raymond Griffin, et al | RF272-42800 | 1/6/89 | 161 | 4,123 |
| Roseville Community Schools, et al | RF272-337 | 1/6/89 | 46 | 35,091 |
| William E. Callander, et al | RF272-41200 | 1/5/89 | 131 | 3,814 |

### Dismissals

BILLING CODE 6450-01-M

### Issuance of Decisions and Orders During the Week of January 16 Through January 20, 1989

During the week of January 16 through January 20, 1989, the decisions and orders summarized below were issued with respect to applications for relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

### Refund Applications

*Atlantic Richfield Company/AERNI & Hitzel Fuel, Inc., et al., 1/18/89, RF304-2106 et al.*

The DOE issued a Decision and Order concerning 75 Applications for Refund filed in the Atlantic Richfield Company (ARCO) special refund proceeding. As reseller/retailers claiming refunds of less than $5,000 in principal or end-users, each applicant was presumed to have been injured by ARCO's alleged overcharges. After examining the applications and supporting documentation, the DOE determined that the firms should receive refunds totalling $155,283, representing $122,159 in principal and $33,124 in interest.

*Atlantic Richfield Company/Anthony Spina et al., 1/18/89, RF304-674 et al.*

The DOE issued a Decision and Order concerning eight Applications for Refund filed in the Atlantic Richfield Company (ARCO) special refund proceeding. All of the applicants documented the volume of their ARCO purchases and were end-users or reseller/retailers requesting refunds $5,000 or less. Therefore, each applicant was presumed injured. The refunds granted in this Decision totalled $8,034 ($6,304 in principal and $1,730 in interest).

*Atlantic Richfield Company/Buzz & Tex Service, et al., 1/18/79, RF304-1024 et al.*

The DOE issued a Decision and Order concerning 37 Applications for Refund filed by 35 claimants in the Atlantic Richfield Company (ARCO) special refund proceeding. All of the applicants were either end-users or reseller/retailers that applied for small claims presumption refunds. In addition, each applicant documented the volume of its purchases from ARCO and, therefore, was presumed to have been injured and entitled to a refund. The DOE concluded that the applicants should receive refunds totalling $40,436, representing $31,810 in principal and $8,626 in accrued interest).

*Atlantic Richfield Company/Cole Bros. Harvesting, Inc. et al., 1/18/89, RF304-634 et al.*

The DOE issued a Decision and Order concerning four Applications for Refund filed in the Atlantic Richfield Company (ARCO) special refund proceeding. All of the applicants documented the volume of their ARCO purchases and were end-users or reseller/retailers requesting refunds of less than $5,000. Therefore, each applicant was presumed injured. The refunds granted in this Decision totalled $3,109 ($2,445 in principal and $664 in interest).

*Atlantic Richfield Company/Dave's ARCO, Inc. et al., 1/19/89, RF304-1502 et al.*

The DOE issued a Decision and Order concerning 44 Applications for Refund filed in the Atlantic Richfield Company (ARCO) special refund proceeding. All of the applicants documented the volume of their ARCO purchases and were end-users or reseller/retailers requesting refunds of $5,000 or less. Therefore, each applicant was presumed injured. The refunds granted in this Decision totalled $82,802 ($40,349 in principal and $13,353 in interest).

*Atlantic Richfield Company/Henrickson ARCO, et al., 1/18/89, RF304-3000 et al.*

The DOE issued a Decision and Order concerning 73 Applications for Refund filed in the Atlantic Richfield Company (ARCO) special refund proceeding. As reseller/retailers claiming refunds of less than $5,000 in principal or end-users, each applicant was presumed to have been injured by ARCO's alleged overcharges. After examining the applications and supporting documentation, the DOE determined that the firms should receive refunds totalling $113,380, representing $89,202 in principal and $24,188 in interest.

*Cone Mills Corp., 1/18/89, RF272-21*

Cone Mills filed a Motion for Reconsideration seeking to overturn OHA's denial of its Subpart V crude oil refund application. The DOE denied the Motion, determining that Cone Mills had waived its right to a Subpart V refund when it filed for a refund from the Surface Transporter Escrow in the *Stripper Well* refund proceeding.

*East End Gulf Service, et al., 1/24/89, RF272-84679 et al.*

The DOE issued a Decision and Order denying 27 Applications for Refund filed in the Subpart V crude oil refund proceedings. Each applicant was reseller or retailer during the period August 19, 1973 through January 27, 1981. Because none of the applicants demonstrated that it was injured due to the crude oil overcharges, each applicant was ineligible for a crude oil refund.

*Exxon Corporation/Francis Kocar et al., 1/19/89, RF307-224 et al.*

The DOE issued a Decision and Order concerning five Applications for Refund filed in the Exxon Corporation special refund proceeding. Each of the Applicants purchased directly from Exxon and was either a reseller whose allocable share is less than $5,000 or an end-user of Exxon products. The DOE determined that each applicant was eligible to receive a refund equal to its full allocable share. The sum of the refunds granted in this Decision is $3,884 ($3,183 principal plus $501 interest).

*Exxon Corporation/Rockwell International Et al., 1/18/89, RF307-4714 et al.*

The Office of Hearings and Appeals of the Department of Energy issued a Decision and Order granting 50 applications for Refund from consent order funds obtained from Exxon Corporation. Each Applicant sought a refund of less then $5,000, and was therefore presumed to have suffered injury as a result of Exxon's alleged overcharges. The sum of the refunds granted is $34,531.

*Gulf Oil Corporation/Army and Air Force Exchange Service, 1/17/89, RF300-4348*

The DOE issued a Decision and Order to the Army and Air Force Exchange Service (AAFES) in the Gulf Oil Corporation special refund proceeding. The AAFES' primary purpose is to provide discount goods and services to military personnel. Any profits generated by its sales operations are used for the benefit of the military personnel who purchase from it. Because the covered products claimed by the AAFES were sold to and consumed by military personnel, and because any refund received by the AAFES will be used for the benefit of military personnel, the DOE granted the AFFES a full volumetric refund totaling $300,374 on 366,309,441 gallons of covered Gulf products.

*Gulf Oil Corporation/Commerce Propane, Greenville Automotic Gas Co., 1/17/89, RF300-4090 and RF300-4091*

The DOE issued a Decision and Order concerning two Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding by Commerce Propane and Greenville Automatic Gas Co. Because the firms were under common ownership during the consent order period, and because their allocable share exceeded $5,000 they could not be considered separately. The two firms collectively purchased 8,936,026 gallons of covered Gulf products, and their Applications were approved under the 40 percent presumption of injury. The refund granted in this Decision, which includes both principal and interest, is $6,406.

*Gulf Oil Corporation/Embassy Gulf, 1/19/89, RF300-1061*

The DOE issued a Decision and Order concerning an Application for Refund submitted in the Gulf Oil Corporation special refund proceeding by Embassy Gulf. The applicant, a service station owned by Carl Lotto, sought a refund on 11,930,376 gallons of coverd Gulf products. Mr. Lotto also owned another service station for which he filed an Application under the name of Carl L. Lotto (Case No. RF300-1066). Mr. Lotto was previously granted a refund of $765 for 943,902 gallons in Case RF300-1066. Because the firms were under common ownership, they were considered together for purposes of applying the $5,000 presumption of injury. Accordingly, the principal amount previously awarded to Mr. Lotto was subtracted from the $5,000 refund to which he was entitled for both stations. Mr. Lotto was granted a refund of $5,632, which includes both principal and interest, on the Embassy Gulf Applications.

*Gulf Oil Corporation/Farrell Lines Incorporated et al., 1/17/89, RF300-641 et al.*

The DOE issued a Decision and Order concerning 64 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision, which includes both principal and interest, is $389,899.

*Gulf Oil Corporation/Gray's Gulf Service, et al., 1/17/89, RF300-1142 et al.*

The DOE issued a Decision and Order concerning 11 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $32,913.

*Gulf Oil Corporation/Greensboro, North Carolina, 1/17/89, RF300-10654*

On December 20, 1988, the Office of Hearings and Appeals issued a Decision and Order to M & A Petroleum, *et al.* (Case Nos. RF300-2451, *et al.*) in which Greensboro, North Carolina, Case No. RF300-2886, was issued a refund of

VOL 54 ISS 40 MR 2 1989 UMI

$6,406. In this Decision Greensboro was incorrectly considered as a reseller applicant who wished to elect the 40 percent presumption. Greensboro is not a reseller, however, but an end-user, and is therefore entitled to a full volumetric refund without submitting an injury showing. Accordingly, the DOE issued a Supplemental Order indicating that Greensboro should receive a supplemental refund of $1,007.

*Gulf Oil Corporation/James P. Lowe, et al., 1/17/89, RF300-509 et al.*

The DOE issued a Decision and Order concerning 86 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $149,080.

*Gulf Oil Corporation/Montgomery Mall Gulf Service, et al., 1/17/89, RF300-6453 et al.*

The DOE issued a Decision and Order concerning 34 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $64,543.

*Gulf Oil Corporation/P.D. Humphrey Co., Inc. Mathieu Oil Co., Inc., 1/17/89, RF300-5458 and RF300-6459*

The DOE issued a Decision and Order concerning two Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding by P.D. Humphrey Co., Inc. and Mathieu Oil Co., Inc. Although the two firms have common ownership now, they did not have common ownership during the consent order period. Since the two firms did not have common ownership during the consent order period, the DOE considered the applications separately. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $8,287.

*Gulf Oil Corporation/Walker's Auto Service, et al., 1/17/89, RF300-2277, et al.*

The DOE issued a Decision and Order concerning 63 Applications for Refund submitted in the Gulf Oil Corporation special refund proceeding. Each application was approved using a presumption of injury. The sum of the refunds granted in this Decision is $108,416.

*Hanna Nickel Smelting Company, 1/17/89, RF272-10400*

Hanna Nickel Smelting Company (Hanna) filed an Application for Refund in the Subpart V crude oil refund proceeding. A group of states filed on objection to Hanna's application, claiming that the firm should not be eligible to receive a refund because it had not established that it was an injured end-user. The DOE rejected the states' arguments, finding that they had not submitted relevant material sufficient to overcome the presumption of injury available to end-user applicants in this proceeding. The DOE then reviewed the application and found that the information provided therein supported the firm's claim. Accordingly, Hanna was granted a refund of $9,066.

*Johnson Controls Inc., 1/19/89, RC272-18*

On January 5, 1989 the DOE issued a Decision granting 146 Applications for Refund in the crude oil refund proceedings. *James W. Stewart,* (Case Nos. RF272-42400, *et al.*). It has come to the DOE's attention that one of the applicants in that Decision, Johnson Controls Inc. (Case No. RF272-42583) (Johnson) should have been granted a refund based on a much larger gallonage. Accordingly, this Decision rescinds *James W. Stewart,* with respect to Johnson. Johnson's application based on the correct gallonage will be considered at a later date under a new case number.

*Owens-Corning Fiberglas Corporation, 1/19/89, RF272-10027 and RD272-10027*

Owens-Corning Fiberglas Corporation (O-C) filed an Application for Refund from crude oil monies available for disbursement under 10 C.F.R. Part 205, Subpart V, based upon its purchases of refined petroleum products, during the period August 19, 1973 through January 27, 1981. A group of thirty States and two Territories (collectively "the States") filed objections in opposition to the receipt of any refund by O-C on the basis that the firm had suffered no actual injury as a result of crude oil overcharges. In addition, the States filed a Motion for Discovery. In considering O-C's refund application, the DOE determined that the firm had consumed petroleum products, principally asphalt, in the production of fiberglas-based construction materials. Thus, the DOE determined that O-C was presumptively injured by crude oil overcharges based upon the presumption of injury accorded to end-users outside of the petroleum industry. The DOE further determined that the States had failed to rebut the presumption of injury in their objections since the States' general showing with regard to O-C's profitability and industry-wide data pertaining to the construction industry were not sufficiently probative of the extent to which O-C actually passed through increased petroleum product costs. On the same basis, the DOE determined that the States had failed to support adequately their Motion for Discovery. Accordingly, O-C's Application for Refund was approved, and the States' objections and Motion for Discovery were denied. The total refund amount approved in this Decision and Order is $662,319.

*Standard Oil Co. (Indiana)/New York (Saint Regis Mohawk Tribe), 1/17/89, RQ21-492*

The DOE issued a Decision and Order granting the second-stage refund application filed by the State of New York on behalf of the Saint Regis Mohawk Tribe in the Standard Oil Co. (Indiana) (Amoco I) special refund proceeding. The tribe requested permission to use $805 in Amoco I monies to purchase two items, a setback thermostat control device and a battery charger timer. In light of the small sum of money involved, the DOE found the plan to be adequately restitutionary. Accordingly, the tribe's request was granted.

*Total Petroleum/Madden Oil Company, 1/19/89, RF310-337*

The DOE issued a Decision and Order in which it reconsidered an Application for Refund filed by Madden Oil Company, a motor gasoline and diesel fuel reseller, in the Total Petroleum special refund proceeding. After a thorough evaluation of Madden's refund claim and the examination of a separate refund claim advanced by Madden in an earlier refund proceeding, the DOE determined that Madden was granted a refund on December 20, 1988 to which it was not entitled. The $20,935 refund awarded to Madden on that date was therefore rescinded. The DOE also determined that under the standards established in *Total Petroleum Inc.*, 17 DOE ¶ 85,542 (1988), Madden was eligible for a refund of $5,742 ($5,000 of principal and $742 of interest).

**Crude Oil End-Users**

The Office of Hearings and Appeals granted crude oil overcharge refunds to end-user applicants in the following Decision and Orders:

| Name | Case No. | Date | No. of applicants | Refund |
|---|---|---|---|---|
| Flasher Public School District et al | RF272-9389 | 1/17/89 | 83 | $23,950 |
| Greene County et al | RF272-14322 | 1/18/89 | 83 | 27,455 |
| John W. Osborne et al | RF272-46600 | 1/19/89 | 196 | 1,124 |
| Marvin Thon et al | RF272-47801 | 1/19/89 | 143 | 3,974 |
| Robert Donnell et al | RF272-14810 | 1/18/89 | 54 | 18,415 |
| Underbrink Farms et al | RF272-35002 | 1/19/89 | 58 | 10,987 |

**Dismissals**

The following submissions were dismissed:

| | |
|---|---|
| Bruce Caley's Exxon | RF307-236 RF309-237 |
| Cargill, Inc. | RD272-54026 |
| Covelli's A-1 | RF304-3588 |
| D & G Getty | RF265-3767 |
| Frank L. Bordell | KFA-0258 |

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-3530-7]

### Agency Information Collection Activities Under OMB Review

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

**FOR FURTHER INFORMATION CONTACT:** Sandy Farmer at EPA, (202 382-2740).

**SUPPLEMENTARY INFORMATION:**

**Office of Air and Radiation**

*Title:* NESHAP for Asbestos (Subpart M)—Information Requirements (EPA ICR #0111.04; OMB #2060-0101). This is a request for reinstatement of an existing collection.

*Abstract:* Demolition and renovation contractors must notify EPA or the State(s) of each demolition and/or renovation operation where the amount of friable asbestos exceeds 80 linear meters (260 linear feet) on pipes or 15 square meters (160 square feet) on other facility components. EPA or the States will use these notifications to ensure proper work practices and to plan and schedule inspections.

*Burden Statement:* The estimated public reporting burden for this collection of information is approximately 4 hours per response per respondent. This estimate includes the time to read instructions, gather necessary data, and complete and review the forms used to notify the proper officials.

*Respondents:* Demolition and renovation contractors.

*Estimated No. of Respondents:* 7,000.

*Estimated Total Annual Burden on Respondents:* 336,000 hours.

*Frequency of Collection:* Each demolition/renovation operation.

Send comments regarding the burden estimate, or any other aspect of these information collections, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223), 401 M Street, SW., Washington, DC 20460

and

Nicolas Garcia, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place, NW., Washington, DC 20530.

**OMB Responses to Agency PRA Clearance Requests**

EPA ICR #1432; Protection of Stratospheric Ozone—Reporting and Recordkeeping Requirements; was approved 01/10/89; OMB #2060-0170; expires 01/31/92.

EPA ICR #1084; NSPS for Nonmetallic Mineral Processing Plants—Reporting and Recordkeeping; was approved 01/13/89; OMB #2060-0050; expires 01/31/92.

EPA ICR #1383; National Sewage Sludge Questionnaire Survey; was approved 01/12/89; OMB #2040-0119; expires 09/30/90.

EPA ICR #1331; Accidental Release Information Program; was approved 01/19/89; OMB #2050-0085; expires 01/31/91.

EPA ICR #1214; Pesticide Product Registration Maintenance Fee; was approved 01/11/89; OMB #2070-0100; expires 01/31/92.

EPA ICR #1486; Superfund Site Evaluation and Hazard Ranking Information Collection; was approved 01/17/89; OMB #2050-0095; expires 01/31/92.

EPA ICR #0012; Motor Vehicle Exclusion Requests; was approved 01/13/89; OMB #2060-0124; expires 01/31/92.

EPA ICR #1349; National Survey of Solid Waste from Mineral Processing; was approved 02/02/89; OMB #2050-0098; expires 12/31/89.

EPA ICR #1463; Revision to the National Oil and Hazardous Substances Pollution Contingency Plan; was approved 01/30/89; OMB #2050-0096; expires 01/31/91.

EPA ICR #1487; Cooperative Agreements and Superfund State Contracts for Superfund Response Actions; was approved 01/30/89; OMB #2010-0020; expires 10/31/91.

EPA ICR #1398; National Residential Radon Survey Pretest; was aproved 01/26/89; OMB #2060-0173; expires 06/30/89.

EPA ICR #1082; NSPS Monitoring Requirements for Coal Preparation Plants Subpart Y; was approved 01/30/89; OMB #2060-0122; expires 01/31/92.

EPA ICR #0002.04; Pretreatment Program Information Requirements; was disapproved 01/26/89.

BILLING CODE 6560-50-M

**[OPP-66015; FRL-3531-5]**

## Chapman Chemical Co.; Notice of Intent to Cancel Registration

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of Intent to Cancel and Preliminary Determination Governing Sale and Use of Existing Stocks.

**SUMMARY:** By letter dated February 5, 1988, EPA directed Chapman Chemical Company ("Chapman") to supply to the Agency within 30 days a complete and accurate confidential statement of formula for the company's pesticide product ALDREC, bearing EPA Registration Number 1022-220. As of, February 21, 1989, Chapman has not complied with this directive. The Agency has determined that Chapman's continuing failure to submit a complete and accurate confidential statement of formula is in violation of section 3(c)(1)(E) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), and that the appropriate course of action is to cancel Chapman's ALDREC registration pursuant to FIFRA section 6(b). Accordingly, the Agency by this Notice announces its intention to cancel Chapman's registration for ALDREC. The Agency also has preliminarily determined not to permit sale and use of existing stocks of ALDREC if its registration is canceled.

**DATE:** A request for a hearing on cancellation or a request to modify preliminary determination governing existing stocks by a registrant must be received by April 3, 1989 or 30 days from receipt by mail of this Notice, whichever is the later applicable deadline. A request for a cancellation hearing or modification of the existing stocks determination from any other adversely affected person must be received by April 3, 1989. Any other person who wishes to comment on whether the Agency should allow sale or use of existing stocks of ALDREC should provide those comments by April 3, 1989.

**ADDRESS:** Three copies of any request for a hearing must be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

**FOR FURTHER INFORMATION CONTACT:** By mail: George LaRocca, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 204, CM #2, 1921 Jefferson Davis Highway, Arlington, VA (703-557-2400).

Requests for, or comments applicable to, an existing stocks allowance should be submitted to George LaRocca at the address above.

**SUPPLEMENTARY INFORMATION:** ALDREC is a termiticide product containing the active ingredient aldrin (chemical name: 1,2,3,4,10,10-hexachloro-1,4,4a,5,8,8a-hexahydro-exo-1,4-endo-5,8-dimethanonaphthalene; CAS Registry No. 309-00-2). Chapman Chemical Company (Chapman) received a registration from EPA for ALDREC in 1959. It is assumed that Chapman at one time acquired the aldrin for use in ALDREC from Shell Chemical Company, since the companies of the Royal Dutch Shell Group in the United States and Europe have been the sole producers of aldrin in the world from the time of its first registration as a pesticide in the 1950's. In recent years, Shell's pesticide registrations for aldrin products in the United States have been held by the Scallop Corporation (a Shell Group company); Scallop voluntarily canceled all of its aldrin registrations on May 15, 1987. The canceled Scallop registrations included the only aldrin product for manufacturing use (also called a technical grade product), which is used by formulator companies such as Chapman in making their own registered pesticide products. Chapman has never identified a new, registered source of supply of aldrin to the Agency, although required to do so under current law.

This Notice is organized into two parts. Part I describes the background and basis for the cancellation of Chapman's ALDREC registration. Part II describes the procedures which will be followed in implementing the regulatory actions set forth in this Notice.

### I. Basis For Cancellation

Under section 3(c)(1)(E) of FIFRA, applicants for registration are required to submit to EPA the complete formula of their pesticide products. For formulators, such as Chapman, who purchase a pesticidal ingredient from another registered source, EPA requires that the formulator include as part of its complete formula, the identity of the registered source of supply and the EPA registration number of that component of the formulator's product in order that EPA can ascertain the complete composition of the formulated product.

EPA first required an updated confidential statement of formula from Chapman as part of a Data Call-in Notice dated February 23, 1984. Chapman failed to provide the requested information. The Agency again requested by letter dated September 16, 1985, that Chapman provide the Agency with a complete formula for its ALDREC registration; once again, Chapman did not respond, and the registration was subsequently suspended pursuant to FIFRA section 3(c)(2)(B) on July 15, 1987. Finally, the Agency sent Chapman a letter dated February 5, 1988, in which the Agency once again required that Chapman submit, within 30 days, a complete and accurate confidential statement of formula to the Agency. In this last letter, the Agency pointed out that it considers an accurate and current statement of formula to be an important and continuing requirement of registration, and that Chapman's continuing failure to provide a complete and accurate statement of formula would constitute grounds for cancellation. As of February 21, 1989, Chapman has still not submitted an updated confidential statement of formula in response to the Agency's communications.

Under section 6(b) of FIFRA, the Administrator may issue a notice of intent to cancel any pesticide if, among other things, the "labeling or other material required to be submitted does not comply with the provisions of [FIFRA]." As noted, the Agency believes that registrants have a continuing obligation under section 3(c)(1)(E) to provide the Agency with the complete formula of their pesticide products. EPA is mandated by FIFRA to assess the risks and benefits of registered pesticides. EPA's ability to perform this assessment is at least partially dependant upon information being supplied by registrants. Compliance with the requirement to supply the Agency with an up-to-date statement of formula is a basic element of registration support required of registrants; failure to fully identify the ingredients in a pesticide product greatly hampers the Agency's ability to assess the risks and benefits associated with the product.

Chapman has been directed to supply the Agency with the complete formula of its ALDREC registration three times since 1984, and yet the Agency continues to lack a complete and accurate formula for ALDREC. Under the circumstances, cancellation is appropriate because Chapman has failed to provide material required to be submitted pursuant to FIFRA, and because material submitted does not comply with the provisions of the Act (since Chapman's statement of formula has not been properly updated).

Before taking any cancellation action under section 6(b), the Administrator must consider restricting a pesticide's use as an alternative to cancellation, and must further consider the effect of a cancellation upon the agricultural economy. This cancellation action is being taken because of the failure of Chapman to submit a complete and updated confidential statement of formula to the Agency, and not because of specific concerns about the safety of the use of ALDREC. Restricting the use of a pesticide pursuant to section 3(d) of FIFRA is not an appropriate response to the failure to provide the Agency with correct information required to be submitted under the Act.

As to the effect of a cancellation upon the agricultural economy, ALDREC is a termiticide product used for structural pest control; it is not an agricultural product. Further, the registration of ALDREC has been suspended under section 3(c)(2)(B) since July 1987, and it is not believed that there is any appreciable quantity of remaining existing stocks of ALDREC. Thus, cancellation action would not be likely to have any appreciable effect upon any sector of the economy, including the agricultural sector. Finally, it should be noted that the Agency frequently requires information from registrants in order to perform its regulatory responsibilities. Where a registrant fails to provide to the Agency even the most basic of information—the formula of its product—it would in most circumstances be inappropriate for the Agency to allow the registration to continue even if a cancellation would result in some hardship to the agricultural economy.

A draft of this Notice of Intent to Cancel the registration of ALDREC was sent to the Department of Agriculture (USDA) for their review as required by section 6(b) of FIFRA. The USDA had no objection to the proposed cancellation. The draft document was also sent to the FIFRA Scientific Advisory Panel for their review as required by section 25(d) of FIFRA. The Panel was asked to waive its review of the Notice since there was not risk data or scientific procedure at issue. The Panel granted a waiver of its review of the Notice.

Under section 6(a)(1) of FIFRA, the Administrator may permit the continued sale and use of existing stocks of pesticide products whose registrations have been canceled pursuant to section 6(b) to such extent, under such conditions, and for such uses as he or she may specify if he or she determines that such sale or use is not inconsistent with the purposes of FIFRA and will not have unreasonable adverse effects on the environment. EPA is not aware that there are any existing stocks of ALDREC. EPA also has questions concerning the feasibility of making the requisite finding for a pesticide product containing aldrin as the active ingredient (EPA has identified risk concerns associated with exposure to aldrin termiticides). At this time, EPA has not made a finding pursuant to section 6(a)(1) that would allow continued sale and use of ALDREC. Under such circumstances, no further sale nor use of ALDREC would be permitted upon cancellation pursuant to this Notice. It is therefore the Agency's preliminary determination that neither sale nor use of existing stocks of ALDREC will be allowed after cancellation of the ALDREC registration.

### II. Procedures

This Notice announces EPA's intent to cancel Chapman's ALDREC registration, and further provides preliminary notification that if ALDREC is canceled, the Agency proposes not to permit any further sale or use of ALDREC. This part of the Notice explains how the registrant or any other adversely affected person may request a hearing on whether ALDREC should be canceled or may request that the Agency allow the continued sale and use of existing stocks of ALDREC if the registration is canceled. It also invites any interested person to provide comments on whether the Agency should permit the continued sale and use of existing stocks of ALDREC if the registration is canceled.

#### *A. Request For Cancellation Hearing*

Under section 6(b) of FIFRA, registrants and other adversely affected persons are entitled to respond to this Notice by requesting a hearing on whether the registration for ALDREC should be canceled. Unless a hearing is properly requested, the cancellation will become final by operation of law either 30 days after this publication in the **Federal Register** or 30 days after Chapman receives a copy of this Notice, whichever occurs later.

To contest the cancellation action set forth in this Notice, the registrant may request a hearing within 30 days of receipt of this Notice, or within 30 days from publication of this Notice, whichever occurs later. Any other person adversely affected by the cancellation action set forth in this Notice may request a hearing within 30 days of publication of this Notice in the **Federal Register.**

A registrant or other adversely affected party who requests a hearing must file the request in accordance with the procedures established by FIFRA and EPA's Rules of Practice Governing Hearings under 40 CFR Part 164. These procedures require, among other things, that all requests must identify the specific product for which a hearing is requested, and that all requests must be received by the Hearing Cleak within the applicable 30-day period. Failure to comply with these requirements may result in denial of the request for a hearing. Requests for a hearing must also be accompanied by specific objections to the portions of this Notice that a party seeks to challenge.

Requests for a hearing must be submitted to the Hearing Clerk at the address specified earlier in this Notice. If a hearing on the action initiated by this Notice is requested in a timely and effective manner, the hearing will be governed by EPA's Rules of Practice for hearing under FIFRA section 6 (40 CFR Part 164). Any such hearing shall be held in the Washington, DC metropolitan area. If no hearing is requested by the end of the applicable 30-day period, the registration of ALDREC will be canceled by operation of law.

EPA's Rules of Practice forbid anyone who may take part in deciding this case, at any stage of the proceeding, from discussing the merits of the proceeding *ex parte* with any party or with any person who has been connected with the preparation or presentation of the proceeding as an advocate or in any investigative or expert capacity, or with any of their representatives (40 CFR 164.7).

Accordingly, the following EPA offices, and the staffs thereof, are designated as the judicial staff to perform the judicial function of EPA in any administrative hearing arising from this Notice of Intent to Cancel: the Office of the Administrative Law Judge, the Office of the Judicial Officer, the Administrator, and the Deputy Administrator. None of the persons designated as the judicial staff may have any *ex parte* communication on the merits of any of the issues involved in this proceeding with the trial staff or

BEST COPY AVAILABLE

VOL 54 ISS 40 MR 2 1989 UMI

any interested person not employed by EPA, without fully complying with the applicable regulations.

*B. Existing Stocks*

As noted above, the Administrator has made a preliminary determination that no sale or use of existing stocks of ALDREC should be permitted if the registration is canceled. If any person would like to challenge this preliminary determination and receive permission to sell or use existing stocks of ALDREC following cancellation, he or she must submit a request within 30 days of publication of this Notice to George LaRocca at the address listed earlier in this Notice under the heading "FOR FURTHER INFORMATION CONTACT."

Any such request should include information concerning the extent of existing stocks of ALDREC and should contain factual information sufficient to support a finding that continued sale or use of such stocks will not be inconsistent with the purposes of FIFRA and will not result in unreasonable adverse effects on the environment. Any person wishing to comment on whether continued sale or use of existing stocks of ALDREC should be permitted may also supply such comments within 30 days of publication of this Notice to the individual identified above.

If a timely request to allow sale or use of existing stocks is received and ALDREC's registration is canceled, the Agency will consider the request and make a final determination as to whether sale or use of existing stocks should be permitted. If no request is received within 30 days from publication of this Notice, the preliminary determination will become final upon cancellation of the registration for ALDREC, and no sale or use of existing stocks of ALDREC will be permitted after cancellation of the registration.

Dated: February 21, 1989.

## TSCA Chemical Testing; Receipt of Test Data

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This notice announces the receipt of test data on tetrabromobisphenol A (TBBPA) (CAS No. 79-94-7) and hexafluoropropene (CAS No. 139-15-4), submitted pursuant to final test rules under the Toxic Substances Control Act (TSCA). Publication of this notice is in compliance with section 4(d) of TSCA.

**FOR FURTHER INFORMATION CONTACT:** Michael M. Stahl, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. EB-44, 401 M St. SW., Washington, DC 20460 (202) 554-1404, TDD (202) 554-0551.

**SUPPLEMENTARY INFORMATION:** Section 4(d) of TSCA requires EPA to publish a notice in the **Federal Register** reporting the receipt of test data submitted pursuant to test rules promulgated under section 4(a) within 15 days after it is received.

### I. Test Data Submissions

Test data for TBBPA were submitted by Great Lakes Chemical Corporation pursuant to a test rule at 40 CFR 799.4000. It was received by EPA on February 6, 1989. The submissions describe 1) the determination of the biodegradability of TBBPA in soil under aerobic conditions and 2) the determination of the biodegradability of TBBPA in soil under anaerobic conditions. Chemical fate testing is required by this test rule. Tetrabromobisphenol A is used primarily as a reactive flame retardant, and, to a lesser extent, as an additive flame retardant.

Test data for hexafluoropropene was submitted by the Chemical Manufacturers Association on behalf of E.I. du Pont de Nemours and Company pursuant to a test rule at 40 CFR 799.1700. It was received by EPA on January 23, 1989. The submission describes a ninety-day inhalation toxicity study in rats and mice with hexafluoropropene. Subchronic toxicity testing is required by this test rule. Hexafluoropropene is used as a precursor in the manufacture of highly specialized polymers and elastomers.

EPA has initiated its review and evaluation process for these data submissions. At this time, the Agency is unable to provide any determination as to the completeness of the submissions.

### II. Public Record

EPA has established a public record for this TSCA section 4(d) receipt of data notice (docket number OPTS-44526). This record includes copies of all studies reported in this notice. The record is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in the TSCA Public Docket Office, Rm. NE-G004, 401 M St. SW., Washington, DC 20460.

Authority: 15 U.S.C. 2603.

Dated: February 22, 1989.

## Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984 (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. Notices for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of four such PMN(s) and provides a summary of each.

**DATES:** Close of Review Periods:

Y 89-63, 89-65, 89-66, 89-67, March 6, 1989.

**FOR FURTHER INFORMATION CONTACT:** Michael M. Stahl, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. EB-44, 401 M Street SW., Washington, DC 20460, (202) 554-1404, TDD (202) 554-0551.

**SUPPLEMENTARY INFORMATION:** The following notice contains information extracted from the nonconfidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete nonconfidential document is available in the Public Reading Room NE-G004 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

## FEDERAL COMMUNICATIONS COMMISSION

### Public Information Collection Requirements Submitted to the Office of Management and Budget for Review

February 22, 1989.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, 44 U.S.C. 3507.

Copies of these submissions may be purchased from the Commission's duplicating contractor, International Transcription Service, 2100 M Street, NW., Suite 140, Washington, DC 20037, or telephone (202) 857-3815. Persons wishing to comment on an information collection should contact Eyvette Flynn, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, telephone (202) 395-3785. Copies of these comments should also be sent to the Commission. For further information contact Doris Benz, Federal Communications Commission, telephone (202) 632-7513.

OMB No.: 3060-0040

*Title:* Application for Aircraft Radio Station License and Temporary Aircraft Radio Station Operating Authority

*Form No.:* FCC 404/404-A

*Action:* Extension

*Respondents:* Individuals, State or local governments, Business (including small business), and Non-profit institutions

*Frequency of Response:* On occasion

*Estimated Annual Burden:* 25,668 Respondents, ten minutes each

*Needs and Uses:* Filing is required for a new station license, or renewal or modification of an existing license. Applicants for a new license may operate the aircraft radio station for 90 days under the temporary authority provided for on FCC 404-A. The data on the FCC 404 is used to determine the applicant's eligibility and to issue a license.

*OMB No.:* 3060-0136

*Title:* Temporary Permit to Operate a General Mobile Radio Service System

*Form No.:* FCC 574-T

*Action:* Extension

*Respondents:* Individuals, State or local governments, Business (including small business), and Non-profit institutions

*Frequency of Response:* Recordkeeping requirement

*Estimated Annual Burden:* 1,500 Recordkeepers, six minutes each

VOL 54 ISS 40 MR 2 1989 UMI

*Needs and Uses:* Eligible applicants for new or modified radio stations in the GMRS complete the form for immediate authorization to operate the radio station (valid for 180 days), and retain it during the processing of an application for license grant.

*OMB No.:* 3060-0139

*Title:* Request for Approval of Proposed Amateur Radio Antenna and Notification of Action

*Form No.:* FCC 854

*Action:* Extension

*Respondents:* Individuals

*Frequency of Response:* On occasion

*Estimated Annual Burden:* 250 Respondents, 30 minutes each

*Needs and Uses:* Submission of the data is necessary to determine whether the antenna height requested would be a hazard to air navigation, and whether painting and/or lighting of the antenna is required.

Federal Communications Commission.

Donna R. Searcy,

*Secretary.*

[MM Docket No. 89-27; FCC 89-18]

**Applications, Hearings, Determinations, etc.: Great American Radio Corp.**

**AGENCY:** Federal Communications Commission.

**ACTION:** Order to show cause and notice of apparent liability.

**SUMMARY:** This action is an Order to Show Cause to determine if Great American Radio Corp., licensee of Radio Station KCKO(AM), Spokane, Washington, violated §§ 73.1740(a)(4) and 73.1750 of the Commission's Rules by remaining silent without authority, and if so, whether the license for that station should be revoked.

**EFFECTIVE DATE:** February 15, 1989.

**ADDRESS:** Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Ben Halprin, Enforcement Division, Mass Media Bureau, (202) 632-3660.

### Order to Show Cause and Notice of Apparent Liability

In the Matter of: Great American Radio Corp., Spokane, Washington; Licensee of Radio Station KCKO(AM), Spokane, Washington; Order to Show Cause Why the License of Station KCKO(AM), Spokane, Washington, Should Not Be Revoked.

Adopted: January 19, 1989.

Released: February 15, 1989.

By the Commission:

1. The Commission has before it for consideration: (a) the license of Great American Radio Corp., for Radio Station KCKO(AM), Spokane, Washington; and, (b) the results of the Commission's investigation into KCKO's unauthorized silent status.

2. On May 13, 1985, the Commission granted KCKO permission to remain silent until August 15, 1985. After that permission expired, attempts to contact KCKO by mail resulted in return of Commission correspondence marked "unclaimed." Commission personnel, thereafter, attempted inspection and monitoring to ascertain the station's status. Monitoring during the week of March 23, 1987, revealed that the station was not operating. An attempt to inspect the station at its studio's last known address, N. 2804 Argonne Road in Spokane, WA, on March 23, 1987, was unsuccessful. The studio was vacant and locked, with a "For Rent" sign in front. A visit to the transmitter site did not reveal any evidence of a radio transmitter building or antenna towers. Subsequent to the attempted monitoring and inspection, the Commission sent a letter of inquiry to the licensee. The letter, dated June 13, 1988, was returned stamped: "Return to Sender—Attempted Not Known." [1] Thus, it appears that the station has not resumed operation since August 15, 1985. Furthermore, the licensee has neither requested Commission permission to remain off the air since its silent authority expired on August 15, 1985, nor turned in its license, in apparent violation of §§ 73.1740(a)(4) and 73.1750 of the Commission's Rules.[2]

[1] Section 1.5 of the Commission's Rules requires that the licensee keep the Commission informed of any change in its mailing address.

[2] Section 73.1740(a)(4) provides:

In the event that causes beyond the control of a licensee make it impossible to adhere to the operating schedule of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 30 days without further authority from the FCC. Notification must be sent to the FCC in Washington, DC not later than the 10th day of limited or discontinued operation. During such period, the licensee shall continue to adhere to the requirements in the station license pertaining to the lighting of antenna structures. In the event normal operation is restored prior to the expiration of the 30 day period, the licensee will so notify the FCC of this date. If the causes beyond the control of the licensee make it impossible to comply within the allowed period, informal written request shall be made to the FCC no later than the 30th day for such additional time as may be deemed necessary.

Section 73.1750 provides:

The licensee of each station shall notify the FCC in Washington, DC of permanent discontinuance of operation at least two days before operation is discontinued. Immediately after discontinuance of operation, the licensee shall forward the station license and other instruments of authorization to the FCC, Washington, DC for cancellation.

3. Accordingly, *it is ordered,* That pursuant to section 312(a) (3) and (4) of the Communications Act of 1934, as amended, Great American Radio Corp. is directed to show cause why the license for Radio Station KCKO(AM), Spokane, WA, should not be revoked, at a hearing to be held at a time and location specified in a subsequent Order, upon the following issues:

(a) To determine whether Great American Radio Corp. violated §§ 73.1740(a)(4) and/or 73.1750 of the Commission's Rules.

(b) To determine, in light of the evidence adduced under the foregoing issue, whether Great American Radio Corp. possesses the requisite qualifications to be or remain licensee of the captioned radio station.

4. *It is further ordered,* That the Chief, Mass Media Bureau, is directed to serve upon Great American Radio Corp., within thirty (30) days of the release of this Order, a Bill of Particulars with respect to issues (a) and (b) above.

5. *It is further ordered,* That pursuant to section 312(d) of the Communications Act of 1934, as amended, both the burden of proceeding with the evidence and the burden of proof shall be upon the Mass Media Bureau as to both issues.

6. *It is further ordered,* That to avail itself of the opportunity to be heard, the licensee, pursuant to § 1.91(c) of the Commission's Rules, in person or by attorney, shall file with the Commission within thirty (30) days of the receipt of the Order to Show Cause a written appearance stating that it will appear at the hearing and present evidence on the matters specified in the Order. If the licensee fails to file an appearance within the time specified, the right to a hearing shall be deemed to have been waived. Where a hearing is waived, a written statement in mitigation or justification may be submitted within thirty (30) days of the receipt of the Order to Show Cause. *See* § 1.92(a) of the Commission's Rules. In the event the right to a hearing is waived, the presiding officer, or the Chief Administrative Law Judge if no presiding officer has been designated, will terminate the hearing proceeding and certify the case to the Commission in the regular course of business and an appropriate Order will be entered. *See* § 1.92 (c) and (d) of the Commission's Rules.[3]

[3] The Commission has recently delegated authority for cases such as this to the Mass Media Bureau. *See In the Matter of Radio Northwest Broadcasting Company,* MM Docket 88-107, Adopted December 8, 1988.

7. *It is further ordered,* That if it is determined that the hearing record does not warrant an Order revoking the license for Station KCKO(AM), Spokane, WA, it shall be determined, pursuant to section 503(b) of the Communications Act of 1934, as amended, whether an order for forfeiture shall be issued against Great American Radio Corp. in an amount not exceeding twenty thousand dollars ($20,000) for the willful and repeated violation of §§ 73.1740 and/or 73.1750 of the Commission's Rules.

8. *It is further ordered,* That this document constitutes a notice of apparent liability for willful or repeated violation of §§ 73.1740 and/or 73.1750 of the Commission's Rules. The Commission has determined that in every case designated for hearing involving the potential revocation of a station license, it shall, as a matter of course, include a forfeiture notice so as to maintain the fullest possible flexibility of action. Since the practice of including such forfeiture notice is a routine procedure, such inclusion herein should not be viewed in any manner as suggesting or otherwise indicating what the initial or final disposition of this proceeding should be.

9. *It is further ordered,* That the Chief, Mass Media Bureau, send a copy of this Order by *Certified Mail-Return Receipt Requested,* to: Great American Radio Corp., Radio Station KCKO(AM), N. 2804 Argonne Road, Spokane, WA 99206.

Federal Communications Commission.

Donna R. Searcy,

*Secretary.*

BILLING CODE 6712-01-M

---

[MM Docket No. 89-28; FCC 89-11]

**Applications, Hearings, Determinations, etc.; Mega Broadcasting Corp.**

**AGENCY:** Federal Communications Commission.

**ACTION:** Order to show cause and notice of apparent liability.

**SUMMARY:** This action is an Order to Show Cause to determine if Mega Broadcasting Corp., licensee of Radio Station WRPZ(AM), Paris, Kentucky, violated §§ 73.1740(a)(4) and 73.1750 of the Commission's Rules by remaining silent without authority, and if so, whether the license for that station should be revoked.

**EFFECTIVE DATE:** February 15, 1989.

**ADDRESS:** Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Ben Halprin, Enforcement Division, Mass Media Bureau, (202) 632-3660.

### Order to Show Cause and Notice of Apparent Liability

In the Matter of: Mega Broadcasting Corp., Paris, Kentucky; Licensee of Radio Station WRPZ(AM), Paris, Kentucky; Order to Show Cause Why the License of Station WRPZ(AM), Paris, Kentucky, Should Not Be Revoked.

Adopted: January 19, 1989.

Released: February 15, 1989.

By the Commission:

1. The Commission has before it for consideration: (a) the license of Mega Broadcasting Corp. for Radio Station WRPZ(AM), Paris, Kentucky; and, (b) the results of its investigation into WRPZ's unauthorized silent status.

2. On November 20, 1987, the Commission received a complaint alleging that WRPZ(AM) had not broadcast programming since October 11, 1987. Investigation by Commission personnel determined that the station had definitely ceased operation by the end of November 1987. Monitoring by Commission staff during the week of May 23, 1988, indicated that the station remained non-operational. Subsequent to the attempted monitoring, the Commission sent a letter of inquiry to the licensee at the address that appeared in Commission records. The letter, dated June 17, 1988, was returned stamped: "Return to Sender. No Forwarding Order on File." [1] Thus, it appears that the station has not resumed operation since at least November 1987. Furthermore, the licensee has neither requested Commission permission to remain off the air nor turned in its license, in apparent violation of §§ 73.1740(a)(4) and 73.1750 of the Commission's Rules.[2]

[1] Section 1.5 of the Commission's Rules requires that the licensee keep the Commission informed of any change in its mailing address.

[2] Section 73.1740(a)(4) provides:

In the event that causes beyond the control of a licensee make it impossible to adhere to the operating schedule of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 30 days without further authority from the FCC. Notification must be sent to the FCC in Washington, DC not later than the 10th day of limited or discontinued operation. During such period, the licensee shall continue to adhere to the requirements in the station license pertaining to the lighting of antenna structures. In the event normal operation is restored prior to the expiration of the 30 day period, the licensee will so notify the FCC of this date. If the causes beyond the control of the licensee make it impossible to comply within the allowed period, informal written request shall be made to the FCC no later than the 30th day for such additional time as may be deemed necessary.

Section 73.1750 provides:

The licensee of each station shall notify the FCC in Washington, DC of permanent discontinuance of operation at least two days before operation is discontinued. Immediately after discontinuance of operation, the licensee shall forward the station license and other instruments of authorization to the FCC, Washington, DC for cancellation.

3. Accordingly, *it is ordered,* That pursuant to section 312(a) (3) and (4) of the Communications Act of 1934, as amended, Mega Broadcasting Corp. is directed to show cause why the license for Radio Station WRPZ(AM), Paris, KY, should not be revoked, at a hearing to be held at a time and location specified in a subsequent Order, upon the following issues:

(a) To determine whether Mega Broadcasting Corp. violated §§ 73.1740(a)(4) and/or 73.1750 of the Commission's Rules.

(b) To determine, in light of the evidence adduced under the foregoing issue, whether Mega Broadcasting Corp. possesses the requisite qualifications to be or remain licensee of the captioned radio station.

4. *It is further ordered,* That the Chief, Mass Media Bureau, is directed to serve upon Mega Broadcasting Corp., within thirty (30) days of the release of this Order, a Bill of Particulars with respect to issues (a) and (b) above.

5. *It is further ordered,* That pursuant to section 312(d) of the Communications Act of 1934, as amended, both the burden of proceeding with the evidence and the burden of proof shall be upon the Mass Media Bureau as to both issues.

6. *It is further ordered,* That to avail itself of the opportunity to be heard, the licensee, pursuant to § 1.91(c) of the Commission's Rules, in person or by attorney, shall file with the Commission within thirty (30) days of the receipt of the Order to Show Cause a written appearance stating that it will appear at the hearing and present evidence on the matters specified in the Order. If the licensee fails to file an appearance within the time specified, the right to a hearing shall be deemed to have been waived. Where a hearing is waived, a written statement in mitigation or justification may be submitted within thirty (30) days of the receipt of the Order to Show Cause. *See* §1.92(a) of the Commission's Rules. In the event the right to a hearing is waived, the presiding officer, or the Chief Administrative Law Judge if no presiding officer has been designated, will terminate the hearing proceeding and certify the case to the Commission in the regular course of business and an appropriate Order will be entered. *See*

The licensee of each station shall notify the FCC in Washington, DC of permanent discontinuance of operation at least two days before operation is discontinued. Immediately after discontinuance of operation, the licensee shall forward the station license and other instruments of authorization to the FCC, Washington, DC for cancellation.

VOL 54 ISS 40 MR 2 1989 UMI

§ 1.92(c) and (d) of the Commission's Rules.

7. *It is further ordered,* That if it is determined that the hearing record does not warrant an Order revoking the license for Station WRPZ(AM), Paris, KY, it shall be determined, pursuant to section 503(b) of the Communications Act of 1934, as amended, whether an Order for Forfeiture shall be issued against Mega Broadcasting Corp. in an amount not exceeding twenty thousand dollars ($20,000.00) for the willful and repeated violation of §§ 73.1740 and/or 73.1750 of the Commission's Rules.

8. *It is further ordered,* That this document constitutes a notice of apparent liability for willful or repeated violation of §§ 73.1740 and/or 73.1750 of the Commission's Rules. The Commission has determined that in every case designated for hearing involving the potential revocation of a station license, it shall, as a matter of course, include a forfeiture notice so as to maintain the fullest possible flexibility of action. Since the practice of including such forfeiture notice is a routine procedure, such inclusion herein should not be viewed in any manner as suggesting or otherwise indicating what the initial or final disposition of this proceeding should be.

9. *It is further ordered,* That the Secretary send a copy of this Order by *Certified Mail-Return Receipt Requested,* to: Mega Broadcasting Corp., Radio Station WRPZ(AM), 525 High Street, No. 204, Paris, KY 40078.

Federal Communications Commission.

[MM Docket No. 89-81; FCC 89-304]

## Order to Show Cause; Jack E. Ondracek

**AGENCY:** Federal Communications Commission.

**ACTION:** Order to show cause and notice of apparent liability.

**SUMMARY:** This action is an Order to Show Cause to determine if Jack E. Ondracek, licensee of Radio Station KRGL(AM), Myrtle Creek, Oregon, violated §§ 73.1740(a)(4) and 73.1750 of the Commission's Rules by remaining silent without authority, and if so, whether the license for that station should be revoked.

**EFFECTIVE DATE:** January 25, 1989.

**ADDRESS:** Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Ben Halprin, Enforcement Division, Mass Media Bureau, (202) 632-3660.

### Order to Show Cause and Notice of Apparent Liability

Adopted: December 2, 1988.

Released: January 25, 1989.

By the Commission:

1. The Commission has before it for consideration: (a) The license of Jack E. Ondracek, for Radio Station KRGL(AM), Myrtle Creek, Oregon; and, (b) the results of its investigation into KRGL's unauthorized silent status.

2. In September 1988, the Commission received information indicating that the captioned licensee had ceased operation of KRGL in mid-March 1988. Commission personnel visited the site on November 17, 1988, and found it abandoned. The Commission sent a letter of inquiry to the licensee at the address that appeared in Commission records. The letter, postmarked July 15, 1987, was returned stamped: "Return to Sender-Box Closed." [1] Commission personnel revisited the site on March 10, 1988, and again found it abandoned. Thus, it appears that the station has not resumed operation since it left the air in March 1988. Furthermore, the licensee has neither requested Commission permission to remain off the air nor turned in its license, in apparent violation of §§ 73.1740(a)(4) and 73.1750 of the Commission's Rules.[2]

3. Accordingly, *It Is Ordered,* That pursuant to section 312(a) (3) and (4) of the Communications Act of 1934, as amended, Jack E. Ondracek is *Directed to Show Cause* why the license for Radio Station KRGL(AM) Myrtle Creek, Oregon, should not be *Revoked,* at a hearing to be held at a time and location specified in a subsequent Order, upon the following issue:

(a) To determine whether Jack E. Ondracek violated §§ 73.1740(a)(4) and/or 73.1750 of the Commission's Rules.

(b) To determine, in light of the evidence adduced under the foregoing issue, whether Jack E. Ondracek possesses the requisite qualifications to be or remain licensee of the captioned radio station.

4. *It is Further Ordered,* That the Chief, Mass Media Bureau, is directed to serve upon Jack E. Ondracek, within thirty (30) days of the release of this Order, a Bill of Particulars with respect to issues (a) and (b) above.

5. *It is Further Ordered,* That pursuant to section 312(d) of the Communications Act of 1934, as amended, both the burden of proceeding with the evidence and the burden of proof shall be upon the Mass Media Bureau as to both issues.

6. *It is Further Ordered,* That to avail itself of the opportunity to be heard, the licensee, pursuant to § 1.91(c) of the Commission's Rules, in person or by attorney, shall file with the Commission within thirty (30) days of the receipt of the Order to Show Cause a written appearance stating that it will appear at the hearing and present evidence on the matters specified in the Order. If the licensee fails to file an appearance within the time specified, the right to a hearing shall be deemed to have been waived. Where a hearing is waived, a written statement in mitigation or justification may be submitted within thirty (30) days of the receipt of the Order to Show Cause. *See* § 1.92(a) of the Commission's Rules. In the event the right to a hearing is waived, the presiding officer, or the Chief Administrative Judge if no presiding officer has been designated, will terminate the hearing proceeding and certify the case to the Commission in the regular course of business and an appropriate Order will be entered. *See* § 1.92 (c) and (d) of the Commission's Rules.

7. *It is Further Ordered,* That if it is determined that the hearing record does not warrant an Order revoking the license for Station KRGL(AM), Myrtle Creek, OR, it shall be determined, pursuant to section 503(b) of the Communications Act of 1934, as amended, whether an *Order for Forfeiture* shall be issued against Jack E. Ondracek in an amount not exceeding twenty thousand dollars ($20,000.00) for the willful and repeated violation of Sections 73.1740 and/or 73.1750 of the Commission's Rules.

8. *It is Further Ordered,* That this document constitutes a *Notice of Apparent Liability* for willful or repeated violation of §§ 73.1740 and/or 73.1750 of the Commission's Rules. The Commission has determined that in every case designated for hearing involving the potential revocation of a station license, it shall, as a matter of course, include forfeiture notice so as to maintain the fullest possible flexibility of action. Since the practice of including such forfeiture notice is a routine procedure, such inclusion herein should not be viewed in any manner as suggesting or otherwise indicating what the initial or final disposition of this proceeding should be.

9. *It is Further Ordered,* That the Chief, Mass Media Bureau, send a copy of this Order by *Certified Mail-Return Receipt Requested,* to: Jack E. Ondracek, Radio Station KRGL(AM), P.O. Box 6001, Myrtle Creek, OR 97457.

Federal Communications Commission.

BILLING CODE 6712-01-M

[1] Section 1.5 of the Commission's Rules requires that the licensee keep the Commission informed of any changes in its mailing address.

[2] Section 73.1740(a)(4) provides:

In the event that causes beyond the control of a licensee make it impossible to adhere to the operating schedule of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 30 days without further authority from the FCC. Notification must be sent to the FCC in Washington, DC not later than the 10th day of limited or discontinued operation. During such period, the licensee shall continue to adhere to the requirements in the station license pertaining to the lighting of antenna structures. In the event normal operation is restored prior to the expiration of the 30 day period, the licensee will so notify the FCC of this date. If the causes beyond the control of the licensee make it impossible to comply within the allowed period, informal written request shall be made to the FCC no later than the 30th day for each additional time as may be deemed necessary.

Section 73.1750 provides:

The licensee of each station shall notify the FCC in Washington, DC of permanent discontinuance of operation at least two days before operation is discontinued. Immediately after discontinuance of operation, the licensee shall forward the station license and other instruments of authorization to the FCC, Washington, DC for cancellation.

## FEDERAL DEPOSIT INSURANCE CORPORATION

### Information Collection Submitted to OMB for Review

**AGENCY:** Federal Deposit Insurance Corporation.

**ACTION:** Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act.

**SUMMARY:** The submission is summarized as follows.

*Type of Review:* Renewal without any change.

*Title:* Application for a Bank to (1) Establish a Branch, (2) Move its Main Office or Branch, and (3) Establish a Remote Service Facility.

*Form Number:* None (letter application).

*OMB Number:* 3064-0070.

*Expiration Date of Current OMB Clearance:* May 31, 1989.

*Frequency of Response:* On occasion.

*Respondents:* Insured State nonmember banks applying for FDIC consent to establish branches, move main offices or branches, or establish remote service facilities.

*Number of Respondents:* 1,253.

*Number of Responses Per Respondent:* 1.

*Total Annual Responses:* 1,253.

*Average Number of Hours Per Response:* 7.

*Total Annual Burden Hours:* 8,771.

*OMB Reviewer:* Gary Waxmen, (202) 395-7340, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

*FDIC Contact:* John Keiper, (202) 898-3810, Assistant Executive Secretary, Room 6096, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

*Comments:* Comments on this collection of information are welcome and should be submitted on or before May 1, 1989.

**ADDRESSES:** A copy of the submission may be obtained by calling or writing the FDIC contact listed. Comments regarding the submission should be addressed to the OMB reviewer listed. The FDIC would be interested in receiving a copy of the comments.

**SUPPLEMENTARY INFORMATION:** The FDIC is requesting OMB approval to extend the clearance of the information collection pertaining to the application, by insured State nonmember banks, to obtain FDIC's consent to establish branches, move main offices or branches, or establish remote service facilities. The applicant is required to furnish information, in letter form, about the location of the proposed site, the involvement of bank insiders in the proposal, the impact of the proposal on the environment and compliance with local zoning laws, historic preservation considerations, community services considerations, and evidence of public notice of the proposal. The information furnished by the applicant is used by the FDIC as a basis for evaluating the factors required by statute (12 U.S.C. 1828(d) and 1816) before approving the application.

Dated: February 24, 1989.

Federal Deposit Insurance Corporation.

## FEDERAL MARITIME COMMISSION

### Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

*Agreement No.:* 202-010987-008

*Title:* United States/Central America Liner Association

*Parties:* Crowley Caribbean Transport, Inc., Sea-Land Service, Inc., Seaboard Marine Ltd., Crowley Trailer Marine Transport, Corp.

*Synopsis:* The proposed modification would permit the parties to charter space to each other on vessels owned or operated by them.

By Order of the Federal Maritime Commission.

Dated: February 27, 1989.

Joseph C. Polking,

*Secretary.*

BILLING CODE 6730-01-M

[Docket No. 89-02]

### Matson Navigation Co., Inc.; Transportation of Cargoes Between Ports and Points Outside Hawaii and Islands Within the State of Hawaii; Enlargement of Time to Reply

This proceeding was initiated by Petition for Declaratory Order ("Petition") filed by Matson Navigation Company, Inc. Replies to the Petition currently are due March 1, 1989.

Young Brothers, Ltd., now has filed a motion for a stay of the proceeding pending a decision by the State of Hawaii Public Utilities Commission regarding a related complaint action brought by Young Brothers against Matson Navigation Company, Inc. In the cover letter accompanying the Motion, Young Brothers requests an extension until May 1, 1989, to file a reply to Matson's Petition should the Commission determine not to grant the request for a stay.

The Commission has determined that in order to allow time for filing of replies to the motion for stay and for Commission consideration of the motion and of the alternative request for extension of time, a short extention of time for filing replies to the Petition for Declaratory Order is appropriate. Accordingly, time for filing such replies is enlarged to March 24, 1989.

By the Commission.

Joseph C. Polking,

*Secretary.*

## FEDERAL RESERVE SYSTEM

[Docket No. R-0661]

### Risk on Automated Clearing House Transactions

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Request for comment.

**SUMMARY:** The Board of Governors of the Federal Reserve System ("Board") is proposing several changes in the way that Federal Reserve Banks treat automated clearing house ("ACH") transactions. These changes are intended as additional steps in implementing the risk reduction policy adopted by the Board in May, 1985. (*See*, policy statement, "Reducing Risks on Large-Dollar Electronic Funds Transfer Systems," 50 FR 21120, May 22, 1985.) The changes proposed includue:

- Granting finality to receivers of ACH credit transactions at 6:30 p.m. local time on the settlement day;
- Treating credits given to originators of ACH debit transactions as final payments at 10:00 a.m. local time on the business date following the settlement day;
- Advising depository institutions with on-line connections to Fedwire that payments are being reversed by the time set for finality of ACH payments;
- Endeavoring to advise off-line institutions by telephone that payments are being reversed;
- Reserving the right to debit the reserve/clearing accounts of depository institutions originating ACH credit transactions at any time during the settlement day; and
- Granting credit for debit item adjustments only when the Reserve Banks can recover credit from the originating depository institution.

**DATE:** Comments must be received by April 3, 1989.

**ADDRESS:** Comments, which should refer to Docket No. R-0661, may be mailed to the Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, NW., Washington, DC 20551, to the attention of Mr. William W. Wiles, Secretary, or delivered to room B-2223 between 8:45 a.m. and 5:15 p.m. Comments may be inspected in room B-1122 between 9:00 a.m. and 5:00 p.m., except as provided in § 261.8 of the Board's Rules Regarding Availability of Information, 12 CFR 261.8.

**FOR FURTHER INFORMATION CONTACT:** Florence Young, Adviser, Division of Federal Reserve Bank Operations (202/452-3955); Oliver I. Ireland, Associate General Counsel (202/452-3625), or Elaine M. Boutilier, Senior Attorney, Legal Division (202/452-2418), Board of Governors of the Federal Reserve System, Washington, DC 20551. For the hearing impaired *only*, Telecommunications Devise for the Deaf ("TDD"), Earnestine Hill or Dorothea Thompson (202/452-3544).

**SUPPLEMENTARY INFORMATION:**

### Background

Two types of payments flow over the ACH mechanism—credit transactions and debit transactions. In the case of ACH credit transactions, funds flow from the originator of the payment to the receiver. The majority of ACH credit payments are payroll, pension, or annuity payments. In the case of ACH debit transactions, funds flow from the receiver to the originator. The majority of ACH debit transactions are used to collect insurance premiums, bill payments, and mortgage loan payments. In addition, ACH debit transactions are used for cash concentration purposes, that is, to draw down balances from the accounts of affiliates or subsidiaries located throughout the country, and they account for the largest proportion of the dollar value of ACH transactions.

The ACH is a value-dated mechanism. Transactions may be originated one or two days before the settlement date and may be processed on one of the two operating cycles—a day or a night cycle. All ACH transactions are provisional

payments. The Reserve Banks currently reserve the right to reverse credits given to receivers of ACH credit transactions until the entries are posted on the settlement day, and credit given for debit transactions may currently be reversed by a Reserve Bank until the opening of business on the day following settlement. In addition, institutions receiving debit transactions have the right to return them.

### Previous Proposal and Comments

In December 1986, the Board requested comments on the following proposals (Docket No. R-0591, 51 FR 45043, December 16, 1986):

- To provide finality to receivers of ACH credit transactions amounting to $5,000 or less at 1:00 p.m. local time on the settlement date;
- To provide finality to receivers of ACH credit transactions amounting to more than $5,000 when the Reserve Banks have received actually and finally collected funds;
- to notify receivers of ACH credit transactions if payments were reversed before the time of finality on a "best efforts" basis; and
- to retain the right to reverse ACH debit transactions at any time until the Reserve Bank has received actually and finally collected funds.

The Board received 112 comments on these proposals. The majority of commenters opposed the proposals. In the case of the proposals concerning ACH credit transactions, commenters stated that there was no good reason to distinguish between small and large-dollar credit transactions, that the dollar amounts proposed were arbitrary, and that finality should be granted at a specific time for all ACH credit transactions. Eighty-five percent of the commenters believed that small-dollar credit transactions should be treated as final at the opening of business on the settlement day. All commenters believed that a specific time should be set for the finality of large-dollar credit transactions, and more than 50 percent believed that all ACH credit transactions should be treated as final at the opening of business on the settlement day.

Commenters believed that delaying finality for ACH credit transactions amounting to $5,000 or more and ACH debit transactions until the Reserve Banks had received actually and finally collected funds would add substantially to the risk of participating institutions and their customers. They indicated that the increased uncertainty resulting from adoption of this proposal would reduce the attractiveness of the ACH mechanism. A majority of commenters argued that finality should be granted at a specific time and indicated that they would prefer that the same time be designated for both debit and credit transactions.

If the Reserve Banks were to grant finality for all ACH credit transactions at the opening of business on the settlement day, as many commenters on the 1986 proposal suggested, the credit exposure currently faced by receiving institutions would be eliminated. The Reserve Banks' risk, however, would be substantially increased because they would not be able to reverse any payments on the settlement day without regard to whether the originating institution had sufficient funds in its account to cover the payments.

The Board believes that no distinction should be made concerning the finality accorded large and small-dollar ACH credit transactions. While commenters would prefer that finality be granted at the opening of business on the settlement day, the Board believes that the risk faced by the Reserve Banks is too great to adopt this proposal. In order to balance the risk faced by the Reserve Banks with that faced by receiving institutions, the Board believes that finality for ACH credit transactions should be granted at 6:30 p.m. local time, a time late enough on the settlement day to permit the Reserve Banks to recover some funds, if it is determined that an originator is unable to cover the payments that it has originated.

With regard to the proposal to treat credits given for ACH debit transactions as final only after they had received actually and finally collected funds, the majority of commenters opposed this proposal. They indicated that a specific time should be adopted after which a Reserve Bank would not reverse credits given for ACH debit transactions.

The Reserve Banks' risk would not differ substantially under the terms of the current operating circular or the proposal published for comment in 1986. To provide greater certainty for depository institutions, the Board proposes to treat credits given to originators of ACH debit transactions as final at 10:00 a.m. local time on the business day following the settlement day.

### Discussion

Three issues have been considered in the timing of finality for ACH credit transactions: (1) Current practices and customs; (2) the credit exposure faced by the Federal Reserve and by depository institutions; and (3) the potential that changes in the treatment of finality for ACH transactions may result in shifts in the use of payment mechanisms.

*Current Practices*—The Reserve Banks' ACH operating circular currently indicates that credit given to receivers of ACH credit transactions is available for use on the settlement day. At the same time, the Reserve Banks reserve the right not to settle for an item after notice of the suspension or closing of the originator or the receiver is received.[1] In addition, the Reserve Banks may cease acting on or settling for a credit item if a Reserve Bank judges that there may not be sufficient funds in the originator's account on the settlement day to cover the item.[2] Based on these provisions, the Reserve Banks have the right to reverse credit transactions until all transactions affecting reserve or clearing accounts have been posted on the settlement day. Further, Reserve Banks are not obligated to notify depository institutions before transactions are reversed although notices would typically be provided the business day following the reversal of transactions.
